**A CUMULATIVE INDEX
TO
A CONTINUING BIBLIOGRAPHY ON

AERONAUTICAL ENGINEERING**

This Cumulative Index supersedes the indexes contained in supplements [SP-7037(236) through SP-7037(247)] published by NASA during 1989.

National Aeronautics and Space Administration
Office of Management
Scientific and Technical Information Division
Washington, DC

1990

This index is available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 on standing order subscription as PB89-914100 at the price of \$16.50 domestic; \$33.00 foreign.

INTRODUCTION

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037(236) through NASA SP-7037(247) of *Aeronautical Engineering: A Continuing Bibliography*. NASA SP-7037, and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their *STAR* accession numbers (N89-10000).
2. AIAA entries by their *IAA* accession numbers (A89-10000 series).

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject, personal author, corporate source, foreign technology, contract number, report number, and accession number index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

AIRCRAFT PROTUBERANCES

U PROTUBERANCES

FLIGHT PERFORMANCE

U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

FLOW RESISTANCE

NT AERODYNAMIC DRAG

NT FRICTION DRAG

NT SUPERSONIC DRAG

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items; this is because subject terms may include documents on different aspects of the same subject term. For example:

AIRLINE OPERATIONS

All-weather operations, including pilot role, instrument landing systems and guidance aids.

Airport congestion as constraint on air travel, considering runway capacity and adjusted demand.

HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching on the index for variants of an author's name. For example:

EMELIANOV, M. D.

and

YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV. (Source citation entry)

BOEING CO., SEATTLE, WASH. (Source index entry)

HOW TO USE THE FOREIGN TECHNOLOGY INDEX

The foreign technology index identifies research performed outside of the United States. Listings in this index are arranged alphabetically by country of intellectual origin. For example:

CHINA, PEOPLE'S REPUBLIC OF

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758

F33615-71-C-1758

HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in cataloging may result in different report number series. For example:

TP-924

ONERA-TP-924

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired supplement number will be found in the first column. For example:

Page 150 will be found in Supplement 238

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in *Aeronautical Engineering Supplements* is found in the Introduction to the most currently issued *Supplement*.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC: NASA and NASA-sponsored documents and a large number of aerospace publications are available to the public for reference purposes at the library maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, NY 10019.

EUROPEAN: An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 51 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 51 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on the inside back cover. These libraries are *not* sales outlets. A local library can contact a Regional Depository to help locate specific reports, or direct contact may be made by an individual.

TABLE OF CONTENTS

	<i>Page</i>
Subject Index	A-1
Personal Author Index	B-1
Corporate Source Index	C-1
Foreign Technology Index	D-1
Contract Number Index	E-1
Report Number Index	F-1
Accession Number Index	G-1

Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of document content, a title extension is added, separated from the title by three hyphens. The (NASA or AIAA) accession number and the page number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document. Under any one subject heading, the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

A

A-10 AIRCRAFT

- Sonic fatigue life increase of the A-10 gunbay
[AIAA PAPER 89-1359] p 390 A89-30834
- Operational test plan concept for evaluation of close air support alternative aircraft
[AD-A208185] p 835 N89-28513

A-300 AIRCRAFT

- Takeoff drag prediction for Airbus A300-600 and A310 compared with flight test results p 228 A89-22810
- Comparison of the results of tests on A300 aircraft in the PAE 5 metre and the ONERA F1 wind tunnels p 300 N89-16849

A-310 AIRCRAFT

- B747-400 aircraft condition monitoring system - A consistent step forward based on the proven A310 concept
[AIAA PAPER 89-2100] p 759 A89-49458
- The accurate measurement of drag in the 8 ft x 8 ft tunnel p 337 N89-16855

A-320 AIRCRAFT

- A320 - The next generation airline aircraft p 237 A89-24853
- Use of color displays in the A320 cockpit
[SAE PAPER 881416] p 319 A89-28200
- Color displays can reduce workload p 532 A89-38949
- System testing exemplified by the A320-landing flaps flight maneuvering system
[MBB-UT-0131-88-PUB] p 614 A89-42939
- A320 - Past definitions and future possibilities p 755 A89-48549
- Lateral electric flight control laws of a civil aircraft based upon eigenstructure assignment technique
[AIAA PAPER 89-3594] p 851 A89-52718
- The CFM 56-5 on the A-320 at Air France p 320 N89-16793

A-4 AIRCRAFT

- Skyhawk soars again p 228 A89-21845

A-7 AIRCRAFT

- Simple model for predicting time to roll wings level in the A-7E p 113 A89-16099
- Aerodynamic improvement of a current attack aircraft through numerical wing design
[AIAA PAPER 89-3384] p 732 A89-49085

ABLATION

- Approximate calculations of viscous drag and aerodynamic heating p 10 A89-11157
- Shape calculation of bodies ablating under the effect of aerodynamic heating during motion in an arbitrary trajectory p 121 A89-13339
- Experimental research of flow separation, heat transfer and ablation on flat plate-wedges in supersonic, turbulent flow p 292 A89-25938
- Nonequilibrium viscous hypersonic flows over ablating Teflon surfaces
[AIAA PAPER 89-0314] p 293 A89-26368

ABORT TRAJECTORIES

- Transformation techniques for minimax optimal control problems and their application to optimal flight trajectories in a windshear - Optimal abort landing trajectories p 245 A89-24526
- Abort landing guidance trajectories in the presence of windshear p 481 A89-32725

ABORTED MISSIONS

- Simulator evaluation of a display for a Takeoff Performance Monitoring System
[NASA-TP-2908] p 615 N89-23469

ABRASION

- Evolution of rotor blade abrasion strips at Bell Helicopter Textron p 604 A89-41589

ABRASION RESISTANCE

- The prospects for advanced polymer-, metal- and ceramic-matrix composites p 267 A89-20978
- Evaluation of barrier cable impact pad materials
[AD-A207554] p 792 N89-26864

ABSORBERS (MATERIALS)

- Attenuation of blast waves using foam and other materials
[AD-A203148] p 505 N89-21632

ABSTRACTS

- Rotary balances: A selected, annotated bibliography
[NASA-TM-4105] p 408 N89-18500

AC GENERATORS

- The solution of 3-D temperature distribution in a cycling oil cooled aircraft ac generator by network topology method p 701 A89-46282

ACCELERATED LIFE TESTS

- Selection of combined accelerated test regimes for aircraft components p 754 A89-47980

ACCELERATION (PHYSICS)

- Boundary layer measurements on an airfoil at low Reynolds numbers in an accelerating flow from a nonzero base velocity
[AIAA PAPER 89-0569] p 288 A89-25458
- A new computational method applied to acceleration potential theory --- of helicopter rotors
[ONERA, TP NO. 1988-131] p 364 A89-29282
- On the accelerating airflow problem in the test section of a transonic wind tunnel p 541 A89-39477
- Acceleration forces aboard NASA KC-135 aircraft during microgravity maneuvers p 620 A89-42022
- Acceleration test for aircraft low-pass filter
[PB89-116263] p 557 N89-22807
- Injuries to seat occupants of light airplanes
[AD-A207579] p 749 N89-26830
- Identification of an adequate model for collective response dynamics of a Sea King helicopter in hover
[AD-A208060] p 836 N89-29341

ACCELERATION TOLERANCE

- Aerial delivery of personnel in ground proximity
[AIAA PAPER 89-0887] p 461 A89-35207
- G-seat heave motion cueing for improved handling in helicopter simulators
[AIAA PAPER 89-3337] p 786 A89-48389
- Brain o2 reserve limiter for high performance aircraft
[AD-D014137] p 783 N89-26858

ACCELERATORS

- The ram accelerator and its applications - A new approach for reaching ultrahigh velocities p 63 A89-12884

- Propulsion cycles for transatmospheric accelerators p 840 A89-54328

ACCELEROMETERS

- The measurement and control of helicopter blade modal response using blade-mounted accelerometers p 229 A89-23306
- The optical bidirectional accelerometer --- for microgravity experiments p 553 A89-36966

ACCIDENT INVESTIGATION

- European airworthiness control for the 1990s
[SAE PAPER 880936] p 2 A89-12320
- The role of manufacturer in the accident investigation p 223 A89-23335
- Accident/incident data analysis database summaries, volume 1
[DOT/FAA/DS-89/17-1] p 827 N89-29332
- Accident/incident data analysis database summaries, volume 2
[DOT/FAA/DS-89/17-2] p 828 N89-29333

ACCIDENT PREVENTION

- On design and projected use of Doppler radar and low-level windshear alert systems in aircraft terminal operations
[AIAA PAPER 89-0704] p 302 A89-25545
- Weather accident prevention using the tools that we have
[AIAA PAPER 89-0707] p 302 A89-25547
- Enroute convective turbulence deviation considerations on short segments p 302 A89-25555
- Airline operations and the contaminated runway
[SAE PAPER 881460] p 658 A89-47339
- Safe skies for tomorrow: Aviation safety in a competitive environment
[PB89-114318] p 524 N89-22591
- Analysis of a system to prevent helicopter rotor blade-airframe strikes
[AD-A209804] p 767 N89-27649

ACCURACY

- Accuracy versus convergence rates for a three dimensional multistage Euler code p 135 A89-13592
- Estimating aircraft airframe tooling cost: An alternative to DAPCA 3
[AD-A201506] p 360 N89-19226

ACOUSTIC ATTENUATION

- Acoustic aspects of a radial diffuser p 434 A89-29351
- Twin-jet screech suppression
[AIAA PAPER 89-1140] p 504 A89-33768
- Lateral noise attenuation of the advanced propeller of the propan test assessment aircraft
[AIAA PAPER 89-1057] p 564 A89-36217
- Reduction of sound transmission through fuselage walls by alternate resonance tuning (A.R.T.)
[AIAA PAPER 89-1046] p 631 A89-40470

ACOUSTIC DUCTS

- Study of propagating acoustic sources in a fan intake by modal analysis of tone noise
[ONERA, TP NO. 1988-101] p 434 A89-29253
- The acoustics of a lined duct with flow
[NLR-TR-87002-U] p 139 N89-12363

ACOUSTIC EMISSION

- AE load-cycle dependence applied to monitoring fatigue crack growth under complex loading conditions --- in aircraft parts p 420 A89-31599
- Prediction of wake-interaction noise in axial-flow machines - Application to helicopter fenestron p 504 A89-35388
- Acoustic emission testing the F-111 p 541 A89-39008
- Acoustic emission detection of crack presence and crack advance during flight p 625 A89-42853
- Application of signal analysis to acoustic emission from a cyclically loaded aluminum joint specimen p 799 A89-47862
- AE monitoring of airframe structure during full scale fatigue test p 863 A89-53322
- Long term possibilities for nondestructive evaluation for US Navy aircraft p 350 N89-17259

ACOUSTIC EXCITATION

- Measurements in the field of a spark excited compressible axisymmetric jet p 203 A89-18948

- Control of laminar separation over airfoils by acoustic excitation
[AIAA PAPER 89-0565] p 288 A89-25454
- Control of flow separation by acoustic excitation
[AIAA PAPER 89-0973] p 365 A89-30487
- Control of wall-separated flow by internal acoustic excitation
[AIAA PAPER 89-0974] p 366 A89-30488
- Sonic fatigue life increase of the A-10 gunbay
[AIAA PAPER 89-1359] p 390 A89-30834
- Noise reduction of a composite cylinder subjected to random acoustic excitation
[AIAA PAPER 89-1049] p 501 A89-33708
- Airfoil profile drag increase due to acoustic excitation
[AIAA PAPER 89-1069] p 501 A89-33715
- Sonic fatigue and nonlinear response of stiffened panels
[AIAA PAPER 89-1101] p 492 A89-33741
- Separation control on an airfoil by periodic forcing
p 509 A89-36922
- Structure of artificial perturbations generated by an external acoustic source in a supersonic boundary layer
p 740 A89-50933
- Control of laminar separation over airfoils by acoustic excitation
[NASA-TM-101379] p 87 N89-12552
- The effects of nonlinear damping on the large deflection response of structures subjected to random excitation
p 193 N89-13796

- Robust control system design with multiple model approach and its application to active flutter control
[AIAA PAPER 89-3578] p 849 A89-52661
- Active flutter suppression using invariant zeros/eigensystem assignment
[AIAA PAPER 89-3610] p 850 A89-52688
- Integration of active and passive sensors for obstacle avoidance
p 830 A89-54083
- A study of active control techniques for noise reduction in an aircraft fuselage model
p 139 N89-13232
- Control surface spanwise placement in active flutter suppression systems
[NASA-TP-2873] p 261 N89-16196
- Active control helicopter aeromechanical and aeroelastic instabilities
p 483 N89-20149
- Active vibration control for flexible rotor by optimal direct-output feedback control
[NASA-TM-101972] p 537 N89-22605
- Detailed design of a Ride Quality Augmentation System for commuter aircraft
[NASA-CR-4230] p 615 N89-23470
- Aeroservoelastic wind-tunnel investigations using the Active Flexible Wing Model: Status and recent accomplishments
[NASA-TM-101570] p 609 N89-24313
- Digital robust control law synthesis using constrained optimization
p 689 N89-25193
- An integrated approach to the optimum design of actively controlled composite wings
p 670 N89-25194

Design of an active helicopter control experiment at the Princeton Rotorcraft Dynamics Laboratory
[NASA-CR-185490] p 783 N89-26859

ACTUATOR DISKS

Transmission and reflection on pressure waves by compressor and turbine stages, based on an actuator-disk model
[AD-A203513] p 496 N89-20426

ACTUATORS

Performance improvement of flight simulator servoactuators p 125 A89-15119
Digital control of a quadruplex direct drive actuator [AIAA PAPER 88-3951] p 172 A89-18122
Electromechanical blade fold systems - Current status and future developments p 230 A89-23316
Ball and the jack --- ball bearing screw for aircraft actuator linear motion control p 258 A89-24324
The comparative analysis and development of an 8000 psi rotary vane actuator [SAE PAPER 881435] p 349 A89-28210
Design of feedback control systems for stable plants with saturating actuators p 428 A89-28536
Calculation of the principal parameters of the actuating mechanisms of aircraft slave drives --- Russian book p 555 A89-38500
An uncertainty model for saturated actuators --- in flight control systems p 833 A89-54066

Control surface actuator [NASA-CASE-LAR-12852-1] p 102 N89-11738
Design of feedback control systems for unstable plants with saturating actuators p 194 N89-14377
Application of triggered lightning numerical models to the F106B and extension to other aircraft [NASA-CR-4207] p 261 N89-15485
Actuation constraints in multivariable flight control systems p 483 N89-20998
Dynamics and control of truss structures with extending members p 523 N89-21778
Actuator rate saturation compensator [AD-D013962] p 616 N89-23474
Flap system for short takeoff and landing aircraft [AD-D013981] p 671 N89-25234
The NASA Langley Research Center 0.3-meter transonic cryogenic tunnel T-P/Re-M controller manual [NASA-CR-181868] p 793 N89-26869

ADA (PROGRAMMING LANGUAGE)

Universal Ada Test Language (UATL) to support real-time software/system integration and factory/maintenance fault isolation p 197 A89-18009
Ada in avionics - Beyond validation [AIAA PAPER 88-3907] p 199 A89-18087
A fault tolerant avionics multiprocessing system architecture supporting concurrent execution of Ada tasks [AIAA PAPER 88-3908] p 199 A89-18088
A case study - F-16 Ada Digital Flight Control System [AIAA PAPER 88-3911] p 171 A89-18090
Ada executive for distributed avionics processing [AIAA PAPER 88-4042] p 200 A89-18166
The search for a new flight simulation software modeling standard - A modular approach using features of the Ada programming language [AIAA PAPER 89-3278] p 809 A89-48392
Development of a real-time man-in-the-loop simulation incorporating transportable Ada flight control software [AIAA PAPER 89-3277] p 789 A89-48439
The impact of Ada on flight simulator development p 810 A89-48842
Ada as a real-time development tool p 810 A89-48843
An Ada programming support environment p 264 N89-16287
Implementation of Ada protocols on Mil-STD-1553 B data bus p 264 N89-16297
Towards a general object-oriented software development methodology p 264 N89-16330
RT-BUILD: An expert programmer for implementing and simulating Ada real-time control software p 265 N89-16343
Applying Ada to Beech Starship avionics p 265 N89-16354
Conversion to Ada: Does it really make sense p 431 N89-18453
The state of practice in Ada-based program design languages p 431 N89-18457
Debugging distributed Ada avionics software p 432 N89-18458
Automated Ada code generation for military avionics p 432 N89-18459
An avionics software expert system design p 433 N89-18467
Ada in embedded avionic systems p 399 N89-18468

ADAPTIVE CONTROL

Reconfigurable flight control system simulation p 181 A89-19558
Optimization of a complex baroinertial computer of aircraft's vertical velocity and flight height p 242 A89-21554
An adaptive transmit power control system for digital airborne communications p 225 A89-24054
A moving-average method for input saturation problem in adaptive control p 264 A89-24582
Adaptive active control of enclosed sound fields in elastic cylinders via vibrational inputs --- noise attenuation research for advanced turboprop aircraft [AIAA PAPER 89-1075] p 469 A89-33720
Adaptive control of the grinding of large gas turbine blades p 492 A89-34144
Adaptive automatic control systems for flight vehicles --- Russian book p 563 A89-38511
Synthesis of systems for the motion control of nonstationary objects --- Russian book p 563 A89-38512
Adaptive optimum attitude extrapolation for precise antenna pointing control p 610 A89-42656
Fixed-gain versus adaptive higher harmonic control simulation p 782 A89-49832
A microcomputer controlled optimal adaptive flight simulator servo system p 811 A89-50782
Adaptive control of high performance unstable aircraft - A review p 851 A89-52989
Adaptive wall technology for minimization of wall interferences in transonic wind tunnels [NASA-CR-4191] p 83 N89-11698
Theory and development of adaptive flight control systems using nonlinear inverse dynamics p 248 N89-15926
Multivariable control law design for the Control Reconfigurable Combat Aircraft (CRCA) [AD-A202697] p 540 N89-21803
Nonlinear and adaptive control [NASA-CR-180088] p 712 N89-26610

ADAPTIVE FILTERS
Adaptive solutions of the Euler equations using finite quadtree and octree grids p 81 A89-16952
A self-adaptive computational method applied to transonic turbulent projectile aerodynamics [AIAA PAPER 89-0837] p 290 A89-25606
A self-adaptive computational method for transonic turbulent flow past a real projectile p 443 A89-34730

ADDITIVES
Alternative modified binders for airfield pavements [AD-A197902] p 249 N89-15124
Fuel-additive system for test cells [AD-A200801] p 342 N89-17681
Theoretical model for stabilization of clay-silt airport pavement subgrade systems. Phase 1: Laboratory investigation. Phase 2: Rutting tests [DOT/FAA/PM-87/20-PHASE-1/2] p 793 N89-27673

ADHESION
Ceramic joining in the United States [DE89-009323] p 798 N89-27834

ADHESION TESTS
Stress analysis concepts for adhesive bonding of aircraft primary structure p 45 A89-10093

ADHESIVE BONDING
Adhesively bonded joints: Testing, analysis, and design; Proceedings of the International Symposium, Baltimore, MD, Sept. 10-12, 1986 p 45 A89-10076
Effect of adhesive debond on stress-intensity factors in bonded composite panels p 45 A89-10091
Environmental durability of adhesively bonded joints p 46 A89-10095
Fracture behavior of adhesively repaired cracked plate p 413 A89-29104
Heat-up rate effects of repair bonding helicopter rotor blades p 387 A89-29961
A foil adhesive for construction - The Letoxit system p 620 A89-40085
Void minimization in adhesive joints p 802 A89-50141
Comparison of a further group of reactive acrylic adhesives for bonding aluminium alloys p 796 A89-50142
A review of Arall technology p 797 A89-51573

ADHESIVES
An adhesive for field repair of composites [AD-A209992] p 798 N89-27859
High temperature adhesive systems [AD-A209168] p 880 N89-28643

ADIABATIC CONDITIONS
Analysis and test of insulated components for rotary engine [SAE PAPER 890326] p 804 A89-51489

ADIABATIC FLOW
A new transformation for computing hypergeometric series and the exact evaluation of the transonic adiabatic flow over a smooth bump p 211 A89-22333

Adiabatic compressible flow in parallel ducts - An approximate but rapid method of solution p 571 A89-41775

Effect of the adiabatic exponent on the stability and turbulent transition of a supersonic laminar boundary layer p 588 A89-42567

Adiabatic Wankel type rotary engine [NASA-CR-182233] p 330 N89-17599

ADSORPTION

Denormalized product of the adsorptive zeolite extraction of paraffins as a jet fuel component p 857 A89-52775

AERIAL PHOTOGRAPHY

An air photo analysis of an airplane crash p 657 A89-45337

AERIAL RECONNAISSANCE

Complementary minis - Skyeye and Phoenix, an overview of their multi-mission coverage p 467 A89-33558
Linescan 2000 - Tomorrow's sensor today p 475 A89-33574

AERIAL RUDDERS

Finite element analysis of composite rudder for DO 228 aircraft p 347 A89-26284
Development of an aircraft side rudder in a new type of carbon fiber composite technology p 717 A89-50362

AEROACOUSTICS

Results of acoustic tests of a prop-fan model p 59 A89-10112
A study on effects of aircraft noise environment on its structure [SAE PAPER 872450] p 28 A89-10663
Prediction of aircraft-propeller-induced, structure-borne interior noise p 28 A89-12564
Analyses of the transmission of sound into the passenger compartment of a propeller aircraft using the finite element method p 95 A89-13635
NOISE-CON 88 - Noise control design: Methods and practice; Proceedings of the National Conference on Noise Control Engineering, Purdue University, West Lafayette, IN, June 20-22, 1988 p 137 A89-15076
Cascade aeroacoustics including steady loading effects p 137 A89-15081
Vibrational and acoustical behaviour of complex structural configurations using standard finite element program --- for aircraft fuselages p 98 A89-15570
Aeroacoustics of supersonic jet flows from a contoured plug-nozzle p 138 A89-16107
Sound generated from the interruption of a steady flow by a supersonically moving aerofoil p 82 A89-17063
Tip-path-plane angle effects on rotor blade-vortex interaction noise levels and directivity p 203 A89-18914
Frequency-domain method for the computation of propeller acoustics p 203 A89-19902
Viscous effects on the resonance of a slotted wind tunnel using finite elements p 248 A89-22369
The ray theory of supersonic propeller acoustics p 266 A89-22787
Computation of non-linear acoustics in two-dimensional blade-vortex interactions p 216 A89-23309
Aeronautical acoustics - Mathematics applied to a major industrial problem p 266 A89-24884
Investigation of aeroacoustic mechanisms by remote thermal imaging p 407 A89-29511
Control of flow separation by acoustic excitation [AIAA PAPER 89-0973] p 365 A89-30487
Acoustic forcing of three dimensional shear layers [AIAA PAPER 89-1063] p 501 A89-33712
On sound generation by a jet flow passing a semi-infinite aerofoil [AIAA PAPER 89-1070] p 501 A89-33716
Asymptotic/numerical analysis of supersonic propeller noise [AIAA PAPER 89-1078] p 501 A89-33722
Sound power spectrum and wave drag of a propeller in flight [AIAA PAPER 89-1081] p 502 A89-33724
Finite element modelling of sheared flow effects on the radiation characteristics of acoustic sources in a circular duct [AIAA PAPER 89-1085] p 502 A89-33726
Forward flight effects on broadband shock associated noise of supersonic jets [AIAA PAPER 89-1088] p 502 A89-33729
Interaction noise mechanisms for an advanced propeller - Experimental results [AIAA PAPER 89-1093] p 502 A89-33733
Near wakes of advanced turbopropellers [AIAA PAPER 89-1095] p 441 A89-33735
Near-field noise of a pusher propeller [AIAA PAPER 89-1096] p 502 A89-33736
The effect of the wind tunnel wall boundary layer on the acoustic testing of propellers [AIAA PAPER 89-1097] p 503 A89-33737

- An analytical model for the prediction of MR/TR interaction noise --- main rotor/tail rotor
[AIAA PAPER 89-1130] p 503 A89-33762
- Integrating the acoustic analogy for supersonic rotating surfaces
[AIAA PAPER 89-1133] p 503 A89-33763

Design and testing of a common engine and nacelle for the Fokker 100 and Gulfstream GIV airplanes [AIAA PAPER 89-2486] p 666 A89-46867

Aerodynamics of high-lift, low-aspect-ratio unswept wings p 652 A89-47372

Aerodynamic analysis of segmented configurations in high-speed flight [AIAA PAPER 89-2170] p 720 A89-47635

Multi-body flow field calculations with overlapping-mesh method [AIAA PAPER 89-2179] p 720 A89-47641

Computational aerodynamics for aircraft design p 726 A89-47863

An engineering approach for nearly shock-free wing design p 754 A89-48191

A comparison of the ground effects measured with and without rate-of-descent modeling on the F-15 S/MTD configuration [AIAA PAPER 89-3280] p 755 A89-48393

Experimental investigation of wing/fuselage integration geometries p 727 A89-48553

The X-31 - High performance at low cost [AIAA PAPER 89-2122] p 757 A89-48948

Aerodynamic improvement of a current attack aircraft through numerical wing design [AIAA PAPER 89-3384] p 732 A89-49085

The flying wind tunnel [AIAA PAPER 89-3378] p 757 A89-49103

Integrated design of aerodynamics and structures [AIAA PAPER 89-2079] p 734 A89-49443

Validation of computational aerodynamics applied to general aviation configurations [AIAA PAPER 89-2169] p 761 A89-49678

Wing-flutter calculations with the CAP-TSD unsteady transonic small-disturbance program p 761 A89-50068

Structural performance of radomes at high Mach numbers p 763 A89-51215

Aircraft Symposium, 26th, Sendai, Japan, Oct. 19-21, 1988, Proceedings p 718 A89-51301

What drives unique configurations [SAE PAPER 881353] p 764 A89-51352

Wind-tunnel investigation of the low-speed aerodynamics of slender accelerator-type configurations [SAE PAPER 881356] p 742 A89-51354

Wind-tunnel investigation of the forebody aerodynamics of a vortex-lift fighter configuration at high angles of attack [SAE PAPER 881419] p 743 A89-51358

High-alpha flight dynamics research on the X-29 configuration using dynamic model test techniques [SAE PAPER 881420] p 783 A89-51359

Numerical grid generation in 3-D Euler-flow simulation p 744 A89-51539

An approach to geometric and flow complexity using feature-associated mesh embedding (FAME) - Strategy and first results p 744 A89-51540

Some experiences with grid generation on curved surfaces using variational and optimisation techniques p 744 A89-51550

Transonic flows with vorticity transport around slender bodies p 820 A89-53949

Aeroelasticity and structural optimization of helicopter rotor blades with swept tips p 29 N89-10887

Aerodynamic optimization by simultaneously updating flow variables and design parameters with application to advanced propeller designs [NASA-CR-182181] p 109 N89-11750

Numerical grid generation and potential airfoil analysis and design [AD-A197972] p 154 N89-14219

Aerodynamic performance of wings of arbitrary planform in inviscid, incompressible, irrotational flow [AD-A200436] p 297 N89-16728

Estimation of drag arising from asymmetry in thrust or airframe configuration [ESDU-88006] p 297 N89-16730

Study of the aerodynamic situation along the C 160 aircraft in parachuting configuration [DAT-88-06] p 299 N89-16756

Development of a panel method for modeling configurations with unsteady component motions, phase 1 [AD-A200255] p 315 N89-16775

A numerical simulation of flows about two-dimensional bodies of parachute-like configuration [ISAS-629] p 302 N89-17580

Efforts toward the validation of a computational fluid dynamics code for analysis of internal aerodynamics p 423 N89-18643

Documentation of two- and three-dimensional hypersonic shock wave/turbulent boundary layer interaction flows [NASA-TM-101075] p 451 N89-20100

Transonic CFD applications at Boeing p 453 N89-20929

Applied transonics at Grumman p 454 N89-20931

Vector potential methods p 455 N89-20939

An investigation of V/STOL jet interactions in a crossflow [AD-A206360] p 596 N89-24272

The conceptual design of a Mach 2 Oblique Flying Wing supersonic transport [NASA-CR-177529] p 671 N89-25233

Experimental and computational flow-field results for an all-body hypersonic aircraft [NASA-CR-185347] p 655 N89-25953

Development and application of a computer-based system for conceptual aircraft design [ETN-89-94886] p 673 N89-26001

HOMAR: A computer code for generating homotopic grids using algebraic relations: User's manual [NASA-CR-4243] p 708 N89-26176

The conceptual design study of USB powered lift aircrafts in FY 1986 [NAL-TR-958] p 764 N89-26835

Feasibility and benefits of laminar flow control on supersonic cruise airplanes [NASA-CR-181817] p 765 N89-26841

Aerodynamic design of low pressure turbines p 778 N89-27669

Low-speed static and dynamic force tests of a generic supersonic cruise fighter configuration [NASA-TM-4138] p 821 N89-28486

Chaotic response of aerosurfaces with structural nonlinearities [AD-A208433] p 824 N89-29316

Revolutionary opportunities for materials and structures study, addendum [NASA-CR-179642-ADD] p 842 N89-29351

AERODYNAMIC DRAG

Two-dimensional model for airfoil unsteady drag below stall p 4 A89-10114

Boundary-layer control for drag reduction [SAE PAPER 872434] p 6 A89-10651

The possibility of drag reduction by outer layer manipulators in turbulent boundary layers p 74 A89-14038

An entropy and viscosity corrected potential method for rotor performance prediction p 145 A89-18857

Winglets on low-aspect-ratio wings p 149 A89-20142

Takeoff drag prediction for Airbus A300-600 and A310 compared with flight test results p 228 A89-22810

Thermodynamics and wave processes in high Mach number propulsive ducts [AIAA PAPER 89-0261] p 278 A89-25219

Dragonfly unsteady aerodynamics - The role of the wing phase relations in controlling the produced flows [AIAA PAPER 89-0832] p 289 A89-25602

The effects of aft-loaded airfoils on aircraft trim drag [AIAA PAPER 89-0836] p 312 A89-25605

Drag prediction using state-of-the-art calculation methods in France [ONERA, TP NO. 1988-74] p 413 A89-29239

Toward lower drag with laminar flow technology p 371 A89-32301

Airfoil profile drag increase due to acoustic excitation [AIAA PAPER 89-1069] p 501 A89-33715

Induced drag and the ideal wake of a lifting wing p 446 A89-34898

Parachutes - Yesterday, today, and tomorrow [AIAA PAPER 89-0880] p 463 A89-36019

The effect of an adverse pressure gradient on the drag reduction performance of manipulators p 571 A89-41771

Effects of contamination on riblet performance p 579 A89-42021

Wind-tunnel investigations of wings with serrated sharp trailing edges p 641 A89-45262

Computational modeling of axisymmetric propeller-hull interaction in slender low drag bodies [AIAA PAPER 89-2674] p 649 A89-47004

An evaluation of the influence of airfoil selection on wing-body drag for a general aviation aircraft [AIAA PAPER 89-2203] p 753 A89-47662

A comparison of the thrust reversal and other braking capabilities of aircraft using the effectiveness coefficient p 754 A89-47985

Three-surface aircraft - Optimum vs typical p 727 A89-48652

Prediction of the induced drag by lifting surface theories p 735 A89-49829

The minimum drag of thin wings at supersonic speed according to Kogan's theory p 736 A89-49899

Aerodynamic technology opportunities for a high-speed civil transport [SAE PAPER 881354] p 764 A89-51353

A preliminary design study of supersonic through-flow fan inlets [NASA-CR-182224] p 109 N89-11751

A fundamental approach to the sticking of insect residues to aircraft wings [NASA-CR-183041] p 156 N89-13414

Aerodynamic drag of ridge arrays in adverse pressure gradients p 219 N89-15075

Aerodynamic drag of cylindrical vehicles moving concentrically within long tubes [AD-A197947] p 219 N89-15076

Estimation of drag arising from asymmetry in thrust or airframe configuration [ESDU-88006] p 297 N89-16730

Intake drag p 299 N89-16747

Development of testing techniques in a large transonic wind tunnel to achieve a required drag accuracy and flow standards for modern civil transports p 337 N89-16857

Precision improvement of transport aircraft drag measurements p 300 N89-16858

Use of riblets to obtain drag reduction on airfoils at high Reynolds number flows [AD-A201485] p 378 N89-19267

Drag coefficients for irregular fragments [AD-A201943] p 379 N89-19276

Effect of riblets upon flow separation in a subsonic diffuser [AD-A203178] p 458 N89-20967

Numerical simulation of flow over iced airfoils [AD-A203291] p 458 N89-20969

Navier-Stokes solution for a NACA 0012 airfoil with mass flux (fan) [AD-A205771] p 593 N89-23424

Use of Navier-Stokes methods to predict circulation control airfoil performance [AD-A206242] p 595 N89-24270

An experimental investigation of high lift/high rate aerodynamics of an unsteady airfoil [AD-A206964] p 656 N89-25964

Technical Status Review on Drag Prediction and Analysis from Computational Fluid Dynamics: State of the Art [AGARD-AR-256] p 745 N89-26817

Drag prediction and analysis from computational fluid dynamics, state-of-the-art in France p 805 N89-26818

Drag prediction and analysis from CFD state-of-the-art in Germany p 745 N89-26819

Some results on flow calculations involving drag prediction p 745 N89-26820

State-of-the-art of aircraft drag prediction in Italy by means of theoretical methods p 745 N89-26821

Aircraft drag prediction for transonic potential flow p 746 N89-26822

CFD methods for drag prediction and analysis currently in use in UK p 746 N89-26823

Computational fluid dynamics drag prediction: Results from the Viscous Transonic Airfoil Workshop p 746 N89-26824

CFD drag prediction for aerodynamic design p 746 N89-26825

Combination boundary layer control system for high altitude aircraft [AD-D014075] p 765 N89-26837

Low density flow effects for hypervelocity vehicles
[AD-A206218] p 747 N89-27633

AERODYNAMIC FORCES

On the compensation of the phugoid mode induced by initial conditions and windshears p 68 A89-13545
The calculation of aerodynamic forces on flexible wings of agricultural aircraft p 70 A89-13599
The relationship between the aerodynamic characteristics of double-delta wings and vortices with sideslips at high angles of attack p 148 A89-19801
Experimental study on unsteady aerodynamic characteristics of an oscillating cascade with tip clearance p 148 A89-19927
A flow visualization and aerodynamic force data evaluation of spanwise blowing on full and half span delta wings
[AIAA PAPER 89-0192] p 276 A89-25167
Multiple solutions for aircraft sideslip behaviour at high angles of attack
[AIAA PAPER 89-0645] p 331 A89-25510
Electro-impulse de-icing systems - Issues and concerns for certification

Nonlinear damping estimation from rotor stability data using time and frequency domain techniques
[AIAA PAPER 89-1243] p 389 A89-30728
Aerodynamically forced response and flutter of structurally mistuned bladed disks in subsonic flow
[AIAA PAPER 89-1387] p 400 A89-30860
Modeling of parachute opening - An experimental investigation p 460 A89-34891
Coupling factor method for studying elastic motion of flight vehicles p 544 A89-37004
A way for upgrading the accuracy of force measurement p 553 A89-37011
Use of a simplified estimation scheme for simulation validation and improvement
[AIAA PAPER 89-3262] p 785 A89-48379
Influence of mechanical nonlinearities on flutter - Analytical and computational aspects
[AIAA PAPER 89-2091] p 801 A89-49451
Steady and unsteady pressures and forces in a vibrating ejector engine in the subsonic and transonic speed regimes p 774 A89-50363
Nonlinear stabilizing control of high angle of attack flight dynamics
[AIAA PAPER 89-3487] p 845 A89-52580
A computational study of coherent structures in the wakes of two-dimensional bluff bodies
[AD-A196820] p 53 N89-11188
Modeling of vortex layers over delta wings with a vortex line adapted panel method
[ETN-88-93235] p 86 N89-11721
Statistical simulation of turbulent flow around a cube subjected to frontal flows
[ETN-88-93215] p 127 N89-12019
Aerodynamic drag of cylindrical vehicles moving concentrically within long tubes
[AD-A197947] p 219 N89-15076
Prediction of forces and moments for flight vehicle control effectors: Workplan
[NASA-CR-184666] p 247 N89-15122
Modal forced vibration analysis of aerodynamically excited turbosystems
[NASA-CR-174966] p 425 N89-18696
Aerodynamics of engine-airframe interaction
[NASA-CR-184824] p 517 N89-21769
Aerodynamics of nonrigid bodies undergoing large amplitude time-dependent motions p 521 N89-22586
Modelling aircraft dynamics
[AD-A204086] p 607 N89-23449
Unsteady aerodynamic effects on bluff bodies
p 596 N89-24278
Aeroservoelastic modeling and applications using minimum-state approximations of the unsteady aerodynamics
[NASA-TM-101574] p 608 N89-24308
Feasibility study for enhanced lateral control of the P-3C aircraft
[AD-A208461] p 784 N89-26863
Hypersonic prediction comparisons with experimental data for a cone-cylinder at mach 6.86
[AD-A207583] p 747 N89-27636
Small scale model tests in small wind and water tunnels at high incidence and pitch rates. Volume 2: Small wind tunnel (ADF) data base
[AD-A208539] p 794 N89-27676
Boundary-layer measurements on a transonic low-aspect ratio wing
[NASA-TM-88214] p 823 N89-29305
Some effects of aerodynamic spoilers on wing flutter
[NASA-TM-101632] p 825 N89-29324

AERODYNAMIC HEAT TRANSFER

Navier-Stokes solution to the flowfield over ice accretion shapes p 12 A89-12557
Measurements of heat transfer distribution over the surfaces of highly loaded turbine nozzle guide vanes p 51 A89-12752
Infrared thermography in blowdown and intermittent hypersonic facilities
[AIAA PAPER 89-0042] p 334 A89-25036
Fluctuation of heat transfer in shock wave/turbulent boundary-layer interaction p 371 A89-31910
Local heat transfer in internally cooled turbine airfoil leading edge regions. I - Impingement cooling without film coolant extraction. II - Impingement cooling with film coolant extraction p 494 A89-34932
Computation of external, hypersonic, three-dimensional flowfield and heat transfer p 494 A89-34935
A vectorized Gauss-Seidel line relaxation scheme for solving 3D Navier-Stokes equations
[AIAA PAPER 89-1948] p 573 A89-41795
Methods of flying model studies --- Russian book p 605 A89-42535
Analysis of flow-, thermal- and structural-interaction of hypersonic structures subjected to severe aerodynamic heating
[AD-A205077] p 518 N89-21775
Unsteady aerodynamics and heat transfer in a transonic turbine stage p 537 N89-21800
Control of embedded vortices using wall jets
[AD-A202606] p 558 N89-22835
A computer simulation study of liquid water content adjustment based on icing cloud horizontal extent
[DOT/FAA/CT-TN89/3] p 598 N89-24288
AERODYNAMIC HEATING
Approximate calculations of viscous drag and aerodynamic heating p 10 A89-11157
Aerothermodynamics - The required tools
[SAE PAPER 880928] p 12 A89-12316
Shape calculation of bodies ablating under the effect of aerodynamic heating during motion in an arbitrary trajectory p 121 A89-13339
Effect of aerodynamic heating on deformation of composite cylindrical panels in a gas flow p 74 A89-13692
Short-term high-temperature properties of reinforced metal matrix composites p 119 A89-15747
Detection of laminar-turbulent transition by infrared thermography p 143 A89-17147
A study on aerodynamic heating in the interaction regions of shock waves and turbulent boundary layers induced by sharp fins p 148 A89-20131
Coupled flow, thermal, and structural analysis of aerodynamically heated panels p 181 A89-20322
Thermo-viscoplastic analysis of hypersonic structures subjected to severe aerodynamic heating
[AIAA PAPER 89-1226] p 388 A89-30713
Fluid-thermal-structural interaction of aerodynamically heated leading edges
[AIAA PAPER 89-1227] p 388 A89-30714
Experimental investigation of aerodynamic heating by flow through control surface gaps p 510 A89-37785
The structure of aerodynamic heating in three-dimensional shock wave/turbulent boundary layer interactions induced by sharp and blunt fins
[AIAA PAPER 89-1854] p 585 A89-42082
Aerodynamic pressures and heating rates on surfaces between split elevons at Mach 6.6
[NASA-TP-2855] p 129 N89-12822
Analysis of flow-, thermal- and structural-interaction of hypersonic structures subjected to severe aerodynamic heating
[AD-A205077] p 518 N89-21775
Transition to turbulence in laminar hypersonic flow p 522 N89-22830
Numerical simulation of hypersonic flow around a space plane. 1: Basic development
[NAL-TR-9767] p 591 N89-23409
Experimental study of pressure and heating rate on a swept cylindrical leading edge resulting from swept shock wave interference
[NASA-CR-185326] p 592 N89-23411
Thermal analysis of a hypersonic wing test structure
[NASA-CR-185319] p 595 N89-24265
Finite element flow-thermal-structural analysis of aerodynamically heated leading edges p 655 N89-25198
An introduction to the problem of aerodynamic heating
[AERO-REPT-8901] p 656 N89-25970
A review of high-speed, convective, heat-transfer computation methods
[NASA-TP-2914] p 805 N89-27116
Hypervelocity atmospheric flight: Real gas flow fields
[NASA-TM-101055] p 805 N89-27117
Thermo-viscoplastic analysis of hypersonic structures subjected to severe aerodynamic heating
[NASA-CR-185915] p 825 N89-29328

AERODYNAMIC INTERFERENCE

Wing laminar boundary layer in the presence of a propeller slipstream p 4 A89-10105
Investigation on wall interference of low-speed wind tunnel with slotted walls p 8 A89-11081
Thickness effects in the unsteady aerodynamics of interfering lifting surfaces p 68 A89-13552
Some new test results in the adaptive rubber tube test section of the DFVLR Goettingen p 115 A89-13619
Application of a flexible wall testing technique to the NASA Langley 0.3-m Transonic Cryogenic Tunnel p 115 A89-13620
Low speed wind tunnel investigation of propeller slipstream aerodynamic effects on different nacelle/wing combinations p 97 A89-13678
Body wing tail interference studies at high angles of attack and variable Reynolds numbers p 74 A89-13691
Investigation of the interacting flow of nonsymmetric jets in crossflow p 126 A89-16109
A wall pressure correction method for closed subsonic wind tunnel test sections p 79 A89-16436
An investigation of wall interference correction to the pressure measurement in low speed wind tunnel with solid walls p 183 A89-19808
Interference effects associated with a plate-supported half-model in hypersonic flow p 148 A89-19924
Aspects of wind tunnel interference effects on rotor model loadings p 216 A89-23343
Euler procedure for three-dimensional transonic wall interference p 218 A89-24307
Unsteady wall interference in rotary tests
[AIAA PAPER 89-0046] p 273 A89-25040
Transonic Euler solutions on mutually interfering finned bodies
[AIAA PAPER 89-0264] p 278 A89-25222
Emerging technology for transonic wind-tunnel-wall interference assessment and corrections
[SAE PAPER 881454] p 336 A89-28220
Wall-interference corrections for parachutes in a closed wind tunnel p 485 A89-35217
Calculation of wind-tunnel side-wall interference using a three-dimensional multigrad Navier-Stokes code
[AIAA PAPER 89-1790] p 579 A89-42026
Nacelle/pylon interference study on a 1/17th-scale, twin-engine, low-wing transport model
[AIAA PAPER 89-2480] p 665 A89-46864
Calculation of isolated and installed multiple rotor flows using a surface panel method
[AIAA PAPER 89-2214] p 723 A89-47671
A numerical study of a wing and propeller in mutual interference p 723 A89-47672
Tests on 3 NACA 0012 airfoil models of DFVLR in the NAL 0.3 tunnel: An assessment of 2-D wall interference
[TM-AE-8705] p 15 N89-10847
Adaptive wall technology for minimization of wall interferences in transonic wind tunnels p 83 N89-11698
Sidewall boundary-layer measurements with upstream suction in the Langley 0.3-meter transonic cryogenic tunnel
[NASA-CR-4192] p 86 N89-12544
A review of turbomachinery blade-row interaction research
[NASA-CR-182211] p 109 N89-12567
Turbulence and modeling in transonic flow p 456 N89-20951
Wall interference assessment and corrections p 457 N89-20958
Two-measured variable method for wall interference assessment/correction p 457 N89-20959
Comparison of airfoil results from an adaptive wall test section and a porous wall test section p 457 N89-20960
Capabilities of wind tunnels with two-adaptive walls to minimize boundary interference in 3-D model testing p 486 N89-20961
Experimental study of pressure and heating rate on a swept cylindrical leading edge resulting from swept shock wave interference
[NASA-CR-185326] p 592 N89-23411
Vortices and pressure waves at plates, cylinders and wind profiles

Human factors aspects of the traffic alert and collision avoidance system (TCAS II) [AD-A196811] p 91 N89-11731

LORAN C Offshore Flight Following (LOFF) in the Gulf of Mexico [AD-A197179] p 91 N89-12558

Voice recognition and artificial intelligence in an air traffic control environment p 91 N89-12559

[AD-A197219] p 91 N89-12559

TURB: Turbulence forecasting for small/medium and large aircraft [PB88-246388] p 135 N89-13125

Terminal area forecasts: Fiscal years 1988-2000 [AD-A198079] p 156 N89-13419

A flight test design for studying airborne applications of air to ground duplex data link communications p 195 N89-14924

Simulation of a future Terminal Maneuvering Area (TMA) scenario [DFVLR-FB-88-33] p 226 N89-15096

A piloted simulation study of data link ATC message exchange [NASA-TP-2659] p 227 N89-15900

Simulation evaluation of TIMER, a time-based, terminal air traffic, flow-management concept [NASA-TP-2870] p 227 N89-15901

Design of automation tools for management of descent traffic [NASA-TM-101078] p 306 N89-17584

Activities report in air traffic control [ETN-89-93513] p 309 N89-17586

An evaluation of automating Carrier Air Traffic Control Center (CATCC) status boards utilizing voice recognition input [AD-A200626] p 309 N89-17588

The efficacy of color-coded symbols to enhance air-traffic control displays p 385 N89-19284

[AD-A201594] p 385 N89-19284

The application of software fault tolerance to air traffic control: Study contract overview [BR108587] p 465 N89-20114

The application of trajectory prediction algorithms for planning purposes in the Netherlands Air Traffic Control (ATC) system [NLR-MP-87031-U] p 465 N89-20115

Improved computer simulation of the TCAS 3 circular array mounted on an aircraft [NASA-CR-184907] p 496 N89-20363

Microwave landing systems: Additional systems should not be procured unless benefits proven [GAO/RCED-88-118] p 466 N89-20977

Description of the derivation of the collision risk model used in the vertical separation simulation risk model [AD-A205108] p 523 N89-21781

A procedure for operating dependent instrument approaches to converging runways [AD-A204723] p 526 N89-21784

Design, implementation and computer aided tests of a shaped reflector for an air traffic control system [ETN-89-94229] p 556 N89-22014

National airspace system plan: Facilities, equipment, associated development and other capital needs [AD-A202615] p 526 N89-22596

National Airspace System Search and Rescue operational concept (NAS-SR-1329) [DOT/FAA/DS-89/07] p 597 N89-23435

Generation of architectures for distributed intelligence systems [AD-A205783] p 601 N89-23440

Comparison of interpolation algorithms for speed control in air traffic management [AD-A206314] p 601 N89-23444

Host computer system capacity management procedures [AD-A193416] p 630 N89-24051

A comparison of detection efficiency on an air traffic control monitoring task with and without computer aiding [AD-A206422] p 602 N89-24294

Notice to Airmen (NOTAM) system operational concept [DOT/FAA/CT-TN89/10] p 658 N89-25142

FAA (Federal Aviation Administration) aviation forecasts: Fiscal years 1989-2000 [AD-A206716] p 638 N89-25948

Controller evaluations of the descent advisor automation aid [NASA-TM-102197] p 659 N89-25981

Evaluation of a projection algorithm for the stereographic representation of aircraft in an air traffic control system [DOT/FAA/CT-TN89/20] p 661 N89-25985

Controller evaluation of Initial Data Link air traffic control services. Volume 2: Mini Study 2 [DOT/FAA/CT-89/14-VOL-2] p 661 N89-25986

Descent strategy comparisons for TNAV-equipped aircraft under airplane-preferred operating conditions [NASA-CR-4248] p 690 N89-26011

Functional requirements of the Communications Interface Driver (CID) [DOT/FAA/CT-TN87/41-REV] p 707 N89-26121

Mode S performance test plan [DOT/FAA/CT-TN89/24] p 707 N89-26127

Satellite low rate voice demonstration test plan [AD-A206710] p 707 N89-26133

Evaluation of low data rate voice CODECS for air traffic control applications [DOT/FAA/CT-TN89/13] p 805 N89-27047

Terminal area forecasts: FY 1989 - 2005 [AD-A209805] p 750 N89-27644

Automated planning function for AERA 3: Maneuver option manager [DOT/FAA/DS-89/21] p 752 N89-27845

Collision avoidance operational concept [WP-88W00418] p 831 N89-28509

AIR TRAFFIC CONTROLLERS (PERSONNEL)

The law: The pilot and the air traffic controller - Division of responsibilities p 357 A89-26665

A task-oriented dialogue system - An aeronautical application p 384 A89-31907

Air traffic control p 437 A89-34450

Privatization of the air traffic control system - Its rationale, implementation and implications p 566 A89-38877

Controller evaluations of the descent advisor automation aid [AIAA PAPER 89-3624] p 829 A89-52699

Controller evaluation of initial data link air traffic control services: Mini study 1, volume 1 [DOT/FAA/CT-88/25-VOL-1] p 227 N89-15100

Controller evaluation of initial data link air traffic control services: Mini-study 1, volume 2 [DOT/FAA/CT-88/25-VOL-2] p 227 N89-15101

Studies of poststrike air traffic control specialist trainees. Part 2: Selection and screening programs [AD-A199177] p 526 N89-22595

Controller evaluations of the descent advisor automation aid [NASA-TM-102197] p 659 N89-25981

Controller evaluation of Initial Data Link air traffic control services. Volume 2: Mini Study 2 [DOT/FAA/CT-89/14-VOL-2] p 661 N89-25986

AIR TRANSPORTATION

V/STOL aircraft configurations and opportunities in the Pacific Basin [SAE PAPER 872403] p 18 A89-10631

New proposals for new directions - 1992 and the GATT approach to trade in air transport services p 204 A89-18949

Severe weather - Impact on aviation and FAA programs in response [AIAA PAPER 89-0794] p 352 A89-25583

Impact of severe weather on aviation - An NWS perspective [AIAA PAPER 89-0795] p 304 A89-25584

The effects of inclement weather on airline operations [AIAA PAPER 89-0797] p 304 A89-25585

Airport technology international 1988 --- Book p 541 A89-38582

The Chicago Convention - Article 33 and the SFAR 40 episode p 566 A89-38876

New developments in air and space research - Contributions of the German aircraft and space industry to advanced programs and international cooperation [MBB-Z-177-88-PUB] p 635 A89-42927

Annals of air and space law. Volume 13 --- Book p 714 A89-45175

The EEC supports air transport research p 638 A89-46078

Calculation of the steady periodic and gust responses of a hingeless rotor helicopter using two-dimensional time domain unsteady aerodynamics p 182 A89-14240
The poststall nonlinear dynamics and control of an F-18: A preliminary investigation p 169 A89-14922
High alpha feedback control for agile half-loop maneuvers of the F-18 airplane
[NASA-CR-181360] p 234 A89-15106
Continuous-discrete filtering for systems with Markovian switching coefficients
[NLR-MP-87076-U] p 465 A89-20117
Numerical simulation of the flow field over delta wings with leading edge blowing p 453 A89-20924
Helipoint night parking area criteria test plan
[DOT/FAA/CT-TN88/45] p 619 A89-23480
Brain O2 reserve limiter for high performance aircraft
[AD-D014137] p 783 A89-26858
Aerodynamic parameters of an advanced fighter aircraft estimated from flight data. Preliminary results
[NASA-TM-101631] p 784 A89-26861
Automated planning function for AERA 3: Maneuver option manager
[DOT/FAA/DS-89/21] p 752 A89-27645
A mathematical formulation for planning automated aircraft separations for AERA 3
[DOT/FAA/DS-89/20] p 752 A89-27646
Small scale model tests in small wind and water tunnels at high incidence and pitch rates. Volume 2: Small wind tunnel (ADF) data base
[AD-A208539] p 794 A89-27676
Acoustical tracking of fast maneuvering aircraft by distributed sensors
[REPT-6-88] p 877 A89-29156
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 1: Basic use
[AD-A208058] p 835 A89-29339
- AIRCRAFT MODELS**
Theoretical modelling for helicopter flight dynamics - Development and validation p 92 A89-13522
Sensitivity of reduced flight dynamic model depending on elasticity of aircraft structure p 95 A89-13634
Determination of nonlinear aerodynamic coefficients using the estimation-before-modeling method p 113 A89-16090
Enhanced assessment of robustness for an aircraft's sliding mode controller p 113 A89-16154
Zonal techniques for flowfield simulation about aircraft p 80 A89-16931
Evolution of the ACAP crash energy management system p 164 A89-18923
Dynamic tire/soil contact surface interaction model for aircraft ground operations p 155 A89-20320
Helicopter model noise testing at DNW - Status and prospects p 266 A89-23359
Consideration of trends in stability and control derivatives from helicopter system identification p 243 A89-23360
The identification of reduced order models of helicopter behaviour for handling qualities studies p 243 A89-23363
Identification of the longitudinal motion of a Dornier Do 28 airplane p 245 A89-24490
Agile Fighter Aircraft Simulation
[AIAA PAPER 89-0015] p 331 A89-25011
Lateral oscillations of sting-mounted models at high alpha
[AIAA PAPER 89-0047] p 310 A89-25041
Aircraft vertical profile implementation using directed-graph methods p 332 A89-25683
Comparison of test mounts for military aircraft afterbodies
[ONERA, TP NO. 1988-151] p 370 A89-31811
Partitioning of flight data for aerodynamic modeling of aircraft at high angles of attack p 394 A89-31858
A mathematical model of aircraft spin and results of its computer integration p 481 A89-34130
Transient dynamics of aircraft propellers during touch-down impact p 470 A89-34509
Experimental investigation on buckling of aircraft shell by the curved grating shadow moire method p 553 A89-37006
Validation of nonstationary aerodynamics models for longitudinal aeroplane motion on the basis of flight measurements p 539 A89-37524
Investigation for venting test technology with large-sized model in a large wind tunnel p 541 A89-37783
Simulation of optimal flight paths of dynamical soaring flight and the design of a model aircraft p 529 A89-39259
- Validation of aerodynamic parameters for high-incidence research models p 578 A89-42012
Methods of flying model studies --- Russian book p 605 A89-42535
Aircraft flight safety: Methodological principles --- Russian book p 597 A89-42536
Software development reusability for aircraft simulation systems p 630 A89-43127
Development of an analytical model of wing rock for slender delta wings p 728 A89-48658
Comparison of experimental and numerical results for transient electromagnetic fields induced on a scale model aircraft by current injection technique
[ONERA, TP NO. 1989-86] p 756 A89-48766
Digital mockup --- airplane design and production using computer techniques p 759 A89-49447

[SAWE PAPER 1834] Analysis of absorbing characteristics of thin-type absorber for generalized conditions of incident wave p 861 A89-52105
Stability analysis of flexible body dynamics for a highly maneuverable fighter aircraft
[AIAA PAPER 89-3471] p 845 A89-52565
Evaluation methods for complex flight control systems
[AIAA PAPER 89-3502] p 846 A89-52595
A systematic approach to gain suppression using eigenstructure assignment p 875 A89-54024
Estimating electric field enhancement factors on an aircraft utilizing a small scale model: A method evaluation p 21 A89-10454
An assessment of ground effects determined by static and dynamic testing techniques p 16 A89-10854
Derivation and definition of a linear aircraft model
[NASA-RP-1207] p 247 A89-15123
An experimental investigation of a fighter aircraft model at high angles of attack
[AD-A201993] p 394 A89-18445
Ice research tunnel test of a model helicopter rotor
[NASA-TM-101978] p 403 A89-19305
Lateral stability analysis for X-29A drop model using system identification methodology
[NASA-TM-4108] p 539 A89-21802
Experimental aerodynamic characteristics of a joined-wing research aircraft configuration
[NASA-TM-101083] p 596 A89-24285
Meeting the challenges with the Douglas Aircraft Company Aeroelastic Design Optimization Program (ADOP) p 671 A89-25222
Physical mechanisms and disturbances related to the attachment of an electric arc to a conductive cylinder
[ONERA-NT-1988-2] p 866 A89-29698
- AIRCRAFT NOISE**
A study on effects of aircraft noise environment on its structure
[SAE PAPER 872450] p 28 A89-10663
Cruise noise of the 2/9 scale model SR-7A propeller p 59 A89-12561
Structure-borne noise control for propeller aircraft p 59 A89-12563
Analyses of the transmission of sound into the passenger compartment of a propeller aircraft using the finite element method p 95 A89-13635
The ultralight aeroplane - A 'pain in the air' of an environmentally acceptable flight vehicle? --- noise reduction p 95 A89-13636
A new diagnostic method for separating airborne and structureborne noise radiated by plates with applications for propeller driven aircraft p 137 A89-14988
NOISE-CON 88 - Noise control design: Methods and practice; Proceedings of the National Conference on Noise Control Engineering, Purdue University, West Lafayette, IN, June 20-22, 1988 p 137 A89-15076
A parametric study of transonic blade-vortex interactions p 138 A89-15084
Sound transmission into a finite, closed, cylindrical shell having an absorbing layer on its inner surface p 138 A89-15088
Measuring vibration transmission in structures p 124 A89-15097
Bell 222 Helicopter cabin noise - Analytical modeling and flight test validation p 98 A89-15101
Aircraft interior noise prediction using a structural-acoustic analogy in NASTRAN modal synthesis p 99 A89-15606
Influence of a floor on sound transmission into an aircraft fuselage model p 166 A89-20135
NASA/AHS rotorcraft noise reduction program - McDonnell Douglas Helicopter Company accomplishments p 143 A89-20747
Effect of signal jitter on the spectrum of rotor impulsive noise p 266 A89-22327
An experimental and theoretical investigation of the propagation of sound waves through a turbulent boundary layer p 266 A89-22785
- NASA/AHS Rotorcraft Noise Reduction program - Accomplishments at Sikorsky Aircraft p 229 A89-22976
Computation of non-linear acoustics in two-dimensional blade-vortex interactions p 216 A89-23309
Measured and predicted impulsive noise directivity characteristics --- from blade-vortex interaction in helicopter forward flight p 266 A89-23351
Helicopter model noise testing at DNW - Status and prospects p 266 A89-23359
Measurements of propeller noise in a light turboprop airplane p 233 A89-24306
Source localization technique for impulsive multiple sources --- microphone arrays for helicopter rotor noise measurement
[ONERA, TP NO. 1989-114] p 356 A89-27741
In-flight experiments on the active control of propeller-induced cabin noise
[AIAA PAPER 89-1047] p 468 A89-33706
Installation effects on propeller wake/vortex induced structure-borne noise transmission
[AIAA PAPER 89-1072] p 468 A89-33717
Full-scale demonstration tests of cabin noise reduction using active vibration control
[AIAA PAPER 89-1074] p 468 A89-33719
Adaptive active control of enclosed sound fields in elastic cylinders via vibrational inputs --- noise attenuation research for advanced turboprop aircraft
[AIAA PAPER 89-1075] p 469 A89-33720
Model size requirements for finite element prediction of low-frequency cabin noise and vibration
[AIAA PAPER 89-1076] p 469 A89-33721
Asymptotic/numerical analysis of supersonic propeller noise
[AIAA PAPER 89-1078] p 501 A89-33722
A lifting line model for propeller noise
[AIAA PAPER 89-1079] p 502 A89-33723
Finite element modelling of sheared flow effects on the radiation characteristics of acoustic sources in a circular duct
[AIAA PAPER 89-1085] p 502 A89-33726
Forward flight effects on broadband shock associated noise of supersonic jets
[AIAA PAPER 89-1088] p 502 A89-33729
Fuselage boundary layer effects on sound propagation and scattering
[AIAA PAPER 89-1098] p 503 A89-33738
A smart pattern recognition system for the automatic identification of aerospace acoustic sources
[AIAA PAPER 89-1114] p 499 A89-33751
Interior noise in the untreated Gulfstream II Propfan Test Assessment (PTA) aircraft
[AIAA PAPER 89-1119] p 469 A89-33754
Cabin noise control ground tests for UHB aircraft
[AIAA PAPER 89-1121] p 469 A89-33755
Propeller modelling effects on interior noise in cylindrical cavities with application to active control
[AIAA PAPER 89-1123] p 469 A89-33757
Advanced turboprop aircraft flyover noise annoyance - Comparison of different propeller configurations
[AIAA PAPER 89-1128] p 503 A89-33761
Twin-jet screech suppression
[AIAA PAPER 89-1140] p 504 A89-33768
Hub to tip variations of counter rotating propeller interaction noise
[AIAA PAPER 89-1145] p 504 A89-33770
Importance of engine as a source of helicopter external noise
[AIAA PAPER 89-1147] p 470 A89-33771
Prediction of wake-interaction noise in axial-flow machines - Application to helicopter fenestron p 504 A89-35388
Near-field acoustic characteristics of a single-rotor propan
[AIAA PAPER 89-1055] p 533 A89-36215
Installed propan (SR-7L) far-field noise characteristics
[AIAA PAPER 89-1056] p 564 A89-36216
Lateral noise attenuation of the advanced propeller of the propan test assessment aircraft
[AIAA PAPER 89-1057] p 564 A89-36217
A prediction of high-speed rotor noise
[AIAA PAPER 89-1132] p 564 A89-36220
Preliminary results of in-flight experiments on the active control of propeller-induced cabin noise p 529 A89-39509

[NASA-TP-2857] p 617 N89-24327

An initial assessment of the impact of boundary layer control on SST
[AERO-REPT-8802] p 656 N89-25969

Feasibility of predicting performance degradation of airfoils in heavy rain
[NASA-CR-181842] p 657 N89-25973

Strategic bombers: B-1B cost and performance remain uncertain
[AD-A206751] p 673 N89-25998

Revolutionary opportunities for materials and structures study, addendum
[NASA-CR-179642-ADD] p 842 N89-29351

AIRCRAFT PILOTS

Introduction of Pilot's Operational Workload Evaluation Research Simulator, POWERS, in Aeromedical Laboratory, JASDF p 183 A89-19876

The law: The pilot and the air traffic controller - Division of responsibilities p 357 A89-26665

Impact of severe weather on aviation - A pilot viewpoint
[AIAA PAPER 89-0798] p 353 A89-28461

A task-oriented dialogue system - An aeronautical application p 384 A89-31907

Sudden inflight incapacitation in general aviation p 522 A89-36117

Accident investigation and the public interest - A pilot's view p 523 A89-39224

HUD on the head for combat pilots p 532 A89-39227

Expert systems' role broadens p 711 A89-45293

Automation in transport aircraft - Current and future trends
[SAE PAPER 881468] p 657 A89-47334

Cockpit information management through an intelligent pilot/vehicle interface
[AIAA PAPER 89-2098] p 768 A89-49456

Evaluation of a takeoff performance monitoring system display p 837 A89-51704

Towards a physiologically based HUD (Head-Up Display) symbology
[AD-A207748] p 838 N89-28515

AIRCRAFT POWER SUPPLIES

Circuit protection for advanced aircraft - A functional and historical perspective
[SAE PAPER 872502] p 32 A89-10692

Electrical equipment of aircraft --- Russian book p 346 A89-26171

Aerospace power systems technology; Proceedings of the Aerospace Technology Conference and Exposition, Anaheim, CA, Oct. 3-6, 1988
[SAE SP-758] p 324 A89-28254

The all electric airplane revisited
[SAE PAPER 881407] p 314 A89-28256

A highly reliable DC power source for avionic subsystems
[SAE PAPER 881408] p 324 A89-28257

Experimental cascaded doubly fed variable speed constant frequency generator system
[SAE PAPER 881409] p 324 A89-28258

Parallel operation of VSCF electrical power generators
[SAE PAPER 881410] p 324 A89-28259

Overview on the evolution of aircraft battery systems used in Air Force aircraft
[SAE PAPER 881411] p 324 A89-28260

Unbalanced and nonlinear loads in aircraft electrical systems
[SAE PAPER 881413] p 325 A89-28262

High reliability aircraft generator system
[SAE PAPER 881414] p 325 A89-28263

Secondary power - Benefits of digital control and vehicle management system integration
[SAE PAPER 881498] p 325 A89-28264

Pneumatic link secondary power systems for military aircraft
[SAE PAPER 881499] p 325 A89-28265

Emergency power combined with auxiliary power unit --- in aircraft
[SAE PAPER 881500] p 325 A89-28266

T-100 Multipurpose Small Power Unit - Technology for the next generation auxiliary power units
[SAE PAPER 881501] p 349 A89-28267

X-29A subsystems integration - An example for future aircraft
[SAE PAPER 881504] p 314 A89-28269

The all-electric (secondary power) airplane p 535 A89-38950

The solution of 3-D temperature distribution in a cycling oil cooled aircraft ac generator by network topology method p 701 A89-46282

VSCF electrical power generation unit for the CFM56 engine Boeing 737
[AIAA PAPER 89-2021] p 774 A89-49408

AIRCRAFT PRODUCTION

New design, production tools will play key role in B-2 cost p 161 A89-18350

Automated wire preparation system p 189 A89-18895

Building aircraft assembly tools from a 3-D database
[SAE PAPER 881428] p 269 A89-28204

New wings, new ways p 471 A89-35825

MD-11 enters the fray p 603 A89-40857

Thoroughgoing DV-support from project planning to factory control - Practical example from near-development aircraft design
[MBB-UD-528-88-PUB] p 568 A89-42928

Development of a monolithic fuselage shell using CFRP
[MBB-FE-234-S-PUB-338] p 606 A89-42934

Innovative production technology in aircraft construction: CIAM Forming 'made by MBB' - A highly productive example p 625 A89-43076

The EEC supports air transport research p 638 A89-46078

Development of an aircraft side rudder in a new type of carbon fiber composite technology p 717 A89-50362

The importance of weight in a changing cost estimating environment
[SAWE PAPER 1854] p 877 A89-52024

Are the Soviets set to make the big time? p 825 A89-52513

US military aircraft coproduction with Japan
[AD-A206430] p 569 A89-24263

Baseline performance verification of the 12th year production UH-60A Black Hawk helicopter
[AD-A206671] p 719 N89-27632

AIRCRAFT PRODUCTION COSTS

The X-31 - High performance at low cost
[AIAA PAPER 89-2122] p 757 A89-48948

Aircraft airframe cost estimating relationships: All mission types
[AD-A200282] p 269 N89-16719

AIRCRAFT RELIABILITY

Introduction of the Hornet - A success story
[SAE PAPER 872436] p 27 A89-10653

Tornado - The first eight years p 2 A89-11450

A Canadian government look at airworthiness

Ada in embedded avionic systems
p 399 N89-18466

Joint University Program for Air Transportation Research, 1987
[NASA-CP-3028]
p 361 N89-19230

Electronics in civil aviation
[NLR-MP-87009-U]
p 476 N89-20129

Study of the real emulation of the electronic integrated system
[PB89-116271]
p 557 N89-22016

Avionics system engineering: An introduction
p 769 N89-27651

Avionic system requirements
p 769 N89-27652

Integrated avionics: Conceptual design
p 769 N89-27654

The evolution of digital avionics architectures/systems
p 770 N89-27655

Avionic system design methodology
p 770 N89-27656

Rapid prototyping of complex avionics systems
p 770 N89-27657

Modeling functional specifications for onboard software
p 770 N89-27658

AXIAL COMPRESSION LOADS

Local buckling and crippling of thin-walled composite structures under axial compression
p 341 A89-27733

Structural loads due to surge in an axial compressor
[PNR90493]
p 401 N89-18491

AXIAL FLOW

A doublet point method for the calculation of unsteady propeller aerodynamics
p 11 A89-11497

Experimental investigation of propfan aeroelastic response in off-axis flow with mistuning
[AIAA PAPER 88-3153]
p 175 A89-17941

AF-2 scheme for solution of axial symmetric transonic inlet-flowfield
p 511 A89-37791

Use of Navier-Stokes code to predict flow phenomena near stall as measured on a 0.658-scale V-22 tiltrotor blade
[AIAA PAPER 89-1814]
p 580 A89-42044

Prediction of the stability limit of multistage axial compressors
p 640 A89-44637

Model predictions of fan response to inlet temperature transients and spatial temperature distortion
[AIAA PAPER 89-2686]
p 650 A89-47016

Experimental investigation of the performance of a supersonic compressor cascade
[NASA-TM-100879]
p 18 N89-10858

Axial velocity density ratio influence on exit flow angle in transonic/supersonic cascades
p 329 N89-16830

An analytical and numerical study of axial flow compressor instability
p 478 N89-20131

Blading Design for Axial Turbomachines
[AGARD-LS-167]
p 777 N89-27661

Performance prediction for axial-flow compressor and turbine blading
p 777 N89-27665

Measurements of mean-flow and turbulence characteristics in a turbojet exhaust using a laser velocimeter
[ISL-CO-226/88]
p 841 N89-28519

AXIAL FLOW PUMPS

A study of turbomachine flow velocities
[AIAA PAPER 89-0839]
p 346 A89-25608

AXIAL FLOW TURBINES

A simple method for solving direct problems of 3-D flow in axial turbomachinery
p 210 A89-22006

Redistribution of an inlet temperature distortion in an axial flow turbine stage
p 255 A89-22286

Transitional flow on axial turbomachine blading
p 445 A89-34811

Prediction of wake-interaction noise in axial-flow machines - Application to helicopter fenestron
p 504 A89-35388

Design point optimization of an axial-flow compressor stage
p 612 A89-41223

Calculation of an axisymmetric stream and analysis of flow in axial-flow turbine stages
p 741 A89-51024

A multi-objective optimum design method for a radial-axial flow turbine with the optimum criteria of blade twist at outlet of blades
p 838 A89-52306

Part 3: Particle trajectories in axial and radial turbomachines and inlet separators
p 260 N89-15922

Three dimensional flow and temperature profile attenuation in an axial flow turbine
[AD-A206736]
p 685 N89-26005

AXIAL LOADS

Effects of axial force on the flutter of high aspect ratio aerofoil blades
p 216 A89-23368

Thermomechanical characterization of Hastelloy-X under uniaxial cyclic loading
p 133 N89-12909

Accurate drag estimation using a single component drag model technique
p 337 N89-16856

AXIAL STRESS

Creep fatigue life prediction for engine hot section materials (isotropic): Fourth year progress review
p 133 N89-12914

AXISYMMETRIC BODIES

Steady and unsteady potential flows around axisymmetric bodies and ring airfoils
p 11 A89-11489

Low-speed pressure distribution on axisymmetric elliptic-nosed bodies
p 149 A89-20147

Effects of energy release on high-speed flows in an axisymmetric combustor
[AIAA PAPER 89-0385]
p 283 A89-25326

Effect of dynamic changes in body configuration on shock structure
[AIAA PAPER 89-0526]
p 285 A89-25421

Viscous drag reduction of a nose body
p 362 A89-29186

Axisymmetric panel flutter of ring-reinforced composite cylindrical shells
[AIAA PAPER 89-1167]
p 417 A89-30658

Potential flow over bodies of revolution in unsteady motion
p 508 A89-36910

Nonaxisymmetric body, supersonic, inviscid dynamic derivative prediction
[AIAA PAPER 89-2195]
p 722 A89-47655

Newtonian flow over axisymmetric bodies
p 736 A89-49948

Evolution of axisymmetric wakes from attached and separated flows
p 818 A89-52945

Calculation of transonic flow past the tail section of a plane or axisymmetric body
p 820 A89-54535

Transonic Navier-Stokes solutions of three-dimensional afterbody flows
[NASA-TM-4111]
p 594 N89-23433

Design optimization of axisymmetric bodies in nonuniform transonic flow
p 670 N89-25206

Laser velocimetry in the close wake of an axisymmetric rear body
[ISL-R-114/87]
p 865 N89-28774

AXISYMMETRIC FLOW

Numerical study of axisymmetric flows in the wake of blunt bodies in the path of supersonic flow of a viscous gas
p 65 A89-13158

Recent developments in transonic flow computation
p 145 A89-18749

Computation of axisymmetric supersonic jet using space marching technique
p 145 A89-18750

Measurements in the field of a spark excited compressible axisymmetric jet
p 203 A89-18948

Holographic measurements of transition and turbulent bursting in supersonic axisymmetric boundary layers
p 215 A89-23185

Inviscid, unsteady, transonic axisymmetric flow with shock waves - Response to time and space-time dependent perturbations
p 512 A89-38129

Effect of slotting on the mixing and noise of an axisymmetric supersonic jet
[AIAA PAPER 89-1052]
p 632 A89-41042

Experiment and computation in hypersonic cavity flows
[AIAA PAPER 89-1842]
p 583 A89-42070

Supersonic flow past a sphere in a gas with a periodic density field structure
p 588 A89-42521

Calculation of an axisymmetric stream and analysis of flow in axial-flow turbine stages
p 741 A89-51024

Subharmonic and fundamental high amplitude excitation of an axisymmetric jet
[NASA-TM-101948]
p 452 N89-20920

Comparison of 3D computation and experiment for non-axisymmetric nozzles
[NASA-CR-182245]
p 452 N89-20921

The inviscid axisymmetric stability of the supersonic flow along a circular cylinder
[NASA-CR-181816]
p 519 N89-22574

Analysis of the wake behind a propeller using the finite element method with a two-equation turbulence model
p 597 N89-24286

Measurements of mean-flow and turbulence characteristics in a turbojet exhaust using a laser velocimeter
[ISL-CO-226/88]
p 841 N89-28519

B-1 AIRCRAFT

Blackjack - Air defence challenge for the 1990s
p 97 A89-15024

B-2 - The end of the long road toward a 'stealth bomber'
p 438 A89-35100

B-1B high AOA testing
p 687 A89-45162

B-1B development testing
p 687 A89-45165

CEPS: An artificial intelligence approach to avionics maintenance
p 201 N89-14749

The B-1B central integrated test system expert parameter system
p 202 N89-14763

Evaluation of RST (Rapidly Solidified Technology) structural durability and life cycle costs
[AD-A199336]
p 252 N89-16031

B-1B CITS engine monitoring
p 319 N89-16788

Strategic bombers: B-1B cost and performance remain uncertain
[AD-A206751]
p 673 N89-25998

B-70 AIRCRAFT

Experimental investigation of dynamic ground effect
p 514 A89-39185

BACKSCATTERING

Electromagnetic backscatter from open-ended circular cylinder with complex termination
p 536 A89-39284

Scattering from three-dimensional cracks
p 565 A89-39588

A 35 GHz helicopter-borne polarimeter radar
p 134 A89-13038

BACKUPS

Back-up control system for f101 engine and its derivatives
[AD-D014051]
p 775 N89-26848

BACKWARD FACING STEPS

Heat transfer in the recirculating region formed by a backward-facing step
p 51 A89-12252

Heat transfer and interferometric study of the flow over a rearward facing step in hypersonic high enthalpy stream
p 64 A89-12887

Supersonic sudden-expansion flow with fluid injection - An experimental and computational study
[AIAA PAPER 89-0389]
p 284 A89-25328

Effect of wall suction on the stability of compressible subsonic flows over smooth two-dimensional backward-facing steps
[AIAA PAPER 89-0983]
p 366 A89-30495

Evaluation of parallel injector configurations for supersonic combustion
[AIAA PAPER 89-2525]
p 878 A89-46898

Investigation on the flow around a backward facing step with spanwise blowing
[CERT-RF-OA-88/2259-AYD]
p 17 N89-10859

BALANCE

Steady-state unbalance responses for a multiplane rotor
p 50 A89-11066

Design of a certifiable primary on-board aircraft weight and balance system
[AIAA PAPER 88-3919]
p 171 A89-18096

The 13-inch magnetic suspension and balance system wind tunnel
[NASA-TM-4090]
p 184 N89-14241

Balance accuracy and repeatability as a limiting parameter in aircraft development force measurements in conventional and cryogenic wind tunnels
p 338 N89-16873

BALANCING

Rotary balances: A selected, annotated bibliography
[NASA-TM-4105]
p 408 N89-18500

High speed balancing applied to the T700 engine
[NASA-CR-180899]
p 497 N89-20472

BALL BEARINGS

Ball and the jack --- ball bearing screw for aircraft actuator linear motion control
p 258 A89-24324

Advantages of ceramic, solid lubricated bearings for small gas turbine engines
[AIAA PAPER 89-2472]
p 703 A89-46858

Characteristics of the combined support of a gas turbine engine in the absence of oil supply to the ball bearing
p 771 A89-47981

Turbomachinery rotor support with damping
[NASA-CASE-MFS-28345-1]
p 865 N89-28841

BALLISTIC RANGES

A research study for the preliminary definition of an aerophysics free-flight laboratory facility
[NASA-CR-184631]
p 250 N89-15932

BALLISTIC TRAJECTORIES

Aeroballistic Research Facility Data Analysis System (ARFAS)
[AD-A204308]
p 542 N89-21810

BALLISTICS

A self-adaptive computational method applied to transonic turbulent projectile aerodynamics
[AIAA PAPER 89-0837]
p 290 A89-25606

A model of the reachability zone and its use in the ballistic design of flight vehicles
p 620 A89-42459

BALLOON FLIGHT

- Base flow investigation behind axi-and non-axisymmetric blunt bodies
[ISL-CO-246/87] p 452 N89-20103
Aeroballistic Research Facility Data Analysis System (ARFAS)
[AD-A204308] p 542 N89-21810

BALLOON FLIGHT

- New application possibilities for balloon-borne case studies - MIKROBA (Microgravity by balloons)
[DGLR PAPER 87-069] p 184 A89-20233
Recent results in the NASA research balloon program
[AIAA PAPER 89-0233] p 269 A89-25199
Concepts for autonomous flight control for a balloon on Mars
p 247 N89-15600
Long duration balloon technology survey, phase 1
[AD-A206975] p 656 N89-25985

BALLOON-BORNE INSTRUMENTS

- Concepts for autonomous flight control for a balloon on Mars
p 247 N89-15600

BALLOONS

- Photogrammetric technique for in-flight ranging of trailing vortices using entrained balloons
[NASA-TM-4129] p 807 N89-27995

BANDPASS FILTERS

- Magnetic bearing stiffness control using frequency band filtering
p 560 N89-22910

BANDSTOP FILTERS

- Magnetic bearing stiffness control using frequency band filtering
p 560 N89-22910

BAROTROPIC FLOW

- Analysis of Doppler radar windshear data
[NASA-CR-181762] p 464 N89-20111

BARRIER LAYERS

- Thermal Barrier Coatings. Abstracts and figures
[NASA-CP-10019] p 185 N89-13642
Development of thermomechanical life prediction models for thermal barrier coatings
p 186 N89-13643
High time service evaluation of thermal barrier coatings on the Rolls-Royce RB211 engine
p 186 N89-13660

BASE FLOW

- Base flow investigation behind axi-and non-axisymmetric blunt bodies
[ISL-CO-246/87] p 452 N89-20103

BASES

- Production of the base component of B-91/115 aviation gasoline using a metal-zeolite catalyst
p 118 A89-13177

BEAMS (SUPPORTS)

- Power flow in a beam using a 5-accelerometer probe
p 124 A89-15096
Matrix analysis method for composite flexbeam
p 190 A89-18926
A refined beam theory for advanced composite rotor blade analysis
p 414 A89-29464
Fault-tolerant sensor and actuator selection for control of flexible structures
p 874 A89-54007
Multi-objective/loading optimization for rotating composite flexbeams
p 668 N89-25157

BEARING

- Evaluation of vibration analysis techniques for the detection of gear and bearing faults in helicopter gearboxes
p 392 A89-30978

BEARING ALLOYS

- Selection of rolling-element bearing steels for long-life applications
p 704 A89-47250

BEARINGLESS ROTORS

- Bearingless rotors and higher harmonic control modeling using RACAP
p 162 A89-18876
Design and fabrication of an advanced light rotor
p 163 A89-18880
Optimal design of an advanced composite rotating flexbeam
p 189 A89-18884
Dynamic characteristics of advanced bearingless rotors at McDonnell Douglas Helicopter Company
p 164 A89-18899
Testing and correlation on an advanced technology, bearingless rotor
p 182 A89-18900
Ground and air resonance of bearingless rotors in hover and forward flight
p 529 N89-21786

BEARINGS

- Experiments and stability predictions of two sets of tilting pad bearings on an overhung rotor
p 124 A89-15008
Strength analysis and fatigue life prediction for load-bearing casing of aeroengine under complex loading
p 127 A89-16865
Modal analysis of continuous rotor-bearing systems
p 188 A89-18766
Stability of whirl and whip in rotor/bearing systems
p 255 A89-22783
The principle of general energy conservation and an application to the stability analysis of a rotor-bearing system
p 255 A89-22797
Vibrations of a horizontal rotor in elastic supports with clearances
p 256 A89-22580

- Vibration analysis for detection of bearing and gear faults within gearboxes - An innovative signal processing approach
p 392 A89-30985

- Assessment of the adequacy of bearing lubrication in a gas turbine engine through openings in the rotating shaft
p 492 A89-34154

- Variation of critical speed of a rotor-bearing system with slight relocation of bearing
p 554 A89-37766

- Study of nonlinear Duffing characteristics of flexible rotor with SFDB --- squeeze film damper bearings
p 700 A89-45568

- Rotordynamic analysis of a bearing tester
p 498 N89-21759

- Rotordynamic Instability Problems in High-Performance Turbomachinery, 1988
[NASA-CP-3026] p 558 N89-22891

- Cavitation effects on the pressure distribution of a squeeze film damper bearing
p 559 N89-22897

- Incorporating general race and housing flexibility and deadband in rolling element bearing analysis
p 561 N89-22912

- Experimental verification of an eddy-current bearing
p 561 N89-22913

- Superconducting Meissner effect bearings for cryogenic turbomachines, phase 1
[AD-A209875] p 865 N89-28839

- On the stress problem of the pebble bed heat exchanger in a hypersonic wind tunnel
[NAL-TM-ST-8705] p 693 N89-25240

- Cockpit management for regional airlines and business aircraft as applied in the Beech Starship
[AIAA PAPER 88-3957] p 173 A89-18126

- An avionics diagnostics system for regional airlines and business aircraft applied in the Beech Starship 1
[SAE PAPER 881374] p 318 A89-28186

- Rotordynamic analysis of a bearing tester
p 498 N89-21759

- The V-22 vibration, structural life, and engine diagnostic system, VSLED
[SAE 871732] p 31 A89-10617

BOUNDARY LAYER SEPARATION

Boundary-layer measurements on an airfoil at low Reynolds numbers
p 4 A89-10106

Self-similar reversed flows in the separation region of a turbulent boundary layer
p 66 A89-13173

A direct aerofol performance code incorporating laminar separation bubble effects
p 68 A89-13536

Asymptotic theory of boundary layer interaction and separation in supersonic gas flow
p 75 A89-14769

Improving the half-model technology in the Goettingen transonic wind tunnel
[DGLR PAPER 87-083] p 183 A89-20234

Moving wall effects in unsteady flow
p 150 A89-20311

Experimental analysis of turbulent separation on an oblate ellipsoid-cylinder
p 208 A89-21095

Nonlinear interactions of perturbations during the turbulent transition in the separation region of a laminar boundary layer
p 209 A89-21580

Smoke wire visualization of unsteady separation over an oscillating airfoil
p 212 A89-22368

Design features which influence flow separations on aircraft
p 217 A89-23873

Application of continuous vorticity panels in three-dimensional lifting flows with partial separation
[AIAA PAPER 89-0117] p 275 A89-25104

On the structure of two- and three-dimensional separation
[AIAA PAPER 89-0287] p 280 A89-25244

Mach number dependence of flow separation induced by normal shock-wave/turbulent boundary-layer interaction at a curved wall
[AIAA PAPER 89-0353] p 282 A89-25298

Vortex generator jets - A means for passive and active control of boundary layer separation
[AIAA PAPER 89-0564] p 287 A89-25453

Boundary layer measurements on an airfoil at low Reynolds numbers in an accelerating flow from a nonzero base velocity
[AIAA PAPER 89-0569] p 288 A89-25458

Unsteady separation wave in a supersonic boundary layer
p 293 A89-26011

Analysis of wings with flow separation
p 361 A89-29163

The delay of turbulent boundary layer separation by oscillatory active control
p 364 A89-29679

Separation control using moving surface effects - A numerical simulation
[AIAA PAPER 89-0972] p 365 A89-30486

Control of flow separation by acoustic excitation
[AIAA PAPER 89-0973] p 365 A89-30487

The delay of turbulent boundary layer separation by oscillatory active control
[AIAA PAPER 89-0975] p 366 A89-30489

Control of separation in diffusers using forced unsteadiness
[AIAA PAPER 89-1015] p 416 A89-30525

Signatures of unsteady separation
[AIAA PAPER 89-1017] p 416 A89-30527

Numerical instabilities in the calculation of laminar separation bubbles and their implications
p 445 A89-34819

Investigation of flow separation in a three-dimensional diffuser using a coupled Euler and boundary-layer method
p 446 A89-35172

Wakes of four complex bodies of revolution at zero angle of attack
p 508 A89-36907

Measurements in separating boundary layers
p 552 A89-36909

Separation shock motion in fin, cylinder, and compression ramp - Induced turbulent interactions
p 509 A89-36911

Separation control on an airfoil by periodic forcing
p 509 A89-36922

Separation shock motion and ensemble-averaged wall pressures in a Mach 5 compression ramp interaction
[AIAA PAPER 89-1853] p 585 A89-42081

Supersonic flow stagnation in a duct during combustion
p 587 A89-42460

Analysis of low Reynolds number separation bubbles using semiempirical methods
p 652 A89-47351

An investigation into wedge-induced turbulent boundary layer separation on a uniformly roughened surface at Mach 6.0
[AIAA PAPER 89-2163] p 720 A89-47630

Euler solutions for delta wings
[AIAA PAPER 89-3398] p 732 A89-49098

Time-dependent boundary-layer response in a propeller slipstream
p 737 A89-50066

Structure of flow past the windward side of V-shaped wings in the presence of turbulent boundary layer separation
p 740 A89-50931

Prediction of secondary separation in shock wave boundary-layer interactions
p 816 A89-51760

Evolution of axisymmetric wakes from attached and separated flows
p 818 A89-52945

Some aspects of aircraft dynamic loads due to flow separation
p 832 A89-52959

Theory for separated flow around the trailing edge of a thin profile
p 820 A89-54614

Experimental results for the Eppler 387 airfoil at low Reynolds numbers in the Langley low-turbulence pressure tunnel
[NASA-TM-4062] p 15 N89-10842

Experimental research on swept shock wave/boundary layer interactions
[AD-A196938] p 53 N89-11189

Management and control of unsteady and turbulent flows
[AD-A198091] p 192 N89-13751

An LDA (Laser-Doppler Anemometry) investigation of three-dimensional normal shock wave boundary-layer interactions
p 456 N89-20956

Effect of riblets upon flow separation in a subsonic diffuser
[AD-A203178] p 458 N89-20967

Numerical simulation of flow over iced airfoils
[AD-A203291] p 458 N89-20969

Two-dimensional Navier-Stokes solution of the flow over a thick supercritical airfoil with strong shock-induced separation
[AD-A203331] p 459 N89-20971

Computational investigation of incompressible airfoil flows at high angles of attack
[AD-A205885] p 522 N89-22590

An experimental study of the effect of streamwise vortices on unsteady turbulent boundary-layer separation
[AD-A205462] p 593 N89-23420

Airfoil self-noise and prediction
[NASA-RP-1218] p 713 N89-25673

Transition and turbulence structure in the boundary layers of an oscillating airfoil
[AD-A208968] p 824 N89-29317

BOUNDARY LAYER STABILITY

Suppression of unstable oscillations in a boundary layer
p 5 A89-10171

On nonlinear aspects of hypersonic boundary-layer stability
p 10 A89-11116

Navier-Stokes simulation for flow past an open cavity
p 78 A89-16096

The role of the mechanism of local secondary instability in the K-breakdown of the boundary layer
p 209 A89-21584

Stability of three-dimensional boundary layers and laminar wings
p 217 A89-23811

Stability and transition of two-dimensional laminar boundary layers in compressible flow over an adiabatic wall
p 270 A89-24922

Stability of 3D wing boundary layer on a SST configuration
[AIAA PAPER 89-0036] p 272 A89-25031

Evolution of perturbations near a surface in supersonic flow
p 294 A89-27384

An experimental study of the formation and evolution of two-dimensional wave packets in a boundary layer
p 416 A89-30206

Excitation of unstable oscillations in a boundary layer by a source in the potential flow region
p 365 A89-30250

Stability and transition in supersonic boundary layers
p 368 A89-31327

Hypersonic boundary-layer transition
p 441 A89-33646

Three-dimensional boundary-layer transition study
p 447 A89-35195

Unsteady interaction effects on a transitional turbine blade boundary layer
p 508 A89-36186

Crossflow-vortex instability and transition on a 45 deg swept wing
[AIAA PAPER 89-1892] p 587 A89-42114

Effect of wall temperature distribution on the stability of the compressible boundary layer
[AIAA PAPER 89-1894] p 587 A89-42116

Laminar boundary layer stability experiments on a cone at Mach 8. V - Tests with a cooled model
[AIAA PAPER 89-1895] p 587 A89-42117

Effect of the adiabatic exponent on the stability and turbulent transition of a supersonic laminar boundary layer
p 588 A89-42567

Boundary layer transition
[CERT-OA-40/5018-AYD] p 53 N89-11187

Stability of compressible boundary layers
p 456 N89-20953

Secondary three-dimensional instability in compressible boundary layers
p 456 N89-20954

Investigation of the development of laminar boundary-layer instabilities along a cooled-wall cone in hypersonic flows
[AD-A202587] p 458 N89-20966

The inviscid axisymmetric stability of the supersonic flow along a circular cylinder
[NASA-CR-181816] p 519 N89-22574

Feasibility and benefits of laminar flow control on supersonic cruise airplanes
[NASA-CR-181817] p 765 N89-26841

BOUNDARY LAYER TRANSITION

Boundary-layer measurements on an airfoil at low Reynolds numbers
p 4 A89-10106

Three-dimensional boundary layer transition on a concave-convex curved wall
p 4 A89-10167

Boundary-layer control for drag reduction
[SAE PAPER 872434] p 6 A89-10651

Boundary-layer transition effects on airplane stability and control
p 39 A89-12556

Flight and windtunnel investigations on boundary layer transition at Reynolds numbers up to 10 to the 7th
p 71 A89-13601

A new boundary layer wind tunnel
p 116 A89-16323

Detection of laminar-turbulent transition by infrared thermography
p 143 A89-17147

Characterization of boundary layer conditions in wind tunnel tests through IR thermography imaging
p 147 A89-19167

Comment on 'Aeroelastic oscillations caused by transitional boundary layers and their attenuation'
p 167 A89-20150

Transition to turbulence on a wing in flight and in a wind tunnel at the same Reynolds numbers
p 209 A89-21581

Holographic measurements of transition and turbulent bursting in supersonic axisymmetric boundary layers
p 215 A89-23185

Stability and transition of two-dimensional laminar boundary layers in compressible flow over an adiabatic wall
p 270 A89-24922

Boundary layer measurements on an airfoil at low Reynolds numbers in an accelerating flow from a nonzero base velocity
[AIAA PAPER 89-0569] p 288 A89-25458

Feasibility study on the design of a laminar flow nacelle
[AIAA PAPER 89-0640] p 311 A89-25506

Boundary layer transition and turbulence modelling in three-dimensional flow
p 346 A89-25860

Wing rock generated by forebody vortices
p 312 A89-27735

Stability and transition in supersonic boundary layers
p 368 A89-31327

Optical boundary-layer transition detection in a transonic wind tunnel

p 33 N89-10836

BUTTERFLY VALVES

Noise generated by a flight weight, air flow control valve in a vertical takeoff and landing aircraft thrust vectoring system
[NASA-CR-182232] p 504 N89-20776

BUTTONS

Button boards - A connectorless high-speed interconnect for avionics
[AIAA PAPER 89-2093] p 768 A89-49452

BYPASS RATIO

Very high bypass ratio engines for commercial transport propulsion p 106 A89-13679
3-D LDA-measurements in the jet of a bypass-engine p 477 A89-33386

Advanced propulsion systems for large subsonic transports
[AIAA PAPER 89-2477] p 677 A89-46861

Ducted ultra-high bypass engine configuration definition
[AIAA PAPER 89-2478] p 678 A89-46862

Technology readiness for advanced ducted engines
[AIAA PAPER 89-2479] p 678 A89-46863

Configuration studies for a regional airliner using open-rotor ultra-high-bypass-ratio engines
[AIAA PAPER 89-2580] p 666 A89-46937

Installation features of advanced, very high bypass turbofan propulsion systems
[AIAA PAPER 89-2141] p 774 A89-49482

Ultra high bypass aircraft sonic fatigue p 831 A89-51898
Propulsion
[PNR90472] p 403 N89-19302

BYPASSES

Optimization of the parameters and characteristics of bypass engines p 613 A89-42467

Effects of bypass air on the combustion of boron particles in a solid fuel ramjet
[AIAA PAPER 89-2886] p 683 A89-47151

C

C-130 AIRCRAFT

C-130 Hercules outer wing residual strength tests p 663 A89-45132

Contamination of environmental control systems in Hercules aircraft
[MRL-R-1116] p 29 N89-10040

Stress analysis report for the Microwave Landing System (MLS) class V modification C-130 aircraft
[AD-A196722] p 91 N89-11730

Electrical load and power source capacity report for the C-130 aircraft Microwave Landing System (MLS) SLIASC model 6216
[AD-A196721] p 102 N89-11737

Damage tolerance evaluation of PEEK (Polyether Ether Ketonel) composites
[DE89-005421] p 411 N89-18533

Pre and post modification electromagnetic compatibility test report for the C-130H self contained navigation system with MLS A-kit, revision
[AD-A205167] p 533 N89-22604

C-135 AIRCRAFT

The damped solution to sonic fatigue in the KC-135 p 98 A89-15098

Past progress and future advances in space laser communications p 250 A89-24068

An experimental study and prediction of a two-phase pressure drop in microgravity
[AIAA PAPER 89-0074] p 343 A89-25065

High-temperature containerless aircraft furnace experimentation in the microgravity environment aboard a KC-135 aircraft
[AIAA PAPER 89-0402] p 345 A89-25337

Acceleration forces aboard NASA KC-135 aircraft during microgravity maneuvers p 620 A89-42022

KC-135R rumble investigation
[AD-A207532] p 812 N89-27464

C-140 AIRCRAFT

Ground vibration test results of a JetStar airplane using impulsive sine excitation
[NASA-TM-100448] p 236 N89-15909

C-160 AIRCRAFT

Study of the aerodynamic situation along the C 160 aircraft in parachuting configuration
[DAT-88-06] p 299 N89-16756

Lightning campaign 85/86 Transall C160 A04: Flying tests
[REPT-85/535800] p 396 N89-19297

C-5 AIRCRAFT

Flying a wind shear in the C-5
[AIAA PAPER 89-3360] p 780 A89-49064

CABIN ATMOSPHERES

Aircraft cabin cooling device KL-A 50/7 p 248 A89-21289

Fire extinguishing agents for oxygen-enriched atmospheres p 487 A89-32948
Chemical warfare protection for the cockpit of future aircraft p 396 N89-19859

CABINS

Analytical prediction and flight test evaluation of Bell ACAP helicopter cabin noise --- Advanced Composite Airframe Program p 164 A89-18911

CABLES

Reliability in fiber optic cable harness manufacturing
[AIAA PAPER 88-3931] p 167 A89-18105

Evaluation of barrier cable impact pad materials
[AD-A204356] p 542 N89-21811

CABLES (ROPES)

Evaluation of barrier cable impact pad materials
[AD-A207554] p 792 N89-26864

CALCULATORS

Pocket calculator trend monitoring for gas turbine engines
[SAE 841461] p 34 A89-10614

CALCULUS OF VARIATIONS

Integral equations in the linear theory of contact problems p 263 A89-23656

CALENDARS

Calendar of selected aeronautical and space meetings
[AGARD-CAL-88/2] p 566 N89-23361

CALIBRATING

Convergence schemes for an adaptive-wall wind tunnel p 41 A89-12560

Inertial guidance test facility using the earth environment p 700 A89-46218

Estimating electric field enhancement factors on an aircraft utilizing a small scale model: A method evaluation p 21 N89-10454

Theoretical derivation and calibration technique of a hemispherical-tipped, five-hole probe
[NASA-TM-4047] p 151 N89-13396

The measurement of temperature from an aircraft in cloud p 353 N89-17978

Position error calibration of a pressure survey aircraft using a trailing cone
[PB88-250733] p 450 N89-20092

Evaluation of nondestructive test equipment for airfield pavements. Phase 1: Calibration test results and field data collection
[AD-A207159] p 694 N89-26020

Compressor blade clearance measurement system
[AD-D014073] p 776 N89-26850

Evaluation of a strain-gage load calibration on a low-aspect-ratio wing structure at elevated temperature
[NASA-TP-2921] p 807 N89-28034

The acoustic calibration of aircraft fuselage structures, part 1
[ISVR-TR-169-PT-1] p 877 N89-29158

CAMBER

An experimental investigation of the aerodynamic loads on cambered plates
[AIAA PAPER 89-0935] p 447 A89-35244

Influence of thickness and camber on the aeroelastic stability of supersonic throughflow fans: An engineering approach
[NASA-TM-101949] p 656 N89-25957

CAMBERED WINGS

Evaluation of leading- and trailing-edge flaps on flat and cambered delta wings at supersonic speeds
[AIAA PAPER 89-0027] p 272 A89-25023

Measured and predicted pressure distributions on the AFTI/F-111 mission adaptive wing
[NASA-TM-100443] p 235 N89-15908

Boundaries of linear characteristics of cambered and twisted wings at subcritical Mach numbers
[ESDU-88030] p 298 N89-16735

CAMOUFLAGE

Stealth technology for reducing aircraft recognition
[AD-A196873] p 673 A89-44645

Camouflage cap allows aircraft to disappear p 838 A89-54482

CANARD CONFIGURATIONS

Comparison of longitudinally stabilized behavior in vertical turbulence between a modern canard configuration and a conventional aircraft
[DGLR PAPER 87-078] p 39 A89-10515

Another chance for canards p 61 A89-12954

Multivariable control system design for an unstable canard aircraft p 111 A89-13526

Investigations on the vorticity sheets of a close-coupled delta-canard configuration p 69 A89-13566

Canard/LEF design for a multi-mission fighter aircraft p 97 A89-13674

Automatic robust landing control system design for ente plane using equivalent nonlinear elimination method --- for canard-configured aircraft p 244 A89-23977

Transonic Euler solutions on a blunt, body-wing-canard configuration p 218 A89-24242

Tip vortex/airfoil interaction for a canard//wing configuration at low Reynolds numbers
[AIAA PAPER 89-0536] p 286 A89-25430

Low speed aerodynamics of canard configurations p 294 A89-26689

Development and implementation of flight control system for a research drop model p 481 A89-33563

Investigations on the vorticity sheets of a close-coupled delta-canard configuration p 579 A89-42017

Measurements of the aerodynamic characteristics of various wing-canard configurations and comparison with NLVLM results p 723 A89-47674

Unsteady flows produced by small amplitude oscillations of the canard of an X-29 model
[AIAA PAPER 89-2229] p 724 A89-47685

What drives unique configurations p 764 A89-51352

A VSAERO analysis of several canard configured aircraft
[SAE PAPER 881485] p 764 A89-51362

Flow around a delta wing with or without a canard (Phi BA = 60 deg). Part 2: Hydrodynamic visualizations in unsteady flow (pitching oscillations)
[ONERA-RT-11/2891-AN-PT-2] p 17 N89-10860

Design synthesis for canard-delta combat aircraft, volumes 1 and 2 p 316 N89-17590

Validation of a user-friendly CFD code for prediction of the aerodynamic characteristics of flight vehicles p 395 N89-18654

Documentation of separated flows for computational fluid dynamics validation p 424 N89-18662

Multivariable control law design for the Control Reconfigurable Combat Aircraft (CRCA)
[AD-A202697] p 540 N89-21803

Compressible Euler solution around a wing canard sting configuration
[FFA-TN-1988-62] p 519 N89-22578

Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations with canard controls
[FFA-TN-1988-11] p 531 N89-22601

CANOPIES

Simulation of a birdstrike impact on aircraft canopy material p 25 A89-10113

Performance prediction analysis for fully deployed parachute canopies p 155 A89-20314

New solution method for steady-state canopy structural loads p 155 A89-20321

A control canopy release method for improved opening of clustered parachutes
[AIAA PAPER 89-0892] p 461 A89-35210

A revision of the added mass concept as applied to parachute motion
[AIAA PAPER 89-0895] p 461 A89-35213

Calculated and experimental stresses in solid and ring slot parachutes p 523 A89-39200

Glazing into the future --- shielding coatings for military cockpit canopies p 832 A89-52525

An optimal material removal strategy for automated repair of aircraft canopies p 874 A89-53416

Flow field characteristics around bluff parachute canopies p 87 N89-12546

High Reynolds number incompressible flow simulation about parachute canopies and similar bluff bodies p 450 N89-20096

CANTILEVER BEAMS

Nonlinear analysis of a cantilever beam --- General Rotorcraft Aeromechanical Stability Program p 229 A89-23192

Mechanical durability prediction methods p 701 A89-46468

Structural optimization including centrifugal and Coriolis effects
[AD-A196873] p 139 N89-12356

CANTILEVER MEMBERS

Design and analysis of a high speed composite material wing flutter model p 96 A89-13661

Aeroelastic flutter of low aspect ratio cantilever composite plate p 347 A89-26281

CANTILEVER PLATES

Transverse vibrations of a trapezoidal cantilever plate of variable thickness p 622 A89-40914

CAPACITANCE

Recent advances in capacitance type of blade tip clearance measurements
[AIAA PAPER 88-4664] p 106 A89-13725

CAPTURE EFFECT

Simulated final approach path captures using the microwave landing system
[NASA-CR-181696] p 227 N89-15099

Full-potential integral solutions for steady and unsteady transonic airfoils with and without embedded Euler domains p 301 N89-17566

CARBON DIOXIDE

Fueling our transportation engines after the petroleum is gone p 61 A89-15420

CARBON DIOXIDE LASERS

Past progress and future advances in space laser communications p 250 A89-24068

CARBON FIBER REINFORCED PLASTICS

Buckling and postbuckling behaviour of composite panels p 122 A89-13594

The buckling and postbuckling behaviour of curved CFRP laminated shear panels p 123 A89-13595

Supportability of composite airframes - Civilian and military aspects p 99 A89-16080

Carbon fibre composite on the Viggan aircraft p 99 A89-16082

Carbon fiber composites for supersonic technology [DGLR PAPER 87-124] p 185 A89-20244

Radiation-curable carbon fiber prepreg composites p 251 A89-22613

Creep behaviour of carbon fibre reinforced polyetheretherketone and epoxy resin [MBB-Z-178-88-PUB] p 251 A89-22890

Vibration and flutter analysis of composite wing panels p 346 A89-26273

Thermal ageing of poly(aryl-ether-ether ketone) (PEEK) - The role of carbon p 410 A89-29962

Economic issues in composites manufacturing --- for aircraft p 359 A89-30554

Development of a monolithic fuselage shell using CFRP [MBB-FE-234-S-PUB-338] p 606 A89-42934

The use of fiber reinforced thermoplastics as a primary structure on the McDonnell Douglas AH-64 Apache helicopter [SAWE PAPER 1850] p 763 A89-50832

The design, construction and test of a postbuckled, carbon fibre reinforced plastic wing box p 315 A89-16773

Typical joints in a wing structure p 317 A89-17693

Test specimens for bearing and by-pass stress interaction in carbon fibre reinforced plastic laminates p 342 A89-17696

Mechanism of single shear fastened joints p 352 A89-17700

Joining of carbon fiber composite with fasteners p 343 A89-17701

Development and testing of critical components for technological preparation of an Airbus-CFRP-fuselage, phase 2 [MBB-UT-129/87] p 531 A89-22600

Tests of new materials with second generation carbon fibers, test report [REPT-47-188/F] p 550 A89-22702

CSPC test 319.30: Study on impact tolerance of prepregged carbon-epoxy systems [REPT-47-323/F] p 550 A89-22703

CARBON FIBERS

Finite difference analysis of external and internal lightning response of the JAS39 CFC wing p 22 A89-10483

Indirect effects on electronic and mechanical systems installed in carbon fibre compound aircraft structures p 22 A89-10492

Diminution and longitudinal splitting of carbon fibers due to grinding [AD-A196697] p 119 A89-11819

The quality of fibre reinforced thermoplastics mouldings p 196 A89-13839

CARBON MONOXIDE

Some characteristics of the formation of contaminants during the combustion of hydrocarbon fuels in the combustion chambers of gas turbine engines p 488 A89-34120

CARBON-CARBON COMPOSITES

Carbon/carbon composite materials for aircraft brakes p 165 A89-19427

Embedded temperature measurements in a carbon-carbon wing leading edge hot structure p 697 A89-43843

Bolted scarf joints in carbon composite materials. Comparison between assemblies with an interference fit and those with play p 343 A89-17702

CARBONACEOUS MATERIALS

A proposal for funding to purchase a high-temperature furnace to enable determination of the high temperature mechanical properties of structural carbon materials [AD-A204103] p 542 A89-21809

CARBURIZING

Qualification of high temperature vacuum carburizing for an aircraft gear steel p 824 A89-41598

The measurement of residual stresses in case hardened bearing components by X-ray diffraction [PNR90482] p 425 A89-18689

CARET WINGS

Supersonic flow past caret wings and elements of star-shaped bodies at angles of attack and bank p 449 A89-35481

Waverider, volume 2 [NASA-CR-184700] p 380 A89-18408

CARGO AIRCRAFT

Soviet aerospace industry - Certification of super heavy-lift Antonov An-225 planned for 1990 p 587 A89-41061

Loadability considerations in preliminary design --- of military cargo aircraft [SAWE PAPER 1840] p 763 A89-50826

AT3 demonstrates feasibility of cargo STOL with long range p 832 A89-52201

CARIBBEAN REGION

Aviation technology applicable to developing regions [NASA-TM-89425] p 23 A89-10872

CARRIER TO NOISE RATIOS

High-dynamic GPS tracking [NASA-CR-184868] p 465 A89-20113

CARTESIAN COORDINATES

Navier-Stokes calculations using Cartesian grids. I - Laminar flows p 150 A89-20180

An adaptive Cartesian mesh algorithm for the Euler equations in arbitrary geometries [AIAA PAPER 89-1930] p 572 A89-41777

Generation of a grid for a finite difference calculation of flows around an aircraft in Cartesian coordinates [NAL-TR-956] p 58 A89-10563

Trajectory scoring in rectangular coordinates using transponder-interrogator range and range rate data [DE89-007005] p 466 A89-20119

CASCADE CONTROL

Experimental cascaded doubly fed variable speed constant frequency generator system [SAE PAPER 881409] p 324 A89-28258

A multiloop, digital flutter suppression control law synthesis case study [AIAA PAPER 89-3556] p 848 A89-52642

Application of Foraythe method in stabilizing and decoupling speed and height in F4 phantom aircraft [ETN-89-93568] p 246 A89-15119

CASCADE FLOW

A second-order numerical method for the analysis of two-dimensional flow of ideal fluid through a cascade with supersonic input p 8 A89-10607

Flow performance of reversed tandem cascades with double-circular arc profile for compressor stator p 7 A89-11036

Numerical simulation of steady transonic flow past an 8-percent DCA cascade at a freestream Mach number of about 1 p 8 A89-11073

Numerical simulation of turbulent flow through tandem cascade p 87 A89-13519

Investigation of oscillating cascade aerodynamics by an experimental influence coefficient technique [AIAA PAPER 88-2815] p 75 A89-14976

Experimental study on unsteady aerodynamic characteristics of an oscillating cascade with tip clearance p 148 A89-19927

Numerical analysis of cascade viscous flow using the Navier-Stokes equations p 210 A89-22004

Numerical simulation of real flow field with transonic cascades p 210 A89-22005

An experimental investigation on the flutter of the cascade of turbomachinery in the transonic flow p 210 A89-22029

Computation of three-dimensional viscous linear cascade flows p 215 A89-23186

Numerical integration of the blade-to-blade surface Euler equations in vibrating cascades p 240 A89-23187

Preparation of experimental studies of cascade vibrations p 240 A89-23816

Relation between diffusor losses and the inlet flow conditions of turbojet combustors p 322 A89-24916

Prediction of 3D multi-stage turbine flow field using a multiple-grid Euler solver [AIAA PAPER 89-0203] p 277 A89-25178

Adaptive grid embedding Navier-Stokes technique for cascade flows [AIAA PAPER 89-0204] p 277 A89-25179

A simple time-accurate turbomachinery algorithm with numerical solutions of an uneven blade count configuration [AIAA PAPER 89-0206] p 344 A89-25181

Evaluation of an OH grid formulation for viscous cascade flows [AIAA PAPER 89-0207] p 277 A89-25182

Passage-averaged Navier-Stokes equations with finite element applications [AIAA PAPER 89-0208] p 344 A89-25183

Oscillating aerodynamics and flutter of an aerodynamically detuned cascade in an incompressible flow [AIAA PAPER 89-0289] p 280 A89-25246

Computations of 3D viscous flows in rotating turbomachinery blades [AIAA PAPER 89-0323] p 281 A89-25273

Experimental investigation of transonic oscillating cascade aerodynamics [AIAA PAPER 89-0321] p 293 A89-26369

Unsteady Euler cascade analysis [AIAA PAPER 89-0322] p 295 A89-28406

Numerical analysis of flow through oscillating cascade sections [AIAA PAPER 89-0437] p 296 A89-28413

Time domain unsteady incompressible cascade airfoil theory for helicopter rotors in hover p 362 A89-29184

Application of a full-potential solver to bending-torsion flutter in cascades [AIAA PAPER 89-1386] p 404 A89-30859

Variational finite element calculation for hybrid cascade flow problem of type-A on an arbitrary stream sheet p 369 A89-31520

Oscillating incompressible aerodynamics of a loaded airfoil cascade p 371 A89-31916

Computational aerodynamics of oscillating cascades with the evolution of stall p 371 A89-31918

Optimal profile selection in the design of a subsonic turbine cascade p 442 A89-34152

Incompressible cascade calculation using an upwind differenced TVD scheme p 444 A89-34733

Computational study of the effect of cascade parameters on stall propagation in axial compressors p 444 A89-34737

A linear computer code to determine aeroelastic stability in airfoil cascades at unsteady flow conditions p 444 A89-34748

A comparison of secondary flow in a vane cascade and a curved duct p 446 A89-34934

A numerical investigation of steady transonic cascade flow in turbomachinery p 448 A89-35417

A method for calculating potential transonic flows in turbomachinery cascades p 449 A89-35450

Unsteady interaction effects on a transitional turbine blade boundary layer p 508 A89-36186

Calculation of unsteady flows in turbomachinery using the linearized Euler equations p 552 A89-36916

Navier-Stokes computations of two- and three-dimensional cascade flowfields p 514 A89-39035

A physical model of the streamwise corner vortices in a compressor cascade p 515 A89-39473

Far field numerical boundary conditions for internal and cascade flow computations [AIAA PAPER 89-1943] p 573 A89-41790

Three dimensional analysis of a rotor in forward flight [AIAA PAPER 89-1815] p 580 A89-42045

Multigrid solution of the Euler equations for three-dimensional cascade flows [AIAA PAPER 89-1818] p 581 A89-42048

Numerical solution of transonic potential flow in 2D compressor cascades using multi-grid techniques p 589 A89-42837

Computation of flow and losses in transonic turbine cascades p 589 A89-43108

The unsteady flow in the far field of an isolated blade row p 591 A89-43537

Transonic cascade flow solved by the combined shock-capturing and shock-fitting method p 639 A89-44114

Multigrid calculations for cascades p 643 A89-45391

Effects of axial velocity density ratio on cascade performances p 645 A89-45565

Experimental investigation on characteristics of single and tandem blade cascades with double-circular arc profile p 676 A89-45567

A validation of a Navier-Stokes 2D solver for transonic turbine cascade flows [AIAA PAPER 89-2451] p 647 A89-46839

Two-dimensional computations of multi-stage compressor flows using a zonal approach [AIAA PAPER 89-2452] p 647 A89-46840

Application of simple wave theory to the radiative boundary conditions required for an internal flow Euler solver [AIAA PAPER 89-2577] p 648 A89-46935

Steady-state and time-dependent aerodynamics in an annular turbine cascade operating at high subsonic Mach numbers [AIAA PAPER 89-2941] p 651 A89-47185

Multigrid calculation of transonic full potential flows over airfoil and cascade p 738 A89-50173

On the improvement of the rotor blade loss model of axial flow fan and compressor including the effect of rotation and its application p 739 A89-50659

Numerical simulation for unsteady flow in oscillating cascade with propagating stall using discrete vortex method p 739 A89-50660

- COEFFICIENT OF FRICTION**
Tribological properties of alumina-boria-silicate fabric from 25 C to 850 C
p 859 A89-54982
- COHERENT RADAR**
A lightweight MPRF airborne radar - A system point of view --- Medium Pulse Repetition Frequency
p 767 A89-48303
- COHERENT RADIATION**
Coherent Raman spectroscopy for supersonic flow measurements
p 83 N89-11699
- COLD FLOW TESTS**
Cold flow measurements for a double swirler combustor
p 675 A89-45557
A static investigation of several STOVL exhaust system concepts
[AIAA PAPER 89-2928] p 684 A89-47180
- COLD GAS**
Influence of vane/blade spacing and injection on stage heat-flux distributions
p 325 A89-28342
- COLD ROLLING**
Optimization of the cold roll-forging of axial-flow compressor blades with allowance for fatigue characteristics
p 625 A89-42421
- COLD SURFACES**
Convective heat transfer in a boundary layer behind a shock wave propagating along a flat plate with a sharp leading edge - A calculation method and a comparison with experimental data
p 144 A89-18546
- COLD WEATHER**
Aerostat cold weather study
[AD-A207299] p 747 N89-27635
- COLD WORKING**
Fatigue life influence of residual stresses from cold working and high spectrum loads in aircraft structural design
p 46 A89-10099
Fatigue life improvement of thick sections by hole cold expansion
p 118 A89-13561
Stresses and strains in a cold-worked annulus
[AR-005-548] p 866 N89-28871

COLLAPSE

Prediction of parachute collapse due to wake recontact

[AIAA PAPER 89-0901] p 447 A89-35218

COLLISION AVOIDANCE

Operational findings from a Traffic Alert and Collision Avoidance System (TCAS) evaluation

[SAE PAPER 880943] p 32 A89-12321

Results of the in-service evaluation of the traffic alert and collision avoidance system industry prototype

[AIAA PAPER 88-3915] p 171 A89-18092

Simulation evaluation of helicopter Terrain Following/Terrain Avoidance concepts

[AIAA PAPER 88-3924] p 180 A89-18101

A simplified aircraft collision avoidance system

[AIAA PAPER 88-3961] p 173 A89-18128

Data link organization in Mode S secondary surveillance radar systems - Operational compatibility with other Mode S systems

[AIAA PAPER 88-4003] p 159 A89-18157

Development of the Traffic Alert and Collision Avoidance System III (TCAS III)

[AIAA PAPER 88-4002] p 159 A89-18182

TCAS III - Bringing operational compatibility to airborne collision avoidance

[AIAA PAPER 88-4004] p 159 A89-18183

The general rule of birds colliding against aeroplanes and anticollision measures

p 155 A89-19810

Passive TCAS is undergoing evaluation

p 236 A89-21818

LIRAS - A proposal for an airport traffic safety system

p 308 A89-28293

Estimating projections of the playable set

p 430 A89-31459

Civilian RPVs - Eye in the sky or pie in the sky?

p 437 A89-33560

The aviation wire strike problem - The duty to warn of this aerial hazard

p 522 A89-38878

Coming to terms with TCAS

p 522 A89-39088

Automatic conflict detection logic for future air traffic control

p 525 A89-39829

General ideas concerning CAS systems

p 768 A89-50375

In-service evaluation of the Traffic Alert and Collision Avoidance System (TCAS) industry prototype

[DOT/FAA/SA-88/2] p 25 N89-10885

Human factors aspects of the traffic alert and collision avoidance system (TCAS II)

[AD-A196811] p 91 N89-11731

An evaluation of ground collision avoidance system algorithm

[AD-A197831] p 91 N89-12560

Comparison of the general dynamics ground clobber algorithm with the GCAS and laws algorithms

[AD-A198479] p 157 N89-14226

The Traffic-Alert and Collision Avoidance System (TCAS) in the glass cockpit

[NASA-TM-101036] p 238 N89-15911

Improved computer simulation of the TCAS 3 circular array mounted on an aircraft

[NASA-CR-184907] p 496 N89-20363

Ground collision warning system performance criteria for high maneuverability aircraft

[AD-A204390] p 523 N89-21779

Description of the derivation of the collision risk model used in the vertical separation simulation risk model

[AD-A205109] p 523 N89-21781

A mathematical formulation for planning automated aircraft separations for AERA 3

[DOT/FAA/DS-89/20] p 752 N89-27646

Collision avoidance operational concept

[WP-88W00418] p 831 N89-28509

COLLISIONS

Ground collision warning system performance criteria for high maneuverability aircraft

[AD-A204390] p 523 N89-21779

COLLOCATION

ILS/MLS collocation tests at Miami/Tamiami, Florida

[NASA-CR-185715] p 751 N89-26832

An operational demonstration and flight test of the Microwave Landing System (MLS) at the Miami/Tamiami, Florida Airport

[DOT/FAA/CT-TN89/37] p 752 N89-26833

COLOR

Use of color displays in the A320 cockpit

[SAE PAPER 881416] p 319 A89-28200

Color helium bubble flow-visualization technique

p 556 A89-39186

Method for laminar boundary layer transition visualization in flight

[NASA-CASE-LAR-13554-1] p 87 N89-12551

A helmet-mounted virtual environment display system

[AD-A203055] p 476 N89-20994

The Schlieren Observation System installed in the NAL two-dimensional high-Reynolds number transonic wind tunnel and attempts to improve it

[NAL-TR-964] p 693 N89-26015

COLOR CODING

Color displays can reduce workload

p 532 A89-38949

The efficacy of color-coded symbols to enhance air-traffic control displays

[AD-A201594] p 385 N89-19284

Aircraft color displays: Chromaticity and luminance requirements

[AD-A206786] p 749 N89-26828

COLOR PHOTOGRAPHY

Aircraft and cloud sky simulator

p 429 A89-29529

COMBAT

TEAS - An AI based threat response recommendation system

p 398 A89-31611

Testing for agility - A progress report

p 686 A89-45152

Cooperative simulation effectiveness analysis

[AIAA PAPER 89-3338] p 788 A89-48424

Full field of view dome display system

[AIAA PAPER 89-3316] p 788 A89-48425

The RAE combat aircraft multi-variate optimisation method

[AIAA PAPER 89-2080] p 759 A89-49444

Combat aircraft mission tradeoff models for conceptual design evaluation

p 102 N89-11736

The importance of aircraft performance and signature reduction upon combat survivability

[AD-A202106] p 396 N89-19292

COMBUSTIBLE FLOW

The role of mixing and kinetics in heat release decrease in the supersonic combustion of unmixed gases in expanding ducts

p 250 A89-22227

Flowfield modifications of combustion rates in unstable ramjets

[AIAA PAPER 89-0105] p 322 A89-25092

Effects of energy release on high-speed flows in an axisymmetric combustor

[AIAA PAPER 89-0385] p 283 A89-25326

Nonequilibrium effects for hypersonic transitional flows using continuum approach

[AIAA PAPER 89-0461] p 284 A89-25377

Scramjet analysis with chemical reaction using three-dimensional approximate factorization

[AIAA PAPER 89-0672] p 323 A89-25533

Modular analysis of scramjet flowfields

p 325 A89-28337

Combustor air flow prediction capability comparing several turbulence models

p 349 A89-28345

Jet flows of reacting gases --- Russian book

p 416 A89-30254

Highly-resolved flowfield induced by Mach reflection

p 512 A89-38125

Characteristics of dump combustor flows

p 612 A89-41224

Determination of computational time step for chemically reacting flows

[AIAA PAPER 89-1855] p 585 A89-42083

Supersonic flow stagnation in a duct during combustion

p 587 A89-42460

Efficient computational tool for ramjet combustor research

[AIAA PAPER 88-0060] p 674 A89-44108

Review of passive shear-flow control research for improved subsonic and supersonic combustion

[AIAA PAPER 89-2786] p 703 A89-47083

Mixing enhancement in a supersonic combustor

[AIAA PAPER 89-2794] p 681 A89-47088

Study of three-dimensional gas-turbine combustor flows

p 773 A89-48522

Experimental study of a reverse flow combustor - Influence of primary holes on combustor efficiency

[ONERA, TP NO. 1989-77] p 773 A89-48759

Turbulent reactive flows

p 857 A89-51860

Mixing augmentation technique for hypervelocity scramjets

p 840 A89-53351

Combustion-related shear-flow dynamics in elliptic supersonic jets

p 819 A89-53930

Flame driving of longitudinal instabilities in liquid fueled dump combustors

[AD-A201293] p 412 N89-19392

High density fuel effects

[AD-A202426] p 490 N89-21125

An explicit Runge-Kutta method for turbulent reacting flow calculations

[NASA-TM-101945] p 536 N89-21799

COMBUSTION

The ram accelerator and its applications - A new approach for reaching ultrahigh velocities

p 63 A89-12884

Turbine Engine Hot Section Technology, 1987

[NASA-CP-2493] p 351 N89-17298

Measurement uncertainty within the Uniform Engine Test Programme

[AGARD-AG-307] p 776 N89-26854

COMBUSTION CHAMBERS

A design method of 'wigglesnap' film-cooling construction of flame tube

p 50 A89-11039

Calculations of the unsteady, three-dimensional flow field inside a motored Wankel engine

[SAE PAPER 880625] p 37 A89-12307

Sensitivity of supersonic combustion to combustor/flameholder design

p 105 A89-13511

Thermal measurements for jets in disturbed and undisturbed crosswind conditions

p 107 A89-16102

Laser-induced-fluorescence visualization of transverse gaseous injection in a nonreacting supersonic combustor

p 107 A89-16465

Selected papers on fundamental aspects of gas turbine combustion --- Book

p 177 A89-20625

Development of an analytical model to assess fuel property effects on combustor performance

p 238 A89-20949

3-D combustor performance validation with high density fuels

[AIAA PAPER 89-0219] p 340 A89-25193

Turbulent mixing in supersonic combustion systems

[AIAA PAPER 89-0260] p 323 A89-25218

Effects of energy release on high-speed flows in an axisymmetric combustor

[AIAA PAPER 89-0385] p 283 A89-25326

Experimental and analytical study on exit radial temperature profile of experimental 2D combustor

[AIAA PAPER 89-0493] p 340 A89-25403

Combined tangential-normal injection into a supersonic flow

[AIAA PAPER 89-0622] p 288 A89-25492

Low frequency pressure oscillations in a model ramjet combustor - The nature of frequency selection

[AIAA PAPER 89-0623] p 323 A89-25493

Acoustic-vortex interactions and low-frequency oscillations in axisymmetric combustors --- of ramjet engines

p 325 A89-28336

The influence of a radial swirl generator on the flow field from a fuel nozzle model

p 490 A89-33354

Heat transfer in gas turbine combustors

p 491 A89-33580

A new method for the thermodynamic calculation of combustion chambers

p 478 A89-34409

Laser-induced iodine fluorescence technique for quantitative measurement in a nonreacting supersonic combustor

p 445 A89-34809

A study on exit radial temperature profile of 2D experimental combustor

p 535 A89-37759

Research on temperature profile factor at exit in an annular combustor

p 535 A89-37769

Aerodynamic device for generating mono-disperse fuel droplets

p 554 A89-37878

Isothermal flow in a gas turbine combustor - A benchmark experimental study

p 514 A89-38873

Investigation of a small solid fuel ramjet combustor

p 544 A89-39028

A research experiment of discrete fuel injection in aero-engine combustion chamber

p 536 A89-39480

Characteristics of dump combustor flows

p 612 A89-41224

PNS code assessment studies for scramjet combustor and nozzle flowfields

[AIAA PAPER 89-1697] p 613 A89-43213

Advanced turbofan engine combustion system design and test verification

p 675 A89-44117

The instability and acoustic wave modes of supersonic mixing layers inside a rectangular channel

p 699 A89-45453

Effects of fuel chemical properties on exhaust smoke from gas turbine combustor

p 695 A89-45554

An experimental research on mixture pressure loss in combustor

p 675 A89-45556

Cold flow measurements for a double swirler combustor

p 675 A89-45557

Evaluation of parallel injector configurations for supersonic combustion

[AIAA PAPER 89-2525] p 678 A89-46898

A numerical investigation of scramjet combustors

[AIAA PAPER 89-2561] p 679 A89-46926

Mixing enhancement in a supersonic combustor

[AIAA PAPER 89-2794] p 681 A89-47088

Improving the development process for main combustor exit temperature distribution
[AIAA PAPER 89-2804] p 681 A89-47094

A 3-D analysis of gas turbine combustors
[AIAA PAPER 89-2888] p 683 A89-47153

Combustion characteristics of gaseous flames in a gas turbine combustor
[AIAA PAPER 89-2892] p 683 A89-47155

Investigation of low NOx staged combustor concept in high-speed civil transport engines
[AIAA PAPER 89-2942] p 684 A89-47186

Evaluation of novel igniters in a turbulent bomb facility and a turbo-annular gas turbine combustor
[AIAA PAPER 89-2944] p 684 A89-47188

Determination of the frequency characteristics of the combustion chamber cycle
p 771 A89-47967

Study of three-dimensional gas-turbine combustor flows
p 773 A89-48522

Aspects of the numerical simulation of turbulent flow in combustor type configurations
p 775 A89-50373

Fuel properties effect on the performance of a small high temperature rise combustor
[AIAA PAPER 89-2901] p 838 A89-52025

Unsteady heat transfer in turbine blade ducts - Focus on combustor sources
p 862 A89-53286

Turbofan forced mixer lobe flow modeling. Part 3: Application to augment engines
[NASA-CR-4147-Pt-3] p 14 N89-10025

Numerical simulations of the flowfield in central-dump ramjet combustors. Part 2: Effects of inlet and combustor acoustics
[AD-A196743] p 108 N89-11745

Turbine Engine Hot Section Technology (HOST) Project
p 110 N89-12877

HOST structural analysis program overview
p 130 N89-12881

Further development of the dynamic gas temperature measurement system
p 130 N89-12884

Aerothermal modeling program, phase 2
p 131 N89-12890

Aerothermal modeling program, phase 2. Element B: Flow interaction experiment
p 131 N89-12891

Aerothermal modeling program, phase 2. Element C: Fuel injector-air swirl characterization
p 131 N89-12892

Combustor diffuser interaction program
p 110 N89-12893

Efficient numerical techniques for complex fluid flows
p 131 N89-12894

On 3D inelastic analysis methods for hot section components
p 132 N89-12906

Component specific modeling
p 110 N89-12907

Elevated temperature crack growth
p 133 N89-12915

LDV measurements in an annular combustor model
[NASA-CR-182207] p 192 N89-13755

Measurements of gas turbine combustor and engine augmentor tube sooting characteristics
[AD-A199768] p 328 N89-16821

Three-dimensional inelastic analysis methods for hot section components
p 351 N89-17316

Structural response of an advanced combustor liner: Test and analysis
p 351 N89-17329

Requirements in the development of gas turbine combustors
[PNR90528] p 402 N89-18496

Current diagnostic practice in gas turbine combustors
[PNR90530] p 403 N89-19306

Flame driving of longitudinal instabilities in liquid fueled dump combustors
[AD-A201293] p 412 N89-19392

Assessment, development, and application of combustor aerothermal models
p 479 N89-20138

Structural analysis applications
p 480 N89-20141

Development of a rotary valve for pulse combustion applications
[PB89-131114] p 496 N89-20468

High density fuel effects
[AD-A202426] p 490 N89-21125

Investigation of low NOx staged combustor concept in high-speed civil transport engines
[NASA-TM-101977] p 537 N89-22606

The demonstration of monolithic and composite ceramics in aircraft gas turbine combustors
p 550 N89-22665

Combustor flow visualization using innovative infrared thermographics techniques
[AD-A205905] p 550 N89-22718

Experiment on a cylindrical scramjet combustor. 2: Simulated flight Mach number 6.7
[NAL-TR-969] p 613 N89-23464

Fuel properties effect on the performance of a small high temperature rise combustor
[NASA-TM-102096] p 685 N89-25238

COMBUSTION CONTROL

Variable geometry control of reacting shear layers
[AIAA PAPER 89-0979] p 411 A89-30492

Fuels combustion research
[AD-A204161] p 490 N89-21071

Engine combustion optimization by exhaust analysis
[PB89-195788] p 859 N89-28588

COMBUSTION EFFICIENCY

Development of an analytical model to assess fuel property effects on combustor performance
p 238 A89-20949

Experimental study of distributions at exit of turbojet afterburner using gas analysis system
p 239 A89-22009

Correlations of high density fuel effects
[AIAA PAPER 89-0216] p 340 A89-25190

3-D combustor performance validation with high density fuels
[AIAA PAPER 89-0219] p 340 A89-25193

An investigation of the physical and chemical factors affecting the performance of fuels in the JFTOT --- Jet Fuel Thermal Oxidation Tester
[SAE PAPER 881533] p 341 A89-28242

Investigation of a small solid fuel ramjet combustor
p 544 A89-39028

The model of combustion efficiency and calculation of flow properties for scramjet combustor
p 611 A89-41115

Experimental research on swirling combustion efficiency
p 675 A89-45558

Combustion enhancement in supersonic coaxial flows
[AIAA PAPER 89-2788] p 681 A89-47084

The influence of swirl and fuel composition of boron-containing fuels on combustion in a solid fuel ramjet combustion chamber
[AIAA PAPER 89-2885] p 683 A89-47150

Effects of bypass air on the combustion of boron particles in a solid fuel ramjet
[AIAA PAPER 89-2886] p 683 A89-47151

Investigation of low NOx staged combustor concept in high-speed civil transport engines
[AIAA PAPER 89-2942] p 684 A89-47186

Experimental study of a reverse flow combustor - Influence of primary holes on combustor efficiency
[ONERA, TP NO. 1989-77] p 773 A89-48759

Plasma torch igniter for scramjets
p 858 A89-53355

Aerothermal modeling program, phase 2. Element B: Flow interaction experiment
p 131 N89-12891

Requirements in the development of gas turbine combustors
[PNR90528] p 402 N89-18496

Assessment, development, and application of combustor aerothermal models
p 479 N89-20138

Research as part of the Air Force Research in Aero Propulsion Technology (AFRAPT) Program
[AD-A204968] p 537 N89-21801

Investigation of low NOx staged combustor concept in high-speed civil transport engines
[NASA-TM-101977] p 537 N89-22606

Experiment on a cylindrical scramjet combustor. 2: Simulated flight Mach number 6.7
[NAL-TR-969] p 613 N89-23464

Engine combustion optimization by exhaust analysis
[PB89-195788] p 859 N89-28588

COMBUSTION PHYSICS

Promotion of combustion by electric discharges - The role of vibrationally excited species
p 119 A89-16357

Evidence of a strange attractor in ramjet combustion
[AIAA PAPER 89-0624] p 323 A89-25494

A simple one-dimensional model for the effect of air pollution on supersonic combustion
p 488 A89-34121

Supersonic flow stagnation in a duct during combustion
p 587 A89-42460

Combustion behavior of boron-based BAMO/MMMO fuel-rich solid propellants
[AIAA PAPER 89-2884] p 696 A89-47149

Computational fluid dynamics for combustion applications
[PNR90534] p 426 N89-19525

Fuels combustion research
[AD-A204161] p 490 N89-21071

COMBUSTION PRODUCTS

Deposition of Na2SO4 from salt-seeded combustion gases of a high velocity burner rig
p 43 A89-12330

Formation of liquid-phase deposits in jet fuels
p 118 A89-13176

Characteristics of the formation of benz(a)pyrene in the combustion chambers of aviation gas turbine engines
p 488 A89-34119

Some characteristics of the formation of contaminants during the combustion of hydrocarbon fuels in the combustion chambers of gas turbine engines
p 488 A89-34120

Influence of nonequilibrium effects on electrical conductivity in flows of heterogeneous combustion products in nozzles
p 771 A89-47963

Ecological characterization of fuels in relation to aircraft operations
p 807 A89-47971

COMBUSTION STABILITY

Active control of reheat buzz --- low-frequency combustion instability of jet aeroengine afterburners
p 43 A89-11103

Flowfield modifications of combustion rates in unstable ramjets
[AIAA PAPER 89-0105] p 322 A89-25092

Acoustic-vortex interactions and low-frequency oscillations in axisymmetric combustors --- of ramjet engines
p 325 A89-28336

Variable geometry control of reacting shear layers
[AIAA PAPER 89-0979] p 411 A89-30492

Numerical simulation of unsteady combustion in a dump combustor
[ONERA, TP NO. 1988-142] p 400 A89-31803

Numerical simulations of the flowfield in central-dump ramjet combustors. Part 2: Effects of inlet and combustor acoustics
[AD-A196743] p 108 N89-11745

COMBUSTION TEMPERATURE

Fuel properties effect on the performance of a small high temperature rise combustor
[AIAA PAPER 89-2901] p 838 A89-52025

Gas turbine alternative fuels combustion characteristics
[NASA-TM-101470] p 499 N89-21417

Fuel properties effect on the performance of a small high temperature rise combustor
[NASA-TM-102096] p 685 N89-25238

COMBUSTION WIND TUNNELS

Initial supersonic combustion facility measurements
[AIAA PAPER 89-2462] p 692 A89-46849

COMMAND AND CONTROL

HOTOL Command and Control Systems
[SAE PAPER 880929] p 42 A89-12317

Low cost avionics system for UMA --- unmanned aircraft
p 475 A89-33571

Multivariable design of a bank-to-turn autopilot for command guidance
p 482 A89-35301

COMMAND GUIDANCE

Multivariable design of a bank-to-turn autopilot for command guidance
p 482 A89-35301

COMMERCIAL AIRCRAFT

Configuration optimization of commercial aircraft
[DGLR PAPER 87-081] p 26 A89-10517

Aspects of the control and stabilization of supersonic commercial aircraft
[DGLR PAPER 87-122] p 39 A89-10519

The Boeing 717 - The evolution of technology and design
[SAE PAPER 872405] p 27 A89-10632

RB211 developments
[SAE PAPER 872409] p 35 A89-10635

European airworthiness control for the 1990s
[SAE PAPER 880936] p 2 A89-12320

The designer's impact on commercial aircraft economics
p 140 A89-13597

A320 full scale structural testing for fatigue and damage tolerance certification of metallic and composite structure
p 95 A89-13626

Very high bypass ratio engines for commercial transport propulsion
p 106 A89-13679

An air data inertial reference system for future commercial airplanes
[AIAA PAPER 88-3918] p 171 A89-18095

Commercial jet transport fly-by-wire architecture considerations
[AIAA PAPER 88-3900] p 180 A89-18108

Cockpit management for regional airlines and business aircraft as applied in the Beech Starship
[AIAA PAPER 88-3957] p 173 A89-18126

Digital audio applications in business and regional airline aircraft
[AIAA PAPER 88-3958] p 157 A89-18127

Commercial avionics applications of flat panel displays
[AIAA PAPER 88-3962] p 173 A89-18129

Sizing up the 146-300 --- new commuter aircraft by British Aerospace
p 161 A89-18346

Civil tiltrotor aircraft - A comparison of five candidate designs
p 163 A89-18882

Progress towards a commercial aircraft design expert system
[DGLR PAPER 87-120] p 167 A89-20237

Electronic materials testing in commercial aircraft engines
p 253 A89-21288

Advances in flying control systems
p 246 A89-24354

ARINC 629 data bus system
p 237 A89-24858

CFD in design - An airframe perspective
[AIAA PAPER 89-0092] p 310 A89-25081

The intelligent wing - Aerodynamic developments for future transport aircraft
[AIAA PAPER 89-0534] p 269 A89-25428

p 730 A89-48897

Numerical solution of periodic vortical flows about a thin airfoil
[AIAA PAPER 89-1691] p 730 A89-48955

AIAA Atmospheric Flight Mechanics Conference, Boston, MA, Aug. 14-16, 1989, Technical Papers
p 715 A89-49051

Theoretical study of passive drag-reduction on transonic airfoils
[AIAA PAPER 89-3382] p 731 A89-49083

Navier-Stokes computations of symmetric and asymmetric vortex shedding around slender bodies
[AIAA PAPER 89-3397] p 732 A89-49097

On the modelling of losses with distributed forces for calculating transonic flow fields in radial diffusers
p 733 A89-49141

Evaluation of different boundary algorithms using the example of a transonic flow field in the wheel of a radial compressor
p 734 A89-49598

Profiles in supersonic source flow
p 734 A89-49601

Numerical simulation of Tollmien-Schlichting waves in transonic compressible plate boundary layers
p 734 A89-49604

A natural flow wing design employing 3-D nonlinear analysis applied at supersonic speeds
[AIAA PAPER 89-2167] p 735 A89-49677

Validation of computational aerodynamics applied to general aviation configurations
[AIAA PAPER 89-2169] p 761 A89-49678

An Euler analysis of a High-Speed Civil Transport (HSCT) concept at Mach 3
[AIAA PAPER 89-2174] p 735 A89-49680

An implicit cell-vertex scheme for solution of the Euler equations
[AIAA PAPER 89-2235] p 735 A89-49682

A method for computing transonic flows around complete aircraft configurations
p 738 A89-50084

Aspects of the numerical simulation of turbulent flow in combustor type configurations
p 775 A89-50373

Numerical simulation of vortical flows over a strake-delta wing
p 738 A89-50528

Upwind algorithm for the parabolized Navier-Stokes equations
p 738 A89-50532

Steady, shock-capturing method applied to one-dimensional nozzle flow
p 738 A89-50548

Inviscid, unsteady, transonic axisymmetric flow in nozzles with shock waves
p 738 A89-50549

Aeroelastic characteristics of NACA 0012 airfoil at angle of attack
[AIAA PAPER 89-3375] p 739 A89-50807

Numerical analysis of supersonic flow through oscillating cascade sections by using a deforming grid
[AIAA PAPER 89-2805] p 740 A89-50810

Mathematical modeling of the fall of an infinite-span plate in a fluid
p 740 A89-50844

The Reynolds number dependence of the drag coefficient of convex bodies in a rarefied gas
p 741 A89-50995

Encyclopedia of fluid mechanics, Volume 8 - Aerodynamics and compressible flows --- Book
p 804 A89-51275

Numerical simulation of hypersonic flow around a space plane at high angles of attack using implicit TVD Navier-Stokes code
p 741 A89-51314

Computational fluid dynamics on chemically-reacting external flows around spaceplanes
p 742 A89-51315

Two-dimensional Navier-Stokes computation of high lift devices
p 742 A89-51316

Aerodynamic technology opportunities for a high-speed civil transport
[SAE PAPER 881354] p 764 A89-51353

An Euler code for nonlinear aerodynamic analysis - Assessment of capabilities
[SAE PAPER 881486] p 743 A89-51363

Navier-Stokes and Euler computations of the flow field around a complete aircraft
[SAE PAPER 881488] p 743 A89-51364

Hypersonic aerodynamics at the Ohio State University
[SAE PAPER 881519] p 718 A89-51365

Hypersonic research at Stanford University
[SAE PAPER 881521] p 743 A89-51367

Numerical methods for fluid dynamics III: Proceedings of the Conference, University of Oxford, England, Mar. 21-24, 1988
p 804 A89-51531

Developments in the calculation of unsteady turbomachinery flow
p 743 A89-51532

A strategy for the use of hybrid structured-unstructured meshes in computational fluid dynamics
p 744 A89-51534

Recent developments of the Taylor-Galerkin method for the numerical solution of hyperbolic problems
p 811 A89-51538

Numerical grid generation in 3-D Euler-flow simulation
p 744 A89-51539

An approach to geometric and flow complexity using feature-associated mesh embedding (FAME) - Strategy and first results
p 744 A89-51540

Some experiences with grid generation on curved surfaces using variational and optimisation techniques
p 744 A89-51550

Multiblock techniques for transonic flow computation about complex aircraft configurations
p 744 A89-51553

A total variation diminishing scheme for computational aerodynamics
p 744 A89-51562

Prediction of inplane damping from deterministic and stochastic models --- rotor blade stability in turbulent flow
p 832 A89-52042

Solution for two-dimensional inviscid transonic cascade flows with multiple-grid algorithm
p 817 A89-52308

Application of upwind factor method to transonic cascade calculation
p 817 A89-52309

The development of advanced computational methods for turbomachinery blade design
p 839 A89-52482

Navier-Stokes computation of transonic vortices over a round leading edge delta wing
p 817 A89-52483

Separated flow past three-dimensional bodies as a singular perturbation problem
p 861 A89-52507

An effective flutter control method using fast, time-accurate CFD codes
[AIAA PAPER 89-3468] p 845 A89-52563

Supercomputer requirements for selected disciplines important to aerospace
p 874 A89-53152

A comparison of mixed and penalty finite element methods in analysis of heat exchangers
p 862 A89-53254

CFD in the context of IHPTET - The Integrated High Performance Turbine Engine Technology Program
[AIAA PAPER 89-2904] p 862 A89-53307

A regular perturbation method for subcritical flow over a two-dimensional airfoil
p 818 A89-53570

Constructing a continuous parameter range of computational flows
p 819 A89-53928

Forces for change and the future of hypersonic flight in the 21st century
p 856 A89-54327

Representation and display of vector field topology in fluid flow data sets
p 875 A89-54904

Scientific visualization in computational aerodynamics at NASA Ames Research Center
p 875 A89-54907

The pros and cons of code validation
[NASA-TM-100657] p 14 N89-10034

Cascade flow analysis by Navier-Stokes equation
p 52 N89-11065

Study of three dimensional boundary layers on the front of a fuselage and at an air intake
[CERT-OA-22/5025-AYD] p 53 N89-11184

Boundary layer transition
[CERT-OA-40/5018-AYD] p 53 N89-11187

Experimental research on swept shock wave/boundary layer interactions
[AD-A196938] p 53 N89-11189

A truncation error injection approach to viscous-inviscid interaction
p 83 N89-11700

Free wake analysis of helicopter rotor blades in hover using a finite volume technique
p 83 N89-11701

Three-dimensional self-adaptive grid method for complex flows
[NASA-TM-101027] p 85 N89-11718

Effects of environmentally imposed roughness on airfoil performance
[NASA-CR-179639] p 88 N89-11725

Application of unsteady aeroelastic analysis techniques on the national aerospace plane
[NASA-TM-100648] p 101 N89-11733

Multigrid methods in boundary element calculations
[NLR-MP-87025-U] p 137 N89-12335

The laminar boundary layer on an airfoil started impulsively from rest
p 86 N89-12540

Simulation of 2-dimensional viscous flow through cascades using a semi-elliptic analysis and hybrid C-H grids
[NASA-CR-4180] p 88 N89-12553

A control-volume method for analysis of unsteady thrust augmenting ejector flows
[NASA-CR-182203] p 109 N89-12566

Improved numerical methods for turbulent viscous recirculating flows
p 131 N89-12895

Development of three-dimensional code for the analysis of jet mixing problem. Part 1: Laminar solution
[NASA-CR-4200] p 152 N89-13401

LDV measurements in an annular combustor model
[NASA-CR-182207] p 192 N89-13755

The measurement and prediction of rotordynamic forces for labyrinth seals
[AD-A197185] p 192 N89-13784

Numerical simulation and comparison of symmetrical/supercritical airfoils for the near tip region of a helicopter in forward flight
[NASA-CR-4212] p 204 N89-14821

Overlapping grids for flow field calculations
p 195 N89-14918

Aerodynamic maneuvering hypersonic flight mechanics
[NASA-CR-183007] p 219 N89-15074

Solution of the two-dimensional Euler equations by a finite volume discretization on unstructured triangular meshes
[DFVLR-FB-88-34] p 264 N89-15672

Aerodynamic performance of wings of arbitrary planform in inviscid, incompressible, irrotational flow
[AD-A200436] p 297 N89-16728

Intake Aerodynamics, volume 2 --- conference
[VKI-LS-1988-04-VOL-2] p 299 N89-16748

CFD application to subsonic inlet airframe integration --- computational fluid dynamics (CFD)
p 299 N89-16753

CFD application to supersonic/hypersonic inlet airframe integration --- computational fluid dynamics (CFD)
p 299 N89-16754

Transonic Compressors, volume 1 --- conference
[VKI-LS-1988-03-VOL-1] p 328 N89-16825

Incidence angle rules in supersonic cascades
p 328 N89-16827

Exit angle rules in supersonic cascades
p 329 N89-16828

Analysis of 3D viscous flows in transonic compressors
p 329 N89-16831

Transonic Compressors, volume 2 --- conference
[VKI-LS-1988-03-VOL-2] p 329 N89-16833

The design and development of transonic multistage compressors
p 329 N89-16834

Supersonic compressors
p 330 N89-16836

Design methodology for advanced High Pressure (HP) compressor first stage
p 330 N89-16840

The accurate measurement of drag in the 8 ft x 8 ft tunnel
p 337 N89-16855

A numerical simulation of flows about two-dimensional bodies of parachute-like configuration
[ISAS-629] p 302 N89-17580

A computer code (USPOTF2) for unsteady incompressible flow past two airfoils
[AD-A201671] p 372 N89-18420

Structural loads due to surge in an axial compressor
[PNR90493] p 401 N89-18491

CFD applications to the aero-thermodynamics of turbomachinery
[PNR90520] p 401 N89-18494

Validation of Computational Fluid Dynamics. Volume 1: Symposium papers and round table discussion
[AGARD-CP-437-VOL-1] p 422 N89-18610

Wind tunnel experiments on aerofoil models for the assessment of computational flow methods
p 372 N89-18614

Parametric study of grid size, time step and turbulence modeling on Navier-Stokes computations over airfoils
p 373 N89-18615

Comparative study of calculation procedures for viscous flows around airfoils in the transonic regime
p 422 N89-18617

- Navier-Stokes simulation of transonic wing flow fields using a zonal grid approach
[AIAA PAPER 89-0658] p 290 A89-25582
- Diagonal implicit multigrid calculation of inlet flowfields
[AIAA PAPER 89-0658] p 294 A89-27716
- Transonic store separation using a three-dimensional chimera grid scheme
[AIAA PAPER 89-0637] p 296 A89-28442
- Unsteady Euler algorithm with unstructured dynamic mesh for complex-aircraft aeroelastic analysis
[AIAA PAPER 89-1189] p 388 A89-30679
- Euler flutter analysis of airfoils using unstructured dynamic meshes
[AIAA PAPER 89-1384] p 419 A89-30857
- Patched-grid computations of high-speed inlet flows
[AIAA PAPER 89-1384] p 443 A89-34728
- Applications of a generalized pressure correction algorithm for flows in complicated geometries
[AIAA PAPER 89-1384] p 493 A89-34738
- Extension and application of flux-vector splitting to calculations on dynamic meshes
[AIAA PAPER 89-1384] p 508 A89-36901
- Newton solution of inviscid and viscous problems
[AIAA PAPER 89-1384] p 570 A89-40909
- An adaptive Cartesian mesh algorithm for the Euler equations in arbitrary geometries
[AIAA PAPER 89-1830] p 572 A89-41777
- Solution of the 2D Navier-Stokes equations on unstructured adaptive grids
[AIAA PAPER 89-1932] p 572 A89-41779
- An efficient cell-vertex multigrid scheme for the three-dimensional Navier-Stokes equations
[AIAA PAPER 89-1953] p 574 A89-41800
- An adaptive grid polygonal finite volume method for the compressible flow equations
[AIAA PAPER 89-1959] p 574 A89-41805
- Multigrid Euler solver about arbitrary aircraft configurations with Cartesian grids and local refinement
[AIAA PAPER 89-1960] p 575 A89-41806
- Development of an efficient multigrid code for 3-D Navier-Stokes equations
[AIAA PAPER 89-1971] p 625 A89-42027
- Vortex-dominated conical-flow computations using unstructured adaptively-refined meshes
[AIAA PAPER 89-1816] p 580 A89-42048
- Multigrid solution of the Euler equations for three-dimensional cascade flows
[AIAA PAPER 89-1818] p 581 A89-42048
- Numerical solutions of forward-flight rotor flow using an upwind method
[AIAA PAPER 89-1848] p 584 A89-42074
- Adaptive grid embedding in nonequilibrium hypersonic flow
[AIAA PAPER 89-1852] p 590 A89-43178
- Efficient computational tool for ramjet combustor research
[AIAA PAPER 88-0060] p 874 A89-44108
- A flow-field solver using overlying and embedded meshes together with a novel compact Euler algorithm
[AIAA PAPER 89-0204] p 641 A89-45359
- Multidimensional adaptive Euler solver
[AIAA PAPER 89-0204] p 641 A89-45360
- Development of a highly efficient and accurate 3D Euler flow solver
[AIAA PAPER 89-0204] p 642 A89-45370
- Low-storage implicit upwind-FEM schemes for the Euler equations
[AIAA PAPER 89-0204] p 642 A89-45375
- Adaptive numerical solutions of the Euler equations in 3D using finite elements
[AIAA PAPER 89-0204] p 644 A89-45413
- Transonic analysis of arbitrary configurations using locally refined grids
[AIAA PAPER 89-0204] p 644 A89-45419
- Transonic flow solutions on general 3D regions using composite-block grids
[AIAA PAPER 89-0204] p 644 A89-45428
- Computational analysis of turbomachinery flows using FLOFIVE
[AIAA PAPER 89-2559] p 648 A89-46924
- Block-structured solution of transonic flows around wing/pylon/nacelle configurations
[AIAA PAPER 89-2940] p 651 A89-47184
- Multi-body flow field calculations with overlapping-mesh method
[AIAA PAPER 89-2179] p 720 A89-47641
- A coarse/fine preconditioner for very ill-conditioned finite element problems
[AIAA PAPER 89-2179] p 809 A89-48518
- Generation, optimization and adaptation of multidomain meshes around complex configurations
[ONERA, TP NO. 1989-72] p 729 A89-48756
- An efficient multigrid finite element method for transonic flows with shock
[AIAA PAPER 89-2179] p 733 A89-49107
- Numerical analysis of supersonic flow through oscillating cascade sections by using a deforming grid
[AIAA PAPER 89-2805] p 740 A89-50810
- Navier-Stokes simulation of transonic wing flow fields using a zonal grid approach
[NASA-TM-100039] p 13 A89-10022
- Generation of a grid for a finite difference calculation of flows around an aircraft in Cartesian coordinates
[NAL-TR-956] p 58 A89-10583
- Study of three dimensional boundary layers on the front of a fuselage and at an air intake
[CERT-OA-22/5025-AYD] p 53 A89-11184
- Interactive grid generation for turbomachinery flow field simulations
[NASA-TM-101301] p 85 A89-11717

Graphic displays for real-time monitoring in research simulation p 790 A89-48831

Automated Mass Properties System (AMPS) [SAWE PAPER 1834] p 811 A89-50823

Scientific visualization in computational aerodynamics at NASA Ames Research Center p 875 A89-54907

Dynamic stall analysis utilizing interactive computer graphics [AD-A196812] p 84 N89-11709

Interactive grid generation for turbomachinery flow field simulations [NASA-TM-101301] p 85 N89-11717

Advances in computational design and analysis of airbreathing propulsion systems [NASA-TM-101987] p 613 N89-23465

Applications of integrated design/analysis systems in aerospace structural design p 666 N89-25147

An overview of the Douglas Aircraft Company Aeroelastic Design Optimization Program (ADOP) p 671 N89-25221

Meeting the challenges with the Douglas Aircraft Company Aeroelastic Design Optimization Program (ADOP) p 671 N89-25222

Effect of three-dimensional object type and density in simulated low-level flight [AD-A209756] p 795 N89-27679

COMPUTER NETWORKS

Shared-memory networking architectures - Simplicity and elegance [AIAA PAPER 89-3298] p 809 A89-48407

Extended observability of linear time-invariant systems under recurrent loss of output data [AIAA PAPER 89-3510] p 873 A89-52603

Fiber optic buses and networks for advanced avionics architectures p 33 N89-10836

High speed parallel processing networks for advanced architectures p 59 N89-10837

COMPUTER PROGRAM INTEGRITY

Developing error-free software p 201 A89-19679

COMPUTER PROGRAMMING

Avionic development means a complete integrated operational solution p 263 A89-23374

Programming techniques for high-speed processing on the supercomputer FUJITSU VP-system [NAL-TR-915] p 58 N89-10585

Applying Ada to Beech Starship avionics p 265 N89-16354

Three generations of software engineering for airborne systems p 432 N89-18485

Flight control system for the CRCA (Control Reconfigurable Combat Aircraft) using a command generator tracker with PI (Plus Integral) feedback and Kalman filter, volume 2 [AD-A206202] p 617 N89-24325

Multilevel decomposition of complete vehicle configuration in a parallel computing environment p 670 N89-25205

Influence of rubbing on rotor dynamics, part 2 [NASA-CR-183649-PT-2] p 706 N89-25464

Automated structural optimization system (ASTROS): User training workshop [AD-A207090] p 709 N89-26267

Modeling functional specifications for onboard software p 770 N89-27658

COMPUTER PROGRAMS

Method to optimize nacelle shape in a supersonic cruise aircraft p 28 A89-12558

High speed inlet calculations with real gas effects [AIAA PAPER 88-3076] p 75 A89-14980

Modern wing flutter analysis by computational fluid dynamics methods p 191 A89-20146

NNEPEQ - Chemical equilibrium version of the Navy/NASA Engine Program [ASME PAPER 88-GT-314] p 322 A89-24989

Evaluation of three turbulence models for the prediction of steady and unsteady airloads [AIAA PAPER 89-0609] p 288 A89-25485

Computational structural mechanics for engine structures [AIAA PAPER 89-1260] p 400 A89-30745

Prediction of full system helicopter noise for a MDHC 500E helicopter using the Rotonet program [AIAA PAPER 89-1135] p 500 A89-33785

Generic imagery processing and exploitation p 622 A89-40255

Development of a Navier-Stokes code on a Connection Machine [AIAA PAPER 89-1938] p 572 A89-41785

A validation study of four Navier-Stokes codes for high-speed flows [AIAA PAPER 89-1838] p 583 A89-42066

Development of a real-time man-in-the-loop simulation incorporating transportable Ada flight control software [AIAA PAPER 89-3277] p 789 A89-48439

Analytical flutter investigation of a composite propfan model p 800 A89-48663

Transport delay compensation for computer-generated imagery systems p 800 A89-48841

A method for computing transonic flows around complete aircraft configurations p 738 A89-50084

Computerized life and reliability modeling for turbo-prop transmissions p 863 A89-53364

Validation of a pair of computer codes for estimation and optimization of subsonic aerodynamic performance of simple hinged-flap systems for thin swept wings [NASA-TP-2828] p 13 N89-10024

A filamentary method for calculating induced voltages within resistive structures in either the frequency or time domain p 52 N89-10484

Hardware fault insertion and instrumentation system: Experimentation and results [NASA-CR-182746] p 58 N89-10526

Programming techniques for high-speed processing on the supercomputer FUJITSU VP-system [NAL-TR-915] p 58 N89-10585

Computing Systems Configuration for Highly Integrated Guidance and Control Systems [AGARD-LS-158] p 3 N89-10831

Computing system configuration for fighter aircraft flight control systems p 40 N89-10832

Some statistical aspects of attrition studies [AD-A196665] p 30 N89-10891

Automated Airframe Assembly Program (AAP) survey of CIM status in the aircraft industry [AD-A197368] p 63 N89-12535

Development and validation of an advanced low-order panel method [NASA-TM-101024] p 88 N89-12554

Evaluation of three turbulence models for the prediction of steady and unsteady airloads [NASA-TM-101413] p 88 N89-12555

Influence of bulk turbulence and entrance boundary layer thickness on the curved duct flow field p 131 N89-12896

Wall adjustment strategy software for use with the NASA Langley 0.3-meter transonic cryogenic tunnel adaptive wall test section [NASA-CR-181694] p 151 N89-13400

Development of three-dimensional code for the analysis of jet mixing problem. Part 1: Laminar solution [NASA-CR-4200] p 152 N89-13401

Predictions of airfoil aerodynamic performance degradation due to icing [NASA-TM-101434] p 153 N89-13412

Constitutive modeling for isotropic materials [NASA-CR-174805] p 177 N89-13436

LDV measurements in an annular combustor model [NASA-CR-182207] p 192 N89-13755

Plotting component maps in the Navy/NASA Engine Program (NNEP): A method and its usage [NASA-TM-101433] p 178 N89-14239

Detailed design specification for a prototype Assessment System for Aircraft Noise (ASAN) [AD-A197936] p 204 N89-14818

Users' manual for the Langley high speed propeller noise prediction program (DFP-ATP) [NASA-CR-4208] p 204 N89-14820

The application of process modelling to heat treatment of superalloys p 252 N89-15281

Three-dimensional viscous flow analysis for moving bodies past fixed structures [AD-A199982] p 259 N89-15349

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 1: Theory and application [NASA-CR-4199-VOL-1] p 222 N89-15896

Estimation of longitudinal stability and control derivatives for an icing research aircraft from flight data [NASA-TM-4098] p 247 N89-15925

Development of direct-inverse 3-D methods for applied transonic aerodynamic wing design and analysis [NASA-CR-184788] p 300 N89-16761

Accuracy of various wall-correction methods for 3D subsonic wind-tunnel testing p 338 N89-16863

An evaluation of automating Carrier Air Traffic Control Center (CATCC) status boards utilizing voice recognition input [AD-A200626] p 308 N89-17538

Design synthesis for canard-delta combat aircraft, volumes 1 and 2 p 316 N89-17590

The effects of freestream turbulence on airfoil boundary layer behavior at low Reynolds numbers [AD-A201865] p 372 N89-18419

Crushing behaviour of helicopter subfloor structures p 381 N89-18429

Transport airplane crash simulation, validation and application to crash design criteria p 382 N89-18435

Crash simulation and verification for metallic, sandwich and laminate structures p 383 N89-18437

Control of on-board software p 398 N89-18452

High temperature furnace modeling and performance verifications [NASA-CR-183381] p 408 N89-18498

CFD applications in design and analysis of the Fokker 50 and Fokker 100 p 373 N89-18629

CFD validation experiments for internal flows p 423 N89-18635

Computational techniques and validation of 3D viscous/turbulent codes for internal flows p 423 N89-18638

Efforts toward the validation of a computational fluid dynamics code for analysis of internal aerodynamics p 423 N89-18643

A comparative study and validation of upwind and central-difference Navier-Stokes codes for high-speed flows p 424 N89-18647

Validation of Computational Fluid Dynamics. Volume 2: Poster papers [AGARD-CP-437-VOL-2] p 424 N89-18648

Validation of a multi-block Euler flow solver with propeller-slipstream flows p 373 N89-18649

Validation of a user-friendly CFD code for prediction of the aerodynamic characteristics of flight vehicles p 395 N89-18654

Detailed flowfield measurements over a 75 deg swept delta wing for code validation p 374 N89-18657

Experiments and code validation for junction flows p 374 N89-18658

SUBJECT INDEX

Implicit central difference simulation of compressible Navier-Stokes flow over a NACA0012 airfoil p 82 A89-17022

Analytical determination and experimental comparison of performance degradation on a helicopter main rotor due to ice accretion p 155 A89-18909

Evolution of the ACAP crash energy management system p 164 A89-18923

Aerospace simulation III; Proceedings of the SCS Multiconference, San Diego, CA, Feb. 3-5, 1988 p 142 A89-19551

X-29 validation methodology for simulation and flight control system p 181 A89-19557

Modelling of ground effects on aircraft --- landing gear-runway interactions p 166 A89-19559

A parallel architecture for a real-time blade element rotorcraft simulation p 201 A89-19560

The combination of simulation and response methodology and its application in an aggregate production plan p 190 A89-19806

Numerical simulations of an isolated microburst. I - Dynamics and structure p 196 A89-20265

New solution method for steady-state canopy structural loads p 155 A89-20321

Developments and perspectives at AMD-BA in the field of impact and crash sizing p 227 A89-21407

Direct and inverse polynomials for computer-aided thermal analysis of gas turbine engines p 239 A89-21574

Numerical simulation of real flow field with transonic cascades p 210 A89-22005

Numerical simulations of dynamic response of fixed and rotary wing aircraft to a large airplane wake p 243 A89-23301

A new model reference adaptive aircraft controller p 245 A89-24491

Simulation of transonic viscous wing and wing-fuselage flows using zonal methods p 219 A89-24823

Numerical and experimental study of the crash behavior of helicopters and fixed-wing aircraft p 309 A89-24919

CFD simulation of square cross-section, contoured nozzle flows - Comparison with data [AIAA PAPER 89-0045] p 273 A89-25039

Numerical simulation of hypersonic flow around a space plane at high angles of attack using implicit TVD Navier-Stokes code [AIAA PAPER 89-0273] p 279 A89-25230

Numerical simulation of vortical flows on flexible wings [AIAA PAPER 89-0537] p 286 A89-25431

Comparison of two different Navier-Stokes methods for the simulation of 3-D transonic flows with separation [AIAA PAPER 89-0559] p 287 A89-25448

Computational design of low aspect ratio wing-winglets for transonic wind-tunnel testing [AIAA PAPER 89-0644] p 311 A89-25509

Infrared technique to measure the skin temperature on an electrothermal de-icer - Comparison with numerical simulations [AIAA PAPER 89-0760] p 303 A89-25566

Elevator deflection effects on the icing process [AIAA PAPER 89-0846] p 290 A89-25615

Aircraft vertical profile implementation using directed-graph methods p 332 A89-25683

Navier-Stokes calculations for DFVLR F5-wing in wind tunnel using Runge-Kutta time-stepping scheme p 291 A89-25867

Finite element simulation of 3D turbulent free shear flows p 294 A89-26946

A dynamic model for vapor-cycle cooling systems --- for aircraft [SAE PAPER 881001] p 313 A89-27809

F-14 flow field simulation [AIAA PAPER 89-0642] p 296 A89-28444

Analysis of Arrow Air DC-8-63 accident Gander, Newfoundland on 12 December 1985 [AIAA PAPER 89-0706] p 305 A89-28448

Simple model of lightning return-stroke simulations [ONERA, TP NO. 1988-27] p 427 A89-29214

Overview of icing research at ONERA [ONERA, TP NO. 1988-123] p 379 A89-29275

KRASH analysis correlation with the Bell ACAP full-scale aircraft crash test p 386 A89-29465

Navier-Stokes simulations of tip vortices for fixed and rotating helicopter blades p 368 A89-31343

Numerical simulation of incompressible flow around three-dimensional wing p 369 A89-31351

Numerical simulation of unsteady combustion in a dump combustor [ONERA, TP NO. 1988-142] p 400 A89-31803

Numerical simulation of unsteady three-dimensional flows in turbines [ONERA, TP NO. 1988-145] p 369 A89-31806

Research conducted at the ONERA Direction de l'Aérodynamique for calculating internal flows by solution of the Euler and Navier-Stokes equations [ONERA, TP NO. 1988-146] p 370 A89-31807

Validation of in-house and acquired software at Aerospatiale p 431 A89-31905

Experimental methods for hypersonics - Capabilities and limitations p 441 A89-33638

Numerical simulation of three-dimensional hypersonic viscous flows p 441 A89-33644

Advances in the computation of transonic separated flows over finite wings p 442 A89-34427

Direct numerical simulation of a three-dimensional turbulent boundary layer p 493 A89-34909

Bipolar coordinates for computation of transition duct flows p 493 A89-34912

Flight control system design for an in-flight simulator p 539 A89-36934

Computer simulation of the movement of loading door retraction mechanism with slide tracks p 527 A89-37019

Influence of pitching motion on subsonic wing rock of slender delta wings p 514 A89-39187

Two-dimensional simulation of electrothermal deicing of aircraft components p 528 A89-39194

Interferometry against differential Doppler - Performance comparison of two emitter location airborne systems p 525 A89-39203

Use of high-resolution upwind scheme for vortical flow simulations [AIAA PAPER 89-1955] p 574 A89-41802

Unsteady aerodynamic simulation of multiple bodies in relative motion p 577 A89-41839

[AIAA PAPER 89-1996] p 577 A89-41839

Convergence acceleration of viscous and inviscid hypersonic flow calculations [AIAA PAPER 89-1875] p 586 A89-42100

Adaptive optimum attitude extrapolation for precise antenna pointing control p 610 A89-42656

Software development reusability for aircraft simulation systems p 630 A89-43127

Real-time solution of the airflow continuity equations for a hovercraft simulation p 589 A89-43147

An overview of the direct simulation of an integrated aircraft navigation system on a PC p 600 A89-43148

Evaluating ILS and MLS sites without flight tests p 660 A89-43894

Numerical simulations of oblique detonations in supersonic combustion chambers p 674 A89-44115

French aerospace research in the international context p 691 A89-45036

Some aspects of interference on Loran-C p 660 A89-45221

Computer simulation of some types of flows arising at interactions between a supersonic flow and a boundary layer p 642 A89-45381

Numerical codes for unsteady simulation of turbojet, turbofan and turboprop engines for training purposes [AIAA PAPER 89-2259] p 676 A89-46704

Navier-Stokes simulation of burst vortex flowfields for fighter aircraft at high incidence [AIAA PAPER 89-2190] p 722 A89-47651

Supersonic Navier-Stokes simulations of turbulent afterbody flows [AIAA PAPER 89-2194] p 722 A89-47654

Use of a simplified estimation scheme for simulation validation and improvement [AIAA PAPER 89-3262] p 785 A89-48379

Comparison of experimental and numerical results for transient electromagnetic fields induced on a scale model aircraft by current injection technique [ONERA, TP NO. 1989-86] p 756 A89-48766

Functionally distributed simulation p 810 A89-48827

Modularity in tactical flight simulation and computing p 790 A89-48829

Prediction of aircraft spin recovery [AIAA PAPER 89-3363] p 780 A89-49067

Monte Carlo simulation for molecular gas dynamics p 737 A89-50012

Numerical simulation of hypersonic flow around a space plane at high angles of attack using implicit TVD Navier-Stokes code p 741 A89-51314

Global positioning system accuracy improvement using Ridge regression [AIAA PAPER 89-3499] p 828 A89-52591

A model of the National Airspace System [AIAA PAPER 89-3626] p 829 A89-52701

Numerical simulation of rolling up of leading/trailing-edge vortex sheets for slender wings p 819 A89-53926

Numerical simulation of microbursts - Aircraft trajectory studies p 869 A89-54788

Scientific visualization in computational aerodynamics at NASA Ames Research Center p 875 A89-54907

COMPUTERIZED SIMULATION

Microcomputer simulation of lubricant degradation in turbine engines using laboratory data p 859 A89-54986

On the diagnostic emulation technique and its use in the AIRLAB [NASA-TM-4027] p 58 A89-10524

An approximate, maximum terminal velocity descent to a point [DE88-000349] p 15 A89-10840

Investigation of the tumbling phenomenon using computer simulation p 41 A89-10896

Sandia National Laboratories flight simulation facilities [DE88-012108] p 42 A89-10898

Interactive grid generation for turbomachinery flow field simulations [NASA-TM-101301] p 85 A89-11717

Effects of environmentally imposed roughness on airfoil performance [NASA-CR-179639] p 88 A89-11725

Human factors aspects of the traffic alert and collision avoidance system (TCAS II) [AD-A196811] p 91 A89-11731

A control-volume method for analysis of unsteady thrust augmenting ejector flows [NASA-CR-182203] p 109 A89-12566

HOST combustion R and T overview p 110 A89-12879

Turbine stator flow field simulations p 132 A89-12902

Predictions of airfoil aerodynamic performance degradation due to icing [NASA-TM-101434] p 153 A89-13412

Atmospheric photochemical modeling of turbine engine fuels and exhausts. Computer model development, volume 1 [AD-A198690] p 196 A89-13832

Atmospheric photochemical modeling of turbine engine fuels and exhausts. Computer model development, volume 2 [AD-A198691] p 196 A89-13833

A microcomputer pollution model for civilian airports and air force bases, model description [AD-A199003] p 197 A89-14616

Numerical simulation and comparison of symmetrical/supercritical airfoils for the near tip region of a helicopter in forward flight [NASA-CR-4212] p 204 A89-14821

Application of Forsythe method in stabilizing and decoupling speed and height in F4 phantom aircraft [ETN-89-93566] p 246 A89-15119

Prediction of helicopter free flight trim using a state-of-the-art analytical model [AD-A200404] p 235 A89-15806

A microcomputer pollution model for civilian airports and Air Force bases. User's guide, issue 2 [AD-A199795] p 262 A89-16228

Analysis of 3D viscous flows in transonic compressors p 329 A89-16831

Wind tunnel predicted air vehicle performance: A review of lessons learned p 337 A89-16852

The vertical motion simulator p 339 A89-18384

Crashworthiness activities on MBB helicopters p 381 A89-18425

Developments and perspectives at AMD-BA in the field of impact and crash sizing p 381 A89-18427

Crash investigations with sub-components of a composite helicopter lower airplane section p 381 A89-18430

Numerical and experimental study of the crash behavior of helicopters and aircraft p 382 A89-18433

Study of the dynamic behaviour of stiffened composite fuselage shell structures p 382 A89-18434

Transport airplane crash simulation, validation and application to crash design criteria p 382 A89-18435

Crashworthiness of aircraft structures p 383 A89-18436

Crash simulation and verification for metallic, sandwich and laminate structures p 383 A89-18437

MADYMO crash victim simulations: A flight safety application p 421 A89-18441

Structural loads due to surge in an axial compressor [PNR90493] p 401 A89-18491

CFD applications to the aero-thermodynamics of turbomachinery [PNR90520] p 401 A89-18494

The DFVLR-F5 wing experiment: Towards the validation of the numerical simulation of transonic viscous wing flows p 373 A89-18623

Numerical simulation of the flow field over delta wings with leading edge blowing p 453 A89-20924

Transonic aerodynamic design experience p 454 A89-20934

Vector potential methods p 455 A89-20939

Developments and trends in three-dimensional mesh generation p 455 A89-20940

Transonic Symposium: Theory, Application, and Experiment, volume 1, part 2
[NASA-CP-3020-VOL-1-PT-2] p 455 N89-20942
Simulation at Dryden Flight Research Facility from 1957 to 1982
[NASA-TM-101695] p 474 N89-20983
Performance analysis of the fiber distributed data interface in the super cockpit audio world
[AD-A202535] p 474 N89-20985
A wind tunnel and computer investigation of the low speed aerodynamic characteristics of the prone escape system (PRESS)
[AD-A202768] p 475 N89-20988
Description of the derivation of the collision risk model used in the vertical separation simulation risk model
[AD-A205109] p 523 N89-21781
Functional performance specification for an inertial navigation system
[AD-A204850] p 526 N89-21785
A study of the effect of design parameter variation on predicted tilt-rotor aircraft performance
[AD-A204856] p 531 N89-21793
A flight dynamic study of the helicopter including blade dynamics
[AD-A205730] p 531 N89-21796
A perspective on future directions in aerospace propulsion system simulation
[NASA-TM-102038] p 536 N89-21798
Study of the real emulation of the electronic integrated system
[PB89-116271] p 557 N89-22016
PARC code validation for propulsion flows
[AD-A204293] p 557 N89-22066
A vortex panel analysis of circular-arc bluff-bodies in unsteady flow
[DE89-007141] p 558 N89-22845
Enhanced rotor modeling tailored for rub dynamic stability analysis and simulation
[AD-A207554] p 561 N89-22916
A methodology for determining the survivability of fixed-wing aircraft against small arms
[AD-A205730] p 607 N89-23455
Advances in computational design and analysis of airbreathing propulsion systems
[NASA-TM-101987] p 613 N89-23465
Investigations on the cracking behavior of joints in airfields and roads: Field investigations and laboratory simulations
[PB89-141279] p 619 N89-23479
ASR-9 weather channel test report, executive summary
[DOT/FAA/PS-89/6-EXEC-SUMM] p 626 N89-23758
Advanced computational techniques for hypersonic propulsion
[NASA-TM-102005] p 627 N89-23809
A demonstration of the method of stochastic finite element analysis
[AD-A206135] p 630 N89-24127
Numerical aerodynamic simulation
[NASA-EP-262] p 569 N89-24262
An investigation of V/STOL jet interactions in a crossflow
[AD-A206360] p 596 N89-24272
A computer simulation study of liquid water content adjustment based on icing cloud horizontal extent
[DOT/FAA/CT-TN89/3] p 598 N89-24288
A model for prediction of STOL ejector dynamics
[NASA-TM-102098] p 614 N89-24319
Comparison of predicted and measured temperatures of UH-60A helicopter transmission
[NASA-TP-2911] p 628 N89-24607
Some issues in numerical simulation of nonlinear structural response
[AD-A206360] p 628 N89-24639
Computational procedures for postbuckling of composite shells
[AD-A206360] p 628 N89-24642
Computational Methods for Structural Mechanics and Dynamics
[NASA-CP-3034-PT-2] p 628 N89-24654
Improving transient analysis technology for aircraft structures
[AD-A206360] p 629 N89-24655
Transient analysis techniques in performing impact and crash dynamic studies
[AD-A206360] p 629 N89-24658
Recent Advances in Multidisciplinary Analysis and Optimization, part 3

CONCENTRATION (COMPOSITION)

Three dimensional hazard zones
p 195 A89-18259
CONCRETES
Investigations on the cracking behavior of joints in airfields and roads: Field investigations and laboratory simulations
[PB89-141279] p 619 N89-23479
Evaluation of nondestructive test equipment for airfield pavements. Phase 1: Calibration test results and field data collection
[AD-A207159] p 694 N89-26020
Evaluation of barrier cable impact pad materials
[AD-A207554] p 792 N89-26864
A comparison of rutting behavior of asphalt concrete under the F-4C/G and F-15C/D aircraft
[AD-A208911] p 794 N89-27678
Joint sealants for airport pavements. Phase 1: Laboratory and field investigations
[DOT/FAA/DS-89/2-PHASE-1] p 854 N89-28523

CONDENSATES

Aerodynamically-driven condensate layer thickness distributions on isothermal cylindrical surfaces
p 51 A89-12337
Vapor deposition and condensate flow on combustion turbine blades - Theoretical model to predict/understand some corrosion rate consequences of molten alkali sulfate deposition in the field or laboratory
p 238 A89-20950

CONDENSATION

Total pressure loss in supersonic nozzle flows with condensation - Numerical analyses
p 79 A89-16352
2-D transonic flow with energy supply by homogeneous condensation - Onset condition and 2-D structure of steady Laval nozzle flow
p 214 A89-22801
A numerical method for calculating steady transonic flows with relaxation and heat input
p 734 A89-49600

CONDENSATION NUCLEI

Condensation phenomena in a turbine blade passage
p 511 A89-37939

CONDENSING

Observation of airplane flowfields by natural condensation effects
p 578 A89-42009
Transonic flow around airfoils with relaxation and energy supply by homogeneous condensation
[AIAA PAPER 89-1834] p 582 A89-42062

CONDUCTIVE HEAT TRANSFER

Hypersonic flow of a viscous heat-conducting chemically reacting gas past bodies over a wide range of Reynolds numbers
p 75 A89-14772
Generalized criteria for microwave breakdown in air-filled waveguides
p 552 A89-36655
Study of flow and heat transfer in rotating cavities
[ONERA, TP NO. 1989-33] p 698 A89-45188

CONES

Position error calibration of a pressure survey aircraft using a trailing cone
[PB88-250733] p 450 N89-20092
Evaluation of an updated design of an internally lighted wind cone
[DOT/FAA/CT-TN89/45] p 793 N89-26868

CONFERENCES

Adhesively bonded joints: Testing, analysis, and design; Proceedings of the International Symposium, Baltimore, MD, Sept. 10-12, 1988
p 45 A89-10076
Swedish Symposium on Residual Stresses, Sunne, Sweden, Mar. 30-Apr. 2, 1987, Proceedings
p 46 A89-10096
Turbulence management and relaminarisation; Proceedings of the IUTAM Symposium, Bangalore, India, Jan. 19-23, 1987
p 46 A89-10154
Advanced boundary element methods; Proceedings of the IUTAM Symposium, San Antonio, TX, Apr. 13-16, 1987
p 47 A89-10182

International Pacific Air and Space Technology Conference, Melbourne, Australia, Nov. 13-17, 1987, Proceedings
[SAE P-208] p 1 A89-10627

Aerospace avionics equipment and integration; Proceedings of the Second Conference, Dallas, TX, Nov. 2-4, 1987
[SAE P-205] p 48 A89-10676

Fracture mechanics; Proceedings of the Nineteenth National Symposium, San Antonio, TX, June 30-July 2, 1986
p 50 A89-11426

Automation applications for rotorcraft; Proceedings of the National Specialists' Meeting, Atlanta, GA, Apr. 4-6, 1988
p 2 A89-12401

Bird hazards in aviation; Proceedings of the Symposium, London, England, Oct. 14, 1987
p 3 A89-12716
ICAS, Congress, 16th, Jerusalem, Israel, Aug. 28-Sept. 2, 1988, Proceedings. Volumes 1 & 2
p 92 A89-13501

NOISE-CON 88 - Noise control design: Methods and practice; Proceedings of the National Conference on Noise Control Engineering, Purdue University, West Lafayette, IN, June 20-22, 1988
p 137 A89-15076
Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, Nov. 17-19, 1987, Proceedings
p 62 A89-16201

AIAA/IEEE Digital Avionics Systems Conference, 8th, San Jose, CA, Oct. 17-20, 1988, Technical Papers, Parts 1 & 2
p 169 A89-18051

AHS, Annual Forum, 44th, Washington, DC, June 16-18, 1988, Proceedings
p 141 A89-18851

Aerospace simulation III; Proceedings of the SCS Multiconference, San Diego, CA, Feb. 3-5, 1988
p 142 A89-19551

Yearbook 1987 II; DGLR, Annual Meeting, Berlin, Federal Republic of Germany, Oct. 5-7, 1987, Reports
p 142 A89-20226

International Conference on Computational Engineering Mechanics, Beijing, People's Republic of China, June 21-25, 1987, Proceedings
p 253 A89-21132

Boundary elements X; Proceedings of the Tenth International Conference on Boundary Element Methods, Southampton, England, Sept. 6-9, 1988, Volume 2 - Heat transfer, fluid flow and electrical applications
p 253 A89-21277

International Symposium on Domain Decomposition Methods for Partial Differential Equations, 1st, Ecole Nationale des Ponts et Chaussees, Paris, France, Jan. 7-9, 1987, Proceedings
p 264 A89-24809

Civil avionics - The future international scene; Proceedings of the Symposium, London, England, Mar. 17, 1988
p 237 A89-24851

Numerical simulation of the transonic DFVLR-F5 wing experiment; Proceedings of the International Workshop on Numerical Simulation of Compressible Viscous-Flow Aerodynamics, Goettingen, Federal Republic of Germany, Sept. 30-Oct. 2, 1987
p 290 A89-25856

PLANS '88 - IEEE Position Location and Navigation Symposium, Orlando, FL, Nov. 29-Dec. 2, 1988, Record
p 339 A89-26701

International Instrumentation Symposium, 34th, Albuquerque, NM, May 2-6, 1988, Proceedings
p 348 A89-27651

Aerospace power systems technology; Proceedings of the Aerospace Technology Conference and Exposition, Anaheim, CA, Oct. 3-6, 1988
[SAE SP-758] p 324 A89-28254

National Technical Specialists' Meeting on Advanced Rotorcraft Structures, Williamsburg, VA, Oct. 25-27, 1988, Proceedings
p 359 A89-29451

AIAA, ASME, ASCE, AHS, and ASC, Structures, Structural Dynamics and Materials Conference, 30th, Mobile, AL, Apr. 3-5, 1989, Technical Papers, Parts 1, 2, 3, & 4
p 417 A89-30651

Detection, diagnosis and prognosis of rotating machinery to improve reliability, maintainability, and readiness through the application of new and innovative techniques
p 392 A89-30976

Computational fluid dynamics; Proceedings of the International Symposium, Sydney, Australia, Aug. 23-27, 1987
p 420 A89-31301

High speed commercial flight: From inquiry to action; Proceedings of the Second Symposium, Columbus, OH, Oct. 19, 20, 1988
p 360 A89-31421

Symposium on Turbulence, 11th, University of Missouri-Rolla, Rolla, Oct. 17-19, 1988, Preprints
p 491 A89-33402

Remotely piloted vehicles; International Conference, 7th, Bristol, England, Sept. 12-14, 1988, Proceedings and Supplementary Papers
p 467 A89-33554

Advances and applications in computational fluid dynamics; Proceedings of the Symposium, ASME Winter Annual Meeting, Chicago, IL, Nov. 27-Dec. 2, 1988
p 443 A89-34726

CONICAL NOZZLES

CONICAL NOZZLES

A semiempirical method for calculating separated turbulent flow in a conical Laval nozzle in the reexpansion mode p 216 A89-23688

CONJUGATE GRADIENT METHOD

A coarse/fine preconditioner for very ill-conditioned finite element problems p 809 A89-48518

CONNECTORS

Button boards - A connectorless high-speed interconnect for avionics [AIAA PAPER 89-2093] p 768 A89-49452

CONSERVATION EQUATIONS

An explicit Runge-Kutta method for turbulent reacting flow calculations [NASA-TM-101945] p 536 N89-21799

CONSERVATION LAWS

Transonic degeneracy in systems of conservation laws [ONERA, TP NO. 1988-112] p 363 A89-29264

CONSTITUTIVE EQUATIONS

Modelling of viscoplastic anisotropic behaviour of single crystals [ONERA, TP NO. 1988-127] p 409 A89-29278
Constitutive modelling of single crystal and directionally solidified superalloys p 120 N89-12912
Life prediction and constitutive models for engine hot section p 133 N89-12916

CONSTRAINTS

Variation of anisotropic axes due to multiple constraints in structural optimization --- for aircraft design p 123 A89-13652
Injuries to seat occupants of light airplanes [AD-A207579] p 749 N89-26830

CONSTRUCTION

The design and initial construction of a composite RPV (Remotely Piloted Vehicle) for flight research applications [AD-A201884] p 395 N89-19291
Superplastic forming of aluminum, task C [AD-A207282] p 797 N89-26962

CONSTRUCTION MATERIALS

Forces for change and the future of hypersonic flight in the 21st century p 856 A89-54327
Selecting high-temperature structural intermetallic compounds - The materials science approach p 858 A89-54671

CONTACT LOADS

A study of contact interaction in aircraft structural elements p 188 A89-18644
Integral equations in the linear theory of contact problems p 263 A89-23656
Formulation and solution of axisymmetric problems in the statics of multilayer shells of revolution with contact interaction between layers p 492 A89-34129
Three dimensional finite element stress predictions of spur gears compared to gear fatigue rig measurements [AIAA PAPER 89-2918] p 704 A89-47172

CONTAINERLESS MELTS

High-temperature containerless aircraft furnace experimentation in the microgravity environment aboard a KC-135 aircraft [AIAA PAPER 89-0402] p 345 A89-25337

CONTAINMENT

Fuel containment system concept to reduce spillage [DOT/FAA/CT-TN89/22] p 672 N89-25994

CONTAMINANTS

Contamination of environmental control systems in Hercules aircraft [MRL-R-1116] p 29 N89-10040
Advanced air separation module performance evaluation [AD-A198401] p 224 N89-15088
Chemical warfare protection for the cockpit of future aircraft p 396 N89-19859

CONTAMINATION

A solution to water vapor in the National Transonic Facility [AIAA PAPER 89-0152] p 334 A89-25135
Effects of contamination on riblet performance p 579 A89-42021

A comparative evaluation of RPD (Rotary Particle Depositor) and ferrographic diagnostic methods for turbine engine lubricant samples [AD-A196207] p 38 N89-10044

Contamination of the exterior of a C-130E aircraft used for aerial spray, 907 TAG, Rickenbacker ANGB, OH [AD-A202430] p 474 N89-20984

CONTINUITY EQUATION

Real-time solution of the airflow continuity equations for a hovercraft simulation p 589 A89-43147

CONTINUUM MECHANICS

Numerical optimisation techniques applied to problems in continuum mechanics p 139 N89-12471

CONTINUUM MODELING

Comparison of shock structure solutions using independent continuum and kinetic theory approaches p 74 A89-14199

'Hypersonic slip flows' and issues on extending continuum model beyond the Navier-Stokes level [AIAA PAPER 89-1663] p 590 A89-43187

CONTINUUMS

Continuum theories for fluid-particle flows: Some aspects of lift forces and turbulence p 53 N89-11155

CONTRACTION

Design of a new contraction for the ARL low speed wind tunnel [ARL-AERO-R-171] p 116 N89-11755

CONTRACTORS

Defective military aircraft and the government contractor defense - The constitutional difficulties that arise even after Boyle v. United Technologies Corp p 268 A89-24704

CONTRAROTATING PROPELLERS

Unsteady loading noise of counter-rotating propeller p 36 A89-11054
Single and contra-rotation high speed propellers - Flow calculation and performance prediction p 105 A89-13559
From Sir Frank Whittle to the year 2000 - What is new in propulsion? p 241 A89-23872
Hub to tip variations of counter rotating propeller interaction noise p 504 A89-33770

Unsteady blade pressure measurements on a model counterrotation propeller [AIAA PAPER 89-1144] p 631 A89-40175
Average-passage simulation of counter-rotating propfan propulsion systems as applied to cruise missiles [AIAA PAPER 89-2943] p 651 A89-47187

Analysis and design of dual-rotation propellers [AIAA PAPER 89-2216] p 771 A89-47673
Noise of a model counterrotation propeller with simulated fuselage and support pylon at takeoff/approach conditions p 812 A89-48953
Low-speed wind tunnel performance of high-speed counterrotation propellers at angle-of-attack [AIAA PAPER 89-2583] p 739 A89-50808

Unsteady blade pressure measurements on a model counterrotation propeller [NASA-TM-102002] p 504 N89-20779
Noise of a model counterrotation propeller with simulated fuselage and support pylon at takeoff/approach conditions [NASA-TM-101996] p 633 N89-24138

Advanced turboprop aircraft flyover noise: Annoyance to counter-rotating-propeller configurations with a different number of blades on each rotor: Preliminary results [NASA-TM-100638] p 634 N89-24888
Low-speed wind tunnel performance of high-speed counterrotation propellers at angle-of-attack [NASA-TM-102292] p 653 N89-25121

CONTROL CONFIGURED VEHICLES

The T-2 control configured vehicle development, integration and flight test [AIAA PAPER 88-3882] p 179 A89-18076
Structural optimization for aeroelastic control effectiveness p 470 A89-34899
Application of precomputed control laws in a reconfigurable aircraft flight control system p 538 A89-36931

Experimental measurements of the aerodynamic hinge moment on a plain trailing-edge flap at M = 10 [AIAA PAPER 89-3383] p 780 A89-49084
Application of perfect model following to a control configured vehicle [AIAA PAPER 89-3453] p 844 A89-52552

Surface failure detection and evaluation of control law for reconfiguration of flight control system [AIAA PAPER 89-3509] p 847 A89-52602

An integrated configuration and control analysis technique for hypersonic vehicles p 833 A89-54006
Multivariable control law design for the Control Reconfigurable Combat Aircraft (CRCA) [AD-A202697] p 540 N89-21803

Flight control system for the CRCA (Control Reconfigurable Combat Aircraft) using a command generator tracker with PI (Proportional-Plus-Integral) feedback and Kalman filter, volume 1 [AD-A205723] p 616 N89-23473

Flight control system for the CRCA (Control Reconfigurable Combat Aircraft) using a command generator tracker with PI (Plus Integral) feedback and Kalman filter, volume 2 [AD-A206202] p 617 N89-24325

CONTROL EQUIPMENT

Modernization plans and progress in the United States --- air traffic control system p 90 A89-16204
Rotating air scoop as airfoil boundary-layer control p 150 A89-20149

Concept and flight testing of a modern longitudinal motion regulator using an inverse model [DGLR PAPER 87-121] p 181 A89-20238
Ball and the jack --- ball bearing screw for aircraft actuator linear motion control p 258 A89-24324
A demonstration of active noise reduction in an aircraft cabin p 529 A89-39510
Prediction of forces and moments for flight vehicle control effectors: Workplan [NASA-CR-184666] p 247 N89-15122

CONTROL SIMULATION

Flight evaluation of the ATTAS digital fly-by-wire/light flight control system --- Advanced Technologies Testing Aircraft System p 93 A89-13588
Evaluation of the performance of a vocal recognition system in air traffic control tasks - Vocal workstation of an air traffic control simulator p 89 A89-14491
Determination of control laws for a single pilot, attack helicopter p 180 A89-18904
X-29 validation methodology for simulation and flight control system p 181 A89-19557
Reconfigurable flight control system simulation p 181 A89-19558

Simulation study on adjustment of a gas turbine unit p 262 A89-22001

Simulation methodology for helicopter automatic flight control systems p 686 A89-45048
Use of a simplified estimation scheme for simulation validation and improvement p 785 A89-48379

[AIAA PAPER 89-3262] p 785 A89-48379
Nonlinear model following control application to a flight simulator control loader [AIAA PAPER 89-3308] p 788 A89-48416

In-flight simulation of unstable aircraft systems [AIAA PAPER 89-3329] p 789 A89-48435
Fixed-gain versus adaptive higher harmonic control simulation p 782 A89-49832

Experience with implementation of a turbojet engine control program on a multiprocessor p 875 A89-54106

CONTROL STABILITY

Reduced conservative singular value analysis for robustness p 197 A89-17489
Nonlinear stabilizing control of high angle of attack flight dynamics [AIAA PAPER 89-3487] p 845 A89-52580

Dynamic stability and active control of elastic vehicles acting with unsteady aerodynamic forces [AIAA PAPER 89-3557] p 848 A89-52643

On the control of elastic vehicles - Model simplification and stability robustness [AIAA PAPER 89-3558] p 873 A89-52715

Results of an A109 simulation validation and handling qualities study [NASA-TM-101062] p 617 N89-24323
Nonlinear and adaptive control [NASA-CR-180088] p 712 N89-26610

Stability robustness improvement of direct eigenspace assignment based feedback systems using singular value sensitivities [NASA-CR-182302] p 784 N89-27672

CONTROL STICKS

Response equivocation analysis for the smart stick controller [AD-A203146] p 475 N89-20989

Design considerations of manipulator and feel system characteristics in roll tracking [NASA-CR-4111] p 783 N89-26860

CONTROL SURFACES

Optimization of nonlinear aeroelastic tailoring criteria p 94 A89-13611
A guide to classical flutter p 188 A89-18801

The new complement for air and spacecraft - A man/A computer p 244 A89-24487
Vortex generator jets - A means for passive and active control of boundary layer separation [AIAA PAPER 89-0564] p 287 A89-25453

Dynamics of longitudinal motion of an aeroplane after drop of loads p 333 A89-28396
Integrated design of structures p 385 A89-29170

A model of self-oscillating generation for aerodynamic control surfaces at transonic velocities p 364 A89-30070

Effect of control surface mass unbalance on the stability of a closed-loop active control system [AIAA PAPER 89-1211] p 430 A89-30700

Flutter of circulation control wings p 394 A89-31863
Experimental investigation of aerodynamic heating by flow through control surface gaps p 510 A89-37785

Integral rudder system for aircraft steering p 539 A89-39258
Active flutter suppression on a delta wing p 614 A89-40963

Transonic aeroelasticity of fighter wings with active control surfaces p 579 A89-42020

Response equivocation analysis for the smart stick controller [AD-A203148] p 475 N89-20989

Actuation constraints in multivariable flight control systems p 483 N89-20998

A digital rate controller for the control reconfigurable combat aircraft designed using quantitative feedback theory [AD-A203050] p 484 N89-21001

Selection of a frequency sensitive QFT (Quantitative Feedback Theory) weighting matrix using the method of specified outputs [AD-A202692] p 501 N89-21592

The structure and control of three-dimensional shock wave turbulent boundary layer interactions [AD-A205923] p 558 N89-22866

Magnetic bearing stiffness control using frequency band filtering p 560 N89-22910

Multivariable flight control design with parameter uncertainty for the AFTI/F-16 [AD-A206068] p 616 N89-23476

Digital robust control law synthesis using constrained optimization p 689 N89-25193

An integrated approach to the optimum design of actively controlled composite wings p 870 N89-25194

Control surface spanwise placement in active flutter suppression systems p 689 N89-25195

Recent Advances in Multidisciplinary Analysis and Optimization, part 3 [NASA-CP-3031-PT-3] p 670 N89-25201

Flutter suppression control law synthesis for the Active Flexible Wing model [NASA-TM-101584] p 690 N89-26010

Nonlinear and adaptive control [NASA-CR-180068] p 712 N89-26610

Integrated structure/control law design by multilevel optimization [NASA-TM-101623] p 712 N89-26623

Aircraft flight test trajectory control [NASA-CR-4181] p 811 N89-27416

CONTROL VALVES

Power efficient hydraulic systems. Volume 2: Hardware demonstration phase [AD-A203900] p 473 N89-20128

CONTROLLABILITY

Modal observability and controllability measures for first and second order linear systems and model reduction p 57 A89-11680

Measures of modal controllability and observability for first- and second-order linear systems p 563 A89-36943

FAA handling qualities assessment - Methodology in transition p 687 A89-45159

Flying qualities criteria for precise landing of a STOL fighter [AIAA PAPER 89-3390] p 781 A89-49091

Flight investigation of helicopter low-speed response requirements p 842 A89-51702

A design procedure for the handling qualities optimization of the X-29A aircraft [AIAA PAPER 89-3428] p 843 A89-52529

Fault-tolerant sensor and actuator selection for control of flexible structures p 874 A89-54007

Results of an A109 simulation validation and handling qualities study [NASA-TM-101062] p 617 N89-24323

Aircraft design optimization with multidisciplinary performance criteria p 671 N89-25212

CONTROLLED ATMOSPHERES

Fire extinguishing agents for oxygen-enriched atmospheres p 487 A89-32948

CONTROLLERS

Design of higher bandwidth model following for flight vehicle stabilization and control p 112 A89-13632

Modern digital pressure control system [AIAA PAPER 88-3948] p 172 A89-18119

Functional augmentation of digital engine controllers to implement an integrated testability concept [AIAA PAPER 88-3953] p 176 A89-18124

Synthesis of a helicopter full authority controller [AIAA PAPER 89-3448] p 843 A89-52547

Design of tunable digital set-point tracking PID controllers for gas turbines with unmeasurable outputs [AIAA PAPER 89-3577] p 839 A89-52660

Integral LQG model following controller p 852 A89-53979

QFT digital controller for an unmanned research vehicle (URV) p 853 A89-54080

Development along different paths --- electronic control of aircraft engines p 820 A89-54484

Fiber optic control system integration [NASA-CR-179568] p 140 N89-13256

The poststall nonlinear dynamics and control of an F-18: A preliminary investigation p 169 N89-14922

Response equivocation analysis for the smart stick controller [AD-A203146] p 475 N89-20989

A digital rate controller for the control reconfigurable combat aircraft designed using quantitative feedback theory [AD-A203050] p 484 N89-21001

Energy concepts applied to control of airplane flight in wind shear p 540 N89-21806

Single channel test controllers [AD-A204088] p 541 N89-22611

Robust computer-aided synthesis and optimization of linear multivariable control systems with varying plant dynamics via AUTOCORON p 711 N89-25179

Flutter suppression using eigenspace freedoms to meet requirements p 689 N89-25191

Design considerations of manipulator and feel system characteristics in roll tracking [NASA-CR-4111] p 783 N89-26860

The NASA Langley Research Center 0.3-meter transonic cryogenic tunnel T-P/Re-M controller manual [NASA-CR-181868] p 793 N89-26869

Aircraft flight test trajectory control [NASA-CR-4181] p 811 N89-27416

CONVECTION

Superconducting rotor cooling system [AD-D014020] p 709 N89-26240

CONVECTION CURRENTS

Oklahoma-Kansas preliminary regional experiment for storm-central (O-K pre-storm). Volume 3: Aircraft mission summary [PB88-205489] p 56 N89-10499

CONVECTIVE FLOW

An experimental study of the effect of streamwise vortices on unsteady turbulent boundary-layer separation [AD-A205462] p 593 N89-23420

CONVECTIVE HEAT TRANSFER

Heat transfer and flow around elliptic cylinders in tandem arrangement p 128 A89-18356

Convective heat transfer in a boundary layer behind a shock wave propagating along a flat plate with a sharp leading edge - A calculation method and a comparison with experimental data p 144 A89-18546

Local heat-transfer characteristics of glaze-ice accretions on a NACA 0012 airfoil p 256 A89-22816

Single and multiple jet impingement heat transfer on rotating disks [AIAA PAPER 89-0174] p 344 A89-25150

A novel infrared thermography heat transfer measurement technique [AIAA PAPER 89-0601] p 345 A89-25478

A comparison of mixed and penalty finite element methods in analysis of heat exchangers p 862 A89-53254

Heat transfer in the tip region of a rotor blade simulator p 132 N89-12898

Analysis of flow-, thermal- and structural-interaction of hypersonic structures subjected to severe aerodynamic heating [AD-A205077] p 518 N89-21775

An introduction to the problem of aerodynamic heating [AERO-REPT-8901] p 656 N89-25970

A review of high-speed, convective, heat-transfer computation methods [NASA-TP-2914] p 805 N89-27116

CONVERGENCE

Convergence schemes for an adaptive-wall wind tunnel p 41 A89-12560

Accuracy versus convergence rates for a three dimensional multistage Euler code p 135 A89-13592

Convergence acceleration through the use of time inclining --- for inviscid flow computation [AIAA PAPER 89-0096] p 274 A89-25085

An acceleration method for solving the Euler equations on an unstructured mesh by applying multigrid on an auxiliary structured mesh [AIAA PAPER 89-0116] p 275 A89-25103

The spatially non-uniform convergence of the numerical solutions of flows p 699 A89-45535

Numerical study of the influence of leading and trailing edge flaps on the performance of airfoils [AD-A206138] p 594 N89-23428

CONVERGENT NOZZLES

Subcritical swirling flows in convergent, annular nozzles p 323 A89-27694

Static internal performance of convergent single-expansion-ramp nozzles with various combinations of internal geometric parameters [NASA-TM-4112] p 517 N89-21768

CONVERGENT-DIVERGENT NOZZLES

Dynamic distortion in flowfield downstream of transonic shock-boundary layer interaction p 8 A89-11061

An analytical description of unsteady transonic Laval-nozzle flow p 147 A89-19664

A study of flow characteristics in models of gas turbine engine Laval nozzles in stationary and nonstationary regimes p 239 A89-21571

2-D transonic flow with energy supply by homogeneous condensation - Onset condition and 2-D structure of steady Laval nozzle flow p 214 A89-22801

Comparison of 3D computation and experiment for non-axisymmetric nozzles [AIAA PAPER 89-0007] p 325 A89-28403

Numerical study of turbulence model in a supersonic nozzle p 515 A89-39349

Optimum design for geometric parameters of axisymmetric converging-diverging nozzle p 839 A89-52319

Effect of geometric parameters on internal performance of convergent-divergent nozzle p 839 A89-52320

Nozzle geometry effects on supersonic jet interaction p 876 A89-53932

Aerodynamic model tests of exhaust augmentors for F/A-18 engine run-up facility at RAAF Williamtown [AD-A208110] p 841 N89-28518

CONVEXITY

The Reynolds number dependence of the drag coefficient of convex bodies in a rarefied gas p 741 A89-50995

COOLANTS

Development of a thermal and structural analysis procedure for cooled radial turbines [NASA-TM-101418] p 109 N89-12568

Coolant passage heat transfer with rotation p 351 N89-17314

COOLING

Heat pipe cooling for scramjet engines [NASA-CR-4036] p 259 N89-15351

Investigation of the development of laminar boundary-layer instabilities along a cooled-wall cone in hypersonic flows [AD-A202587] p 458 N89-20966

Variable nozzle area turbine vane cooling [AD-D014071] p 775 N89-26849

p 186 N89-13648
- Alternative modified binders for airfield pavements
[AD-A197902] p 249 N89-15124
- Development of stress and lifting criteria for single crystal turbine blades
p 549 N89-22663

CREEP RUPTURE STRENGTH

- Influence of regeneration treatments on creep rupture lives of turbine blades
p 43 A89-11214
- Time dependent probabilistic failure of coated components
[AIAA PAPER 89-2900] p 704 A89-47163

CREEP TESTS

- Creep tests for slow and fast fatigue conditions on aluminum alloy specimens
[REPT-MO-535200] p 45 N89-11020

CREW PROCEDURES (INFLIGHT)

- Flight mission scenario generation with knowledge-based system
p 355 A89-27614
- Aircraft Accident Report: AVAir Inc., Flight 3378, Fairchild Metro 3, SA227 AC, N622AV, Cary, North Carolina, February 19, 1988
[PB88-910412] p 598 N89-23436

CREW WORKSTATIONS

- Light weight escape capsule for fighter aircraft
p 383 N89-19858
- An evaluation of the F/B/F/EF-111 crew/voice message system
[AD-A205998] p 626 N89-23774

CRITERIA

- Transport airplane crash simulation, validation and application to crash design criteria
p 382 N89-18435

CRITICAL FLOW

- Derivation of an integral equation for large disturbing transonic flow and its numerical method of undercritical flow
p 293 A89-25944

CRITICAL LOADING

- Experimental investigation on buckling of aircraft shell by the curved grating shadow moire method
p 553 A89-37006

CRITICAL VELOCITY

- Critical speed data for model floating ice roads and runways
p 134 A89-15706
- Variation of critical speed of a rotor-bearing system with slight relocation of bearing
p 554 A89-37766
- Radial swirl flows between parallel discs at critical flow rate
p 802 A89-49826
- Some in-field experiences of non-synchronous vibrations in large rotating machinery
p 559 N89-22894

CROSS COUPLING

- In-flight simulation investigation of rotorcraft pitch-roll cross coupling
[NASA-TM-101059] p 246 N89-15118

CROSS FLOW

- Three dimensional simulation of an underexpanded jet interacting with a supersonic cross flow
[AIAA PAPER 88-3181] p 75 A89-14982
- Thermal measurements for jets in disturbed and undisturbed crosswind conditions
p 107 A89-16102
- Investigation of the interacting flow of nonsymmetric jets in crossflow
p 126 A89-16109
- Zonal techniques for flowfield simulation about aircraft
p 80 A89-16931
- Experimental investigation of a jet impinging on a ground plane in crossflow
p 149 A89-20141
- Planar imaging of jet mixing in crossflow
p 255 A89-22352
- Stability of 3D wing boundary layer on a SST configuration
[AIAA PAPER 89-0036] p 272 A89-25031
- A numerical study of the contrarotating vortex pair associated with a jet in a crossflow
[AIAA PAPER 89-0448] p 284 A89-25366
- Numerical study of single impinging jets through a crossflow
[AIAA PAPER 89-0449] p 284 A89-25367
- Interaction of jet in hypersonic cross stream
p 362 A89-29192
- Study of V/STOL flows using the fortified Navier-Stokes scheme
p 420 A89-31347
- Effects of swirl and high turbulence on a jet in a crossflow
p 515 A89-39192
- Crossflow-vortex instability and transition on a 45 deg swept wing
[AIAA PAPER 89-1892] p 587 A89-42114
- Normal impinging jet in crossflow - A parametric investigation

The NASA Langley Research Center 0.3-meter transonic cryogenic tunnel T-P/Re-M controller manual
[NASA-CR-181868] p 793 N89-26869

CRYOGENICS
Design and operation of a horizontal liquid helium flow facility
[DE89-013482] p 792 N89-26867

CRYSTAL DEFECTS
Microstructural optimisation of titanium alloys for defect tolerance in gas turbine engine components
p 43 A89-10069

High temperature constitutive and crack initiation modeling of coated single crystal superalloys
p 342 N89-17334

CRYSTAL GROWTH
Measurements of diffusion limited solidification at varying gravity
[AIAA PAPER 89-1755] p 626 A89-43268

CRYSTAL LATTICES
Intermetallic compounds for high-temperature structural use
p 409 A89-29159

CRYSTAL STRUCTURE
Intermetallic compounds for high-temperature structural use
p 409 A89-29159

CRYSTALLOGRAPHY
Constitutive modelling of single crystal and directionally solidified superalloys
p 342 N89-17325

CUES
An exploratory study of the use of movement-correlated cues in an auditory head-up display p 674 A89-45329
Technology involved in the simulation of motion cues:
The current trend
[NLR-MP-87060-U] p 249 N89-15126

CUMULATIVE DAMAGE
Test research on main shaft service life of aeroengine
p 108 A89-16864

Fatigue damage to an aircraft from gusts
p 603 A89-40083

The use of operational loads data to assess fatigue damage rates in a jet trainer aircraft p 605 A89-41913
Probabilistic methods for estimating the remaining life of structural elements of operating aircraft gas turbine engines p 839 A89-52832

CURING
Low energy cured composite repair system
p 410 A89-29957

In situ composite cure monitoring using infrared transmitting optical fibers p 415 A89-29977
Determining cure cycles for thermosetting epoxy resins
[SME PAPER EM88-533] p 864 A89-54890

CURTAINS
Chemical warfare protection for the cockpit of future aircraft
p 396 N89-19859

CURVATURE
Development of airfoil wake in a longitudinally curved stream
p 78 A89-16110

Some experiences with grid generation on curved surfaces using variational and optimisation techniques
p 744 A89-51550

An experimental and analytical investigation of the effect of spanwise curvature on wing flutter at Mach number of 0.7
[NASA-TM-4094] p 235 N89-15905

Curvature effects on the stability of three-dimensional laminar boundary layers p 425 N89-19500

CURVE FITTING
Identification of XV-15 aeroelastic modes using frequency-domain methods p 604 A89-41092

CURVED PANELS
Buckling and postbuckling behaviour of composite panels
p 122 A89-13594

The buckling and postbuckling behaviour of curved CFRP laminated shear panels p 123 A89-13595
Buckling with imperfection of cylindrical composite panel
p 804 A89-51312

CYCLIC HYDROCARBONS
Characteristics of the formation of benz(a)pyrene in the combustion chambers of aviation gas turbine engines
p 488 A89-34119

CYCLIC LOADS
Life prediction of cooled turbine blade
p 108 A89-16866

Dwell time effects on the fatigue behaviour of titanium alloys p 185 A89-17619
Using adaptability theory in the strength analysis of gas turbine disks p 257 A89-23682

AE load-cycle dependence applied to monitoring fatigue crack growth under complex loading conditions --- in aircraft parts p 420 A89-31599

Application of signal analysis to acoustic emission from a cyclically loaded aluminum joint specimen
p 799 A89-47862

Selection of combined accelerated test regimes for aircraft components p 754 A89-47980

Prediction of fatigue crack propagation in plane specimens and thin-walled structural elements of aircraft under repeated static loading p 799 A89-48000

Effect of protective coatings on life of heat-resistant nickel steel under cyclic heat load p 45 N89-11005

Thermomechanical characterization of Hastelloy-X under uniaxial cyclic loading p 133 N89-12909

Fatigue crack growth in ARALL: A hybrid aluminum Aramid composite material. Crack growth mechanisms and quantitative predictions of the crack growth rates
[ETN-89-93899] p 427 N89-19602

The fatigue in aircraft corrosion testing (FACT) programme
[AGARD-R-713] p 548 N89-21873

CYLINDERS
Experimental investigation of the aerodynamics of a disk-cylinder system p 211 A89-22239

Noise reduction of a composite cylinder subjected to random acoustic excitation
[AIAA PAPER 89-1049] p 501 A89-33708

Propeller modelling effects on interior noise in cylindrical cavities with application to active control
[AIAA PAPER 89-1123] p 469 A89-33757

Numerical analysis on aerodynamic characteristics of an inclined square cylinder
[AIAA PAPER 89-1805] p 580 A89-42038

An experimental investigation of the aerodynamic characteristics of slanted base ogive cylinders using magnetic suspension technology
[NASA-CR-184624] p 300 N89-16758

Experimental study of pressure and heating rate on a swept cylindrical leading edge resulting from swept shock wave interference
[NASA-CR-185326] p 592 N89-23411

CYLINDRICAL BODIES
Fluctuations and massive separation in three-dimensional shock-wave/boundary-layer interactions p 368 A89-30952

Fracture of pressurized composite cylinders with a high strain-to-failure matrix system p 551 A89-36319

Separation shock motion in fin, cylinder, and compression ramp - Induced turbulent interactions
p 509 A89-36911

Buckling with imperfection of cylindrical composite panel p 804 A89-51312

Direct simulation of hypersonic transitional flows over blunt slender bodies p 82 N89-11696

Aerodynamic drag of cylindrical vehicles moving concentrically within long tubes
[AD-A197947] p 219 N89-15076

A study of transonic drag reduction of a blunt cylinder by a cylinder probe
[AD-A202557] p 458 N89-20965

The use of the College of Aeronautics Whirling Arm facility to determine the effect of flow curvature on the aerodynamic characteristics of an ogive-cylinder body
p 516 N89-21765

CYLINDRICAL SHELLS
Sound transmission into a finite, closed, cylindrical shell having an absorbing layer on its inner surface
p 138 A89-15088

Axisymmetric panel flutter of ring-reinforced composite cylindrical shells
[AIAA PAPER 89-1167] p 417 A89-30658

Natural vibrations of cylindrical shells with a rectangular cutout p 492 A89-34126

The load-bearing capacity of closed-profile oblong cylindrical shells made of a metal/polymer composite laminate p 492 A89-34128

Divergence instability of reinforced composite cylindrical shells p 495 A89-35146

Experimental investigation on buckling of aircraft shell by the curved grating shadow moire method
p 553 A89-37006

Application of the theory of fuzzy sets to the two-criterion stochastic optimization of ribbed shells
p 556 A89-39823

An evaluation of active noise control in a cylindrical shell p 811 A89-47720

Evaluation of the tightness of the flange joints of the shell elements of aircraft structures p 799 A89-47959

Bulging cracks in pressurized fuselages: A numerical study
[NLR-MP-87058-U] p 497 N89-20519

CYLINDRICAL TANKS
Fuel holdup and component diffusivity in a cooled cylindrical tank
p 488 A89-34894

D

DAMAGE
Wheel performance evaluation. Phase 1: Analysis
[DOT/FAA/CT-88/16] p 29 N89-10041

Israel Air Force (IAF) in-service aircraft lightning strike and damage survey p 55 N89-10431

Alternative modified binders for airfield pavements
[AD-A197902] p 249 N89-15124

Importance of sensitivity and reliability of NDI techniques on damage tolerance based life prediction of turbine discs p 350 N89-17257

Mechanism of single shear fastened joints
p 352 N89-17700

Artificial and natural icing tests of the EH-60A quick fix helicopter
[AD-A204589] p 530 N89-21792

Full-scale aircraft impact test for evaluation of impact forces. Part 1: Test plan, test method, and test results
[DE89-009329] p 836 N89-29343

DAMAGE ASSESSMENT
Non-classical flow-induced responses of a lifting surface due to localized disturbances p 112 A89-15611

Damage tolerance and supportability aspects of ARALL laminate aircraft structures --- Aramid Reinforced Aluminum p 100 A89-16083

Tip loss and blade strike simulations using DYSCO
p 164 A89-18901

Structural system reliability combining the constraint of damage tolerance design p 256 A89-23012

Condor for high altitudes p 269 A89-26674

Gc - A measure of damage tolerance of composites
p 415 A89-29984

Wind damage to airports - Lessons learned
p 499 A89-34359

Service-induced damage in turbine discs and its influence on damage tolerance-based life prediction
p 612 A89-41910

The use of operational loads data to assess fatigue damage rates in a jet trainer aircraft p 605 A89-41913

Stress intensity factors for damage tolerance evaluations of elliptical pressure dome structure
[AIAA PAPER 89-2090] p 801 A89-49450

Interlaminar fracture toughness and toughening of laminated composite materials - A review
p 858 A89-54426

Fatigue and fracture overview p 130 N89-12682

Thermal barrier coating life prediction model development p 121 N89-12922

Fatigue damage in composites under different loading conditions
[NLR-TR-88032-U] p 251 N89-15198

Damage tolerance behavior of fiber reinforced composite airframes p 316 N89-17278

Damage tolerance concepts for advanced materials and engines p 549 N89-22661

The effects of plastic media blasting paint removal on the microstructure of graphite/epoxy composite materials
[AD-A204801] p 550 N89-22688

DAMPERS
The damped solution to sonic fatigue in the KC-135
p 98 A89-15098

Study of nonlinear Duffing characteristics of flexible rotor with SFDB --- squeeze film damper bearings
p 700 A89-45568

Rotordynamic Instability Problems in High-Performance Turbomachinery, 1988
[NASA-CP-3026] p 558 N89-22891

DAMPING
An evaluation of active noise control in a cylindrical shell p 811 A89-47720

Prediction of inplane damping from deterministic and stochastic models --- rotor blade stability in turbulent flow p 832 A89-52042

An efficient method for predicting the vibratory response of linear structures with friction interfaces. Volume 2: Steady-state vibrations of a 2-body system with a frictional interface
[AD-A197022] p 128 N89-12081

The effects of nonlinear damping on the large deflection response of structures subjected to random excitation
p 193 N89-13796

Damping of wing tip vortex systems by the modification of the wing tips p 654 N89-25138

Flap-tag stability data for a small-scale isolated hingeless rotor in forward flight
[NASA-TM-102189] p 706 N89-25479

Turbomachinery rotor support with damping
[NASA-CASE-MFS-28345-1] p 865 N89-28841

DASSAULT AIRCRAFT
Rafale - Dassault's new dawn p 662 A89-45030

Dassault, leader in European military and business aircraft p 637 A89-45033

DAST PROGRAM
Geometrical and structural properties of an Aeroelastic Research Wing (ARW-2)
[NASA-TM-4110] p 451 N89-20099

DATA ACQUISITION
Ultra-low frequency vibration data acquisition concerns in operating flight simulators p 116 A89-15560

Experimental study on aerodynamic characteristics of hypersonic transport configuration
p 640 A89-44972
Flow separation and vortex bursting locations on wings pitching at constant rates
[AIAA PAPER 89-2180] p 719 A89-47627
A comparison of the aerodynamic characteristics of half-span and full-span delta wings
[AIAA PAPER 89-2181] p 719 A89-47628
Flow visualization study of delta wings in wing-rock motion
[AIAA PAPER 89-2187] p 721 A89-47648
Numerical simulation of leading-edge vortex breakdown using an Euler code
[AIAA PAPER 89-2189] p 721 A89-47650
Vortex interaction over double delta wings at high angles of attack
[AIAA PAPER 89-2191] p 722 A89-47652
Measurements of the aerodynamic characteristics of various wing-canard configurations and comparison with NLVLM results
[AIAA PAPER 89-2217] p 723 A89-47674
Theoretical and qualitative analysis of the effect of free vortices on lifting surfaces
[AIAA PAPER 89-2238] p 725 A89-47692
Investigating a class of local solutions for the problem of a flow past a flat wing with injection
p 726 A89-47931
Development of an analytical model of wing rock for slender delta wings
p 728 A89-48658
On leading edge vortex and its control
[AIAA PAPER 89-3346] p 730 A89-49052
The effect of asymmetric vortex wake characteristics on a slender delta wing undergoing wing rock motion
[AIAA PAPER 89-3348] p 730 A89-49053
A video-based experimental investigation of wing rock
[AIAA PAPER 89-3349] p 731 A89-49054
Feasibility study of vortex interaction control on a chine forebody/delta wing configuration at high angles of attack
[AIAA PAPER 89-3350] p 731 A89-49055
Evaluation of dynamic behaviour of an aircraft with delta-wing configuration at high alpha
[AIAA PAPER 89-3366] p 780 A89-49070
Thickening oscillation of a delta wing using Navier-Stokes and Navier-displacement equations
[AIAA PAPER 89-3373] p 731 A89-49077
Unsteady aerodynamics and control of delta wings with tangential leading-edge blowing
[AIAA PAPER 89-3374] p 731 A89-49078
Euler solutions for delta wings
[AIAA PAPER 89-3398] p 732 A89-49098
The control of asymmetric vortical flows over delta wings at high angles of attack
[AIAA PAPER 89-3347] p 733 A89-49102
A study of the structure of separated flow on a delta wing
p 734 A89-49272
A natural flow wing design employing 3-D nonlinear analysis applied at supersonic speeds
[AIAA PAPER 89-2167] p 735 A89-49677
Analytical study of the subsonic wing-rock phenomenon for slender delta wings
p 782 A89-50058
Numerical simulation of vortical flows over a strake-delta wing
p 738 A89-50528
Boundary layer transition on the surface of a delta wing in supersonic flow
p 741 A89-50934
Navier-Stokes computation of transonic vortices over a round leading edge delta wing
p 817 A89-52483
Asymptotic solution of a nonlinear boundary value problem with a partly unknown boundary
p 874 A89-52802
Flow around a delta wing with or without a canard (Φ BA = 60 deg). Part 2: Hydrodynamic visualizations in unsteady flow (pitching oscillations)
[ONERA-RT-11/2891-AN-PT-2] p 17 A89-10860
Three dimensional shear flow. Analysis of the flow in a delta arrow wing with incidence angle
[CERT-RTS-OA-25/5025-AYD] p 17 A89-10864
Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 1: General description and discussion of results
[AD-A196456] p 18 A89-10867
Vortical flows on the lee surface of delta wings
[TM-AE-8802] p 82 A89-11695
Flow visualisation of leading edge vortices on a delta wing by laser sheet technique
[PD-FM-8804] p 82 A89-11697
Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 3: Plots of the zeroth and first harmonic unsteady pressure distributions (Concluded) and plots of steady and first harmonic unsteady overall loads
[AD-A197541] p 84 A89-11711
A wind tunnel investigation at low speed of the flow about a straked delta wing, oscillating in pitch
[NLR-MP-87048-U] p 85 A89-11715
Modeling of vortex layers over delta wings with a vortex line adapted panel method
[ETN-88-93235] p 86 A89-11721
Unsteady structure of flow past a pitching delta wing
p 86 A89-12541
Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 4: Plots of time histories of pressures and overall loads
[AD-A198682] p 152 A89-13402
Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 5: Power spectral density plots of the overall loads for harmonic oscillation and the response of overall loads to (1-COS) inputs
[AD-A198683] p 152 A89-13403
Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 6: Presentation of the visualization program
[AD-A198684] p 152 A89-13404
Investigation of a moving-model technique for measuring ground effect
[NASA-TM-4080] p 154 A89-14217
Flutter analysis of highly swept delta wings by conventional methods
[NASA-TM-101530] p 221 A89-15087
Trailing edge strips to reduce the drag of slender wings
p 221 A89-15889
An elliptic grid generation method for cropped delta wings
[AD-A199462] p 222 A89-15891
Theoretical studies on flapped delta wings
[NASA-CR-184795] p 222 A89-15893
Numerical solution of flow fields around Delta wings using Euler equations method
[NAL-TM-FM-8701] p 299 A89-16757
Design synthesis for canard-delta combat aircraft, volumes 1 and 2
p 316 A89-17590
The international vortex flow experiment
p 422 A89-18619
Flow field surveys of leading edge vortex flows
p 422 A89-18621
Validation of Computational Fluid Dynamics. Volume 2: Poster papers
[AGARD-CP-437-VOL-2] p 424 A89-18648
Investigation of the surface flow of conical bodies at high subsonic and supersonic speeds
p 373 A89-18650
Detailed flowfield measurements over a 75 deg swept delta wing for code validation
p 374 A89-18657
Large-scale viscous simulation of laminar vortex flow over a delta wing
p 374 A89-18660
Documentation of separated flows for computational fluid dynamics validation
p 424 A89-18662
Unsteady low-speed wind tunnel test of a straked delta wing, oscillating in pitch. Part 2: Plots of steady and zeroth and first harmonic unsteady pressure distributions
[AD-A201936] p 378 A89-19275
Some low-speed flutter characteristics of simple low-aspect-ratio delta wing models
[NASA-TM-101547] p 450 A89-20094
Numerical simulation of the flow field over delta wings with leading edge blowing
p 453 A89-20924
An embedded mesh procedure for leading-edge vortex flows
p 455 A89-20936
Thin-layer Navier-Stokes solutions for a cranked delta wing
[AD-A203292] p 459 A89-20970
Transonic and supersonic flow past a 65 deg delta wing with rounded leading edges: Analysis of experimental data
[DFVLR-FB-88-44] p 520 A89-22580
The influence of the leading edge geometry on the wave drag for a 65 degree delta wing at low supersonic speed and small angles of attack
[FFA-141] p 520 A89-22583
Analysis of the boundary layer of a delta wing in incidence
[CERT-RT-OA-26/5025-AYD] p 596 A89-24274
Unsteady phenomena on delta wings with partially broken-down vortex regions
p 654 A89-25129
Studies of unsteady vortex flap aerodynamics
[AD-A209837] p 748 A89-27641
Comparison of flow-visualised vortices with computed geometry over thin delta wings
[AD-A209083] p 821 A89-28489
Flow calculation over a delta-wing using the thin-layer Navier-Stokes equations
[PD-CF-8924] p 822 A89-28497
Evaluation of LDA 3-component velocity data on a 65 deg delta wing at $M = 0.85$ and first results of an analysis
[DFVLR-FB-89-19] p 823 A89-28505
Use of high-resolution upwind scheme for vortical flow simulations
[NASA-CR-185910] p 824 A89-29321
DEMODULATION
Aeronautical mobile TDMA/MCTDMA system
p 806 A89-27918
DENSITY (MASS/VOLUME)
High density fuel effects
[AD-A202426] p 490 A89-21125
DENSITY DISTRIBUTION
Axial velocity density ratio influence on exit flow angle in transonic/supersonic cascades
p 329 A89-16830
DENSITY MEASUREMENT
Measurements of fluctuations of thermodynamic variables and mass flux in supersonic turbulence
p 78 A89-16258

SUBJECT INDEX

- A high speed data acquisition system for the analysis of velocity, density, and total temperature fluctuations at transonic speeds
[SAE PAPER 881451] p 691 A89-45248
- X-ray based extensometry
[NASA-CR-185058] p 706 N89-25432
- DEOXYGENATION**
Jet fuel deoxygenation
[AD-A205006] p 548 N89-21943
- DEPLETION**
Preventing depletion of stratospheric ozone: Implications on future aircraft emissions
[DE89-009964] p 710 N89-25530
Preventing depletion of stratospheric ozone: Implications on future aircraft emissions, revision 1
[DE89-013779] p 808 N89-27273
- DEPLOYMENT**
Modeling of parachute opening - An experimental investigation
[AIAA PAPER 89-0892] p 460 A89-34891
A control canopy release method for improved opening of clustered parachutes
[AIAA PAPER 89-0892] p 461 A89-35210
An expression for dynamic strain in a 'weak link'
[AIAA PAPER 89-0942] p 495 A89-35247
Notes on a theoretical parachute opening force analysis applied to a general trajectory
[AD-A201050] p 302 N89-17582
Hose reel monitor for inflight refueling system
[AD-D014054] p 765 N89-26836
- DEPOSITION**
Contamination of the exterior of a C-130E aircraft used for aerial spray, 907 TAG, Rickenbacker ANGB, OH
[AD-A202430] p 474 N89-20984
- DESCENT**
Controller evaluations of the descent advisor automation aid
[AIAA PAPER 89-3624] p 829 A89-52699
An approximate, maximum terminal velocity descent to a point
[DE88-000349] p 15 N89-10840
An assessment of ground effects determined by static and dynamic testing techniques
[AIAA PAPER 89-0899] p 16 N89-10854
Aircraft accident report: Trans-Colorado Airlines, Inc., Flight 2286, Fairchild Metro 3, SA227 AC, N68TC Bayfield, Colorado, January 19, 1988
[PB89-910401] p 524 N89-22593
Controller evaluations of the descent advisor automation aid
[NASA-TM-102197] p 659 N89-25981
- DESCENT TRAJECTORIES**
Air traffic control automation concepts to optimize flight management system utilization
[AIAA PAPER 89-0899] p 307 A89-26733
An approximate method for calculating aircraft downwash on parachute trajectories
[AIAA PAPER 89-0899] p 447 A89-35216
Control of the descent of a flight vehicle along a glide path in the grazing regime
[NASA-CR-182181] p 779 A89-47960
Design of automation tools for management of descent traffic
[NASA-TM-101078] p 306 N89-17584
Descent strategy comparisons for TNAV-equipped aircraft under airplane-preferred operating conditions
[NASA-CR-4248] p 690 N89-26011
- DESIGN**
Aerospace vehicle design, Spacecraft Section final project reports
[NASA-CR-184741] p 471 N89-20121
- DESIGN ANALYSIS**
Sensitivity analysis and multidisciplinary optimization for aircraft design - Recent advances and results
[NASA-CR-184741] p 135 A89-13598
Aerodynamic and structural design of the standard class sailplane ASW-24
[NASA-CR-184741] p 93 A89-13600
Laminar flow control leading edge systems in simulated airline service
[NASA-CR-184741] p 93 A89-13604
Aerodynamic design of a manual aileron control for an advanced turboprop trainer
[NASA-CR-184741] p 95 A89-13639
Euler analysis of a swirl recovery vane design for use with an advanced single-rotation propfan
[AIAA PAPER 88-3152] p 144 A89-17940
Civil tiltrotor aircraft - A comparison of five candidate designs
[NASA-CR-184741] p 163 A89-18882
Design, analysis, and test of composite fuel tank pods for the CH-46E helicopter
[NASA-CR-184741] p 163 A89-18885
Advanced transmission studies
[NASA-CR-184741] p 189 A89-18908
Classroom analysis and design of axial flow compressors using a streamline analysis model
[NASA-CR-184741] p 207 A89-20948
Design features which influence flow separations on aircraft
[NASA-CR-184741] p 217 A89-23673
Reliable flight control systems - Components placement and feedback synthesis
[NASA-CR-184741] p 263 A89-24493
A patched-grid algorithm for complex configurations directed towards the F-18 aircraft
[AIAA PAPER 89-0121] p 310 A89-25108

- Computational design of low aspect ratio wing-winglets for transonic wind-tunnel testing
[AIAA PAPER 89-0844] p 311 A89-25509
Mechanization, design and methodological lessons learned from a dynamic cockpit mock-up evaluation
[SAE PAPER 881438] p 319 A89-28213
Supportability design requirements for army aircraft and equipment
[SAE PAPER 881447] p 356 A89-28217
Cryogenic wind tunnel research - A global perspective
[NASA-CR-184741] p 407 A89-29288
The development and testing of the HISAC parachute recovery system
[AIAA PAPER 89-0921] p 462 A89-35231
Measurements of individual parachute loads in a clustered parachute system
[AIAA PAPER 89-0923] p 463 A89-35233
Parachutes - Yesterday, today, and tomorrow
[AIAA PAPER 89-0880] p 463 A89-36019
Optimizing advanced propeller designs by simultaneously updating flow variables and design parameters
[NASA-CR-182181] p 514 A89-39189
High-speed propeller performance and noise predictions at takeoff/landing conditions
[NASA-CR-182181] p 565 A89-39195
Aerodynamic design via control theory
[NASA-CR-182181] p 589 A89-43094
Interdisciplinary and multilevel optimum design --- in aerospace structural engineering
[NASA-CR-182181] p 606 A89-43450
Effect of design variables, temperature gradients, and speed on life and reliability of a rotating disk
[NASA-CR-182181] p 799 A89-47719
The use of vestibular models for design and evaluation of flight simulator motion
[AIAA PAPER 89-3274] p 785 A89-48387
Integrated multidisciplinary design optimization of rotorcraft
[AIAA PAPER 89-2132] p 760 A89-49478
Design aspects of long range supersonic LFC airplanes with highly swept wings
[SAE PAPER 881397] p 742 A89-51357
The development of advanced computational methods for turbomachinery blade design
[NASA-CR-182181] p 839 A89-52482
An integrated configuration and control analysis technique for hypersonic vehicles
[NASA-CR-182181] p 833 A89-54006
Quadplex digital flight control system assessment
[NASA-CR-182181] p 40 N89-10058
Design and evaluation of a cockpit display for hovering flight
[NASA-CR-183247] p 42 N89-10900
Combat aircraft mission tradeoff models for conceptual design evaluation
[NASA-CR-183247] p 102 N89-11736
Computer aided optimal structural design of stringers from Airbus A310-300 with STARS: Detailed optimization model
[NASA-CR-183247] p 103 N89-11741
Aerodynamic optimization by simultaneously updating flow variables and design parameters with application to advanced propeller designs
[NASA-CR-182181] p 109 N89-11750
Design of a new contraction for the ARL low speed wind tunnel
[NASA-CR-182181] p 116 N89-11755
User's manual for an aerodynamic optimization scheme that updates flow variables and design parameters simultaneously
[NASA-CR-182181] p 151 N89-13399
Design of high-Reynolds-number flat-plate experiments in the NTF
[NASA-CR-184627] p 153 N89-13411
The 13-inch magnetic suspension and balance system wind tunnel
[NASA-TM-4090] p 184 N89-14241
Thermal-hydraulic designs of finned heat-exchangers experiencing free or forced convection
[NASA-CR-184741] p 259 N89-15345
The design and development of transonic multistage compressors
[NASA-CR-184741] p 329 N89-18834
Crashworthiness design methods applicable at concept stage
[NASA-CR-184741] p 381 N89-18424
CFD applications in design and analysis of the Fokker 50 and Fokker 100
[NASA-CR-184741] p 373 N89-18829
Propulsion
[NASA-CR-184741] p 403 N89-19302
Aerospace vehicle design, Spacecraft Section final project reports
[NASA-CR-184741] p 471 N89-20121
Aerospace vehicle design, Spacecraft Section final project reports
[NASA-CR-184742] p 472 N89-20122
Aerospace vehicle design, Spacecraft Section
[NASA-CR-184743] p 472 N89-20123
A study of the effect of design parameter variation on predicted tilt-rotor aircraft performance
[AD-A204856] p 531 N89-21793

- Design, implementation and computer aided tests of a shaped reflector for an air traffic control system
[ETN-89-94229] p 558 N89-22014
An efficient inverse method for the design of blended wing-body configurations
[NASA-CR-185058] p 532 N89-22603
Experimental verification of an eddy-current bearing
[NASA-CR-185058] p 561 N89-22913
Preliminary design of a modular unmanned research vehicle. Volume 2: Subsystem technical development design study
[AD-A205678] p 607 N89-23454
Advances in computational design and analysis of airbreathing propulsion systems
[NASA-TM-101987] p 613 N89-23465
Multivariable flight control design with parameter uncertainty for the AFTI/F-16
[AD-A206068] p 616 N89-23476
Composite Blade Structural Analyzer (COBSTRAN) demonstration manual
[NASA-TM-101957] p 622 N89-24459
Effects of nonlinear aerodynamics and static aeroelasticity on mission performance calculations for a fighter aircraft
[NASA-CR-177529] p 669 N89-25170
Recent Advances in Multidisciplinary Analysis and Optimization, part 2
[NASA-CP-3031-PT-2] p 669 N89-25173
Treatment of body forces in boundary element design sensitivity analysis
[NASA-CP-3031-PT-3] p 705 N89-25187
Recent Advances in Multidisciplinary Analysis and Optimization, part 3
[NASA-CP-3031-PT-3] p 670 N89-25201
Design optimization of axisymmetric bodies in nonuniform transonic flow
[NASA-CP-3031-PT-3] p 670 N89-25206
The conceptual design of a Mach 2 Oblique Flying Wing supersonic transport
[NASA-CR-177529] p 671 N89-25233
An analytical sensitivity method for use in integrated aeroservoelastic aircraft design
[NASA-TM-101583] p 690 N89-25239
Tipjet VTOL UAV (Vertical Takeoff and Landing/Unmanned Aerial Vehicle) summary. Volume 1: A 1200 pound tipjet VTOL unmanned aerial vehicle. Part 1: Conceptual design study of a 1200-pound vehicle
[AD-A206738] p 672 N89-25997
Strategic bombers: B-1B cost and performance remain uncertain
[AD-A206751] p 673 N89-25998
Design criteria for aggregate-surfaced roads and airfields
[AD-A207059] p 694 N89-26019
Langley rotorcraft structural dynamics program: Background, status, accomplishments, plans
[NASA-TM-101618] p 709 N89-26273
CFD drag prediction for aerodynamic design
[NASA-CR-182181] p 748 N89-26825
Design considerations of manipulator and feel system characteristics in roll tracking
[NASA-CR-4111] p 783 N89-26860
Evaluation of an updated design of an internally lighted wind cone
[DOT/FAA/CT-TN89/45] p 793 N89-26868
Avionics system engineering: An introduction
[NASA-CR-182181] p 789 N89-27851
Avionic system requirements
[NASA-CR-182181] p 789 N89-27852
Integrated avionics: Conceptual design
[NASA-CR-182181] p 769 N89-27854
The evolution of digital avionics architectures/systems
[NASA-CR-182181] p 770 N89-27855
Blading design for cooled high-pressure turbines
[NASA-CR-182181] p 778 N89-27868
- DESIGN TO COST**
The Rolls Royce Allison RB580 turbofan - Matching the market requirement for regional transport
[AIAA PAPER 89-2488] p 678 A89-46869
Fighter aircraft design system user's manual
[AD-A200453] p 265 N89-16391
- DESTRUCTIVE TESTS**
Advancements in erosion testing of rotor blade leading edges
[NASA-CR-182181] p 163 A89-18588
Advanced air separation module performance evaluation
[AD-A198401] p 224 N89-15088
- DETECTION**
Gas path modelling, diagnosis and sensor fault detection
[NASA-CR-182181] p 321 N89-18811
Review of existing NDT technologies and their capabilities
[NASA-CR-182181] p 349 N89-17255
- DETONATION**
The ram accelerator and its applications - A new approach for reaching ultrahigh velocities
[NASA-CR-182181] p 63 A89-12884
- DETONATION WAVES**
Preliminary numerical simulations of a pulsed detonation wave engine
[AIAA PAPER 88-2980] p 126 A89-16850

- Numerical simulations of oblique detonations in supersonic combustion chambers p 674 A89-44115
 Demonstration of oblique detonation wave for hypersonic propulsion [AD-A208268] p 776 N89-26856
- DEVELOPING NATIONS**
 Aviation technology applicable to developing regions [NASA-TM-89425] p 23 N89-10872
- DHC 4 AIRCRAFT**
 An examination of the fatigue meter records from the RAAF (Royal Australian Air Force) caribou fleet [AD-A201074] p 395 N89-19290
- DIAGNOSIS**
 ATE hardware diagnostics, fault detection, and fault isolation tool (Self-test adapter) p 197 A89-18015
 Integrated diagnostic concepts for advanced technology rotorcraft p 141 A89-18023
 The enemy is FA, CND, and RTOK p 141 A89-18025
 Hybrid architecture of field-tested diagnostic expert system p 198 A89-18034
 Measures of testability for automatic diagnostic systems p 258 A89-24172
 Reconfigurable flight control: An opportunity for integrated diagnostics p 182 N89-14744
 On-board expert diagnostics for an avionics subsystem p 202 N89-14758
- DIAMETERS**
 Measurements of gas turbine combustor and engine augmentor tube sooting characteristics [AD-A199768] p 328 N89-16821
- DIAPHRAGMS (MECHANICS)**
 A multidriver shock tube model of a large blast simulator [AD-A208324] p 793 N89-26871
- DIELECTRICS**
 Radar cross section of arbitrarily shaped bodies of revolution p 674 A89-45111
 Electromagnetic scattering from a structured slab comprised of periodically placed resistive cards [AD-A210145] p 806 N89-27953
- DIESEL ENGINES**
 Design with structural ceramics p 803 A89-51253
 Analysis and test of insulated components for rotary engine [SAE PAPER 890326] p 804 A89-51489
 A study of an advanced variable cycle diesel as applied to an RPV: Evaluation of an RPV variable cycle diesel engine [AD-A207754] p 842 N89-29347
- DIESEL FUELS**
 High-viscosity and bituminous oils - Promising raw materials for the production of jet and diesel fuels p 410 A89-30086
- DIFFERENCE EQUATIONS**
 Accuracy versus convergence rates for a three dimensional multistage Euler code p 135 A89-13592
 Difference methods for initial-boundary-value problems and flow around bodies (Revised edition) --- Book p 646 A89-46198
- DIFFERENTIAL EQUATIONS**
 Active control of aeroelastic systems governed by functional differential equations p 332 A89-25871
 Rotordynamic analysis of a bearing tester p 498 N89-21759
- DIFFUSERS**
 Two-dimensional subsonic diffuser flow with uniform shear velocity profile at inlet p 7 A89-11056
 Detailed measurements of the flow in the vaned diffuser of a back-swept transonic centrifugal impeller [ONERA, TP NO. 1988-92] p 70 A89-13586
 Experimental investigation of grooved wall technique for subsonic diffusers p 79 A89-16447
 Highly compact inlet diffuser technology p 107 A89-16460
 The relation between losses and entry-flow conditions in short dump diffusers for combustors p 240 A89-23871
 Modeling of subsonic flow through a compact offset inlet diffuser [AIAA PAPER 89-0639] p 288 A89-25505
 Investigation of the flow in the diffuser section of the NASA Lewis Icing Research Tunnel [AIAA PAPER 89-0755] p 336 A89-28455
 S4MA hypersonic facility - Influence of the ejector-diffuser design [ONERA, TP NO. 1988-133] p 407 A89-29284
 Control of separation in diffusers using forced unsteadiness [AIAA PAPER 89-1015] p 416 A89-30525
 Investigation of flow separation in a three-dimensional diffuser using a coupled Euler and boundary-layer method p 446 A89-35172
 Flow characteristics in an S-shaped rectangular-round diffuser at high incidence p 646 A89-46260
- On the modelling of losses with distributed forces for calculating transonic flow fields in radial diffusers p 733 A89-49141
- An experimental evaluation of S-duct inlet-diffuser configurations for turboprop offset gearbox applications [NASA-CR-179454] p 426 N89-19556
- DIFFUSION**
 Automated design of controlled-diffusion blades [ASME PAPER 88-GT-139] p 77 A89-15967
 A compendium of controlled diffusion blades generated by an automated inverse design procedure [NASA-TM-101968] p 481 N89-20996
 CVD and diffusion coatings for high temperature applications in turbomachinery and rocket motors p 549 N89-22658
- DIFFUSION FLAMES**
 Fuels combustion research [AD-A204161] p 490 N89-21071
- DIFFUSION WELDING**
 Modern joining methods for future aircraft structures p 556 A89-39076
 The diffusion bonding of aeroengine components [PNR90540] p 403 N89-19308
- DIGITAL COMMAND SYSTEMS**
 Design of adaptive digital model-following flight-mode control systems for high-performance aircraft [AIAA PAPER 89-3495] p 846 A89-52587
 Application of Artificial Intelligence (AI) programming techniques to tactical guidance for fighter aircraft [AIAA PAPER 89-3525] p 815 A89-52614
 Recent activities within the Aeroservoelasticity Branch at the NASA Langley Research Center [NASA-TM-101582] p 609 N89-24314
- DIGITAL COMPUTERS**
 NAL flight simulator real-time computer systems [AIAA PAPER 89-3297] p 787 A89-48406
 Hardware fault insertion and instrumentation system: Experimentation and results [NASA-CR-182746] p 58 N89-10526
 COMPASS (Trademark): A generalized ground-based monitoring system p 321 N89-16819
 An evaluation of the F/FB/EF-111 crew/voice message system [AD-A205998] p 626 N89-23774
- DIGITAL DATA**
 Development of an onboard maintenance computer for the AH-64 p 397 A89-30992
 The use of DFDR information in the analysis of a turbulence incident over Greenland p 562 A89-39647
 Digital recording of radar data in an aircraft [PB88-209507] p 51 N89-10212
 A simulator investigation of the use of digital data link for pilot/ATC communications in a single pilot operation [NASA-TP-2837] p 90 N89-11726
 The evolution of digital avionics architectures/systems p 770 N89-27655
- DIGITAL ELECTRONICS**
 The design, development and integration of the complex avionics systems p 135 A89-13617
 Software development for large scale avionics integration programs p 200 A89-18864
 Military engine condition monitoring systems: The UK experience p 320 N89-16797
 A real time microcomputer implementation of sensor failure detection for turbofan engines [NASA-TM-102327] p 876 N89-29032
- DIGITAL FILTERS**
 A way for upgrading the accuracy of force measurement p 553 A89-37011
- DIGITAL NAVIGATION**
 Development and flight evaluation of an integrated GPS/INS navigation system [AIAA PAPER 89-3498] p 828 A89-52590
 Performance test results of a multi-function fault-tolerant RLQ system [AIAA PAPER 89-3584] p 837 A89-52717
- DIGITAL RADAR SYSTEMS**
 A family of radars for advanced systems p 799 A89-48304
 Airborne pulsed Doppler radar --- Book p 750 A89-48895
- DIGITAL SIMULATION**
 Numerical simulation of the vortical flow over a round-edged double-delta wing p 10 A89-11152
 Numerical simulation of supersonic two-phase gas-particle flows p 64 A89-12894
 Numerical simulation of shock layer structure in a supersonic dusty gas flow past a blunt body p 64 A89-12895
 The role of specialized processors in the NAS program - Retrospective/prospective p 136 A89-16518
 Determination of the numerical integration step during the analog-digital modeling of dynamic systems p 354 A89-27405
 A digital simulation technique for Dryden atmospheric turbulence model p 439 A89-33142
- Numerical simulation of flow over a hypersonic aircraft using an explicit upwind PNS solver [AIAA PAPER 89-1829] p 582 A89-42058
- Numerical simulation of laminar hypersonic flow past a double-ellipsoid [AIAA PAPER 89-1840] p 583 A89-42068
 Simulation of the flow around a counterrotating shrouded propfan p 589 A89-43113
 Numerical simulation and experiments on leading-edge vortices on modern wings, with European cooperation p 589 A89-43114
 Numerical simulation of the flow about a wing with leading-edge vortex flow p 843 A89-45390
 Local analytical methods for digital simulation of dynamical control system p 711 A89-46244
 Numerical simulation of leading-edge vortex breakdown using an Euler code p 721 A89-47650
 An alternate approach to table look-up routines for real-time digital flight simulation [AIAA PAPER 89-3310] p 809 A89-48418
 Development of a tactical guidance research and evaluation system (TGRES) [AIAA PAPER 89-3312] p 788 A89-48420
 Cooperative simulation effectiveness analysis [AIAA PAPER 89-3338] p 788 A89-48424
 Hypersonic research at Stanford University [SAE PAPER 881521] p 743 A89-51367
 Modification of trim point and feedback gains for failed aircraft [AIAA PAPER 89-3507] p 846 A89-52600
 Scientific visualization in computational aerodynamics at NASA Ames Research Center p 875 A89-54907
 Numerical simulation of transonic flow around Asuka p 18 N89-11067
 A real-time simulator of a turbofan engine [NASA-TM-100869] p 481 N89-20995
 Microburst simulation via vortex-ring and turbulent jet models p 562 N89-22287
- DIGITAL SYSTEMS**
 Digital electronics on small helicopter engines p 105 A89-13590
 AIAA/IEEE Digital Avionics Systems Conference, 8th, San Jose, CA, Oct. 17-20, 1988, Technical Papers, Parts 1 & 2 p 169 A89-18051
 A methodology for the design of hierarchically testable and maintainable digital systems [AIAA PAPER 89-3859] p 170 A89-18057
 A method of measuring fault latency in a digital flight control system [AIAA PAPER 88-3863] p 170 A89-18060
 Triplex digital flight control system for the STOL research aircraft 'Aska' [AIAA PAPER 88-3883] p 179 A89-18077
 A case study - F-16 Ada Digital Flight Control System [AIAA PAPER 88-3911] p 171 A89-18090
 Digital Fly-By-Wire system for advanced AH-64 helicopters [AIAA PAPER 88-3922] p 179 A89-18099
 On the effectiveness of multiversion software in digital avionics [AIAA PAPER 88-3903] p 199 A89-18111
 Impact of device level faults in a digital avionics processor [AIAA PAPER 88-3904] p 172 A89-18112
 Application of digital technology to aircraft utility systems [AIAA PAPER 88-3872] p 180 A89-18114
 Digital AFCS for AS 332 MK II helicopter p 236 A89-23334
 A320 - The next generation airline aircraft p 237 A89-24853
 Markov reliability models for digital flight control systems p 430 A89-31463
 Aircraft experiences with a hybrid Loran-GPS p 384 A89-31568
 Sensitivity analysis of digital flight control systems using singular-value concepts p 538 A89-36927
 OPST 1 - A digital optical tail rotor control system [MBB-UD-533-88-PUB] p 614 A89-39847
 F/A-18A digital flight control system degraded modes flight evaluation p 687 A89-45158
 Digital flight and inlet control in the SR-71 p 664 A89-45160
 Low cost control system for expendable turbine engines [AIAA PAPER 89-2586] p 680 A89-46942
 Transport delay compensation for computer-generated imagery systems p 800 A89-48841
 Design of tunable digital set-point tracking PID controllers for gas turbines with unmeasurable outputs [AIAA PAPER 89-3577] p 839 A89-52660
 QFT digital controller for an unmanned research vehicle (URV) p 853 A89-54080
 Quadriplex digital flight control system assessment [NASA-CR-182741] p 40 N89-10058

Windshear detection and avoidance - Airborne systems perspective p 134 A89-13506
On design and projected use of Doppler radar and low-level windshear alert systems in aircraft terminal operations [AIAA PAPER 89-0704] p 302 A89-25545
TDWR display experiences --- Terminal Doppler Weather Radar [AIAA PAPER 89-0807] p 346 A89-25590
Microburst detection and display by TDWR - Shape, extent, and alarms --- Terminal Doppler Weather Radar p 868 A89-54785
Divergence estimation by a single Doppler radar p 868 A89-54786
Estimation of microburst asymmetry with a single Doppler radar p 868 A89-54787
A cursory study of F-factor applied to Doppler radar --- characterizing effect of wind shear on jet aircraft p 853 A89-54799
Remote detection of aircraft icing hazards by Doppler radar p 826 A89-54805
Using features aloft to improve timeliness of TDWR hazard warnings --- Terminal Doppler Weather Radar p 870 A89-54809
Evaluation of microburst nowcasting during TDWR 1987 p 870 A89-54813
Doppler weather radar service at the Chiang Kai-Shek International Airport p 871 A89-54840
Gust front detection algorithm for the Terminal Doppler Weather Radar. II - Performance assessment p 871 A89-54852
The FAA Terminal Doppler Weather Radar (TDWR) program p 871 A89-54855
Intracloud lightning as a precursor to thunderstorm microbursts p 56 N89-10490
Use of the Terminal Area Simulation System (TASS) to study microburst wind shears p 197 N89-14899
Preliminary results of the 1983 coordinated aircraft - Doppler weather radar turbulence experiment, volume 1 [AD-A197894] p 261 N89-15486
TDWR (Terminal Doppler Weather Radar) scan strategy requirements [AD-A201785] p 425 N89-19473
A preliminary study of precursors to Huntsville microbursts [AD-A200914] p 428 N89-19782
Analysis of Doppler radar windshear data [NASA-CR-181762] p 464 N89-20111
Selected wind shear events observed during the 1987 evaluation of enhancements to the FAA (Federal Aviation Administration) low level wind shear alert system at Stapleton International Airport [AD-A206711] p 710 N89-26323

DORNIER AIRCRAFT

- Finite element analysis of composite rudder for DO 228 aircraft p 347 A89-26284
The data system on board the DO 228 for testing navigation systems with high accuracy [DFVLR-MITT-88-20] p 226 N89-15095
- DOWNWASH**
An approximate method for calculating aircraft downwash on parachute trajectories [AIAA PAPER 89-0899] p 447 A89-35216
Flight measured downwash of QSRA p 763 A89-51303
Numerical simulation and comparison of symmetrical/supercritical airfoils for the near tip region of a helicopter in forward flight [NASA-CR-4212] p 204 N89-14821
Flight measured downwash of the QSRA [NASA-TM-101050] p 316 N89-17593
Analysis of helicopter environmental data: Indianapolis downtown heliport, Wall Street heliport. Volume 1: Summary [AD-A206708] p 710 N89-26294

DRAG

- Continuum theories for fluid-particle flows: Some aspects of lift forces and turbulence p 53 N89-11155
A numerical simulation of flows about two-dimensional bodies of parachute-like configuration [ISAS-629] p 302 N89-17580
Wave drag due to lift for transonic airplanes p 455 N89-20938

DRAG CHUTES

- Radius-tipped triangular inflatable decelerator design as affected by producibility/survivability constraints [AIAA PAPER 89-0888] p 463 A89-36020
Wake recontact: An experimental investigation using a ringslot parachute [DE89-008320] p 518 N89-21773

DRAG COEFFICIENTS

- Drag measurements on a modified prolate spheroid using a magnetic suspension and balance system [AIAA PAPER 89-0648] p 335 A89-25512
Study of hypersonic flow past sharp cones [AIAA PAPER 89-1713] p 591 A89-43228
The Reynolds number dependence of the drag coefficient of convex bodies in a rarefied gas p 741 A89-50995

DRAG FORCE ANEMOMETERS

- Aerodynamics of two-dimensional slotted bluff bodies [DE89-007288] p 452 N89-20105

DRAG MEASUREMENT

- Drag measurements on a modified prolate spheroid using a magnetic suspension and balance system [AIAA PAPER 89-0648] p 335 A89-25512
Correlation of outer and passive wall region manipulation with boundary layer coherent structure dynamics and suggestions for improved devices [AIAA PAPER 89-1026] p 417 A89-30532
Estimation of drag arising from asymmetry in thrust or airframe configuration [ESDU-88006] p 297 N89-16730
The accurate measurement of drag in the 8 ft x 8 ft tunnel p 337 N89-16855
Accurate drag estimation using a single component drag model technique p 337 N89-16856
Precision improvement of transport aircraft drag measurements p 300 N89-16858
Balance accuracy and repeatability as a limiting parameter in aircraft development force measurements in conventional and cryogenic wind tunnels p 338 N89-16873
Drag measurements on a laminar-flow body of revolution in the 13-inch magnetic suspension and balance system [NASA-TP-2895] p 374 N89-19232
Drag coefficients for irregular fragments [AD-A201943] p 379 N89-19276

DRAG REDUCTION

- Investigations on high Reynolds number laminar flow airfoils p 4 A89-10102
Computational and experimental studies of LEBUs at high device Reynolds numbers p 4 A89-10160
Boundary-layer control for drag reduction [SAE PAPER 872434] p 6 A89-10651
An aerodynamic comparison of planar and non-planar outboard wing planforms p 68 A89-13548
Investigation of flow over cavity-blunt body combination at supersonic speed p 69 A89-13569
Experimental study of the behavior of NACA 0009 profile in a transonic LEBU configuration p 71 A89-13602
Turbulent boundary layer manipulation in zero pressure gradient p 71 A89-13603
The possibility of drag reduction by outer layer manipulators in turbulent boundary layers p 74 A89-14038
Down with drag p 141 A89-18347
Winglets on low-aspect-ratio wings p 149 A89-20142

- Drag reduction factor due to ground effect p 151 A89-20325
Investigation of generic hub fairing and pylon shapes to reduce hub drag p 230 A89-23319
Feasibility study on the design of a laminar flow nacelle [AIAA PAPER 89-0640] p 311 A89-25506
Viscous drag reduction of a nose body p 362 A89-29186
Optimum non-slender geometries of revolution for minimum drag in free-molecular flow with given isoperimetric constraints p 364 A89-29756
Behaviour of internal manipulators - 'Riblet' models in subsonic and transonic flows [AIAA PAPER 89-0963] p 365 A89-30479
LEBU drag reduction in high Reynolds number boundary layers --- Large Eddy Break-Up [AIAA PAPER 89-1011] p 416 A89-30522
Toward lower drag with laminar flow technology p 371 A89-32301
Riblet drag at flight conditions p 515 A89-39196
The effect of an adverse pressure gradient on the drag reduction performance of manipulators p 571 A89-41771
Effects of contamination on riblet performance p 579 A89-42021
Experimental investigation of wing/fuselage integration geometries p 727 A89-48653
Theoretical study of passive drag-reduction on transonic airfoils [AIAA PAPER 89-3382] p 731 A89-49083
Evaluation of add-on drag reduction devices for light aircraft [AIAA PAPER 89-2050] p 758 A89-49424
Flat plate reduction by turbulence manipulation p 737 A89-50008
Passive venting technique for shallow cavities [NASA-CASE-LAR-14031-1] p 168 N89-14232
Passive venting technique for shallow cavities [NASA-CASE-LAR-13875-1] p 169 N89-14233
Trailing edge strips to reduce the drag of slender wings p 221 N89-15889
Helicopter hub fairing and pylon interference drag [NASA-TM-101052] p 372 N89-18416
Experiments and code validation for juncture flows p 374 N89-18658
Use of riblets to obtain drag reduction on airfoils at high Reynolds number flows [AD-A201485] p 378 N89-19267
A study of transonic drag reduction of a blunt cylinder by a cylinder probe [AD-A202557] p 458 N89-20965
The influence of the leading edge geometry on the wave drag for a 65 degree delta wing at low supersonic speed and small angles of attack [FFA-141] p 520 N89-22583
Navier-Stokes solution for a NACA 0012 airfoil with mass flux (fan) [AD-A205771] p 593 N89-23424
Spanwise lift distributions and wake velocity surveys of a semi-span wing with a discontinuous twist [NASA-CR-177532] p 653 N89-25122
An initial assessment of the impact of boundary layer control on SST [AERO-REPT-8802] p 656 N89-25969
Drag prediction and analysis from CFD state-of-the-art in Germany p 745 N89-26819
Combination boundary layer control system for high altitude aircraft [AD-D014075] p 765 N89-26837
Glider ground effect investigation [AD-A209152] p 821 N89-28490
- DRAWINGS**
Parachute drawing standards currently in use at Sandia National Laboratories [DE89-001365] p 260 N89-16072

Digital robust control law synthesis using constrained optimization p 430 A89-31458
The computer controlled system for multi-drone performing formation flight in a same aerial zone p 481 A89-33566
RPV (Remote Piloted Vehicle) applications in the US Navy [AD-A202151] p 396 N89-19293
Hypersonic drone design: A multidisciplinary experience [NASA-CR-184740] p 473 N89-20981

DROP SIZE

- Airblast atomization at conditions of low air velocity
[AIAA PAPER 89-0217] p 344 A89-25191
- Use of the median volume droplet diameter in the characterization of cloud droplet spectra
[AIAA PAPER 89-0756] p 352 A89-25562
- Three-dimensional trajectory analyses of two drop sizing instruments - PMS OAP and PMS FSSP
p 397 A89-30966
- Aerodynamic device for generating mono-disperse fuel droplets
p 554 A89-37878
- Condensation phenomena in a turbine blade passage
p 511 A89-37939

DROP TESTS

- Evolution of the ACAP crash energy management system
p 164 A89-18923
- Numerical and experimental study of the crash behavior of helicopters and fixed-wing aircraft
p 309 A89-24919
- Crash testing of advanced composite energy-absorbing, repairable cabin subfloor structures
p 386 A89-29459
- KRASH analysis correlation with the Bell ACAP full-scale aircraft crash test
p 386 A89-29465
- Development and implementation of flight control system for a research drop model
p 481 A89-33563
- A preliminary characterization of parachute wake recontact
[AIAA PAPER 89-0897] p 447 A89-35214
- The development of a 10,000 lb capacity ram air parachute
[AIAA PAPER 89-0904] p 462 A89-35220
- Method and means for ground crash testing at the Centre d'Essais Aeronautiques de Toulouse: Application to the SA 341 and As 332 helicopters
p 382 A89-18432
- Numerical and experimental study of the crash behavior of helicopters and aircraft
p 382 A89-18433
- Crashworthiness of aircraft structures
p 383 A89-18436
- Lateral stability analysis for X-29A drop model using system identification methodology
[NASA-TM-4108] p 539 A89-21802
- A preliminary characterization of parachute wake recontact
[DE89-006442] p 519 A89-22576

DROPS (LIQUIDS)

- Automated optical instrument for extracting water droplet impingement data from wind tunnel experiments
p 47 A89-10261
- Droplet impaction on a supersonic wedge - Consideration of similitude
[AIAA PAPER 89-0763] p 304 A89-25567
- Three-dimensional trajectory analyses of two drop sizing instruments - PMS OAP and PMS FSSP
p 397 A89-30966
- Aerodynamic device for generating mono-disperse fuel droplets
p 554 A89-37878
- Aircraft icing caused by large supercooled droplets
p 826 A89-53793
- Characteristic time model validation
[AD-A201374] p 426 A89-19510

DUAL THRUST NOZZLES

- Experimental results for a two-dimensional supersonic inlet used as a thrust deflecting nozzle
[NASA-TM-83439] p 194 A89-14386

DUAL WING CONFIGURATIONS

- The Flying Diamond: A joined aircraft configuration design project, volume 1
[NASA-CR-184699] p 360 A89-18407

DUCT GEOMETRY

- Bipolar coordinates for computation of transition duct flows
p 493 A89-34912
- Further experiments on supersonic turbulent flow development in a square duct
p 652 A89-47357

DUCTED BODIES

- Ultrasonic evaluation of matrix cracking in graphite BMI
[SME PAPER EM88-549] p 864 A89-54900

DUCTED FAN ENGINES

- A study of turbomachine flow velocities
[AIAA PAPER 89-0839] p 346 A89-25608
- Ducted ultra-high bypass engine configuration definition
[AIAA PAPER 89-2478] p 678 A89-46862
- Technology readiness for advanced ducted engines
[AIAA PAPER 89-2479] p 678 A89-46863
- High performance gear systems and heat management for advanced ducted systems
[AIAA PAPER 89-2482] p 678 A89-46865
- Installation features of advanced, very high bypass turbofan propulsion systems
[AIAA PAPER 89-2141] p 774 A89-49482

DUCTED FANS

- From single rotating propfan to counter rotating ducted propfan - Propeller/fan characteristics
p 105 A89-13558

- An automatic flight control system for VTOL aircraft supported by ducted fans
p 245 A89-24492
- Development of a flight control system for VTOL aircraft supported by ducted fans
[AIAA PAPER 89-3592] p 849 A89-52672

DUCTED FLOW

- Multiple shock wave and turbulent boundary layer interaction in a rectangular duct
p 64 A89-12890
- Euler flows in hydraulic turbines and ducts related to boundary conditions formulation
p 76 A89-15686
- Development of airfoil wake in a longitudinally curved stream
p 78 A89-16110
- Comparison of LDV measurements and Navier-Stokes solutions in a two-dimensional 180-degree turn-around duct
[AIAA PAPER 89-0275] p 279 A89-25232
- An LDV investigation of a multiple normal shock wave/turbulent boundary layer interaction
[AIAA PAPER 89-0355] p 282 A89-25300
- Finite element modelling of sheared flow effects on the radiation characteristics of acoustic sources in a circular duct
[AIAA PAPER 89-1085] p 502 A89-33726
- Bipolar coordinates for computation of transition duct flows
p 493 A89-34912
- A comparison of secondary flow in a vane cascade and a curved duct
p 446 A89-34934
- Compressible flow losses in branched ducts
p 494 A89-35004

- Experimental investigation of shock wave/boundary-layer interactions in an annular duct
p 514 A89-39039
- The investigation of dynamic distortions in flowfield downstream of strong shock boundary interaction
p 570 A89-41117
- Adiabatic compressible flow in parallel ducts - An approximate but rapid method of solution
p 571 A89-41775

- Supersonic flow stagnation in a duct during combustion
p 587 A89-42460
- Stability of compression shocks in ducts in the presence of external effects
p 588 A89-42465
- Further experiments on supersonic turbulent flow development in a square duct
p 652 A89-47357
- An implicit cell-vertex scheme for solution of the Euler equations
[AIAA PAPER 89-2235] p 735 A89-49682
- CFD application to subsonic inlet airframe integration --- computational fluid dynamics (CFD)
p 299 A89-16753

- Development of a streamline method
[AD-A205146] p 557 A89-22078

DUCTILITY

- Hot ductility response of Al-Mg and Al-Mg-Li alloys
p 695 A89-45330

DUCTS

- Unsteady heat transfer in turbine blade ducts - Focus on combustor sources
p 862 A89-53286
- An experimental evaluation of S-duct inlet-diffuser configurations for turboprop offset gearbox applications
[NASA-CR-179454] p 426 A89-19556
- Aircraft engine outer duct mounting device
[AD-D013988] p 672 A89-25991

DIFFERENTIAL EQUATION

- Time series models for nonlinear systems
[AIAA PAPER 89-1197] p 430 A89-30687

DUMMIES

- Transonic/supersonic (720 KEAS 1.2 Mach) ejection demonstration test of an S4S Biofidelity Manikin (BFM1)
p 463 A89-35841

DUMP COMBUSTORS

- Experimental study of isothermal swirling flows in a dump combustor
p 240 A89-23182
- The relation between losses and entry-flow conditions in short dump diffusers for combustors
p 240 A89-23871
- Relation between diffuser losses and the inlet flow conditions of turbojet combustors
p 322 A89-24916
- An experimental and computational investigation of isothermal swirling flow in an axisymmetric dump combustor
[AIAA PAPER 89-0620] p 323 A89-25491
- Numerical simulation of unsteady combustion in a dump combustor
[ONERA, TP NO. 1988-142] p 400 A89-31803
- Characteristics of dump combustor flows
p 612 A89-41224
- Efficient computational tool for ramjet combustor research
[AIAA PAPER 88-0060] p 674 A89-44108
- Numerical study of reactive ramjet dump combustor flowfields with a pressure based CFD method

EFFECTIVE PERCEIVED NOISE LEVELS

- Noise levels of a combined bypass-propfan engine in the far sonic field p 478 A89-34150

EFFICIENCY

- Experimental aerodynamic performance of advanced 40 deg-swept 10-blade propeller model at Mach 0.6 to 0.85
[NASA-TM-88969] p 17 N89-10865
- Structural efficiency study of composite wing rib structures
[NASA-CR-183004] p 119 N89-11827
- Wind-tunnel results of advanced high-speed propellers at takeoff, climb, and landing Mach numbers
[NASA-TM-87030] p 377 N89-19265

EIGENVALUES

- The eigenvalue dependence of reduced tilting pad bearing stiffness and damping coefficients p 124 A89-15004
- Eigenstructure assignment for the control of highly augmented aircraft p 538 A89-36930
- Eigensolution of periodic assemblies of multi-mode component systems p 556 A89-39519
- Design of a modalized observer with eigenvalue sensitivity reduction --- for lateral dynamics of L-1011 aircraft p 842 A89-51723
- Symbolic eigenvalue analysis for adaptive stepsize control in PNS shock stabilization p 816 A89-51756
- New trial of vibration testing method p 52 N89-11068

- Solution and sensitivity analysis of a complex transcendental eigenproblem with pairs of real eigenvalues
[NASA-CR-182241] p 193 N89-13819

- Calculation of the eigenvibration behavior of coupled bladings of axial turbomachines
[ETN-89-93799] p 425 N89-18692

- Actuation constraints in multivariable flight control systems p 483 N89-20998
- Flutter suppression using eigenspace freedoms to meet requirements p 689 N89-25191

- Stability robustness improvement of direct eigenspace assignment based feedback systems using singular value sensitivities
[NASA-CR-182302] p 784 N89-27672

EIGENVECTORS

- An analysis of lateral-directional handling qualities and eigenstructure of high performance aircraft
[AIAA PAPER 89-0017] p 331 A89-25013
- Structured stability robustness improvement by eigenspace techniques - A hybrid methodology --- in multivariable linear feedback systems for flight control p 405 A89-31456

- Comparison of eigenstructure assignment and the Safford singular perturbation methods in VSTOL aircraft control law design
[AIAA PAPER 89-3451] p 844 A89-52550

- Lateral electric flight control laws of a civil aircraft based upon eigenstructure assignment technique
[AIAA PAPER 89-3594] p 851 A89-52718

- A systematic approach to gain suppression using eigenstructure assignment p 875 A89-54024

- Flutter suppression using eigenspace freedoms to meet requirements p 689 N89-25191

- Stability robustness improvement of direct eigenspace assignment based feedback systems using singular value sensitivities
[NASA-CR-182302] p 784 N89-27672

EJECTION SEATS

- Aerodynamic characteristics of the ACES-II ejection seat at transonic Mach numbers p 25 A89-10463
- Multi-axis seat ejection (MASE) sled p 26 A89-10466

- An investigation of the pressure in an ejection seat bay due to rocket jet p 26 A89-10482

- Pilot ejection from a pronated flying position
[AIAA PAPER 89-0885] p 471 A89-35205

- New lightweight parachute fabrics of Kevlar aramid fiber
[AIAA PAPER 89-0911] p 489 A89-35224

- A seat-mounted combined harness
[AIAA PAPER 89-0937] p 463 A89-35245
- Transonic/supersonic (720 KEAS 1.2 Mach) ejection demonstration test of an S4S Biofidelity Manikin (BFM1) p 463 A89-35841
- Advanced Recovery Sequencer (ARS) --- for ejection seats p 471 A89-35843
- A pronated escape system for fighter aircraft p 463 A89-35845
- Pronated escape system (PRESS) p 755 A89-48659
- A wind tunnel and computer investigation of the low speed aerodynamic characteristics of the prone escape system (PRESS) p 475 N89-20988
- EJECTION TRAINING**
- Cockpit-canopy fragmentation system for immediate pilot rescue p 606 A89-43115
- EJECTORS**

[PB89-116271] p 557 N89-22016
An analysis of Electronic Aids to Maintenance (EAM) for the Light Helicopter Family (LHX)
[AD-A205440] p 568 N89-23407
- ELECTRONIC EQUIPMENT TESTS**
Faults with nonstationary observability are limiting avionics R&M
[AIAA PAPER 88-3852] p 169 A89-18054
The role of testability in the integrated diagnostic process
[AIAA PAPER 88-3858] p 198 A89-18056
A methodology for the design of hierarchically testable and maintainable digital systems
[AIAA PAPER 88-3859] p 170 A89-18057
Avionics failure propagation analysis tool
[AIAA PAPER 88-3868] p 198 A89-18065
Development and applications of an avionics research testbed
[AIAA PAPER 88-3952] p 172 A89-18123
Electronic materials testing in commercial aircraft engines
p 253 A89-21288
The B-1B central integrated test system expert parameter system
p 202 N89-14763
- ELECTRONIC FILTERS**
A signal filter with zero phase lag p 336 A89-27674
- ELECTRONIC PACKAGING**
Button boards - A connectorless high-speed interconnect for avionics
[AIAA PAPER 89-2093] p 768 A89-49452
- ELECTRONIC TRANSDUCERS**
A new high accuracy instrument for measuring moment of inertia and center of gravity
[SAWE PAPER 1827] p 791 A89-50819
- ELECTRONIC WARFARE**
Modeling mission reliability of advanced integrated communication, navigation, identification avionics systems
[AIAA PAPER 88-4023] p 173 A89-18174
GaAs MMICs satisfy EW requirements
p 188 A89-18757
Temperature compensation using GaAs MMIC devices
p 347 A89-26548
Avionics systems engineering and its relationship to mission software development
p 399 N89-18454
- ELECTROREFINING**
Electron beam cold hearth refinement processing of Inconel alloy 718 and Nimonic alloy PK50
p 546 A89-36440
- ELECTROSLAG REFINING**
Causes and effects of center segregation in electro-slag remelted alloy 718 for critical rotating part applications
p 545 A89-36410
- ELECTROSTATIC CHARGE**
Measurement of the electrostatic charging on large helicopters and control of the shock hazard
p 22 N89-10461
Gas path condition monitoring using electrostatic techniques
p 321 N89-16817
- ELECTROSTATICS**
Experimental investigation of electrostatic fire accidents after aircraft landing and preventive measures
p 460 A89-34885
Electrostatic discharge and field effects of electronics systems
p 52 N89-10493
A wide bandwidth electrostatic field sensor for lightning research
[NASA-TM-101539] p 428 N89-19783
- ELEVONS**
Aerodynamic pressures and heating rates on surfaces between split elevons at Mach 6.6
[NASA-TP-2855] p 129 N89-12822
- ELLIPSES**
Pressure cabins of elliptic cross section
p 100 A89-16322
Pulsating flow over an ellipse at an angle of attack
p 513 A89-38620
- ELLIPSOIDS**
Low-speed pressure distribution on axisymmetric elliptic-nosed bodies
p 149 A89-20147
Experimental analysis of turbulent separation on an oblate ellipsoid-cylinder
p 208 A89-21095
Numerical simulation of laminar hypersonic flow past a double-ellipsoid
[AIAA PAPER 89-1840] p 583 A89-42068
- ELLIPTIC DIFFERENTIAL EQUATIONS**
Numerical grid generation and potential airfoil analysis and design
[AD-A197972] p 154 N89-14219
An elliptic grid generation method for cropped delta wings
[AD-A199462] p 222 N89-15891
- ELLIPTIC FUNCTIONS**
A zonal equation method for three-dimensional locally elliptic laminar and turbulent flows
p 87 N89-12547
- ELLIPTICAL CYLINDERS**
Transonic shock tube flow over a NACA 0012 aerofoil and elliptical cylinders
p 65 A89-12923
Heat transfer and flow around elliptic cylinders in tandem arrangement
p 126 A89-16358
Experimental analysis of turbulent separation on an oblate ellipsoid-cylinder
p 208 A89-21095
- EMBEDDED COMPUTER SYSTEMS**
SDAR - A high productivity software engineering environment for embedded systems --- System Design Automation Resources
[AIAA PAPER 88-3865] p 198 A89-18062
A MIL-STD-1750A, single-board computer for embedded multiprocessor applications
[AIAA PAPER 88-4015] p 200 A89-18163
Initial flight qualification and operational maintenance of X-29A flight software
[AIAA PAPER 89-3596] p 850 A89-52675
Avionics systems engineering and its relationship to mission software development
p 399 N89-18454
Embedding formal methods in SAFRA
p 431 N89-18455
Verification and validation of flight critical software
p 432 N89-18460
Ada in embedded avionics systems
p 399 N89-18486
- EMBEDDING**
Adaptive grid embedding in nonequilibrium hypersonic flow
[AIAA PAPER 89-1652] p 590 A89-43178
Numerical solution of compressible Navier-Stokes flows
p 422 N89-18618
Control of embedded vortices using wall jets
[AD-A202606] p 558 N89-22835
- EMERGENCIES**
Integrating causal reasoning at different levels of abstraction --- in problem-solving system functioning as pilot assistant in commercial air transport emergencies
p 355 A89-27609
Emergency power combined with auxiliary power unit --- in aircraft
[SAE PAPER 881500] p 325 A89-28266
A computer-based Safety Assessment for Flight Evacuation - SAFE
p 380 A89-31650
High performance escape capsules
[AIAA PAPER 89-0878] p 470 A89-35202
Controlling severed helicopter blades during emergency escape
p 471 A89-35842
Experiences of rocket seat ejections in the Swedish Air Force - 1967-1987
p 522 A89-36122
- EMERGENCY LIFE SUSTAINING SYSTEMS**
Qualification and operational aspects of light weight SKAD (light weight survival kit air droppable)
p 18 A89-10471
Effect of electromagnetic interference by neonatal transport equipment on aircraft operation
p 625 A89-42161
- EMERGENCY LOCATOR TRANSMITTERS**
Low-temperature performance of a power-pack for a 2-watt ELT
p 709 A89-44016
- EMISSION**
A study of the sensitivity of stratospheric ozone to hypersonic aircraft emissions
[DE89-001240] p 261 N89-15464
- EMISSION SPECTRA**
Supersonic jet studies of fluorene clustered with water, ammonia and piperidine
[AD-A209562] p 860 N89-29497
- EMITTERS**
Multiple sample polygonal correlation algorithm for the determination of ground emitter location
[AIAA PAPER 88-3987] p 158 A89-18145
- END PLATES**
An experimental study of near wall flow parameters in the blade end-wall corner region
[NASA-CR-4211] p 223 N89-15898
- ENDURANCE**
Amber for long endurance
p 269 A89-26673
- ENERGY ABSORPTION**
The development of the V-22 Osprey armored energy-absorbing crewseat assembly
p 155 A89-18883
Energy Absorption of Aircraft Structures as an Aspect of Crashworthiness
[AGARD-CP-443] p 380 N89-18421
Crashworthiness design methods applicable at concept stage
p 381 N89-18424
Crushing behaviour of helicopter subfloor structures
p 381 N89-18429
OH-58 energy attenuating crew seat feasibility study
[AD-A207508] p 749 N89-26829
- ENERGY BUDGETS**
Thermal-energy management for air breathing hyper-velocity vehicles
[AIAA PAPER 89-0183] p 310 A89-25158
- ENERGY CONSERVATION**
NASA/industry advanced turboprop technology program
p 105 A89-13504
The principle of general energy conservation and an application to the stability analysis of a rotor-bearing system
p 255 A89-22797
Advanced turboprop project
[NASA-SP-495] p 109 N89-12565
Wind-tunnel results of advanced high-speed propellers at takeoff, climb, and landing Mach numbers
[NASA-TM-87030] p 377 N89-19265
Relaxation oscillations in aircraft cruise-dash optimization
[AD-A206722] p 672 N89-25996
- ENERGY CONSUMPTION**
Power efficient hydraulic systems. Volume 1: Study phase
[AD-A203899] p 472 N89-20127
- ENERGY DISSIPATION**
An analytical-experimental study of ring gap losses in small axial-flow turbines
p 478 A89-34141
- ENERGY DISTRIBUTION**
Optimal control for maximum energy extraction from wind shear
[AIAA PAPER 89-3490] p 846 A89-52583
Energy concepts applied to control of airplane flight in wind shear
p 540 N89-21806
- ENERGY LEVELS**
Injuries to seat occupants of light airplanes
[AD-A205758] p 749 N89-26830
- ENERGY METHODS**
Design of control laws for flutter suppression based on the aerodynamic energy concept and comparisons with other design methods
[AIAA PAPER 89-1212] p 404 A89-31100
- ENERGY REQUIREMENTS**
Energy management for integrated flight and propulsion control systems
[AIAA PAPER 88-3873] p 178 A89-18068
- ENERGY TECHNOLOGY**
Fueling our transportation engines after the petroleum is gone
p 61 A89-15420
Activities report in aerospace research in Germany, F.R.
[ISSN-0070-3968] p 815 N89-28485
- ENGINE AIRFRAME INTEGRATION**
Propulsion-airframe integration for commercial and military aircraft
[SAE PAPER 872411] p 35 A89-10637
Rotor/airframe interactions on tiltrotor aircraft
p 161 A89-18854
Airframe and propulsion assessment of alternative light helicopter technologies (LHX)
p 161 A89-18863
STOVL engine/airframe integration
p 228 A89-22294
p 251 A89-22928
A numerical study of hypersonic propulsion/airframe integration problem
[AIAA PAPER 89-0030] p 272 A89-25026
Vibration isolation of a system - A powerplant on a moving object
p 417 A89-30616
Innovative pylon concepts for engine-airframe integration for transonic transports
[AIAA PAPER 89-1819] p 581 A89-42049
Prop-fan tested for structural and acoustic data
p 674 A89-43885
Easy method of matching fighter engine to airframe for use in aircraft engine design courses
[AIAA PAPER 89-2260] p 665 A89-46705
Design and testing of a common engine and nacelle for the Fokker 100 and Gulfstream GIV airplanes
[AIAA PAPER 89-2486] p 666 A89-46867
Bow shock matching with viscous effects on hypersonic forebodies
[AIAA PAPER 89-2678] p 649 A89-47008
Numerical and experimental investigation of airframe-integrated inlet for high velocities
[AIAA PAPER 89-2679] p 649 A89-47009
Rapid methodology for design and performance prediction of integrated scramjet/hypersonic vehicle
[AIAA PAPER 89-2682] p 666 A89-47012
Experiences with a prevalidation methodology for designing integrated/propulsion control system architectures
[AIAA PAPER 89-2703] p 688 A89-47030
Integrated flight/propulsion control study for STOVL applications
[AIAA PAPER 89-2908] p 688 A89-47166
Average-passage simulation of counter-rotating propfan propulsion systems as applied to cruise missiles
[AIAA PAPER 89-2943] p 651 A89-47187
TRANAIR applications to engine/airframe integration
[AIAA PAPER 89-2165] p 753 A89-47632
Parameter study of fighter aircraft configurations using a simple performance synthesis model for the overall airframe-engine system
p 762 A89-50372

- Environmental fate and effects of shale-derived jet fuel [AD-A197683] p 120 N89-11918
- Detailed design specification for a prototype Assessment System for Aircraft Noise (ASAN) [AD-A197936] p 204 N89-14818
- Analysis of helicopter environmental data: Indianapolis downtown heliport, Wall Street heliport. Volume 1: Summary [AD-A206708] p 710 N89-26294

High-speed civil transport study. Summary
[NASA-CR-4234] p 766 N89-27647

High-speed civil transport study
[NASA-CR-4233] p 766 N89-27648

ENVIRONMENT MODELS

Effects of environmentally imposed roughness on airfoil performance
[NASA-CR-179639] p 88 N89-11725

A microcomputer pollution model for civilian airports and air force bases. Model description
[AD-A199003] p 197 N89-14616

A microcomputer pollution model for civilian airports and Air Force bases. User's guide, issue 2
[AD-A199795] p 262 N89-16228

A microcomputer pollution model for civilian airports and Air Force bases. Model application and background
[AD-A199794] p 499 N89-20557

ENVIRONMENT SIMULATION

Simulated environment testing for aircraft
p 115 N89-13505

The development of a capability for aerodynamic testing of large-scale wing sections in a simulated natural rain environment
[AIAA PAPER 89-0762] p 337 N89-28457

Mechanical stresses during air transport and ground operations
p 700 N89-46221

Hypersonic vehicle environment simulation, phase 1
[AD-A209030] p 864 N89-28754

ENVIRONMENTAL CONTROL

Improved reliability and maintainability for fighter aircraft Environmental Control Systems
[SAE PAPER 880998] p 312 N89-27808

A dynamic model for vapor-cycle cooling systems --- for aircraft
[SAE PAPER 881001] p 313 N89-27809

Airplane tests of enhanced emergency smoke venting
[D218N301] p 658 N89-25976

ENVIRONMENTAL MONITORING

Contamination of environmental control systems in Hercules aircraft
[MRL-R-1116] p 29 N89-10040

Navigational and Environmental Measurement System (NEMS)
p 752 N89-28178

ENVIRONMENTAL TESTS

Environmental durability of adhesively bonded joints
p 46 N89-10095

Simulated environment testing for aircraft
p 115 N89-13505

NASA will study heavy rain effects on wing aerodynamics
p 407 N89-29347

Consideration of environmental conditions for the fatigue evaluation of composite airframe structure
p 551 N89-36304

The environmental cracking behaviour of aluminium-lithium based alloys
p 621 N89-41801

Environmental tests of thermographic phosphors for turbine-engine temperature measurements
[AIAA PAPER 89-2913] p 802 N89-50124

Environmental effects on composite structures
p 857 N89-52994

EPOXY MATRIX COMPOSITES

Creep behaviour of carbon fibre reinforced polyetheretherketone and epoxy resin
[MBB-Z-178-88-PUB] p 251 N89-22890

Design of an all boron/epoxy doubler reinforcement for the F-111C wing pivot fitting - Structural aspects
p 313 N89-27925

Edge effects in tapered composite structures
p 410 N89-29461

Fatigue crack propagation in ARALL laminates - Measurement of the effect of crack-tip shielding from crack bridging
p 411 N89-31778

Fracture of pressurized composite cylinders with a high strain-to-failure matrix system
p 551 N89-36319

Diminution and longitudinal splitting of carbon fibers due to grinding
[AD-A196697] p 119 N89-11819

Durability and damage tolerance of bismaleimide composites, volume 1
[AD-A201273] p 412 N89-19374

Durability and damage tolerance of bismaleimide composites. Volume 2: Appendix of crack growth and low-velocity impact data
[AD-A201839] p 412 N89-19379

EPOXY RESINS

Radiation-curable carbon fiber prepreg composites
p 251 N89-22813

Heat-up rate effects of repair bonding helicopter rotor blades
p 387 N89-29961

A foil adhesive for construction - The Letoxit system
p 620 N89-40085

Determining cure cycles for thermosetting epoxy resins
[SME PAPER EM88-533] p 864 N89-54890

Lightning tests on an all-composite helicopter
p 21 N89-10452

EQUATIONS OF MOTION

Dynamics of a rigid rotor mounted on discontinuously non-linear elastic supports
p 190 N89-19125

Performance prediction analysis for fully deployed parachute canopies
p 155 N89-20314

On a method for solving integral equations of lifting-surface theory for oscillating high-speed propellers
p 439 N89-33100

Motion of a three-degrees-of-freedom gyroscope with a dynamically unbalanced rotor in the case of contact between the internal frame and an elastic limiter
p 565 N89-39816

On optimal rigid body motions
[AIAA PAPER 89-3616] p 850 N89-52694

Aerodynamic design considerations for a free-flying ducted propeller
[DE88-006867] p 15 N89-10841

A vortex panel method for potential flows with applications to dynamics and control
[AD-A197091] p 87 N89-12549

The effects of internal rotor friction on dynamic characteristics of turbopumps
p 128 N89-12629

Studies of the dynamics of the twin-lift system
[NASA-CR-183273] p 167 N89-13422

Aerodynamic maneuvering hypersonic flight mechanics
[NASA-CR-183007] p 219 N89-15074

Time periodic control of a multiblade helicopter
p 406 N89-19312

EQUATIONS OF STATE

Estimation of states of aircrafts by Kalman filtering algorithms
[PD-SE-8810] p 136 N89-12238

Derivation and definition of a linear aircraft model
[NASA-RP-1207] p 247 N89-15123

EQUILIBRIUM FLOW

Unsteady low-speed wind tunnel test of a straked delta wing, oscillating in pitch. Part 2: Plots of steady and zeroth and first harmonic unsteady pressure distributions
[AD-A201936] p 378 N89-19275

Thin-layer Navier-Stokes solutions for a cranked delta wing
[AD-A203292] p 459 N89-20970

Development of a streamline method
[AD-A205146] p 557 N89-22078

EQUIPMENT SPECIFICATIONS

Parachute drawing standards currently in use at Sandia National Laboratories
[AIAA PAPER 89-0927] p 495 N89-35237

Leads, flexible, shielded, high energy ignition --- for gas turbine engines
[SAE ARP 841] p 534 N89-37861

The effects of leading edge and downstream film cooling on turbine vane heat transfer
[NASA-CR-182133] p 192 N89-13754

Wind tunnel pressurization and recovery system
[NASA-CR-184591] p 408 N89-18499

Design and calibration of the mixing layer and wind tunnel
[NASA-CR-185472] p 792 N89-26866

Airport noise measuring data collection system
[NLR-MP-87006-U] p 855 N89-26526

EROSION

Numerical simulation of shock layer structure in a supersonic dusty gas flow past a blunt body
p 64 N89-12895

Advancements in erosion testing of rotor blade leading edges
p 163 N89-18888

Measurements of particles rebound characteristics on materials used in gas turbines
[AIAA PAPER 89-1693] p 621 N89-43211

Part 5 and 6: Turbomachinery performance deterioration and retention
p 241 N89-15919

Part 4: Blade erosion prediction
p 241 N89-15923

MATE program: Erosion resistant compressor airfoil coating, volume 2
[NASA-CR-179645] p 412 N89-18550

ERROR ANALYSIS

Automated optical instrument for extracting water droplet impingement data from wind tunnel experiments
p 47 N89-10261

Failure detection in dynamic systems with modeling errors
p 136 N89-18155

Developing error-free software
p 201 N89-19679

Sources of error in the graphical analysis of CFD results
p 255 N89-22578

Euler procedure for correcting two-dimensional transonic wind-tunnel wall interference
p 215 N89-23184

Inertial energy distribution error control for optimal wind shear penetration
[AIAA PAPER 89-0016] p 331 N89-25012

A Kalman filter for an integrated Doppler/GPS navigation system
p 308 N89-26740

Interferometry against differential Doppler - Performance comparison of two emitter location airborne systems
p 525 N89-39203

Gain transfer - An algorithm for decentralized hierarchical estimation
p 711 N89-48150

An investigation on stagnation pressure errors due to rotation state behind a rotor
p 839 N89-52315

Surface failure detection and evaluation of control law for reconfiguration of flight control system
[AIAA PAPER 89-3509] p 847 N89-52602

Observability studies of inertial navigation systems
[AIAA PAPER 89-3580] p 829 N89-52663

A perfect explicit model following control solution to imperfect model following control problems
[AIAA PAPER 89-3612] p 850 N89-52690

The pros and cons of code validation
[NASA-TM-100657] p 14 N89-10034

B-1B CITS engine monitoring
p 319 N89-16788

A critical assessment of wind tunnel results for the NACA 0012 airfoil
p 300 N89-16847

Evaluation of a projection algorithm for the stereographic representation of aircraft in an air traffic control system
[DOT/FAA/CT-TN89/20] p 661 N89-25985

ERROR CORRECTING DEVICES

A wall pressure correction method for closed subsonic wind tunnel test sections
p 79 N89-16436

An investigation of wall interference correction to the pressure measurement in low speed wind tunnel with solid walls
p 183 N89-19808

RAIM and GIC working together - The ultimate solution to the GPS integrity problem --- Receiver Autonomous Integrity Monitoring and GPS Integrity Channel
p 750 N89-49791

Correction algorithms for differential GPS reference stations
p 750 N89-49792

ERROR DETECTION CODES

Central fault display systems
p 104 N89-13618

ERROR SIGNALS

Irreducible error rate in aeronautical satellite channels
p 157 N89-17183

ERRORS

Estimating electric field enhancement factors on an aircraft utilizing a small scale model: A method evaluation
p 21 N89-10454

A truncation error injection approach to viscous-inviscid interaction
p 83 N89-11700

Porous plug for reducing orifice induced pressure error in airfoils
[NASA-CASE-LAR-13569-1] p 129 N89-12841

ESCAPE

Controlling severed helicopter blades during emergency escape
p 471 N89-35842

ESCAPE CAPSULES

Advanced crew escape capsule technologies program
p 18 N89-10475

High performance escape capsules
[AIAA PAPER 89-0878] p 470 N89-35202

Testing of a new recovery parachute system for the F111 aircraft crew escape module - An update
[AIAA PAPER 89-0891] p 471 N89-35209

Development of an alternating flat to tubular Kevlar parachute tape
[AIAA PAPER 89-0910] p 462 N89-35223

Light weight escape capsule for fighter aircraft
p 383 N89-19858

ESCAPE SYSTEMS

Hypervelocity technology escape system concepts program
p 184 N89-17929

Magnets promise productivity
p 407 N89-29655

Pilot ejection from a pronated flying position
[AIAA PAPER 89-0885] p 471 N89-35205

Advanced Recovery Sequencer (ARS) --- for ejection seats
p 471 N89-35843

A pronated escape system for fighter aircraft
p 463 N89-35845

Sled testing of U.S. Air Force escape systems
p 657 N89-45129

Pronated escape system (PRESS)
p 755 N89-48659

Crew escape system design for hypersonic vehicles
[AIAA PAPER 89-2025] p 758 N89-49411

A wind tunnel and computer investigation of the low speed aerodynamic characteristics of the prone escape system (PRESS)
[AD-A202768] p 475 N89-20988

Testing of a new recovery parachute system for the F111 aircraft crew escape module: An update
[DE89-007139] p 524 N89-22592

ESTIMATES

Estimating electric field enhancement factors on an aircraft utilizing a small scale model: A method evaluation
p 21 N89-10454

Analytical wing weight prediction/estimation using computer based design techniques
p 234 N89-15903

High-dynamic GPS tracking
[NASA-CR-184868] p 465 N89-20113

ESTIMATING

- Estimation of longitudinal stability and control derivatives for an icing research aircraft from flight data [NASA-TM-4099] p 247 N89-15925
- Estimating aircraft airframe tooling cost: An alternative to DAPCA 3 [AD-A201506] p 380 N89-19226
- Estimating and explaining the production cost of high-technology systems: The case of military aircraft [AD-A208391] p 719 N89-26809

EULER BUCKLING

- Overview of buckling in aircraft design p 834 A89-54462

EULER EQUATIONS OF MOTION

- Numerical approach of advanced turboprop with three-dimensional Euler equations [SAE PAPER 872448] p 7 A89-10661
- Multigrid solution of the two-dimensional Euler equations on unstructured triangular meshes p 9 A89-11108

- Nozzle flap hinge joint [AD-D014002] p 775 N89-26847
- EXHAUST SYSTEMS**
- Preliminary assessment of exhaust systems for high Mach (4 to 6) fighter aircraft [AIAA PAPER 89-2356] p 676 A89-46770

A static investigation of several STOVL exhaust system concepts
[AIAA PAPER 89-2928] p 684 A89-47180
EC-18B/Boeing 707 Smoke Venting flight test
[AD-A206601] p 659 N89-25979

EXHAUST VELOCITY
Rectangular nozzle plume velocity modeling for use in jet noise prediction
[AIAA PAPER 89-2357] p 647 A89-46771
Rectangular nozzle plume velocity modeling for use in jet noise prediction
[NASA-TM-102047] p 519 N89-22577

EXPANDABLE STRUCTURES
Dynamics and control of truss structures with extending members
p 523 N89-21778

EXPANSION
Expansion tube test time predictions
[NASA-CR-181722] p 116 N89-11756

EXPERIMENT DESIGN
Experimental methods for hypersonics - Capabilities and limitations
p 441 A89-33638
ONERA research on civil aircraft
[ONERA, TP NO. 1989-75] p 438 A89-35376
The low-speed wind tunnel at DVLFR in Brunswick (Fed. Republic of Germany)
p 543 N89-22619
Helipod night parking area criteria test plan
[DOT/FAA/CT-TN88/45] p 619 N89-23480
Physical mechanisms and disturbances related to the attachment of an electric arc to a conductive cylinder
[ONERA-NT-1988-2] p 666 N89-29698

EXPERT SYSTEMS
Texmas - An expert system for gas turbine engine diagnosis and more
[SAE 871737] p 34 A89-10621
A tactics expert system for scout/attack rotorcraft
p 58 A89-12405
A hybrid knowledge-based approach to AH-64A fault isolation
p 2 A89-12409
Implementation of knowledge-based systems for helicopter machinery fault prognosis
p 2 A89-12412
Development of a rule-based demonstration prototype expert system for inflight emergencies for the UH1H helicopter
p 32 A89-12415
Aircraft configuration analysis/synthesis expert system
- A new approach to preliminary sizing of combat aircraft
p 98 A89-13668
Hybrid architecture of field-tested diagnostic expert system
p 198 A89-18034
Application of AI technology to time-critical functions
[AIAA PAPER 88-4030] p 174 A89-18190
A method of computer aided design of structural type
- An application of expert system and fuzzy sets theory
p 201 A89-19811
Progress towards a commercial aircraft design expert system
[DGLR PAPER 87-120] p 167 A89-20237
A hierarchical knowledge based system for airplane classification
p 262 A89-21246
Combining expert system and analytical redundancy concepts for fault-tolerant flight control
p 242 A89-22506
Expert systems and quality control --- for helicopter parts
p 256 A89-23331
Advanced diagnostics for helicopter rotor head management, including the use of expert systems
p 233 A89-23377
Pattern-based fault diagnosis using neural networks
p 354 A89-27602
Integrating causal reasoning at different levels of abstraction --- in problem-solving system functioning as pilot assistant in commercial air transport emergencies
p 355 A89-27609
The development of an automated flight test management system for flight test planning and monitoring
p 312 A89-27613
Flight mission scenario generation with knowledge-based system
p 355 A89-27614
Automatic acquisition of domain and procedural knowledge
p 318 A89-27624
Applying evidential reasoning to avionics troubleshooting
p 355 A89-27629
LEADER - An automatic, real-time diagnostic knowledge system
[SAE PAPER 881443] p 534 A89-37651
The application of artificial intelligence techniques for turbomachinery diagnostics
p 629 A89-41081
Establishing artificial intelligence technology in a flight test environment
p 663 A89-45135
ExpertVision - A video-based non-contact system for motion measurement
p 698 A89-45136
Expert systems' role broadens
p 711 A89-45293
A pilot's view of intelligent systems
p 688 A89-45294
A nontraditional approach to reliability
p 701 A89-46483

Preliminary development of an intelligent computer assistant for engine monitoring
[AIAA PAPER 89-2539] p 674 A89-46910
Diagnostic expert systems for gas turbine engines - Status and prospects
[AIAA PAPER 89-2585] p 680 A89-46941
A real-time expert system for self-repairing flight control
[AIAA PAPER 89-3427] p 843 A89-52528
On-board automatic aid and advisory for pilots of control-impaired aircraft
[AIAA PAPER 89-3460] p 844 A89-52558
Air traffic control system - Can we close the control loop?
p 830 A89-53969
An expert system for wind shear avoidance
p 826 A89-53971
Intelligent avionics
p 838 A89-54345
The development of numerically-based and expert system approaches for airfield nowcasting/very short range forecasting
p 872 A89-54860
An expert system for restructurable control
[NASA-TM-101378] p 137 N89-12309
On-board expert diagnostics for an avionics subsystem
p 202 N89-14758
Expert systems in higher echelon maintenance activities
p 202 N89-14761
The B-1B central integrated test system expert parameter system
p 202 N89-14763
Development of an aircraft design expert system
p 233 N89-15102
RT-BUILD: An expert programmer for implementing and simulating Ada real-time control software
p 265 N89-16343
Controls and guidance: Aeronautics
p 334 N89-18401
Responsible requirements definition for combat aircraft in light of uncertainties linked to artificial intelligence and expert systems techniques
p 398 N89-18448
Three generations of software engineering for airborne systems
p 432 N89-18465
An avionics software expert system design
p 433 N89-18467
Avionics expert systems
p 399 N89-18469
A parallel expert system for the control of a robotic air vehicle
p 433 N89-19842
On-board automatic aid and advisory for pilots of control-impaired aircraft
p 483 N89-20150
Reliability and performance evaluation of systems containing embedded rule-based expert systems
[NASA-CR-181769] p 500 N89-20683
INTERFACE 2: Advanced diagnostic software
[AD-A204527] p 563 N89-22366
Recent Advances in Multidisciplinary Analysis and Optimization, part 1
[NASA-CP-3031-PT-1] p 686 N89-25146
TRUSS: An intelligent design system for aircraft wings
p 711 N89-25162
The designer of the 90's: A live demonstration
p 705 N89-25164
Advanced piloted aircraft flight control system design methodology. Volume 1: Knowledge base
[NASA-CR-181726-VOL-1] p 690 N89-28013
Advanced piloted aircraft flight control system design methodology. Volume 2: The FCX flight control design expert system
[NASA-CR-181726-VOL-2] p 691 N89-28014
Applications of fuzzy sets to rule-based expert system development
p 712 N89-26606
Rapid prototyping of complex avionics systems
p 770 N89-27657
Computational structural mechanics engine structures computational simulator
p 866 N89-29792

EXPOSURE
Five year ground exposure of composite materials used on the Bell Model 206L flight service evaluation
[NASA-TM-101645] p 859 N89-28579

EXTENSOMETERS
X-ray based extensometry
[NASA-CR-185058] p 706 N89-25432

EXTERNAL STORE SEPARATION
Transonic store separation using a three-dimensional chimera grid scheme
[AIAA PAPER 89-0637] p 296 A89-28442
Magnets promise productivity
p 407 A89-29655
Cavity door effects on aerodynamic loads of stores separating from cavities
p 578 A89-42011

EXTERNAL STORES
UT1780A RTS - A low-cost monolithic remote terminal stores interface for MIL-STD-1760A
[SAE PAPER 872481] p 48 A89-10677
Efficient vibration mode analysis of aircraft with multiple external store configurations
p 28 A89-12562
Experimental/computational study of a transonic aircraft with stores
[AIAA PAPER 89-1832] p 582 A89-42060

Computation of the Euler flow field produced by a transonic aircraft with stores
[AIAA PAPER 89-2219] p 723 A89-47676
Method to predict external store carriage loads at transonic speeds
p 473 N89-20945
Prediction of loads on wing/body/external store/fins pylon-configurations at transonic speeds
[FFA-TN-1988-44] p 532 N89-22602

EXTERNAL TANKS
Airborne pod structures
p 603 A89-40261
Preliminary airworthiness evaluation of the UH-60A external fuel system
[AD-A207570] p 765 N89-26840

EXTREMELY HIGH FREQUENCIES
EHF monolithic phased arrays - A stepping-stone to the future
p 257 A89-24094
A 35 GHz helicopter-borne polarimeter radar
p 134 N89-13038

EYE (ANATOMY)
Development of a low-cost helmet mounted eye gaze sensor
[AD-A202303] p 399 N89-19298

EYEPIECES
Compact holographic sight
p 125 A89-15785

F

F-104 AIRCRAFT
Application of perfect model following to a control configured vehicle
[AIAA PAPER 89-3453] p 844 A89-52552

F-106 AIRCRAFT
EMP susceptibility insights from aircraft exposure to lightning
p 88 A89-15937
Experimental investigation of dynamic ground effect
p 514 A89-39185
Application of triggered lightning numerical models to the F106B and extension to other aircraft
[NASA-CR-4207] p 261 N89-15485

F-111 AIRCRAFT
Design of an all boron/epoxy doubler reinforcement for the F-111C wing pivot fitting - An update
p 313 A89-27925
Testing of a new recovery parachute system for the F111 aircraft crew escape module - An update
[AIAA PAPER 89-0891] p 471 A89-35209
Acoustic emission testing the F-111
p 541 A89-39008
Fast brake --- F-111 high-performance parachute system development
p 657 A89-46593
Modern avionics connector unreliability
[AIAA PAPER 89-2099] p 768 A89-49457
Measured and predicted pressure distributions on the AFTI/F-111 mission adaptive wing
[NASA-TM-100443] p 235 N89-15908

F-14 AIRCRAFT
IFM applications to cavity flowfield predictions
[AIAA PAPER 89-0477] p 285 A89-25390
F-14 flow field simulation
[AIAA PAPER 89-0642] p 296 A89-28444
F-14/F110 high angle of attack flight tests
p 686 A89-45153
TRANAIR applications to fighter configurations
[AIAA PAPER 89-2220] p 724 A89-47677
Influence function method applications to cavity flowfield predictions
p 728 A89-48661
Tomcat-21, effectiveness and affordability
[AIAA PAPER 89-2120] p 760 A89-49470

F-15 AIRCRAFT
Departure resistance and spin characteristics of the F-15 S/MTD
[AIAA PAPER 89-0012] p 331 A89-25008
Agile Fighter Aircraft Simulation
[AIAA PAPER 89-0015] p 331 A89-25011
Laboratory and flight evaluation of the Integrated Inertial Sensor Assembly (IISA)
p 307 A89-26708
Modified F-15B to demonstrate STOL, maneuver capability
p 603 A89-41075
Experimental/computational study of a transonic aircraft with stores
[AIAA PAPER 89-1832] p 582 A89-42060
F-15 STOL/Maneuvering Technology Demonstrator - Initial flight test results
p 687 A89-45157
Integrated controls pay-off --- for flight/propulsion aircraft systems
[AIAA PAPER 89-2704] p 688 A89-47031
Application of CHIMERA for supersonic viscous calculations of the F-15
[AIAA PAPER 89-2180] p 720 A89-47642
Computation of the Euler flow field produced by a transonic aircraft with stores
[AIAA PAPER 89-2219] p 723 A89-47676

SUBJECT INDEX

- A comparison of the ground effects measured with and without rate-of-descent modeling on the F-15 S/MTD configuration
[AIAA PAPER 89-3280] p 755 A89-48393
- F-15 SMTD low speed jet effects wind tunnel test results p 16 N89-10853
- Flight measured and calculated exhaust jet conditions for an F100 engine in an F-15 airplane
[NASA-TM-100419] p 177 N89-13435
- CAP-TSD analysis of the F-15 aircraft p 395 N89-19239
- US military aircraft coproduction with Japan
[AD-A206430] p 569 N89-24263
- ### F-16 AIRCRAFT
- AFTI/F-16 voice interactive avionics evaluation
[SAE PAPER 871751] p 24 A89-10581
- Determination of departure susceptibility and centre of gravity limitations for control augmented aircraft p 112 A89-13638
- A case study - F-16 Ada Digital Flight Control System
[AIAA PAPER 88-3911] p 171 A89-18090
- The development and application of software quality indicators
[AIAA PAPER 88-3946] p 201 A89-19860
- Unsteady transonic algorithm improvements for realistic aircraft applications p 312 A89-27738
- Numerical simulation of the Navier-Stokes equations for an F-16A configuration p 578 A89-42014
- F-16 inlet stability investigation p 665 A89-46852

- NASA adds to understanding of high angle of attack regime p 571 A89-41201
- Service suitability testing of the F/A-18A for use by the Blue Angels Navy Flight Demonstration Team p 664 A89-45146
- F-18 Hornet - LEX Fence flight test results p 687 A89-45155
- F/A-18A digital flight control system degraded modes flight evaluation p 687 A89-45158
- Hornet maintenance p 638 A89-46496

- Experimental investigation of the F/A-18 vortex flows at subsonic through transonic speeds
[AIAA PAPER 89-2222] p 724 A89-47678
- Effects of structural nonlinearities on flutter characteristics of the CF-18 aircraft p 800 A89-48664
- High performance linear-quadratic and H-infinity designs for a 'supermaneuverable' aircraft
[AIAA PAPER 89-3456] p 832 A89-52712
- Some statistical aspects of attrition studies
[AD-A196665] p 30 N89-10891
- Investigation of a moving-model technique for measuring ground effect
[NASA-TM-4080] p 154 N89-14217
- The poststall nonlinear dynamics and control of an F-18: A preliminary investigation p 169 N89-14922
- Aerodynamic model tests of exhaust augmentors for F/A-18 engine run-up facility at RAAF Williamtown
[AD-A208110] p 841 N89-28518
- ### F-4 AIRCRAFT
- Propulsion interface unit (PIU) controller on PW1120/DEEC re-engined F4 aircraft p 106 A89-13654
- Study of aircraft cruise p 831 A89-51703
- ### F-5 AIRCRAFT
- F-5E departure warning system algorithm development and validation p 113 A89-18088
- ### FABRICATION
- New developments in ARALL laminates p 96 A89-13665
- MBB's five-plant factory - An economic interaction of forces p 61 A89-15035
- Design and fabrication of an advanced light rotor p 163 A89-18880
- Fabrication of sintered alpha-SiC turbine engine components p 491 A89-33621
- Fabrication and testing of lightweight hydraulic system simulator hardware. Phase 2: Addendum
[AD-A198524] p 184 N89-14243
- The effects of a compressor rebuild on gas turbine engine performance p 327 N89-16803
- Joining of carbon fiber composite with fasteners p 343 N89-17701
- Technology of aircraft construction (selected chapters)
[AD-A199946] p 569 N89-24261
- ### FABRICS
- Tribological properties of alumina-boria-silicate fabric from 25 C to 850 C p 859 A89-54982
- ### FABRY-PEROT INTERFEROMETERS
- Three component laser anemometer measurements in an annular cascade of core turbine vanes with contoured end wall
[NASA-TP-2846] p 15 N89-10844
- ### FACTORIAL DESIGN
- The combination of simulation and response methodology and its application in an aggregate production plan p 190 A89-19806
- ### FACTORIZATION
- Scramjet analysis with chemical reaction using three-dimensional approximate factorization
[AIAA PAPER 89-0672] p 323 A89-25533
- Navier-Stokes simulation of wind-tunnel flow using LU-ADI factorization algorithm p 291 A89-25864
- Computation of transonic potential flow past RAE-Wing-A and Body-B2 combination
[PD-CF-8921] p 747 N89-27637
- ### FAIL-SAFE SYSTEMS
- Influence of mechanical nonlinearities on flutter - Analytical and computational aspects
[AIAA PAPER 89-2091] p 801 A89-49451
- Probabilistic damage tolerance methods for metallic aerospace structures p 672 N89-25237
- ### FAILURE
- The nature of the aircraft component failure process: A working note
[AD-A197979] p 169 N89-14234
- Composite failure criterion: Probabilistic formulation and geometric interpretation
[AD-A205275] p 548 N89-21851
- Design criteria for aggregate-surfaced roads and airfields
[AD-A207059] p 694 N89-26019
- Statistics on aircraft gas turbine engine rotor failures that occurred in US commercial aviation during 1984
[NAPC-PE-185] p 841 N89-28516
- Statistics on aircraft gas turbine engine rotor failures that occurred in US commercial aviation during 1985
[NAPC-PE-188] p 841 N89-28517
- Composite material repair and reliability
[AD-A209150] p 859 N89-28574
- ### FAILURE ANALYSIS
- Reasoning about device behavior using qualitative physics --- helicopter diagnostics p 58 A89-12410
- Non-destructive methods applied to aviation equipment testing in service p 123 A89-13616

FAILURE ANALYSIS

- Mechanical failure analysis as a means of improving quality assurance in the aeronautical industry p 123 A89-13673
- Applications of an architecture design and assessment system (ADAS) p 136 A89-16512
- Multifactor model of errors connected with aircraft control p 113 A89-16632

Results of an A109 simulation validation and handling qualities study
[NASA-TM-101062] p 617 N89-24323
Visibility with a moving point of view
p 631 N89-24876
Longitudinal nonlinear aerodynamic model form for USB-STOL aircraft
[NAL-TR-995] p 672 N89-25990
Descent strategy comparisons for TNAV-equipped aircraft under airplane-preferred operating conditions
[NASA-CR-4248] p 690 N89-26011
Effect of three-dimensional object type and density in simulated low-level flight
[AD-A209756] p 795 N89-27679
Glider ground effect investigation
[AD-A209152] p 821 N89-28490
Species composition measurements in nonequilibrium high-speed flows
p 824 N89-29312
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 1: Basic use
[AD-A208058] p 835 N89-29339
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 2: Use with ARL flight data
[AD-A208059] p 836 N89-29340
- FLIGHT SIMULATORS**
Phase II flight simulator mathematical model and data-package, based on flight test and simulation techniques
p 116 N89-13633
Performance improvement of flight simulator servactuators
p 125 N89-15119
Ultra-low frequency vibration data acquisition concerns in operating flight simulators
p 116 N89-15560
Recent results with ATTAS in-flight simulator
[AIAA PAPER 88-4606] p 101 N89-16524
Recent advances in computer image generation simulation
p 116 N89-16738
Evaluation of simulator motion characteristics based on AGARD-AR-144 procedures
p 183 N89-19565
Flying the XV-15 and V-22 tilt-rotors
p 229 N89-23051
Flight simulators - Simple or complex
p 249 N89-24499
Photo-based three dimensional graphics models for multi-sensor simulation --- terrain data bases for flight simulator
p 348 N89-27787
Flight simulators - Concepts and development trends
p 407 N89-29737
Economic problems of raising the effectiveness of air flight simulators
p 435 N89-29738
A task-oriented dialogue system - An aeronautical application
p 384 N89-31907
Flight control system design for an in-flight simulator
p 539 N89-36934
Methods of flying model studies --- Russian book
p 805 N89-42535
Economic aspects of simulation in air transportation
p 691 N89-45047
Inertial guidance test facility using the earth environment
p 700 N89-46218
Modeling of controlled flight dynamics using in-flight simulators --- Russian book
p 688 N89-46546
Verification of the flight characteristics of training aircraft with a relaxed static stability on the TL-39 flight simulator
p 778 N89-47523
A comprehensive collection of procedures for simulation verification
[AIAA PAPER 89-3280] p 785 N89-48377
Need-based evaluation of simulator force and motion cuing devices
[AIAA PAPER 89-3272] p 785 N89-48386
The use of vestibular models for design and evaluation of flight simulator motion
[AIAA PAPER 89-3274] p 785 N89-48387
Modeling atmospheric effects for flight simulators
[AIAA PAPER 89-3284] p 786 N89-48396
NAL flight simulator real-time computer systems
[AIAA PAPER 89-3297] p 787 N89-48406
- An experimenter operator station for helicopter flight simulator research and training
[AIAA PAPER 89-3304] p 788 N89-48412
Nonlinear model following control application to a flight simulator control loader
[AIAA PAPER 89-3308] p 788 N89-48416
Novoview LCV - Balancing performance and cost for a 'low cost' visual system
[AIAA PAPER 89-3321] p 789 N89-48430
Recovery strategies for microburst encounters using reactive and forward-look wind shear detection
[AIAA PAPER 89-3325] p 779 N89-48433
VISTA/F-16 design features
[AIAA PAPER 89-3330] p 789 N89-48436
Flight simulation: Recent developments in technology and use; Proceedings of the Conference, London, England, Apr. 12, 13, 1988
p 790 N89-48826
Changes in RAF engineering requirements for flight simulators - Impact on the manufacturers and the CSDE teams
p 790 N89-48830
The modern research simulator - Your flexible friend
p 790 N89-48832
Project Genesis - The development of a low cost simulator
p 791 N89-48836
Integrated ground training for the RAF's new basic trainer - The Tucano
p 791 N89-48837
The Tucano flight simulator
p 756 N89-48838
Projection displays for flight simulators
p 800 N89-48840
The impact of Ada on flight simulator development
p 810 N89-48842
A microcomputer controlled optimal adaptive flight simulator servo system
p 811 N89-50782
Prototype data acquisition and analysis system for Navy operational flight simulators
[DE88-014557] p 42 N89-10901
Technology involved in the simulation of motion cues: The current trend
[NLR-MP-87060-U] p 249 N89-15126
Towards a general object-oriented software development methodology
p 264 N89-16330
The vertical motion simulator
p 339 N89-18384
An OOD (Object-Oriented Design) paradigm for flight simulators, 2nd edition
[AD-A204849] p 542 N89-21813
Effect of three-dimensional object type and density in simulated low-level flight
[AD-A209756] p 795 N89-27679
- FLIGHT STABILITY TESTS**
Investigation of the effects of payload pods and airbrakes on the longitudinal stability of the X-RAE 2 unmanned aircraft in the 24 foot wind-tunnel
[RAE-TM-AERO-2124] p 103 N89-11744
Lateral stability analysis for X-29A drop model using system identification methodology
[NASA-TM-4108] p 539 N89-21802
Airworthiness and flight characteristics evaluation of the EH-60A (Quick Fix) helicopter
[AD-A207417] p 765 N89-26839
- FLIGHT TEST INSTRUMENTS**
The data system on board the DO 228 for testing navigation systems with high accuracy
[DFVLR-MITT-88-20] p 226 N89-15095
The data acquisition system for the Fokker 100 test aircraft
[NLR-MP-87047-U] p 478 N89-20130
Determination of reference trajectories for testing navigation aids using an onboard CCD camera
p 602 N89-24303
Flight test method development for a quarter-scale aircraft with minimum instrumentation
[AD-A207896] p 835 N89-29337
- FLIGHT TEST VEHICLES**
Preliminary design of a modular unmanned research vehicle. Volume 1: System design document
[AD-A202785] p 474 N89-20987
Flight testing of the Southern Cross replica aircraft
[AD-A205303] p 607 N89-23451
- FLIGHT TESTS**
Flight-test determination of aircraft cruise characteristics using acceleration and deceleration techniques
p 25 N89-10101
Correlation and analysis for SH-2F 101 rotor
p 25 N89-10111
State of the art inertial navigation - Flight testing of the Honeywell LINS Standard Navigator H-423
p 30 N89-10131
Development and testing of an inflight engine performance monitoring technique for the U.S. Navy P-3C airplane
[SAE 841482] p 34 N89-10615
X-29A forward-swept-wing flight research program status
[SAE PAPER 872418] p 27 N89-10640
Seaplane takeoff performance - Using delta ratio as a method of correlation
p 28 N89-12565
- Theoretical modelling for helicopter flight dynamics - Development and validation
p 92 N89-13522
Flow properties associated with wing/body junctions in wind tunnel and flight
p 98 N89-13549
Transgression investigations of helicopter dynamics
p 93 N89-13582
The aerodynamic development of the Fokker 100
p 93 N89-13583
Flight and windtunnel investigations on boundary layer transition at Reynolds numbers up to 10 to the 7th
p 71 N89-13601
Laminar flow control leading edge systems in simulated airline service
p 93 N89-13604
MRVS - A system for measuring, recording and processing flight test data
p 94 N89-13615
Non-destructive methods applied to aviation equipment testing in service
p 123 N89-13616
Cryogenic wind tunnels for high Reynolds number testing
p 115 N89-13622
Phase II flight simulator mathematical model and data-package, based on flight test and simulation techniques
p 116 N89-13633
Propulsion interface unit (PIU) controller on PW1120/DEEC re-engined F4 aircraft
p 106 N89-13654
Cruise noise of an advanced counterrotation turboprop measured from an adjacent aircraft
p 107 N89-15080
Bell 222 Helicopter cabin noise - Analytical modeling and flight test validation
p 98 N89-15101
Piaggio P180
p 98 N89-15563
Second X-29 will execute high-angle-of-attack flights
p 100 N89-16215
On the prowl in the SA-365M Panther
p 100 N89-16225
Use of dynamically scaled models for studies of the high-angle-of-attack behavior of airplanes
p 116 N89-16515
Recent results with ATTAS in-flight simulator
[AIAA PAPER 88-4606] p 101 N89-16524
The T-2 control configured vehicle development, integration and flight test
[AIAA PAPER 88-3882] p 179 N89-18076
Modern digital pressure control system
[AIAA PAPER 88-3948] p 172 N89-18119
Boeing 747-400 - Flight test
p 161 N89-18349
Six degree of freedom crew isolation design, bench test and flight test
p 163 N89-18896
Analytical prediction and flight test evaluation of Bell ACAP helicopter cabin noise --- Advanced Composite Airframe Program
p 164 N89-18911
Development and qualification testing, teaming for the V-22 multi-service aircraft system
p 165 N89-18928
Air-to-air combat helicopter development
p 165 N89-18929
Development and flight test of a precision autohover capability for tactical rotorcraft
p 165 N89-18934
Boeing Model 380 Advanced Technology Helicopter - Design features and flight test update
p 165 N89-18935
A fixed base data system for flight testing
p 201 N89-18937
Concept and flight testing of a modern longitudinal motion regulator using an inverse model
[DGLR PAPER 87-121] p 181 N89-20238
The V-22 - 'Am I gonna like it?'
p 167 N89-20745
Takeoff drag prediction for airbus A300-600 and A310 compared with flight test results
p 228 N89-22810
Flight test and data analysis techniques for helicopter parameter estimation
p 242 N89-22872
V-22 testing - Flexing the Osprey's wings
p 249 N89-22941
Air Force, NASA conduct tests to define fighter aircraft agility
p 228 N89-22975
Helicopter manoeuvrability testing in practice
p 243 N89-23318
Validation of a mathematical model of the Sea King Mk50 helicopter using flight trials data
p 230 N89-23322
Simulation models for optimization of helicopter takeoff and landing
p 231 N89-23339
Correlation of generalized helicopter flight test performance data with theory
p 231 N89-23340
New aerodynamic rotor blade design at MBB
p 231 N89-23345
BO 105 LS - Meet the hot and high challenge --- light twin helicopter for high altitude and extreme temperature conditions
p 231 N89-23348
The ground and flight test programme for the EH101
p 231 N89-23353
Helicopter agility in low speed manoeuvres
p 244 N89-23365
Measurements of propeller noise in a light turboprop airplane
p 233 N89-24306
Design and flight testing of a model following control system for helicopters
p 244 N89-24488
An open-loop control system for a state space flight controller
p 245 N89-24489

- A piloted evaluation of an oblique-wing research aircraft motion simulation with decoupling control laws [NASA-TP-2874] p 248 A89-15930

Wake model for helicopter rotors in high speed flight
[NASA-CR-177507] p 301 N89-17577

Tip aerodynamics and acoustics test: A report and data survey
[NASA-RP-1179] p 302 N89-17579

Flight measured downwash of the QSR4
[NASA-TM-101050] p 316 N89-17593

Combined preliminary airworthiness evaluation and airworthiness and flight characteristics evaluation of the UH-1H with preproduction hub spring and composite main rotor blades installed
[AD-A202316] p 396 N89-19295

Lightning campaign 85/86 Transall C160 A04: Flying tests
[REPT-85/535800] p 396 N89-19297

Development of a low-cost helmet mounted eye gaze sensor
[AD-A202303] p 399 N89-19298

Flight survey of the 757 wing noise field and its effects on laminar boundary layer transition. Volume 2: Data compilation
[NASA-CR-176217] p 426 N89-19505

Hub and blade structural loads measurements of an SA349/2 helicopter
[NASA-TM-101040] p 472 N89-20124

Airworthiness and flight characteristics evaluation of an improved engine air filtration system on the UH-1H helicopter
[AD-A203446] p 480 N89-20145

Coupled rotor/fuselage dynamic analysis of the AH-1G helicopter and correlation with flight vibrations data
[NASA-CR-181723] p 497 N89-20512

Transonic Symposium: Theory, Application, and Experiment, Volume 1, Part 1
[NASA-CP-3020-VOL-1-P1-1] p 453 N89-20925

Flight research and testing
[NASA-TM-101053] p 453 N89-20927

AH-1S communication switch integration program
[NASA-TM-101053] p 466 N89-20978

Aircraft tracking with dual TACAN
[AD-A202647] p 466 N89-20980

Contamination of the exterior of a C-130E aircraft used for aerial spray, 907 TAG, Rickenbacker ANGB, OH
[AD-A202430] p 474 N89-20984

Comparison of propeller cruise noise data taken in the NASA Lewis 8- by 6-foot wind tunnel with other tunnel and flight data
[NASA-TM-101976] p 505 N89-21628

Feasibility of flight experiments and instrumentation hardware for in-flight hypersonic boundary-layer measurements
[NASA-CR-184896] p 517 N89-21772

AFTI (Advanced Fighter Technology Integration)/F-111 mission adaptive wing briefing to industry
[AD-A202467] p 530 N89-21787

Artificial and natural icing tests of the EH-60A quick fix helicopter
[AD-A204589] p 530 N89-21792

NASA's program on icing research and technology
[NASA-TM-101989] p 507 N89-22569

Flight testing of the Southern Cross replica aircraft
[AD-A205303] p 607 N89-23451

Effect of advanced rotorcraft airfoil sections on the hover performance of a small-scale rotor model
[NASA-TP-2832] p 595 N89-24264

Preliminary airworthiness evaluation of modified second-generation Pneumatic Boot Deicing System on a JUH-1H
[AD-A206255] p 598 N89-24289

An operational demonstration and engineering flight test of the Microwave Landing System on runway 22L at Chicago's Midway Airport
[DOT/FAA/CT-TN88/42] p 601 N89-24291

B-737 flight test of curved-path and steep-angle approaches using MLS guidance
[NASA-TM-101521] p 601 N89-24293

Loss of tail rotor effectiveness evaluation of the OH-58C helicopter with directional SAS (Stability Augmentation System)
[AD-A206181] p 608 N89-24309

Results of an A109 simulation validation and handling qualities study
[NASA-TM-101062] p 617 N89-24323

Loran C coverage in Alaska after dual rating Port Clarence
[AD-A198032] p 751 N89-26831

ILS/MLS collocation tests at Miami/Tamiami, Florida Airport
[NASA-CR-185715] p 751 N89-26832

Method for experimental determination of flutter speed by parameter identification
[NASA-TP-2923] p 788 N89-26844

Aerodynamic parameters of an advanced fighter aircraft estimated from flight data. Preliminary results
[NASA-TM-101631] p 784 N89-26861

Glider ground effect investigation
[AD-A209152] p 821 N89-28490

Flight test method development for a quarter-scale aircraft with minimum instrumentation
[AD-A207896] p 835 N89-29337

A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 2: Use with ARL flight data
[AD-A208059] p 836 N89-29340

FLIGHT TIME

A study on the air traffic management - The effect of departure regulation
[AIAA PAPER 89-3387] p 599 A89-40895

An algorithm for in-flight synthesis of minimum-fuel cruise trajectories with fixed arrival time
[AIAA PAPER 89-3387] p 757 A89-49088

General aviation activity and avionics survey
[AD-A201760] p 361 N89-19229

FLIGHT TRAINING

Introduction of the Hornet - A success story
[SAE PAPER 872436] p 27 A89-10653

The use of recent developments in achieving zero flight time approvals
[AIAA PAPER 89-3923] p 791 A89-48835

Disorientation accidents and incidents in U.S. Army helicopters, 1 January 1980 - 30 April 1987
[AD-A198720] p 156 N89-13417

FLIGHT VEHICLES

Vehicle management system requirements
[AIAA PAPER 88-3876] p 179 A89-18070

X-wing fly-by-wire vehicle management system
[AIAA PAPER 88-3923] p 179 A89-18100

Modal control in systems with aftereffect
[AIAA PAPER 89-2577] p 354 A89-26038

Perturbation evaluation of dynamic behavior of a class of elastic vehicles
[AIAA PAPER 89-2577] p 413 A89-29102

Prospects for the application of holographic interferometry to the study of the resonant vibrations of complex systems
[AIAA PAPER 89-2577] p 495 A89-35654

Hydrodynamics and heat transfer in the porous elements of flight vehicle structures --- Russian book
[AIAA PAPER 89-2577] p 554 A89-38499

Synthesis of systems for the motion control of nonstationary objects --- Russian book
[AIAA PAPER 89-2577] p 563 A89-38512

Problems of the unification of the on-board systems of flight vehicles
[AIAA PAPER 89-2577] p 620 A89-42456

A model of the reachability zone and its use in the ballistic design of flight vehicles
[AIAA PAPER 89-2577] p 620 A89-42459

Methods for the mathematical modeling of flight vehicle engines --- Russian book
[AIAA PAPER 89-2577] p 711 A89-46551

Facilities and support requirement for advanced flight vehicles
[AIAA PAPER 89-2102] p 791 A89-49460

Facilities and support requirements for advanced flight vehicles
[AIAA PAPER 89-2102] p 854 A89-54368

FLIR DETECTORS

Standardized advanced infrared sensor - A program status
[AIAA PAPER 89-2102] p 175 A89-18932

A critical examination of sensor fusion
[AIAA PAPER 89-2102] p 768 A89-50302

FLOORS

Influence of a floor on sound transmission into an aircraft fuselage model
[AIAA PAPER 89-2102] p 166 A89-20135

Effects of aircraft size on cabin floor dynamic pulses
[SAE PAPER 881379] p 305 A89-28191

Comparison of the crushing behaviour of metallic subfloor structures
[MBB-UD-535-88-PUB] p 622 A89-39841

Longitudinal impact test of a transport airframe section
[DOT/FAA/CT-87/26] p 54 N89-11265

Crushing behaviour of helicopter subfloor structures
[AIAA PAPER 89-2102] p 381 N89-18429

Crashworthy design of aircraft subfloor structural components
[AIAA PAPER 89-2102] p 382 N89-18431

Transport airplane crash simulation, validation and application to crash design criteria
[AIAA PAPER 89-2102] p 382 N89-18435

FLOQUET THEOREM

A perspective on modelling rotorcraft in turbulence
[AIAA PAPER 89-2102] p 393 A89-31757

Investigations of the aeromechanical instability of a helicopter using Floquet theory
[AIAA PAPER 89-2102] p 782 A89-49585

Prediction of inplane damping from deterministic and stochastic models --- rotor blade stability in turbulent flow
[AIAA PAPER 89-2102] p 832 A89-52042

FLORIDA

ILS/MLS collocation tests at Miami/Tamiami, Florida Airport
[NASA-CR-185715] p 751 N89-26832

An operational demonstration and flight test of the Microwave Landing System (MLS) at the Miami/Tamiami, Florida Airport
[DOT/FAA/CT-TN89/37] p 752 N89-26833

FLOTATION

Ditching and flotation characteristics of the EH101 helicopter
[AIAA PAPER 89-2102] p 232 A89-23355

FLOW CHAMBERS

An analytical study of the characteristics of bypass engine mixing chambers in the case of incomplete mixing of gas flows
[AIAA PAPER 89-2102] p 613 A89-42468

FLOW CHARACTERISTICS

Flow performance of reversed tandem cascades with double-circular arc profile for compressor stator
[AIAA PAPER 89-0207] p 277 A89-25182

Evaluation of an OH grid formulation for viscous cascade flows
[AIAA PAPER 89-1017] p 416 A89-30527

Signatures of unsteady separation
[AIAA PAPER 89-1017] p 449 A89-35481

Supersonic flow past caret wings and elements of star-shaped bodies at angles of attack and bank
[AIAA PAPER 89-1017] p 512 A89-38426

Some properties of nonisentropic transonic flows
[AIAA PAPER 89-1017] p 623 A89-41083

A review of methods of estimating performance characteristics of centrifugal compressors
[AIAA PAPER 89-1017] p 611 A89-41115

The model of combustion efficiency and calculation of flow properties for scramjet combustor
[AIAA PAPER 89-1017] p 588 A89-42569

Three-dimensional effects in high-intensity vortices
[AIAA PAPER 89-1017] p 646 A89-46260

Nonstationary supersonic flow past a sphere moving through a thermal inhomogeneity
[AIAA PAPER 89-1017] p 646 A89-46260

Flow characteristics in an S-shaped rectangular-round diffuser at high incidence
[AIAA PAPER 89-1017] p 648 A89-46935

Application of simple wave theory to the radiative boundary conditions required for an internal flow Euler solver
[AIAA PAPER 89-2577] p 648 A89-46935

Study of a circulation control airfoil with leading/trailing-edge blowing
[AIAA PAPER 89-2577] p 737 A89-50080

Impingement of a sonic jet on wedge-shaped obstacles
[AIAA PAPER 89-2577] p 741 A89-51017

Analysis of fluctuating pressures on a nose-cylinder body measured in the NAL 2mx2m transonic wind tunnel
[AIAA PAPER 89-2577] p 741 A89-51310

Turbulent reactive flows
[AIAA PAPER 89-2577] p 857 A89-51860

Numerical simulation and hydrodynamic visualization of transient viscous flow around an oscillating aerofoil
[AIAA PAPER 89-2577] p 817 A89-52481

Intake-airframe integration
[AIAA PAPER 89-2577] p 315 N89-16744

Intakes for high angle of attack
[AIAA PAPER 89-2577] p 315 N89-16745

A computationally efficient modelling of laminar separation bubbles
[NASA-CR-184789] p 426 N89-19504

Flow characteristics about a trailing edge
[UTIAS-TN-270] p 655 N89-25952

FLOW COEFFICIENTS

Flow characteristics in an S-shaped rectangular-round diffuser at high incidence
[AIAA PAPER 89-2577] p 648 A89-46260

FLOW DEFLECTION

Incompressible Navier-Stokes computations for a round-edged double-delta wing
[AIAA PAPER 89-2577] p 12 A89-12552

Model problem of the hypersonic relaxing-gas flow past bodies
[AIAA PAPER 89-2577] p 211 A89-22245

Navier-Stokes calculations of transonic viscous flow about wing/body configurations
[AIAA PAPER 89-2577] p 214 A89-22812

Evolution of perturbations near a surface in supersonic flow
[AIAA PAPER 89-2577] p 294 A89-27384

Turbulization of a high-velocity boundary layer by a projection
[AIAA PAPER 89-2577] p 448 A89-35434

Euler correction method for two- and three-dimensional transonic flows
[AIAA PAPER 89-2577] p 819 A89-53934

Theory for separated flow around the trailing edge of a thin profile
[AIAA PAPER 89-2577] p 820 A89-54614

An experimental study of transonic buffet of a supercritical airfoil with trailing edge flap
[AD-A203189] p 458 N89-20968

Static internal performance of a nonaxisymmetric vaned thrust reverser with flow spay capability
[NASA-TP-2933] p 747 N89-27634

FLOW DIRECTION INDICATORS

A free-trailing vane flow direction indicator employing a linear output Hall effect transducer
[AIAA PAPER 89-2577] p 336 A89-27675

FLOW DISTORTION

Dynamic distortion in flowfield downstream of transonic shock-boundary layer interaction
[AIAA PAPER 89-2577] p 8 A89-11061

Numerical simulation of compact schemes in super-sonic viscous flows
[AIAA PAPER 89-2577] p 9 A89-11085

On nonlinear aspects of hypersonic boundary-layer stability
[AIAA PAPER 89-2577] p 10 A89-11116

Planar wave stability margin loss methodology --- in military aircraft
[AIAA PAPER 89-2577] p 79 A89-16482

A vector potential model for vortex formation at the edges of bodies in flow
[AIAA PAPER 89-2577] p 127 A89-17122

Determination of the perturbations of the flow fields of supersonic wind tunnels from measured aerodynamic coefficients
[AIAA PAPER 89-2577] p 144 A89-16875

Nonlinear interactions of perturbations during the turbulent transition in the separation region of a laminar boundary layer
[AIAA PAPER 89-2577] p 209 A89-21580

Redistribution of an inlet temperature distortion in an axial flow turbine stage
[AIAA PAPER 89-2577] p 255 A89-22288

Combined tangential-normal injection into a supersonic flow [AIAA PAPER 89-0622] p 288 A89-25492

Prediction of heat transfer characteristics of discrete hole film cooling - One row of injection into a turbulent boundary layer p 494 A89-34831

Development of a second generation injector driven transonic wind tunnel at BUAA p 541 A89-39469

Variational problems in radiative gas dynamics in the case of surface gas injection p 733 A89-49203

FLUID JETS

Transverse jets in compressible crossflows p 452 N89-20923

FLUID MECHANICS

Encyclopedia of fluid mechanics. Volume 8 - Aerodynamics and compressible flows --- Book p 804 A89-51275

A two-dimensional numerical simulation of a supersonic, chemically reacting mixing layer [NASA-TM-4055] p 86 N89-12542

Flow control for unsteady and separated flows and turbulent mixing [AD-A205989] p 594 N89-23426

FLUID PRESSURE

Shock capturing using a pressure-correction method [AIAA PAPER 89-0561] p 345 A89-25450

FLUID-SOLID INTERACTIONS

Correlation of outer and passive wall region manipulation with boundary layer coherent structure dynamics and suggestions for improved devices [AIAA PAPER 89-1026] p 417 A89-30532

Fluid-thermal-structural interaction of aerodynamically heated leading edges [AIAA PAPER 89-1227] p 388 A89-30714

Integrated approach for active coupling of structures and fluids p 552 A89-39917

FLUORESCENCE

In-line wear monitor [AD-A201292] p 402 N89-19301

FLUORINE

Supersonic jet studies of fluorene clustered with water, ammonia and piperidine [AD-A209562] p 860 N89-29497

FLUSHING

Rinsing water analysis of helicopter jet engine compressors [NLR-TR-87074-U] p 108 N89-11748

FLUTTER

A unified approach to the overall body motion stability and flutter characteristics of elastic aircraft p 80 A89-16827

Oscillating aerodynamics and flutter of an aerodynamically detuned cascade in an incompressible flow [AIAA PAPER 89-0289] p 280 A89-25246

Active control of aeroelastic systems governed by functional differential equations p 332 A89-25871

Supersonic turbomachine rotor flutter control by aerodynamic detuning [AIAA PAPER 89-2685] p 680 A89-47015

Analytical flutter investigation of a composite propfan model p 800 A89-48863

Modeling of aerodynamic forces in the Laplace domain with minimum number of augmented states for the design of active flutter suppression systems [AIAA PAPER 89-3486] p 844 A89-52561

AGARD manual on aeroelasticity in axial-flow turbomachines. Volume 2: Structural dynamics and aeroelasticity [AGARD-AG-298-VOL-2] p 13 N89-10006

Fan flutter test p 37 N89-10014

Aeroelastic thermal effects p 37 N89-10015

- Forced vibration and flutter design methodology p 51 N89-10016
- A study of unsteady turbulent flow past airfoils p 521 N89-22587

p 494 A89-34928

Local heat transfer in internally cooled turbine airfoil leading edge regions. I - Impingement cooling without film coolant extraction. II - Impingement cooling with film coolant extraction

p 494 A89-34932

Experimental investigation of the thermal conductivity of dispersed ceramic materials

p 488 A89-34933

Metallurgical stability of Inconel alloy 718

p 545 A89-36405

Development of Gatorized MERL 76 for gas turbine disk applications

p 545 A89-36411

Development of Inconel alloy MA 6000 turbine blades for advanced gas turbine engine designs

p 545 A89-36414

Beyond superalloys - The goals, the materials and some reality

p 546 A89-36418

The processing and testing of a hollow DS eutectic high pressure turbine blade

p 551 A89-36436

Aircraft gas turbine blade and vane repair

p 533 A89-36473

Degradation of aluminate coated directionally solidified superalloy turbine blades in an aero gas turbine engine

p 546 A89-36480

Dynamical calculations of engine components based on elasticity equations

p 553 A89-37421

LEADER - An automatic, real-time diagnostic knowledge system

[SAE PAPER 881443] p 534 A89-37651

Interrelation of engine design and burner configuration with selection and performance of electrical ignition systems for gas turbine engines

[SAE AIR 784] p 534 A89-37654

Aircraft turbine fuel contamination history and endurance test requirements

[SAE AIR 4023] p 547 A89-37658

Leads, flexible, shielded, high energy ignition --- for gas turbine engines

[SAE ARP 841] p 534 A89-37661

Computation of dynamic process with large disturbance for split-shaft gas turbine

p 535 A89-37772

Optimizing design for turboengine digital speed controller

p 535 A89-37773

Probabilistic-parametric models of the long-term strength of metallic materials of aircraft gas turbine engines

p 620 A89-40619

A method for estimating the stochastic vibrational stress level of impeller bladings of aircraft gas turbine engines in operating conditions on the basis of developmental bench test data

p 611 A89-40624

Service-induced damage in turbine discs and its influence on damage tolerance-based life prediction

p 612 A89-41910

Determination of the natural frequency spectra and modes of the fan blade rings of aviation gas turbine engines

p 612 A89-42422

A study of the characteristics of aircraft powerplants under conditions of optimal control of their principal components

p 612 A89-42466

Measurements of particles rebound characteristics on materials used in gas turbines

[AIAA PAPER 89-1693] p 621 A89-43211

Braze repair of aero engine components

p 626 A89-43535

Fiber metal acoustic material for gas turbine exhaust environments

p 695 A89-44400

European gas turbine engines

p 675 A89-45042

Study of flow and heat transfer in rotating cavities

[ONERA, TP NO. 1989-33] p 698 A89-45188

Application of the boundary element method to unsteady heat transfer problems

p 700 A89-45552

Effects of fuel chemical properties on exhaust smoke from gas turbine combustor

p 695 A89-45554

Experimental investigation on characteristics of single and tandem blade cascades with double-circular arc profile

p 676 A89-45567

Experimental investigation of aeroengine high-speed roller bearing

p 700 A89-45570

Continual opportunities for superalloy development

p 696 A89-45931

Titanium requirements for current and future military gas turbine engines

p 696 A89-45944

Ceramic bearings for use in gas turbine engines

p 702 A89-46697

Numerical codes for unsteady simulation of turbojet, turbofan and turboprop engines for training purposes

[AIAA PAPER 89-2259] p 676 A89-46704

A model for airblast atomization

[AIAA PAPER 89-2321] p 702 A89-46748

Spray pattern at high pressure

[AIAA PAPER 89-2323] p 702 A89-46750

Semi-constant volume pulse combustion for gas turbine engine starting

[AIAA PAPER 89-2449] p 677 A89-46838

Three-dimensional multigrid Navier-Stokes computations for turbomachinery applications

[AIAA PAPER 89-2453] p 702 A89-46841

Engine life maturation process

[AIAA PAPER 89-2464] p 677 A89-46851

Advantages of ceramic, solid lubricated bearings for small gas turbine engines

[AIAA PAPER 89-2472] p 703 A89-46858

Diagnostic expert systems for gas turbine engines - Status and prospects

[AIAA PAPER 89-2585] p 680 A89-46941

Light weight gas turbine engine fuel pumping technology

[AIAA PAPER 89-2587] p 703 A89-46943

Model predictions of fan response to inlet temperature transients and spatial temperature distortion

[AIAA PAPER 89-2686] p 650 A89-47016

Advanced material applications for turbine airfoils

[AIAA PAPER 89-2693] p 680 A89-47023

A 3-D analysis of gas turbine combustors

[AIAA PAPER 89-2888] p 683 A89-47153

Combustion characteristics of gaseous flames in a gas turbine combustor

[AIAA PAPER 89-2892] p 683 A89-47155

A technique for the measurement of blade tip clearance in a gas turbine

[AIAA PAPER 89-2916] p 683 A89-47170

Mechanical properties of high-temperature beryllium intermetallic compounds

p 697 A89-47213

Determination of the frequency characteristics of the combustion chamber cycle

p 771 A89-47967

System design of the flow path configuration of an engine using a CAD system

p 771 A89-47974

Characteristics of the combined support of a gas turbine engine in the absence of oil supply to the ball bearing

p 771 A89-47981

A study of residual stress distribution in the lock section of the blade of a gas turbine engine on the basis of initial deformations

p 772 A89-47982

Limiting the service period of gas turbine engine components on the basis of technical/economical efficiency

p 772 A89-47993

Evaluation of the acoustic characteristics of gas turbine engines using experimental noise data for a prototype engine

p 772 A89-47995

Effect of a bend in the contour of the Laval nozzle of a gas turbine engine on flow in the supersonic section

p 772 A89-48007

A method for calculating the thermal state of a cooled gas turbine blade with a heat-insulation coating

p 772 A89-48009

Study of three-dimensional gas-turbine combustor flows

p 773 A89-48522

Experimental study of a reverse flow combustor - Influence of primary holes on combustor efficiency

[ONERA, TP NO. 1989-77] p 773 A89-48759

Steady and unsteady pressures and forces in a vibrating ejector engine in the subsonic and transonic speed regimes

p 774 A89-50363

Developments in titanium alloys for aerospace

p 797 A89-50773

Design with structural ceramics

p 803 A89-51253

Fuel properties effect on the performance of a small high temperature rise combustor

[AIAA PAPER 89-2901] p 838 A89-52025

Design of tunable digital set-point tracking PID controllers for gas turbines with unmeasurable outputs

[AIAA PAPER 89-3577] p 839 A89-52660

Fatigue life of ZrSiO₂ alloy with protective coatings under thermal cycling loading

p 857 A89-52830

Probabilistic methods for estimating the remaining life of structural elements of operating aircraft gas turbine engines

p 839 A89-52832

High-resolution liquid-crystal heat-transfer measurements on the endwall of a turbine passage with variations in Reynolds number

p 862 A89-53289

Comparative durability of six coating systems on first-stage gas turbine blades in the engines of a long-range maritime patrol aircraft

p 858 A89-54255

Statistics on aircraft gas turbine engine rotor failures that occurred in US commercial aviation during 1982 [DOT/FAA/CT-88/23]

p 38 A89-10892

An efficient method for predicting the vibratory response of linear structures with friction interfaces. Volume 2: Steady-state vibrations of a 2-body system with a frictional interface

p 128 A89-12081

Development of a thermal and structural analysis procedure for cooled radial turbines

[NASA-TM-101416] p 109 A89-12568

Turbine Engine Hot Section Technology 1986

[NASA-CP-2444] p 129 A89-12876

Turbine Engine Hot Section Technology (HOST) Project

p 110 A89-12877

HOST instrumentation R and D program overview

p 110 A89-12878

HOST combustion R and T overview

p 110 A89-12879

HOST turbine heat transfer subproject overview

p 110 A89-12880

HOST structural analysis program overview

p 130 A89-12881

Fatigue and fracture overview

Vibration health monitoring of the Westland 30 helicopter transmission - Development and service experience p 392 A89-30988
Helicopter gear box condition monitoring for Australian Navy p 393 A89-30989
How to get the designer into the box --- of helicopter gears p 393 A89-30994
Split torque helicopter transmissions with widely separated engines p 772 A89-48282
Comparison of predicted and measured temperatures of UH-60A helicopter transmission [NASA-TP-2911] p 628 A89-24607

HELICOPTER TAIL ROTORS

A comparison of acoustic predictions with model rotor test data from the NASA 14 x 22 ft wind tunnel p 203 A89-18913
An analytical model for the prediction of MR/TR interaction noise --- main rotor/tail rotor p 165 A89-18931
Unconventional helicopter tail rotor offers forward thrust advantage p 385 A89-29349
Vibration analysis for detection of bearing and gear faults within gearboxes - An innovative signal processing approach p 392 A89-30985
An analytical model for the prediction of MR/TR interaction noise --- main rotor/tail rotor [AIAA PAPER 89-1130] p 503 A89-33762
Prediction of potential noise interactions in axial-flow machines - Application to the helicopter fenestron p 504 A89-35385
Prediction of wake-interaction noise in axial-flow machines - Application to helicopter fenestron p 504 A89-35388
OPST 1 - A digital optical tail rotor control system [MBB-UD-533-88-PUB] p 614 A89-39847
The Mi-8 helicopter: Design and maintenance --- Russian book p 606 A89-42600
Operational advantages and power efficiency of the fenestron as compared to a conventional tail rotor p 761 A89-50170
Icing research tunnel test of a model helicopter rotor [NASA-TM-101978] p 403 A89-19305
Mechanical reaction of wings moving through a vortex region p 654 A89-25139
Performance and loads data from an outdoor hover test of a Lynx tail rotor [NASA-TM-101057] p 656 A89-25958

HELICOPTER WAKES

Profile development results for advanced circulation-guided rotor systems in fast helicopters [DGLR PAPER 87-086] p 5 A89-10513
Numerical solutions of induced velocities by semi-infinite tip vortex lines p 12 A89-12554
Free wake calculation of rotor flow fields for interaction aerodynamics p 145 A89-18853
Rotor inflow variability with advance ratio p 145 A89-18855
A correlation study of rotor inflow in forward flight p 145 A89-18856
Helicopter free wake prediction of complex wake structures under Blade-Vortex Interaction operating conditions p 146 A89-18918
Comparisons of predicted and measured rotor performance in hover using a new free wake analysis p 165 A89-18933
Dynamic inflow for practical applications p 147 A89-19625
A vortex embedding method for free wake analysis of helicopter rotor blades in hover p 216 A89-23321
Comparison with flight data of hover performance using various rotor wake models p 230 A89-23323
The free-wake prediction of rotor hover performance using a vortex embedding method [AIAA PAPER 89-0638] p 296 A89-28443
A study of the rotor wake in nap-of-the-earth p 439 A89-33140
Helicopter rotor wake investigation using a laser Doppler anemometry technique p 439 A89-33385
The prediction of blade wake interaction noise based on a turbulent vortex model [AIAA PAPER 89-1134] p 503 A89-33764
Surface pressure measurements on a body subject to vortex wake interaction p 470 A89-34808
Prediction of wake-interaction noise in axial-flow machines - Application to helicopter fenestron p 504 A89-35388
Extension of classical tip loss formulas --- for rotorcraft design p 528 A89-38652
The effects of wake migration during roll-up on blade air loads p 570 A89-41091
A coupled rotor aeroelastic analysis utilizing nonlinear aerodynamics and refined wake modeling p 831 A89-52041
Development of a panel method for modeling configurations with unsteady component motions, phase 1 [AD-A200255] p 315 A89-16775
Evaluation of VSAERO in prediction of aerodynamic characteristics of helicopter hub fairings [NASA-TM-101048] p 451 A89-20098
Performance optimization for rotors in hover and axial flight [NASA-CR-177524] p 459 A89-20973
Description of a simple rotor test rig and preliminary wake studies p 541 A89-21808
Enhancements to a new free wake hover analysis [NASA-CR-177523] p 592 A89-23414
Aerodynamic interaction between vortical wakes and lifting two-dimensional bodies [NASA-TM-101074] p 627 A89-24563
Incorporation of vortex line and vortex ring hover wake models into a comprehensive rotorcraft analysis code [AD-A208036] p 835 A89-29338

HELICOPTERS

Experimental investigation of strong in-flight oscillation on helicopters and its prevention p 92 A89-13520
An ice detection system for helicopters [AIAA PAPER 88-3949] p 172 A89-18120
Structural dynamics of a helicopter rotor blade system p 162 A89-18878
Advancements in erosion testing of rotor blade leading edges p 163 A89-18888
Automated wire preparation system p 189 A89-18895
Six degree of freedom crew isolation design, bench test and flight test p 163 A89-18896
Dynamic modeling of a helicopter lubrication system p 189 A89-18897
Advanced transmission studies p 189 A89-18906
Navier-Stokes calculations of hovering rotor flowfields [AIAA PAPER 87-2629] p 149 A89-20133
Effect of signal jitter on the spectrum of rotor impulsive noise p 266 A89-22327
Euler solution of multiblade rotor flow p 211 A89-22330

[AIAA PAPER 89-2458] p 648 A89-46845

Experimental investigation of a hybrid wind tunnel model p 791 A89-50137

Design of high-Reynolds-number flat-plate experiments in the NTF
[NASA-CR-184627] p 153 N89-13411

Heat transfer rates on an analytic forebody in the AFWAL (Air Force Wright Aeronautical Laboratories) Mach 3 high Reynolds number wind tunnel. Comparison of test results with predictions from STAPAT (A Specific Thermal Analyzer Program for Aircraft Transparencies)
[AD-A199523] p 220 N89-15080

Airfoil stall penetration at constant pitch rate and high Reynolds number p 377 N89-19260

Use of ribs to obtain drag reduction on airfoils at high Reynolds number flows p 378 N89-19267

Transonic and supersonic flow past a 65 deg delta wing with rounded leading edges: Analysis of experimental data
[DFVLR-FB-88-44] p 520 N89-22580

HIGH SPEED

High speed inlet calculations with real gas effects
[AIAA PAPER 88-3076] p 75 A89-14980

Turbulization of a high-velocity boundary layer by a projection p 448 A89-35434

On the three families of instability waves of high-speed jets p 513 A89-38624

Computational and experimental evaluation of helicopter rotor tips for high speed forward flight
[AIAA PAPER 89-1845] p 584 A89-42073

On the use of prolepses as a means for reducing blade compressibility losses p 771 A89-47670

Prediction of high-speed aerodynamic characteristics using the Aerodynamic Preliminary Analysis System (APAS)
[AIAA PAPER 89-2173] p 735 A89-49679

High speed parallel processing networks for advanced architectures p 59 N89-10837

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 1: Theory and application
[NASA-CR-4199-VOL-1] p 222 N89-15896

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 2: User's manual
[NASA-CR-4199-VOL-2] p 223 N89-15897

Wake model for helicopter rotors in high speed flight
[NASA-CR-177507] p 301 N89-17577

High-speed real-time animated displays on the ADAGE (trademark) RDS 3000 raster graphics system
[NASA-TM-4095] p 433 N89-19899

High speed balancing applied to the T700 engine
[NASA-CR-180899] p 497 N89-20472

HIGH SPEED CAMERAS

A two-spark schlieren system for very-high velocity measurement p 555 A89-38674

HIGH STRENGTH

Improved silicon carbide for advanced heat engines
[NASA-CR-179477] p 252 N89-15251

Durability and damage tolerance of bismaleimide composites, volume 1
[AD-A201273] p 412 N89-19374

Durability and damage tolerance of bismaleimide composites. Volume 2: Appendix of crack growth and low-velocity impact data
[AD-A201839] p 412 N89-19379

HIGH STRENGTH ALLOYS

Aluminum-lithium alloys p 119 A89-16172

Aluminum-lithium alloys for fighter aircraft applications p 696 A89-45937

A review of beryllides for very high temperature service p 696 A89-45948

Developments in titanium alloys for aerospace p 797 A89-50773

HIGH TEMPERATURE

Rapidly solidified aluminum alloys for high temperature/high stiffness applications p 488 A89-33474

Mechanical properties of high-temperature beryllium intermetallic compounds p 697 A89-47213

Turbine Engine Hot Section Technology (HOST) Project p 110 N89-12877

Elevated temperature strain gages p 130 N89-12886

Development of a high temperature static strain sensor p 130 N89-12887

The NASA Lewis Strain Gauge Laboratory: An update p 130 N89-12888

High temperature stress-strain analysis p 133 N89-12913

Improved silicon carbide for advanced heat engines
[NASA-CR-179477] p 252 N89-15251

High temperature furnace modeling and performance verifications p 408 N89-18498

X-ray based extensometry
[NASA-CR-183381] p 706 N89-25432

High temperature adhesive systems
[AD-A209166] p 860 N89-28643

HIGH TEMPERATURE AIR

Convective heat transfer in a boundary layer behind a shock wave propagating along a flat plate with a sharp leading edge - A calculation method and a comparison with experimental data p 144 A89-18546

Thermal analysis of engine inlet anti-icing systems
[AIAA PAPER 89-0759] p 311 A89-25565

A top-down SFP analysis of a complex system --- single failure points p 701 A89-46472

HIGH TEMPERATURE ENVIRONMENTS

High speed inlet calculations with real gas effects
[AIAA PAPER 88-3076] p 75 A89-14980

Experimental investigation of the thermal conductivity of dispersed ceramic materials p 488 A89-34933

Effect of crack size on the tensile strength of ceramics in a high-temperature corrosive environment p 547 A89-38021

Optical research needed to support the testing of hypersonic vehicle structures p 697 A89-43840

Apparent strain characteristics of strain gauges under high temperature environment p 697 A89-43844

The Vought ultra-high temperature, high speed rotor test system p 792 A89-50822

Structural ceramics --- Book p 797 A89-51251

Thermal barrier coating life prediction model development p 351 N89-17333

High temperature constitutive and crack initiation modeling of coated single crystal superalloys p 342 N89-17334

Views on the impact of HOST p 480 N89-20144

Experience with advanced instrumentation in a hot section cascade p 806 N89-27980

[NASA-TM-102294] p 806 N89-27980

Evaluation of a strain-gage load calibration on a low-aspect-ratio wing structure at elevated temperature
[NASA-TP-2921] p 807 N89-28034

HIGH TEMPERATURE FLUIDS

Fuel-rich catalytic combustion of Jet-A fuel-equivalence ratios 5.0 to 8.0 p 489 N89-21051

[NASA-TM-101975] p 489 N89-21051

Hot surface ignition tests of aircraft fluids
[AD-A207372] p 797 N89-26937

HIGH TEMPERATURE GASES

Deposition of Na₂SO₄ from salt-seeded combustion gases of a high velocity burner rig p 43 A89-12330

Numerical investigation of hot streaks in turbines
[AIAA PAPER 88-3015] p 79 A89-16478

Hot gas ingestion testing of an advanced STOVL concept in the NASA Lewis 9- by 15-foot Low Speed Wind Tunnel with flow visualization p 439 A89-33249

[AIAA PAPER 88-3025] p 439 A89-33249

A dynamic digital model for the turbojet with pulse-monitored fueler p 675 A89-45559

Continual opportunities for superalloy development p 696 A89-45931

New high temperature resistant NiCrAl and NiCrAl + Hf felt materials
[ONERA, TP NO. 1989-50] p 796 A89-48735

Hot gas ingestion testing of an advanced STOVL concept in the NASA Lewis 9- by 15-foot low speed wind tunnel with flow visualization
[NASA-TM-100952] p 220 N89-15078

HIGH TEMPERATURE RESEARCH

Toward improved durability in advanced aircraft engine hot sections p 479 N89-20135

[NASA-TM-4087] p 479 N89-20135

Advanced high temperature instrument for hot section research applications p 479 N89-20137

Structural analysis methods development for turbine hot section components p 479 N89-20140

HIGH TEMPERATURE SUPERCONDUCTORS

Aeronautical applications of high-temperature superconductors p 840 A89-53304

[AIAA PAPER 89-2142] p 840 A89-53304

Aeronautical applications of high-temperature superconductors p 686 N89-26008

[NASA-TM-102311] p 686 N89-26008

Superconducting Meissner effect bearings for cryogenic turbomachines, phase 1
[AD-A209875] p 865 N89-28839

HIGH TEMPERATURE TESTS

- The dual element method of strain gauge temperature compensation p 51 A89-12276
- Short-term high-temperature properties of reinforced metal matrix composites p 119 A89-15747
- Engineering ceramics - Applications and testing requirements p 347 A89-27632
- The effect of stress ratio on the near-threshold fatigue crack growth behavior of Ti-8Al-1Mo-1V at elevated temperature p 489 A89-35722
- Titanium requirements for current and future military gas turbine engines p 696 A89-45944
- A review of beryllides for very high temperature service p 696 A89-45948
- Fatigue life of dovetail joints - Verification of a simple biaxial model p 863 A89-54119
- Selecting high-temperature structural intermetallic compounds - The materials science approach p 858 A89-54671
- Elevated temperature crack growth p 133 N89-12915

- Helicopter visual approach surface high temperature and high altitude test plan [AD-A200027] p 226 N89-15092

HIGHLY MANEUVERABLE AIRCRAFT

- Impact of flow unsteadiness on maneuvers and loads of agile aircraft [AIAA PAPER 89-1282] p 404 A89-30764
- Experimental study of the flow in an air intake at angle of attack [ONERA, TP NO. 1988-154] p 370 A89-31813
- Observation of airplane flowfields by natural condensation effects p 578 A89-42009
- Roll response criteria for high maneuverable aircraft using Gibson's method [AIAA PAPER 89-3391] p 781 A89-49092
- Linear quadratic Gaussian design for robust performance of a highly maneuverable aircraft [AIAA PAPER 89-3457] p 844 A89-52555
- Stability analysis of flexible body dynamics for a highly maneuverable fighter aircraft [AIAA PAPER 89-3471] p 845 A89-52565
- Nonlinear longitudinal control of a supermaneuverable aircraft p 851 A89-53957
- Asymptotically decoupled variable structure control of systems and large maneuver of aircraft p 852 A89-53988

- Autonomous RPRV navigation, guidance and control [NASA-CR-179425] p 161 N89-14228
- Flight control systems development and flight test experience with the HiMAT research vehicles [NASA-TP-2822] p 248 N89-15929
- Measured and predicted structural behavior of the HiMAT tailored composite wing [NASA-CR-166617] p 411 N89-18530

HIGHWAYS

- High-efficiency thermal insulation in the base of airfields and highways - Russian book p 619 A89-42499
- Aircraft flexible pavement overlay design and evolution [ETN-88-93230] p 117 N89-11759

HILBERT SPACE

- State space models for aeroelastic and viscoelastic systems [AD-A207092] p 690 N89-26012

HINGES

- Nozzle flap hinge joint [AD-D014002] p 775 N89-26847

HISTORIES

- The nonrigid airship of the Siemens-Schuckert Works [DGLR PAPER 87-055] p 60 A89-10537
- From Kitty Hawk to the year 2000 [SAE PAPER 872395] p 1 A89-10628
- Soviet SST: The technopolitics of the Tupolev-144 - Book p 568 A89-42947
- Early jet engines and the transition from centrifugal to axial compressors: A case study in technological change [AD-A198775] p 177 N89-13430

HOLE GEOMETRY (MECHANICS)

- Fatigue life improvement of thick sections by hole cold expansion p 118 A89-13561

HOLES

- Analysis of the expansion-fan flowfield for holes in a hypersonic configuration p 738 A89-50540

HOLES (MECHANICS)

- Hole tone generated from almost choked to highly choked jets p 203 A89-19903
- Laser drilling of a superalloy coated with ceramic p 551 A89-36455
- Analytical failure prediction of bolted connections in composite shafts p 802 A89-49833
- Analysis of the expansion-fan flowfield for holes in a hypersonic configuration p 738 A89-50540
- Temperature effect on stress concentration around circular hole in a composite material specimen representative of X-29A forward-swept wing aircraft [NASA-CR-179439] p 194 N89-14458

HOLOGRAPHIC INTERFEROMETRY

- Holographic measurements of transition and turbulent bursting in supersonic axisymmetric boundary layers p 215 A89-23185
- Laser holographic interferometric measurements of the flow in a scramjet inlet at Mach 4 [AIAA PAPER 89-0043] p 273 A89-25037
- Prospects for the application of holographic interferometry to the study of the resonant vibrations of complex systems p 495 A89-35654
- Visualization of aerodynamic flow fields using photorefractive crystals p 555 A89-38764
- Measurements of swept shock wave/turbulent boundary-layer interactions by holographic interferometry [AIAA PAPER 89-1849] p 584 A89-42077
- Experimental investigation of propagation of shockwave induced disturbances in transonic airfoils [ESA-TT-1087] p 220 N89-15083

HOLOGRAPHY

- Design methods for a holographic head-up display curved combiner p 104 A89-15778
- Holographic and classical head up display technology for commercial and fighter aircraft p 104 A89-15779
- Compact holographic sight p 125 A89-15785

HOMOTOPY THEORY

- HOMAR: A computer code for generating homotopic grids using algebraic relations: User's manual [NASA-CR-4243] p 708 N89-26176

HONEYCOMB STRUCTURES

- Water intrusion in thin-skinned composite honeycomb sandwich structures p 410 A89-29458
- NASTRAN modelling of honeycomb sandwich panels subjected to picture frame shear p 415 A89-29474
- Annular honeycomb seals: Test results for leakage and rotordynamic coefficients - Comparisons to labyrinth and smooth configurations [ASME PAPER 88-TRIB-35] p 493 A89-34794
- Annular honeycomb seals: Test results for leakage and rotordynamic coefficients; comparisons to labyrinth and smooth configurations p 559 N89-22899
- Electromagnetic scattering from a structured slab comprised of periodically placed resistive cards [AD-A210145] p 806 N89-27953

HORIZONTAL FLIGHT

- Rotor blade aeroelasticity in forward flight with an implicit aerodynamic formulation p 229 A89-23180
- An experimental and analytical investigation of stall effects on flap-lag stability in forward flight p 243 A89-23305
- Aeroelastic prediction of rotor loads in forward flight p 230 A89-23320
- Generic icing effects on forward flight performance of a model helicopter rotor p 804 A89-41093
- Three dimensional analysis of a rotor in forward flight [AIAA PAPER 89-1815] p 580 A89-42045
- Measurement and computation of the velocity field of a cylinder in the wake of a rotor in forward flight [AIAA PAPER 89-1844] p 583 A89-42072
- Numerical solutions of forward-flight rotor flow using an upwind method [AIAA PAPER 89-1846] p 584 A89-42074
- Wind tunnel validation of aerodynamic field calculation codes for rotors and propellers in various flight conditions p 423 N89-18639
- Ground and air resonance of bearingless rotors in hover and forward flight p 529 N89-21786
- Flap-lag stability data for a small-scale isolated hingeless rotor in forward flight [NASA-TM-102189] p 706 N89-25479

HORIZONTAL SPACECRAFT LANDING

- Conceptual study of turbo-engines for horizontal takeoff and landing space plane [IAF PAPER 88-253] p 184 A89-17745

HORIZONTAL TAIL SURFACES

- Development and implementation of flight control system for a research drop model p 481 A89-33563

HORSESHOE VORTICES

- Normal impinging jet in crossflow - A parametric investigation [AIAA PAPER 88-2957] p 684 A89-47199

HOSES

- Hose reel monitor for inflight refueling system [AD-D014054] p 765 N89-26836

HOT CORROSION

- The high temperature oxidation behavior of the single crystal Ni-base alloy M002 mod. with and without protective coatings p 43 A89-11216
- Deposition of Na₂SO₄ from salt-seeded combustion gases of a high velocity burner rig p 43 A89-12330
- Vapor deposition and condensate flow on combustion turbine blades - Theoretical model to predict/understand some corrosion rate consequences of molten alkali sulfate deposition in the field or laboratory p 238 A89-20950
- Influence of thermal fatigue on hot corrosion of an intermetallic Ni-aluminide coating p 547 A89-36484

- Effect of crack size on the tensile strength of ceramics in a high-temperature corrosive environment p 547 A89-38021

- Molten salt induced high temperature degradation of thermal barrier coatings [ONERA, TP NO. 1989-60] p 796 A89-48745
- Corrosion in gas turbines [NLR-MP-87067-U] p 108 N89-11749

HOT ISOSTATIC PRESSING

- Influence of regeneration treatments on creep rupture lives of turbine blades p 43 A89-11214
- Superplasticity of HIPped PM superalloys made from attrited prealloy powder p 341 A89-25915
- Rejuvenation of service-exposed IN 738 turbine blades p 533 A89-36474

HOT SURFACES

- Structural analysis methods development for turbine hot section components p 479 N89-20140
- Hot surface ignition tests of aircraft fluids [AD-A207372] p 797 N89-26937

HOT WORKING

- Hot ductility response of Al-Mg and Al-Mg-Li alloys p 695 A89-45330

HOT-FILM ANEMOMETERS

- Measurements of the buffet boundary of wings in transonic flow with hot-film method p 148 A89-19805
- The design and use of a temperature-compensated hot-film anemometer system for boundary-layer flow transition detection on supersonic aircraft p 318 A89-27668

HOT-WIRE ANEMOMETERS

- A high speed data acquisition system for the analysis of velocity, density, and total temperature fluctuations at transonic speeds [SAE PAPER 881451] p 691 A89-45248
- Hot wire measurements downstream of a prop-fan [AIAA PAPER 89-2698] p 650 A89-47027
- Time-dependent boundary-layer response in a propeller slipstream p 737 A89-50066
- The pros and cons of code validation [NASA-TM-100657] p 14 N89-10034

HOT-WIRE FLOWMETERS

- Turbulence measurements with symmetrically bent V-shaped hot-wires. I - Principles of operation. II - Measuring velocity components and turbulent shear stresses p 121 A89-13378

HOTEL LAUNCH VEHICLE

- Aerothermodynamics - The required tools [SAE PAPER 880928] p 12 A89-12316
- Conceptual study of turbo-engines for horizontal takeoff and landing space plane [IAF PAPER 88-253] p 184 A89-17745
- HOTOL - A European aerospaceplane for the 21st century p 856 A89-54330

HOUSINGS

- T55-L-712 turbine engine compressor housing refurbishment-plasma spray project [NASA-TM-101310] p 44 N89-10156
- Incorporating general race and housing flexibility and deadband in rolling element bearing analysis p 561 N89-22912

HOVERING

- Aeroelastic response characteristics of a hovering rotor due to harmonic blade pitch variation p 101 A89-16547
- Comparisons of predicted and measured rotor performance in hover using a new free wake analysis p 165 A89-18933
- Development and flight test of a precision autohover capability for tactical rotorcraft p 165 A89-18934
- Navier-Stokes calculations of hovering rotor flowfields [AIAA PAPER 87-2829] p 149 A89-20133
- Visualization and measurement of the tip vortex core of a rotor blade in hover p 214 A89-22813
- A vortex embedding method for free wake analysis of helicopter rotor blades in hover p 216 A89-23321
- Comparison with flight data of hover performance using various rotor wake models p 230 A89-23323
- Flow visualization on a helicopter rotor in hover using acenaphthene p 256 A89-23341
- A moving-average method for input saturation problem in adaptive control p 264 A89-24582
- Simulation evaluation of transition and hover flying qualities of the E-7A STOVL aircraft [SAE PAPER 881430] p 333 A89-28205
- Time domain unsteady incompressible cascade airfoil theory for helicopter rotors in hover p 362 A89-29184
- Application of panel method aerodynamics to rotor aerelasticity in hover [AIAA PAPER 89-1234] p 388 A89-30720

HYPERSONIC FLOW

Engineering analysis of slender-body aerodynamics using Sychev similarity parameters p 4 A89-10108
 Unified computation method of unsteady supersonic/hypersonic flow past two dimensional flat plate and rectangular wings [SAE PAPER 872447] p 7 A89-10660
 A new PNS code for chemical nonequilibrium flows p 9 A89-11106
 Analysis of complex hypersonic flows with strong viscous/inviscid interaction p 9 A89-11109
 Heat transfer and interferometric study of the flow over a rearward facing step in hypersonic high enthalpy stream p 64 A89-12887
 Characteristics of a boundary layer on a spherically blunt conical body at low altitudes with allowance for the heating and ablation of the body p 66 A89-13337
 Experimental investigation of the characteristics of the interaction between gas molecules and the walls of cylindrical channels in the case of grazing incidence p 137 A89-13351
 Application of integrated fluid-thermal structural analysis methods p 122 A89-13544
 A numerical method for predicting hypersonic flowfields p 74 A89-14200
 Hypersonic flow of a viscous heat-conducting chemically reacting gas past bodies over a wide range of Reynolds numbers p 75 A89-14772
 A treatment of multivalued singularity of sharp corner in inviscid hypersonic flow p 76 A89-15666
 Euler solvers for hypersonic aerothermodynamic problems p 77 A89-15696
 The computation of non-equilibrium chemically-reacting flows p 127 A89-16934
 Spatial marching techniques for approximate solutions to the hypersonic blunt body problem p 143 A89-17460
 Calculation of hypersonic flow past the windward side of a low-aspect-ratio wing at high angles of attack p 144 A89-18357
 Interference effects associated with a plate-supported half-model in hypersonic flow p 148 A89-19924
 Numerical methods for hypersonic flows [DGLR PAPER 87-084] p 150 A89-20235
 Visualization of hypersonic flows through magnesium vapor combustion p 210 A89-22231
 Model problem of the hypersonic relaxing-gas flow past bodies p 211 A89-22245
 Application of lambda-differencing schemes to hypersonic inviscid flows p 212 A89-22339
 Effect of viscosity on the aerodynamic efficiency of a thin blunt wing at hypersonic flow velocities p 217 A89-23693
 28th Lanchester Memorial Lecture - Experimental real-gas hypersonics p 257 A89-23870
 Adaptive computations of multispecies mixing between scramjet nozzle flows and hypersonic freestream [AIAA PAPER 89-0009] p 322 A89-25005
 Prediction of supersonic/hypersonic viscous flows over RVs and decoys [AIAA PAPER 89-0028] p 272 A89-25024
 Efficient finite-volume parabolized Navier-Stokes solutions for three-dimensional, hypersonic, chemically reacting flowfields [AIAA PAPER 89-0103] p 274 A89-25090
 A set of strongly coupled, upwind algorithms for computing flows in chemical nonequilibrium [AIAA PAPER 89-0199] p 277 A89-25174
 Three-dimensional flow simulation about the AFE vehicle in the transitional regime --- Aeroassist Flight Experiment [AIAA PAPER 89-0245] p 278 A89-25207
 Large-angle-of-attack viscous hypersonic flows over complex lifting configurations [AIAA PAPER 89-0269] p 279 A89-25227
 Effect of nose bluntness on flow field over slender bodies in hypersonic flows [AIAA PAPER 89-0270] p 279 A89-25228
 Numerical simulation of hypersonic flow around a space plane at high angles of attack using implicit TVD Navier-Stokes code [AIAA PAPER 89-0273] p 279 A89-25230
 An implicit flux-vector splitting scheme for the computation of viscous hypersonic flow [AIAA PAPER 89-0274] p 279 A89-25231
 Nonequilibrium effects for hypersonic transitional flows using continuum approach [AIAA PAPER 89-0461] p 284 A89-25377
 An efficient, explicit finite-rate algorithm to compute flows in chemical nonequilibrium [AIAA PAPER 89-0522] p 285 A89-25418
 Effect of dynamic changes in body configuration on shock structure [AIAA PAPER 89-0526] p 285 A89-25421
 An improved upwind finite volume relaxation method for high speed viscous flows [AIAA PAPER 89-0549] p 286 A89-25441

A three-dimensional upwind finite element point implicit unstructured grid Euler solver [AIAA PAPER 89-0658] p 289 A89-25521
 Simple turbulence models for supersonic and hypersonic flows - Bodies at incidence and compression corners [AIAA PAPER 89-0669] p 289 A89-25530
 On the solution of nonequilibrium hypersonic inviscid steady flows [AIAA PAPER 89-0671] p 289 A89-25532
 Nonequilibrium viscous hypersonic flows over ablating Teflon surfaces [AIAA PAPER 89-0314] p 293 A89-26368
 Supersonic, transverse jet from a rotating ogive cylinder in a hypersonic flow p 294 A89-27728
 Viscous shock-layer solutions for the low-density hypersonic flow past long slender bodies [AIAA PAPER 88-0460] p 295 A89-28251
 Interaction of jet in hypersonic cross stream p 362 A89-29192
 Three dimensional viscous analysis of a hypersonic inlet [AIAA PAPER 89-0004] p 364 A89-29924
 Pressure and flow field calculation in supersonic and hypersonic flow about rounded bodies p 370 A89-31901
 Possibilities for modeling turbulent heat transfer in hypersonic finite-jet flow past bodies p 371 A89-32145
 Direct statistical modeling of flow of a rarefied gas past a sphere in the transition regime p 371 A89-32279
 Computation of flow fields for hypersonic flight at high altitudes p 440 A89-33627
 A numerical method for predicting hypersonic flowfields p 440 A89-33634
 Computational methods for hypersonic flows - Special techniques and real gas effects [ONERA, TP NO. 1989-100] p 441 A89-33640
 Turbulence modeling for hypersonic flows p 441 A89-33641
 Numerical simulation of three-dimensional hypersonic viscous flows p 441 A89-33644
 Laminar-turbulent transition problems at high speeds p 441 A89-33645
 High-resolution shock-capturing schemes for inviscid and viscous hypersonic flows p 443 A89-34646
 Patched-grid computations of high-speed inlet flows p 443 A89-34728
 Computation of external, hypersonic, three-dimensional flowfield and heat transfer p 494 A89-34935
 Separation shock motion in fin, cylinder, and compression ramp - Induced turbulent interactions p 509 A89-36911

- ### INSTRUMENT APPROACH
- Flight evaluation of pursuit displays for precision approach of powered-lift aircraft
p 610 A89-43059
- Manual CAT IIIa with a HUD - Requirements and testing --- FAA instrument approach category
p 687 A89-45184
- Microwave landing system instrumentation - A pilot's viewpoint
[SAE PAPER 881461] p 661 A89-47340
- The challenge of lowered visibility limits for precision approach and landing with helicopters
[NLR-MP-87033-U] p 226 A89-15097
- A procedure for operating dependent instrument approaches to converging runways
[AD-A204723] p 526 A89-21784
- Aircraft accident/incident summary reports: Belleville, Illinois, August 22, 1987; Pensacola, Florida, December 27, 1987
[PB89-910405] p 827 A89-28507
- ### INSTRUMENT COMPENSATION
- Test of a calibration device for airborne Lyman-alpha hygrometers
p 532 A89-37537
- ### INSTRUMENT ERRORS
- Determination of the deviation coefficients of a magnetic compass during a turn
p 610 A89-40719
- ### INSTRUMENT FLIGHT RULES
- The impact of yaw axis control modes, flight directors and automatic control coupling on decelerating IFR approaches for rotorcraft
p 180 A89-18903
- The realization of microwave landing system benefits
p 307 A89-26734
- Landing flight near traffic level II using the IL-62M aircraft
p 387 A89-29740
- An investigation of lateral tracking techniques, flight directors and automatic control coupling on decelerating IFR approaches for rotorcraft
[AD-A202910] p 526 A89-21782
- A procedure for operating dependent instrument approaches to converging runways
[AD-A204723] p 526 A89-21784
- ### INSTRUMENT LANDING SYSTEMS
- Terminal navigation for the Combat Talon II aircraft
[AIAA PAPER 88-4021] p 159 A89-18173
- Possibility of using GPS for precision approaches
p 599 A89-40803
- Evaluating ILS and MLS sites without flight tests
p 680 A89-43894
- F-16 AI/VVI (Altitude Indicators/Vertical Velocity Indicators) evaluation: A comparison of four configurations
[AD-A199543] p 233 A89-15105
- Aircraft accident/incident summary report, Travis Air Force Base, California, 8 April 1987
[PB88-910414] p 306 A89-16768
- Instrument landing system mathematical modeling study for Orlando International Airport Runway 17R localizer, Orlando, Florida, revised airside docking plan (Scheme 3A)
[AD-A204722] p 526 A89-21783
- Instrument landing system mathematical modeling study for Orlando International Airport Runway 35L localizer, Orlando, Florida. Final airside docking plan (Scheme 3A)
[AD-A205351] p 600 A89-23438
- ILS/MLS collocation tests at Miami/Tamiami, Florida Airport
[NASA-CR-185715] p 751 A89-26832
- An operational demonstration and flight test of the Microwave Landing System (MLS) at the Miami/Tamiami, Florida Airport
[DOT/FAA/CT-TN89/37] p 752 A89-26833
- ### INSTRUMENT PACKAGES
- HOST instrumentation R and D program overview
p 110 A89-12878
- ### INSTRUMENTS
- International Instrumentation Symposium, 34th, Albuquerque, NM, May 2-6, 1988, Proceedings
p 348 A89-27651
- Utilization of wind tunnel instrumentation with software verifications
p 335 A89-27654
- ### INSURANCE (CONTRACTS)
- The insurance requirements of the aircraft operator - Discrepancies between law and regulations
p 813 A89-48502
- ### INTAKE SYSTEMS
- Engine surge simulation in wind-tunnel model inlet ducts
p 108 A89-13680
- Transport aircraft intake design
[ONERA, TP NO. 1988-18] p 363 A89-29208
- Three dimensional viscous analysis of a hypersonic inlet
[AIAA PAPER 89-0004] p 384 A89-29924
- Hot gas ingestion testing of an advanced STOVL concept in the NASA Lewis 9- by 15-foot Low Speed Wind Tunnel with flow visualization
[AIAA PAPER 88-3025] p 439 A89-33249
- Electromagnetic backscatter from open-ended circular cylinder with complex termination
p 536 A89-39284
- F-16 inlet stability investigation
[AIAA PAPER 89-2465] p 665 A89-46852
- Numerical simulations of the flowfield in central-dump ramjet combustors. Part 2: Effects of inlet and combustor acoustics
[AD-A198743] p 108 A89-11745
- Isolated testing of highly maneuverable inlet concepts
[NASA-CR-179544] p 178 A89-13437
- Hot gas ingestion testing of an advanced STOVL concept in the NASA Lewis 9- by 15-foot low speed wind tunnel with flow visualization
[NASA-TM-100952] p 220 A89-15078
- Flame driving of longitudinal instabilities in liquid fueled dump combustors
[AD-A201293] p 412 A89-19392
- ### INTEGRAL EQUATIONS
- Integral equation method for calculating the nonstationary aerodynamic characteristics of a rotating annular blade row
p 65 A89-13102
- Integral equations in the linear theory of contact problems
p 263 A89-23656
- Integral equation solution of the full potential equation for transonic flows
[AIAA PAPER 89-0563] p 287 A89-25452
- On the reduction of Dirichlet-Newton problems to wing equations
p 429 A89-29130
- A potential flow solution on marine propeller and axial rotating fan
[AD-A198781] p 191 A89-13735
- ### INTEGRAL ROCKET RAMJETS
- Efficient computational tool for ramjet combustor research
[AIAA PAPER 88-0060] p 674 A89-44108
- ### INTEGRATED CIRCUITS
- Aerospace avionics equipment and integration; Proceedings of the Second Conference, Dallas, TX, Nov. 2-4, 1987
[SAE P-205] p 48 A89-10676

GaAs 32-bit single board computer
[AIAA PAPER 88-0412] p 200 A89-18162
GaAs MMICs satisfy EW requirements p 188 A89-18757
Temperature compensation using GaAs MMIC devices p 347 A89-26548

INTERACTIONAL AERODYNAMICS
Propfan design by propeller-nacelle interaction analysis p 36 A89-11055
Dynamic distortion in flowfield downstream of transonic shock-boundary layer interaction p 8 A89-11061
Analysis of transonic wings including viscous interaction p 9 A89-11084
Acoustics of transonic blade-vortex interactions p 59 A89-11101
Analysis of complex hypersonic flows with strong viscous/inviscid interaction p 9 A89-11109
A vortex-lattice method for the calculation of wing-vortex interaction in subsonic flow p 11 A89-11499
Numerical simulation of pressure wave boundary layer interaction p 65 A89-12928
Flow in the region of the interaction of an underexpanded rarefied jet and a conical skimmer p 67 A89-13347
Viscous/inviscid interaction procedure for high-amplitude oscillating airfoils p 70 A89-13579
Time-consistent computation of transonic buffet over airfoils [ONERA, TP NO. 1988-97] p 70 A89-13580
Multigrid computation of transonic flow about complex aircraft configurations, using Cartesian grids and local refinement p 94 A89-13607
Transonic shock boundary layer interaction with passive control p 73 A89-13685
Space-time correlations of wall pressure fluctuations in shock-induced separated turbulent flows p 74 A89-14039
Three dimensional simulation of an underexpanded jet interacting with a supersonic cross flow [AIAA PAPER 88-3181] p 75 A89-14982
Finite element implementation of full fluid/structure interaction using modal methods p 125 A89-15596
Finned, multibody aerodynamic interference at transonic Mach numbers p 78 A89-16094
Interaction of fluids and structures for aircraft applications p 127 A89-16927
Aeroelastic computations of flexible configurations p 127 A89-16928
Solution of the compressible Navier-Stokes equations for a double throat nozzle p 82 A89-17025
Free wake calculation of rotor flow fields for interactional aerodynamics p 145 A89-18853
Rotor/airframe interactions on tiltrotor aircraft p 161 A89-18854
An examination of some rotor aerodynamic models using the RSRA/X-wing model test data p 146 A89-18858
A study on aerodynamic heating in the interaction regions of shock waves and turbulent boundary layers induced by sharp fins p 148 A89-20131
Further comparisons of interactive boundary-layer and thin-layer Navier-Stokes procedures p 149 A89-20137
Interactions between turbulent wakes and boundary layers p 150 A89-20182
Experimental investigation of wake and boundary layer interaction p 208 A89-20956
Prediction of separated flow past airfoil using viscous-inviscid interaction technique p 208 A89-21092
A low order panel method for the calculation of vortex sheet roll-up and wing-vortex interaction p 208 A89-21283
Nonlinear interactions of perturbations during the turbulent transition in the separation region of a laminar boundary layer p 209 A89-21580
Finite-volume calculation of inviscid transonic airfoil-vortex interaction p 212 A89-22358
Simultaneous viscous-inviscid interaction calculation procedure for transonic turbulent flows p 212 A89-22359
An interactive boundary-layer procedure for oscillating airfoils including transition effects [AIAA PAPER 89-0020] p 271 A89-25016
Infrared thermography in blowdown and intermittent hypersonic facilities p 334 A89-25036
An experimental study of shock wave/vortex interaction [AIAA PAPER 89-0082] p 273 A89-25072
Vortex/boundary layer interactions [AIAA PAPER 89-0083] p 273 A89-25073
Influence of wing geometry on leading-edge vortices and vortex-induced aerodynamics at supersonic speeds [AIAA PAPER 89-0085] p 274 A89-25075
An interactive three-dimensional boundary-layer method for transonic flow over swept wings [AIAA PAPER 89-0112] p 274 A89-25099

Grid refinement studies of turbine rotor-stator interaction [AIAA PAPER 89-0325] p 281 A89-25274
Mach number dependence of flow separation induced by normal shock-wave/turbulent boundary-layer interaction at a curved wall p 282 A89-25298
An LDV investigation of a multiple normal shock wave/turbulent boundary layer interaction [AIAA PAPER 89-0355] p 282 A89-25300
An exploratory study of corner bleed on a fin generated three-dimensional shock wave turbulent boundary layer interaction [AIAA PAPER 89-0356] p 282 A89-25301
A numerical study of the contrarotating vortex pair associated with a jet in a crossflow [AIAA PAPER 89-0448] p 284 A89-25366
Numerical study of single impinging jets through a crossflow [AIAA PAPER 89-0449] p 284 A89-25367
Viscous-inviscid interaction and local grid refinement via truncation error injection [AIAA PAPER 89-0468] p 285 A89-25383
Propeller/wing interaction [AIAA PAPER 89-0535] p 311 A89-25429
Numerical solutions to three-dimensional shock wave/vortex interaction at hypersonic speeds [AIAA PAPER 89-0674] p 289 A89-25534
Measurement of transient vortex-surface interaction phenomena [AIAA PAPER 89-0833] p 289 A89-25603
Supersonic, transverse jet from a rotating ogive cylinder in a hypersonic flow p 294 A89-27728
Effect of sidewall boundary layer on a wing in a wind tunnel p 294 A89-27742
Influence of vane/blade spacing and injection on stage heat-flux distributions p 325 A89-28342
Experimental and numerical investigation of an oblique shock wave/turbulent boundary layer interaction with continuous suction [AIAA PAPER 89-0357] p 296 A89-28407
Interaction of jet in hypersonic cross stream p 362 A89-29192
Viscous-inviscid strategy and computation of transonic buffet [ONERA, TP NO. 1988-111] p 363 A89-29263
A model of self-oscillation generation for aerodynamic control surfaces at transonic velocities p 364 A89-30070
Three-dimensional rarefied-gas flow past conical bodies p 364 A89-30106
Direct calculation of flows with shock waves p 365 A89-30109
Three-dimensional supersonic flows past blunt bodies with allowance for interference p 365 A89-30110
Supersonic flows of a viscous gas --- Russian book p 365 A89-30216
Investigation of the parallel blade-vortex interaction at low speed p 370 A89-31857
Velocity measurements of airframe effects on a rotor in a low-speed forward flight p 394 A89-31859
Interactive boundary-layer calculations of a transonic wing flow p 370 A89-31867
Fluctuation of heat transfer in shock wave/turbulent boundary-layer interaction p 371 A89-31910
Application of harmonic analysis method to research on rotor airloads p 467 A89-33139
On sound generation by a jet flow passing a semi-infinite aerofoil [AIAA PAPER 89-1070] p 501 A89-33716
Interaction noise mechanisms for an advanced propeller - Experimental results [AIAA PAPER 89-1093] p 502 A89-33733
Experimental validation of a lifting surface model for rotor wake-stator interaction [AIAA PAPER 89-1125] p 441 A89-33758
An analytical model for the prediction of MR/TR interaction noise --- main rotor/tail rotor [AIAA PAPER 89-1130] p 503 A89-33762
Large-eddy simulations of excitation effects on a VTOL upwash fountain p 442 A89-34461
Viscous-inviscid interaction and computation in aerodynamics [ONERA, TP NO. 1988-126] p 443 A89-34627
Calculation of blade-vortex interaction airloads on helicopter rotors p 446 A89-34895
An experimental investigation of the aerodynamic loads on cambered plates [AIAA PAPER 89-0935] p 447 A89-35244
Prediction of potential noise interactions in axial-flow machines - Application to the helicopter fenestron p 504 A89-35385
Unsteady interaction effects on a transitional turbine blade boundary layer p 508 A89-36186

Fluctuating pressures on wing surfaces in the slipstream of a single-rotor propfan [AIAA PAPER 89-1058] p 564 A89-36218
Blade-vortex interaction p 508 A89-36905
Separation shock motion in fin, cylinder, and compression ramp - induced turbulent interactions p 509 A89-36911
Explicit Runge-Kutta method for unsteady rotor/stator interaction p 509 A89-36912
Integrated approach for active coupling of structures and fluids p 552 A89-36917
New possibilities of viscous-inviscid numerical techniques for solving viscous flow equations with massive separation [ONERA, TP NO. 1989-24] p 554 A89-37640
Gust analysis of an aircraft with highly non-linear systems interaction [AIAA PAPER 89-1377] p 527 A89-37650
The computation of the viscous/inviscid interaction p 510 A89-37777
Consideration of the effect of surface roughness on regime coefficients in local interaction theory p 512 A89-38432
Dependence of regime coefficients on regime parameters in local interaction theory p 512 A89-38435
Three-dimensional Navier-Stokes simulations of turbine rotor-stator interaction. I - Methodology p 514 A89-39034
Experimental investigation of shock wave/boundary-layer interactions in an annular duct p 514 A89-39039
Wing-store flutter analysis of an airfoil in incompressible flow p 528 A89-39198
Simulation of the interaction between aerodynamics and vehicle dynamics in general unsteady ground effect [AIAA PAPER 89-1498] p 571 A89-41570
An inviscid/viscous coupling approach for vortex flowfield calculations [AIAA PAPER 89-1961] p 575 A89-41807
Unsteady aerodynamic simulation of multiple bodies in relative motion [AIAA PAPER 89-1996] p 577 A89-41839
A validation study of four Navier-Stokes codes for high-speed flows [AIAA PAPER 89-1838] p 583 A89-42066
Interaction of a compression ramp with a hypersonic laminar boundary layer [AIAA PAPER 89-1843] p 583 A89-42071
Unsteady interaction of a rotor with a vortex [AIAA PAPER 89-1848] p 584 A89-42076
Measurements of swept shock wave/turbulent boundary-layer interactions by holographic interferometry [AIAA PAPER 89-1849] p 584 A89-42077
Navier-Stokes simulation of a shock wave-turbulent boundary layer interaction in a three-dimensional channel [AIAA PAPER 89-1851] p 585 A89-42079
Numerical simulation of 3D rarefied hypersonic flows [AIAA PAPER 89-1715] p 591 A89-43230
Interaction of an oscillating vortex with a turbulent boundary layer p 645 A89-45906
Rapid methodology for design and performance prediction of integrated scramjet/hypersonic vehicle [AIAA PAPER 89-2682] p 666 A89-47012
Average-passage simulation of counter-rotating propfan propulsion systems as applied to cruise missiles [AIAA PAPER 89-2943] p 651 A89-47187
Investigation of the flow structure around a rapidly pitching airfoil p 652 A89-47360

Fast laminar near wake flow calculation by an implicit method solving the Navier-Stokes equations p 270 A89-24923
A numerical study of hypersonic supersonic/airframe integration problem [AIAA PAPER 89-0030] p 272 A89-25026
Three-dimensional compressible boundary layer calculations to fourth order accuracy on wings and fuselages [AIAA PAPER 89-0130] p 275 A89-25115
Upwind Navier-Stokes solutions for leading-edge vortex flows [AIAA PAPER 89-0265] p 278 A89-25223
Control of laminar separation over airfoils by acoustic excitation [AIAA PAPER 89-0565] p 288 A89-25454
Laminar flow - The past, present, and prospects [AIAA PAPER 89-0989] p 366 A89-30501
NASA supercritical laminar flow control airfoil experiment p 372 A89-32331
Business aviation and new technologies p 438 A89-35379
Measurements of laminar separation bubble on B3 airfoil p 569 A89-40893
Large-scale viscous simulation of laminar vortex flow over a delta wing p 569 A89-40901
A validation study of four Navier-Stokes codes for high-speed flows [AIAA PAPER 89-1838] p 583 A89-42066
Numerical simulation of laminar hypersonic flow past a double-ellipsoid [AIAA PAPER 89-1840] p 583 A89-42068
Algorithm for calculating transonic viscous-gas flows near asymmetric wing profiles p 727 A89-47933
Effect of turbulence on lifting surface boundary layer transition [ONERA, TP NO. 1989-87] p 729 A89-48767
One-equation turbulence model for the laminar separation bubble on airfoils p 738 A89-49947
Fifty years of laminar flow flight testing [SAE PAPER 881393] p 784 A89-51355
Design aspects of long range supersonic LFC airplanes with highly swept wings [SAE PAPER 881397] p 742 A89-51357
A transonic interactive boundary-layer theory for laminar and turbulent flow over swept wings [NASA-CR-4186] p 14 N89-10029
A zonal equation method for three-dimensional locally elliptic laminar and turbulent flows p 87 N89-12547

Control of laminar separation over airfoils by acoustic excitation
[NASA-TM-101379] p 87 N89-12552

An interactive three-dimensional laminar and turbulent boundary-layer method for compressible flow over swept wings
p 222 N89-15892

Large-scale viscous simulation of laminar vortex flow over a delta wing
p 374 N89-18660

Flight survey of the 757 wing noise field and its effects on laminar boundary layer transition. Volume 1: Program description and data analysis
[NASA-CR-178216] p 424 N89-18665

The NASA Langley laminar-flow-control experiment on a swept, supercritical airfoil - Drag equations
[NASA-TM-4096] p 374 N89-19231

Drag measurements on a laminar-flow body of revolution in the 13-inch magnetic suspension and balance system
[NASA-TP-2895] p 374 N89-19232

A computationally efficient modelling of laminar separation bubbles
[NASA-CR-184789] p 426 N89-19504

The birth of open separation on a prolate spheroid
[AD-A201350] p 426 N89-19509

The NASA Langley laminar-flow-control experiment on a swept supercritical airfoil: Basic results for slotted configuration
[NASA-TM-4100] p 516 N89-21762

Comparison of boundary layer trips of disk and grit types on airfoil performance at transonic speeds
[AD-A205206] p 519 N89-22575

Transition to turbulence in laminar hypersonic flow
p 522 N89-22830

Wind-tunnel investigation of aerodynamic characteristics and wing pressure distributions of an airplane with variable-sweep wings modified for laminar flow
[NASA-TM-4124] p 744 N89-26810

Feasibility and benefits of laminar flow control on supersonic cruise airplanes
[NASA-CR-181817] p 765 N89-26841

Finite element analysis of incompressible viscous flows around single and multi-element aerofoils in high Reynolds number region
[NAL-TR-1010T] p 865 N89-26765

LAMINAR FLOW AIRFOILS

Investigations on high Reynolds number laminar flow airfoils
p 4 A89-10102

Design and experimental verification of an advanced Fowler flapped natural laminar flow airfoil
p 87 A89-13517

Design philosophy of long range LFC transports with advanced supercritical LFC airfoils --- laminar flow control
p 92 A89-13528

A multistage multigrid method for the compressible Navier-Stokes equations
p 81 A89-17018

Implicit central difference simulation of compressible Navier-Stokes flow over a NACA0012 airfoil
p 82 A89-17022

Transition to turbulence on a wing in flight and in a wind tunnel at the same Reynolds numbers
p 209 A89-21581

Flow visualization for laminar profiles
p 213 A89-22761

Stability of three-dimensional boundary layers and laminar wings
p 217 A89-23811

Flow quality measurements for the Langley 8-foot transonic pressure tunnel LFC experiment
[AIAA PAPER 89-0150] p 276 A89-25133

Evaluation of an analysis method for low-speed airfoils by comparison with wind tunnel results
[AIAA PAPER 89-0266] p 278 A89-25224

Optimization of natural laminar flow airfoils for high section lift-to-drag ratios in the lower Reynolds number range
[AIAA PAPER 89-0539] p 296 A89-28428

Numerical solution of Navier-Stokes equations for two-dimensional viscous compressible flows
p 570 A89-40903

Newton solution of inviscid and viscous problems
p 570 A89-40909

Flight tests with the VFW 614 - ATTAS laminar glove
[MBB-UT-0132-88-PUB] p 606 A89-42936

Investigation of the flow structure around a rapidly pitching airfoil
p 652 A89-47360

Environmentally induced surface roughness effects on laminar flow airfoils - Implications for flight safety
[AIAA PAPER 89-2049] p 748 A89-49423

A fundamental approach to the sticking of insect residues to aircraft wings
[NASA-CR-183041] p 156 N89-13414

The effects of freestream turbulence on airfoil boundary layer behavior at low Reynolds numbers
[AD-A201665] p 372 N89-18419

Two experimental supercritical laminar-flow-control swept-wing airfoils
[NASA-TM-89073] p 378 N89-19266

LAMINAR HEAT TRANSFER

PARC code validation for propulsion flows
[AD-A204293] p 557 N89-22066

LAMINAR WAKES

Study of the vortical wake patterns of an oscillating airfoil
[AIAA PAPER 89-0554] p 287 A89-25444

LAMINATES

A geometrically nonlinear theory of shear deformable laminated composite plates and its use in the postbuckling analysis
p 122 A89-13538

Optimal design of large laminated structures --- of aircraft
p 123 A89-13650

New developments in ARALL laminates
p 96 A89-13665

Damage tolerance and supportability aspects of ARALL laminate aircraft structures --- Aramid Reinforced Aluminum
p 100 A89-16083

Buckling and final failure of graphite/PEEK stiffener sections
p 190 A89-19911

COCOMAT, a CAE system for composite structures design --- for aircraft
p 166 A89-19981

Design studies of primary aircraft structures in ARALL laminates
p 167 A89-20318

Free vibration and panel flutter of quadrilateral laminated plates
p 347 A89-28274

Edge effects in tapered composite structures
p 410 A89-29461

ARALL laminate structures - Toward the supportable and durable aircraft
p 387 A89-30001

Shape sensitivity analysis of flutter response of a laminated wing
[AIAA PAPER 89-1267] p 389 A89-30750

Effects of transverse shear on large deflection random response of symmetric composite laminates with mixed boundary conditions
[AIAA PAPER 89-1356] p 418 A89-30831

Component-level analysis of composite box beams
[AIAA PAPER 89-1360] p 418 A89-30835

Delamination arrestment by discretizing the critical ply in a laminate
[AIAA PAPER 89-1403] p 419 A89-30876

Analysis of laminated composite structures
p 420 A89-30955

Influence of a tough layer within an orthotropic plate on the mode I stress intensity factor
p 421 A89-31789

Sonic fatigue-resistant damped laminated structures
[AIAA PAPER 89-1102] p 469 A89-33742

The load-bearing capacity of closed-profile oblong cylindrical shells made of a metal/polymer composite laminate
p 492 A89-34128

Formulation and solution of axisymmetric problems in the statics of multilayer shells of revolution with contact interaction between layers
p 492 A89-34129

On the design of biaxially stiffened composite plates
p 493 A89-34867

Experimental study on applicability of damage failure criterion of composite laminates
p 727 A89-48194

Flutter of general laminated panels in supersonic flow
p 803 A89-50174

Buckling with imperfection of cylindrical composite panel
p 804 A89-51312

A review of Arall technology
p 797 A89-51573

Interlaminar fracture toughness and toughening of laminated composite materials - A review
p 858 A89-54426

Design, fabrication, and testing of a composite main landing gear retracting beam
[SME PAPER EM88-551] p 834 A89-54901

Tension fatigue analysis and life prediction for composite laminates
[NASA-TM-100549] p 44 N89-10951

Shape sensitivity analysis of flutter response of a laminated wing
[NASA-CR-181725] p 102 N89-11740

Structural efficiency study of composite wing rib structures
[NASA-CR-183004] p 119 N89-11827

Fatigue damage in composites under different loading conditions
[NLR-TR-88032-U] p 251 N89-15188

Vibration and aeroelastic tailoring of advanced composite plate-like lifting surfaces
p 351 N89-17263

Test specimens for bearing and by-pass stress interaction in carbon fibre reinforced plastic laminates
p 342 N89-17696

Mechanism of single shear fastened joints
p 352 N89-17700

Durability and damage tolerance of bismaleimide composites, volume 1
[AD-A201273] p 412 N89-19374

Durability and damage tolerance of bismaleimide composites, Volume 2: Appendix of crack growth and low-velocity impact data
[AD-A201639] p 412 N89-19379

Composite sizing and ply orientation for stiffness requirements using a large finite element structural model
p 705 N89-25166

Composite transport wing technology development
[NASA-CR-178408] p 766 N89-26842

Composite material repair and reliability
[AD-A209150] p 859 N89-28574

LAND MOBILE SATELLITE SERVICE

NTT's program of experimental mobile satellite system (EMSS) using ETS-V and preliminary results
p 552 A89-36585

LANDING

High-speed propeller performance and noise predictions at takeoff/landing conditions
p 585 A89-39195

Noise of the Harrier in vertical landing and takeoff
p 60 N89-10856

Autonomous flight and remote site landing guidance research for helicopters
[NASA-CR-177478] p 114 N89-11752

Simulated final approach path captures using the microwave landing system
[NASA-CR-181696] p 227 N89-15099

LANDING AIDS

Counteracting sidewind control system for aircraft landing
p 181 A89-19800

Flight management procedures for noise-minimal landing trajectories with consideration of temperature and wind gradients
p 245 A89-24500

Transformation techniques for minimax optimal control problems and their application to optimal flight trajectories in a windshear - Optimal abort landing trajectories
p 245 A89-24526

Abort landing guidance trajectories in the presence of windshear
p 481 A89-32725

Development of an Autonomous Landing Guidance system simulation model
[AIAA PAPER 89-3282] p 786 A89-48394

Stress analysis report for the Microwave Landing System (MLS) class V modification C-130 aircraft
[AD-A196722] p 91 N89-11730

Electrical load and power source capacity report for the C-130 aircraft Microwave Landing System (MLS) SLIASC model 6216
[AD-A196721] p 102 N89-11737

Autonomous RPRV navigation, guidance and control
[NASA-CR-179425] p 161 N89-14228

F-16 AI/VVI (Attitude Indicators/Vertical Velocity Indicators) evaluation: A comparison of four configurations
[AD-A199543] p 233 N89-15105

Design of automated system for management of arrival traffic
[NASA-TM-102201] p 598 N89-24290

LANDING GEAR

Fatigue crack growth in aircraft main landing gear wheels
p 28 A89-11447

Modelling of ground effects on aircraft --- landing gear-runway interactions
p 166 A89-19559

New design procedures applied to landing gear development
p 167 A89-20138

Aircraft landing gear design: Principles and practices --- Book
p 312 A89-26950

Landing gear design and development
p 754 A89-48283

Design, fabrication, and testing of a composite main landing gear retracting beam
[SME PAPER EM88-551] p 834 A89-54901

F-15 SMTD low speed jet effects wind tunnel test results
p 16 N89-10853

Investigation into the applicability of fracture mechanics techniques to aircraft wheel life studies
p 128 N89-12763

Failure analysis: Analysis of landing gear fatigue test results for mechanical and metallurgical considerations in order to determine the authorized run time
p 556 N89-21984

Acta Aeronautica et Astronautica Sinica (selected articles)
[AD-A205128] p 508 N89-22570

Aircraft accident/incident summary reports: Belleville, Illinois, August 22, 1987; Pensacola, Florida, December 27, 1987
[PB89-910405] p 827 N89-28507

LANDING INSTRUMENTS

Preconditions for G.P.S. installation - Receivers in differential operation for landing aircraft in general aviation
[DGLR PAPER 87-132] p 23 A89-10523

Microwave landing system instrumentation - A pilot's viewpoint
[SAE PAPER 881461] p 661 A89-47340

LANDING LOADS

Using the momentum method to estimate aircraft ditching loads
p 99 A89-15707

Transient dynamics of aircraft propellers during touch-down impact
p 470 A89-34509

Injuries to seat occupants of light airplanes [AD-A207579] p 749 N89-26830

LIGHT EMITTING DIODES

Detectability of emergency lights for underwater escape p 380 A89-32339

LIGHT HELICOPTERS

Airframe and propulsion assessment of alternative light helicopter technologies (LHX) p 161 A89-18863

Light helicopter technology for the year 2000 p 232 A89-23372

T800/A129 flight program p 533 A89-36399

BO 108 - Technology for new light twin helicopters [MBB-UD-529-88-PUB] p 603 A89-39844

Vertical flight programs at Hughes Aircraft Company p 717 A89-50169

LIGHT MODULATION

Phase-only filters with improved signal to noise ratio p 356 A89-28382

Display characteristics of example light-valve projectors [AD-A209580] p 877 N89-29193

LIGHT SOURCES

Evaluation of an updated design of an internally lighted wind cone [DOT/FAA/CT-TN89/45] p 793 N89-26868

LIGHTNING

EH101: Lightning protection of composite materials - Results of preliminary tests on CFC panels p 230 A89-23315

Experimental evaluation of lightning-induced transients on the AS355 helicopter p 233 A89-23380

National lightning detection - A real-time service to aerospace [AIAA PAPER 89-0787] p 352 A89-25578

Lightning initiation on aircraft in thunderstorms p 353 A89-26214

Lightning triggered by the presence of aerospace vehicles p 353 A89-26215

Simple model of lightning return-stroke simulations [ONERA, TP NO. 1988-27] p 427 A89-29214

Experimental study of the connection between a long spark and an aircraft mock-up [ONERA, TP NO. 1988-118] p 407 A89-29270

Electromagnetic disturbances associated with lightning strikes on aircraft [ONERA, TP NO. 1988-163] p 380 A89-31821

Laboratory simulation of the attachment of a leader to a suspended aircraft mockup --- lightning effects study [ONERA, TP NO. 1988-165] p 408 A89-31823

The SAFIR lightning monitoring and alert system [ONERA, TP NO. 1988-168] p 428 A89-31826

Triggered lightning strikes to aircraft and natural intracloud discharges p 460 A89-35158

Principal characteristics of lightning on aircraft [ONERA, TP NO. 1989-59] p 748 A89-48744

Effects of lightning on modern aircraft p 748 A89-50692

LDIS (Lightning Data and Information Systems) - A new resource for aviation meteorology p 869 A89-54801

International Aerospace and Ground Conference on Lightning and Static Electricity [PB88-197439] p 55 N89-10429

Statistics of lightning interaction with aircraft in Japan p 55 N89-10430

An aircraft-borne electric field measuring system for rocket launch support p 55 N89-10443

New electric field instrumentation and the effects of space charge at Kennedy Space Center p 55 N89-10444

A case for a unified lightning threat p 56 N89-10447

Summary of inflight data on lightning currents and fields p 56 N89-10449

Analysis of recent in-flight lightning measurements on different aircraft p 20 N89-10450

Linear and nonlinear interpretation of CV-580 lightning data p 21 N89-10451

Lightning tests on an all-composite helicopter p 21 N89-10452

A chronology of in-cloud electric field and lightning strikes on an instrumented research aircraft p 21 N89-10455

Lightning initiation on aircraft in thunderstorms p 21 N89-10456

Lightning tests to measure the bulk current levels associated with the electronic engine control of a turboprop commuter transport p 21 N89-10457

The electrical structure of thunderstorm anvils p 56 N89-10470

Lightning and surge protection of large ground facilities p 52 N89-10474

Implications of a recent lightning strike to a NASA jet trainer p 22 N89-10478

The SAFIR lightning monitoring and warning system, applications to aerospace activities p 52 N89-10481

Finite difference analysis of external and internal lightning response of the JAS39 CFC wing p 22 N89-10483

A filamentary method for calculating induced voltages within resistive structures in either the frequency or time domain p 52 N89-10484

Modelling of common mode coupling between an aircraft wing traversed by a lightning current and wiring installed in that wing p 22 N89-10485

Intracloud lightning as a precursor to thunderstorm microbursts p 56 N89-10490

Indirect effects on electronic and mechanical systems installed in carbon fibre compound aircraft structures p 22 N89-10492

System protection from atmospheric electricity for aerostats with conducting tethers p 52 N89-10497

Lightning simulation test technique evaluation [DOT/FAA/CT-87/38] p 156 N89-13415

Application of triggered lightning numerical models to the F106B and extension to other aircraft [NASA-CR-4207] p 261 N89-15485

Lightning campaign 85/86 Transall C160 A04: Flying tests [REPT-85/535800] p 396 N89-19297

Generalized three-dimensional experimental lightning code (G3DXL) user's manual p 428 N89-19779

[NASA-CR-166079] p 428 N89-19779

A wide bandwidth electrostatic field sensor for lightning research [NASA-TM-101539] p 428 N89-19783

In-flight lightning characterization program on a CV-580 aircraft [AD-A203954] p 464 N89-20976

Ground vibration test of the Foudre A04 Transall aircraft [REPT-20/7234-PY-382-R] p 609 N89-24311

Lightning inflight study onboard a Transall aircraft. Definition of the onboard instruments [ONERA-RF-19/7234-PY] p 629 N89-24777

LIGHTNING SUPPRESSION

EMP susceptibility insights from aircraft exposure to lightning p 88 A89-15937

Lightning protection testing of the E-6 wing tip antenna pod/HF probe p 825 A89-53474

LINE OF SIGHT COMMUNICATION

Data links for video and IR surveillance p 465 A89-33567

LINEAR EQUATIONS

The determination of defectiveness of linear structural dynamic systems p 262 A89-21147

Unsteady aerodynamic theory using correction by wind-tunnel measurements [ONERA, TP NO. 1989-56] p 728 A89-48741

LINEAR PREDICTION

Advances in the numerical analysis of linearized unsteady cascade flows [AD-A199211] p 260 N89-16120

LINEAR PROGRAMMING

Procedures for shape optimization of gas turbine disks p 685 N89-25207

LINEAR QUADRATIC GAUSSIAN CONTROL

Application of law synthesis for flexible aircraft p 482 A89-35045

Application of precomputed control laws in a reconfigurable aircraft flight control system p 538 A89-36931

Wideband linear quadratic Gaussian control of strapdown dry tuned gyro/accelerometers [AIAA PAPER 89-3441] p 837 A89-52540

Flight control synthesis for an unstable fighter aircraft using the LQG/LTR methodology [AIAA PAPER 89-3452] p 844 A89-52551

Linear quadratic Gaussian design for robust performance of a highly maneuverable aircraft [AIAA PAPER 89-3457] p 844 A89-52555

A surrogate system approach to robust control design [AIAA PAPER 89-3492] p 873 A89-52585

Application of stochastic robustness to aircraft control systems [AIAA PAPER 89-3505] p 846 A89-52598

Integrated flight/propulsion control system design based on a centralized approach [AIAA PAPER 89-3520] p 847 A89-52611

Design of integrated autopilot/autothrottle for NASA TSRV airplane using integral LQG methodology --- transport systems research vehicle [AIAA PAPER 89-3595] p 849 A89-52674

Turbofan engine control system design using the LQG/LTR methodology p 840 A89-53956

Integral LQG model following controller p 852 A89-53979

Approximation theory for LQG (Linear-Quadratic-Gaussian) optimal control of flexible structures [NASA-CR-181705] p 114 N89-11753

Wind tunnel tests on flutter control of a high-aspect-ratio cantilevered wing [NAL-TR-978] p 616 N89-24321

An analytical sensitivity method for use in integrated aeroservoelastic aircraft design [NASA-TM-101583] p 690 N89-25239

Turbofan engine control system design using the LQG/LTR methodology [NASA-CR-182303] p 685 N89-26004

Integrated flight/propulsion control system design based on a centralized approach [NASA-TM-102137] p 690 N89-26009

LINEAR QUADRATIC REGULATOR

Simulation study on adjustment of a gas turbine unit p 262 A89-22001

Selection of weighting matrices for linear optimal regulator p 563 A89-36990

Improved time-domain stability robustness measures for linear regulators p 630 A89-43068

Self-tuning Generalized Predictive Control applied to terrain following flight [AIAA PAPER 89-3450] p 843 A89-52549

Dynamic stability and active control of elastic vehicles acting with unsteady aerodynamic forces [AIAA PAPER 89-3557] p 848 A89-52643

Flutter suppression using eigenspace freedoms to meet requirements p 689 N89-25191

LINEAR SYSTEMS

HISSS - A higher-order panel method for subsonic and supersonic attached flow about arbitrary configurations p 10 A89-11484

Design and flight testing of a model following control system for helicopters p 244 A89-24488

Modal control in systems with aftereffect p 354 A89-26038

An H(infinity) method for the design of linear time-invariant multivariable sampled-data control systems p 354 A89-26187

Sensitivity analysis of digital flight control systems using singular-value concepts p 538 A89-36927

Input signal selection in the identification of linear continuous dynamic systems from discrete observations p 563 A89-39777

A critique of several failure detection approaches for navigation systems p 809 A89-48124

Extended observability of linear time-invariant systems under recurrent loss of output data [AIAA PAPER 89-3510] p 873 A89-52603

Optimal output feedback for linear time-periodic systems [AIAA PAPER 89-3574] p 873 A89-52657

Derivation and definition of a linear aircraft model [NASA-RP-1207] p 247 N89-15123

User's manual for interactive LINEAR: A FORTRAN program to derive linear aircraft models [NASA-TP-2835] p 265 N89-16437

Robust stabilization of linear time-invariant uncertain systems via Lyapunov theory p 483 N89-20147

LINEAR VIBRATION

Time series models for nonlinear systems [AIAA PAPER 89-1197] p 430 A89-30687

LINEARIZATION

Modal observability and controllability measures for first and second order linear systems and modal reduction p 57 A89-11680

Dynamic feedback linearization with application to aircraft control p 403 A89-28550

Calculation of unsteady flows in turbomachinery using the linearized Euler equations p 552 A89-36916

Measures of modal controllability and observability for first- and second-order linear systems p 563 A89-36943

Unsteady aerodynamics of blade rows p 402 N89-19263

Acta Aeronautica et Astronautica Sinica (selected articles) [AD-A205128] p 508 N89-22570

LINES OF FORCE

Merging of aircraft vortex trails - Similarities to magnetic field merging p 356 A89-26630

LININGS

Fuel properties effect on the performance of a small high temperature rise combustor
[AIAA PAPER 89-2901] p 838 A89-52025
Component specific modeling p 110 N89-12907
Heat pipe cooling for scramjet engines
[NASA-CR-4036] p 259 N89-15351
Three-dimensional inelastic analysis methods for hot section components p 351 N89-17316
Structural response of an advanced combustor liner: Test and analysis p 351 N89-17329
Fuel properties effect on the performance of a small high temperature rise combustor
[NASA-TM-102096] p 685 N89-25238

LIQUID ATOMIZATION

Characteristic time model validation
[AD-A201374] p 426 N89-19510

LIQUID BEARINGS

Turbomachinery rotor support with damping
[NASA-CASE-MFS-28345-1] p 865 N89-28841

LIQUID CHROMATOGRAPHY

Evaluation of corrosion inhibitors as lubricity improvers
[AD-A198743] p 252 N89-16053

LIQUID COOLING

Miniaturized compact water-cooled pitot-pressure probe for flow-field surveys in hypersonic wind tunnels p 348 A89-27659

The solution of 3-D temperature distribution in a cycling oil cooled aircraft ac generator by network topology method p 701 A89-46282
High performance gear systems and heat management for advanced ducted systems p 678 A89-46865

Superconducting rotor cooling system
[AD-D014020] p 709 N89-26240

LIQUID CRYSTALS

Avionic color liquid crystal displays - Recent trends
[SAE PAPER 871790] p 31 A89-10585
One million pixel full color liquid crystal display for avionics applications p 173 A89-18134

High-resolution liquid-crystal heat-transfer measurements on the endwall of a turbine passage with variations in Reynolds number p 862 A89-53289

Flow visualization techniques for flight research
[NASA-TM-100455] p 85 N89-11719

Method for laminar boundary layer transition visualization in flight
[NASA-CASE-LAR-13554-1] p 87 N89-12551

Liquid crystals for surface shear stress visualization on wind turbine airfoils
[DE88-017117] p 267 N89-15730

High-resolution liquid-crystal heat-transfer measurements on the end wall of a turbine passage with variations in Reynolds number p 424 N89-18664

A helmet-mounted virtual environment display system
[AD-A203055] p 476 N89-20994

Automated thermal mapping techniques using chromatic image analysis
[NASA-TM-101554] p 706 N89-25443

LIQUID FILLED SHELLS

Internal pressure measurements for a liquid payload at low Reynolds numbers p 191 N89-13727

LIQUID FUELS

Effect of turbulence on the combustion of an atomized liquid fuel p 488 A89-34122

LIQUID HELIUM

Superconducting rotor cooling system
[AD-D014020] p 709 N89-26240

Design and operation of a horizontal liquid helium flow facility
[DE89-013482] p 792 N89-26867

LIQUID METALS

Heat pipe cooling for scramjet engines
[NASA-CR-4036] p 259 N89-15351

LIQUID OXYGEN

Support of the eight-foot high-temperature tunnel modifications project
[NASA-CR-183356] p 117 N89-12572

LIQUID PHASES

Formation of liquid-phase deposits in jet fuels p 118 A89-13176

LIQUID PROPELLANT ROCKET ENGINES

Transferring jet engine diagnostic and control technology to liquid propellant rocket engines
[AIAA PAPER 89-2851] p 682 A89-47125

Application of advanced materials for turbomachinery and rocket propulsion p 549 N89-22656

LIQUID-SOLID INTERFACES

Mathematical modeling of the fall of an infinite-span plate in a fluid p 740 A89-50844

LIQUIDS

Mass flow measurement of liquid cryogenics using the triboelectric effect
[NASA-CR-179519] p 129 N89-12837

LITERATURE

A review of turbomachinery blade-row interaction research
[NASA-CR-182211] p 109 N89-12567

LITHIUM ALLOYS

Aluminum-lithium alloys p 119 A89-16172
Evaluation of aluminum-lithium alloys in compression-stiffened aircraft structures p 191 A89-20315

The environmental cracking behaviour of aluminum-lithium based alloys p 621 A89-41601

A study of Al-Li alloys using small angle neutron scattering p 695 A89-44577

Hot ductility response of Al-Mg and Al-Mg-Li alloys p 695 A89-45330

Aluminum-lithium alloys for fighter aircraft applications p 696 A89-45937

Superplastic forming of 8091 aluminum lithium
[AD-A200364] p 252 N89-16034

Superplastic formed aluminum-lithium aircraft structure
[AD-A200245] p 316 N89-17591

LITHIUM NIOBATES

Visualization of aerodynamic flow fields using photorefractive crystals p 555 A89-38764

LOAD DISTRIBUTION (FORCES)

Fatigue life influence of residual stresses from cold working and high spectrum loads in aircraft structural design p 46 A89-10099

A new approach to load transfer in bolted joints p 121 A89-13515

Primary design and stress analysis on the external load structure connected on a helicopter p 123 A89-14548

Holometrics - An information transformation methodology p 200 A89-18922

Evaluation of stress intensity factors for corner cracked turbine discs under arbitrary loading using finite element methods p 256 A89-22848

Analysis and reconstruction of helicopter load spectra p 386 A89-29452

AE load-cycle dependence applied to monitoring fatigue crack growth under complex loading conditions --- in aircraft parts p 420 A89-31599

Measurements of individual parachute loads in a clustered parachute system p 463 A89-35233

The influence of altitude and speed variations on the aeroplane's load components in longitudinal nonlinear manoeuvres p 688 A89-45179

Three dimensional finite element stress predictions of spur gears compared to gear fatigue rig measurements
[AIAA PAPER 89-2918] p 704 A89-47172

Loadability considerations in preliminary design --- of military cargo aircraft
[SAWE PAPER 1840] p 763 A89-50826

Extending derivative airplane capabilities - Weight and balance considerations p 763 A89-50827

Comparison of the results of tests on A300 aircraft in the RAE 5 metre and the ONERA F1 wind tunnels p 300 N89-16849

On the relationship between matched filter theory as applied to gust loads and phased design loads analysis
[NASA-CR-181802] p 472 N89-20125

Investigation of a free-tip rotor configuration for research on spanwise life distributions and wake velocity surveys of a semi-span wing with a discontinuous twist
[NASA-CR-184948] p 457 N89-20963

The use of the College of Aeronautics Whirling Arm facility to determine the effect of flow curvature on the aerodynamic characteristics of an ogive-cylinder body p 516 N89-21765

On the stress problem of the pebble bed heat exchanger in a hypersonic wind tunnel
[NAL-TM-ST-8705] p 693 N89-25240

LOAD TESTING MACHINES
Single channel test controllers
[AD-A204088] p 541 N89-22611

LOAD TESTS

On internal bending-beam strain-gage wind tunnel balances
[RR-070] p 793 N89-26870

Theoretical model for stabilization of clay-silt airport pavement subgrade systems. Phase 1: Laboratory investigation. Phase 2: Rutting tests
[DOT/FAA/PM-87/20-PHASE-1/2] p 793 N89-27673

Evaluation of a strain-gage load calibration on a low-aspect-ratio wing structure at elevated temperature
[NASA-TP-2921] p 807 N89-28034

LOADING MOMENTS
Load alleviation on transport aircraft using acceleration feedback p 471 A89-35299

LOADING OPERATIONS

Computer simulation of the movement of loading door retraction mechanism with slide tracks p 527 A89-37019

Loadability considerations in preliminary design --- of military cargo aircraft
[SAWE PAPER 1840] p 763 A89-50826

LOADING RATE

Dwell time effects on the fatigue behaviour of titanium alloys p 185 A89-17619

LOADS (FORCES)

New solution method for steady-state canopy structural loads p 155 A89-20321

Unsteady loads on a wedge during the diffraction of a shock wave moving at angle of attack p 415 A89-30178

Measurement of aerodynamic characteristics of a hang-glider-wing by ground run tests using a test vehicle
[NAL-TR-953] p 13 N89-10004

Hub loads analysis of the SA349/2 helicopter
[NASA-TM-101061] p 153 N89-13410

Application of the mobility power flow approach to structural response from distributed loading
[NASA-CR-181342] p 193 N89-13817

An analysis of the transonic flow through a lightly loaded compressor rotor p 221 N89-15890

Structural response of flat panels to hydraulic ram pressure loading
[AD-A200410] p 260 N89-16180

Unsteady force calculations on circular cylinders and elliptical airfoils with circulation control
[UMAERO-87-37] p 457 N89-20962

Influence of impeller shroud forces on turbopump rotor dynamics p 560 N89-22909

Aerodynamics of a lifting rotor due to near field unsteady effects p 595 N89-24267

Multi-objective/loading optimization for rotating composite flexbeams p 668 N89-25157

Research and technology plans for FY 1989 and accomplishments for FY 1988 --- Structural Mechanics Division
[NASA-TM-101592] p 807 N89-28035

LOCAL AREA NETWORKS

A network - The missing element --- for next generation avionic systems
[AIAA PAPER 89-2095] p 801 A89-49453

LOCKHEED AIRCRAFT

USAF/Lockheed F-117A has high wing sweep but low wing loading p 528 A89-39234

Experimental localized radar cross sections of aircraft p 673 A89-45105

LOG PERIODIC ANTENNAS

Instrument landing system mathematical modeling study for Orlando International Airport Runway 35L localizer, Orlando, Florida. Final airside docking plan (Scheme 3A)
[AD-A205351] p 600 N89-23438

LOGIC CIRCUITS

Back-up control system for f101 engine and its derivatives
[AD-D014051] p 775 N89-26848

LOGISTICS

Remotely Piloted Vehicle (RPV) two versus three level maintenance support concept study
[AD-A200665] p 270 N89-17564

LOGISTICS MANAGEMENT

AH-64A Contractor Logistic Support - The contractors' perspective p 142 A89-18869

Improved life cycle 'reps' services - V-22 engineering technical services and logistics planning p 142 A89-18873

Maintenance lessons learned - Blue Two Visits
[AIAA PAPER 89-2104] p 716 A89-49462

LONG TERM EFFECTS

Changes in the characteristics of gas turbine helicopter engines with the accrued operating time p 239 A89-21556

Advanced durability analysis. Volume 4: Executive summary
[AD-A202304] p 427 N89-19597

Five year ground exposure of composite materials used on the Bell Model 206L flight service evaluation
[NASA-TM-101645] p 859 N89-28579

LONGERONS

Calculation of a multispar wing box with allowance for the variable stiffness of the load-bearing elements p 227 A89-21568

Procedure for evaluating the effect of structural parameters on the life of longeron-wall joints p 799 A89-47941

LONGITUDINAL CONTROL

Concept and flight testing of a modern longitudinal motion regulator using an inverse model
[DGLR PAPER 87-121] p 181 A89-20238

Pitch pointing flight control system design in the frequency domain p 242 A89-22516

- Identification of the longitudinal motion of a Dornier Do 28 airplane p 245 A89-24490
- Dynamics of longitudinal motion of an aeroplane after drop of loads p 333 A89-28396

- Icing research tunnel test of a model helicopter rotor [NASA-TM-101978] p 403 N89-19305

Investigation of the development of laminar boundary-layer instabilities along a cooled-wall cone in hypersonic flows
[AD-A202587] p 458 N89-20966

LOW VISIBILITY

The effect of reduced useable cue environments on helicopter handling qualities p 112 A89-15705
The challenge of lowered visibility limits for precision approach and landing with helicopters
[NLR-MP-87033-U] p 226 N89-15097
Helipoint night parking area criteria test plan
[DOT/FAA/CT-TN88/45] p 619 N89-23480

LOW VOLTAGE

Electromagnetic emissions from a modular low voltage EIDI system -- Electro-Impulse Deicing
[AIAA PAPER 89-0758] p 303 A89-25564

LOW WEIGHT

Light weight gas turbine engine fuel pumping technology
[AIAA PAPER 89-2587] p 703 A89-46943

LUBRICANT TESTS

Lubricant evaluation and performance
[AD-A208925] p 865 N89-28835

LUBRICANTS

Tribological properties of alumina-boria-silicate fabric from 25 C to 850 C p 859 A89-54982
A comparative evaluation of RPD (Rotary Particle Depositor) and ferrographic diagnostic methods for turbine engine lubricant samples
[AD-A196207] p 38 N89-10044

LUBRICATING OILS

Guide to oil system monitoring in aircraft gas turbine engines
[SAE AIR 1828] p 35 A89-10622
Prediction of the service lives of aviation gas turbine engine oils p 118 A89-13178
Assessment of the adequacy of bearing lubrication in a gas turbine engine through openings in the rotating shaft p 492 A89-34154
Justification for increasing oil change period in aircraft p 795 A89-48084
Microcomputer simulation of lubricant degradation in turbine engines using laboratory data p 859 A89-54986

Hot surface ignition tests of aircraft fuels
[AD-A207372] p 797 N89-26937

LUBRICATION

Aviation fuel lubricity evaluation
[AD-A198197] p 177 N89-13434
Evaluation of corrosion inhibitors as lubricity improvers
[AD-A198743] p 252 N89-16053
In-line wear monitor
[AD-A201292] p 402 N89-19301
Advanced ceramics: A critical assessment of wear and lubrication
[PB89-188569] p 797 N89-27005

LUBRICATION SYSTEMS

Dynamic modeling of a helicopter lubrication system p 189 A89-18897
Advanced lube system diagnostics for V-22 p 190 A89-18907

LUMINAIRES

Required Operational Capability (ROC) for a Portable Helipoint Lighting Set (PHLS)
[AD-A196372] p 117 N89-11757

LUMINANCE

Aircraft color displays: Chromaticity and luminance requirements
[AD-A206786] p 749 N89-26828
Specifications and measurement procedures and aircraft transparencies
[AD-A209396] p 834 N89-28511

LUMINOSITY

Determination of jet fuel luminosity - A free droplet technique for assessing fuel effects on combustion performance in aviation turbines p 119 A89-15203

LUMPED PARAMETER SYSTEMS

Flutter of circulation control wings p 394 A89-31863

LUNAR SURFACE

Laser altimetry measurements from aircraft and spacecraft p 624 A89-41691

LYMAN ALPHA RADIATION

Test of a calibration device for airborne Lyman-alpha hygrometers p 532 A89-37537

M

MACH CONES

Laminar boundary layer stability experiments on a cone at Mach 8. V - Tests with a cooled model
[AIAA PAPER 89-1895] p 587 A89-42117

MACH NUMBER

Profile development results for advanced circulation-guided rotor systems in fast helicopters
[DGLR PAPER 87-086] p 5 A89-10513
Transonic magnus force on a finned configuration p 112 A89-13658
Hypersonic flow of a viscous heat-conducting chemically reacting gas past bodies over a wide range of Reynolds numbers p 75 A89-14772

A study on hypersonic shock tunnel p 148 A89-20132

Flow visualization studies of the Mach number effects on the dynamic stall of an oscillating airfoil
[AIAA PAPER 89-0023] p 271 A89-25019
Thermodynamics and wave processes in high Mach number propulsive ducts
[AIAA PAPER 89-0261] p 278 A89-25219

The effect of Mach number on the stability of a plane supersonic wave
[AIAA PAPER 89-0285] p 280 A89-25242

Mach number dependence of flow separation induced by normal shock-wave/turbulent boundary-layer interaction at a curved wall
[AIAA PAPER 89-0053] p 282 A89-25298
Shock capturing using a pressure-correction method
[AIAA PAPER 89-0561] p 345 A89-25450

Mach number effects on high-angles-of-attack aerodynamic characteristics of a cone-cylinder with various nose shapes p 511 A89-38122
Inception length to a fully-developed fin-generated shock wave boundary-layer interaction
[AIAA PAPER 89-1850] p 584 A89-42078

Preliminary assessment of exhaust systems for high Mach (4 to 6) fighter aircraft
[AIAA PAPER 89-2356] p 676 A89-46770

Experimental study of spreading rate enhancement of high Mach number turbulent shear layers
[AIAA PAPER 89-2458] p 648 A89-46845
An investigation into wedge-induced turbulent boundary layer separation on a uniformly roughened surface at Mach 6.0
[AIAA PAPER 89-2163] p 720 A89-47630

Observations of supersonic free shear layers p 736 A89-50004
A supersonic through-flow fan engine airframe integration study
[AIAA PAPER 89-2140] p 762 A89-50802

Experimental aerodynamic performance of advanced 40 deg-swept 10-blade propeller model at Mach 0.6 to 0.85
[NASA-TM-88968] p 17 N89-10865

A preliminary design study of supersonic through-flow fan inlets
[NASA-CR-182224] p 109 N89-11751

Flight measured and calculated exhaust jet conditions for an F100 engine in an F-15 airplane
[NASA-TM-100419] p 177 N89-13435

Optimization of slender wings for center-of-pressure shift due to change in Mach number p 154 N89-14897

An experimental and analytical investigation of the effect of spanwise curvature on wing flutter at Mach number of 0.7
[NASA-TM-4094] p 235 N89-15905

Derivation of primary air-data parameters for hypersonic flight
[ESDU-88025] p 298 N89-16732

Boundaries of linear characteristics of cambered and twisted wings at subcritical Mach numbers
[ESDU-88030] p 298 N89-16735

Loss development in transonic compressor cascades p 328 N89-16826

Predicted pitching moment characteristics of X-29A aircraft
[NASA-TM-88284] p 372 N89-18418

Drag coefficients for irregular fragments
[AD-A201843] p 379 N89-19276

Ejector effects on a supersonic nozzle at low altitude and Mach number
[AD-A206049] p 594 N89-23427

Experiment on a cylindrical scramjet combustor. 2: Simulated flight Mach number 6.7
[NAL-TR-969] p 613 N89-23464

Mach 5 inlet CFD and experimental results
[NASA-TM-102317] p 778 N89-27670

MACH REFLECTION

Mach reflection of a moving, plane shock wave under rarefied flow conditions p 65 A89-12907

Investigation of Mach reflection for a planar moving shock propagating into steady supersonic flow field around wedge p 510 A89-37782

Highly-resolved flowfield induced by Mach reflection p 512 A89-38125

MACHINE LEARNING

Hierarchical representation and machine learning from faulty jet engine behavioral examples to detect real time abnormal conditions p 355 A89-27622

MLS, a machine learning system for engine fault diagnosis p 355 A89-27623

MACHINE TOOLS

Building aircraft assembly tools from a 3-D database
[SAE PAPER 881428] p 269 A89-28204

MACHINERY

Detection, diagnosis and prognosis of rotating machinery to improve reliability, maintainability, and readiness through the application of new and innovative techniques p 392 A89-30976

MACHINING

Diminution and longitudinal splitting of carbon fibers due to grinding
[AD-A196697] p 119 N89-11819

Evaluation of RST (Rapidly Solidified Technology) structural durability and life cycle costs
[AD-A199336] p 252 N89-16031

MAGNESIUM

Visualization of hypersonic flows through magnesium vapor combustion p 210 A89-22231

MAGNESIUM ALLOYS

Hot ductility response of Al-Mg and Al-Mg-Li alloys p 695 A89-45330

MAGNETIC BEARINGS

Magnetic bearing stiffness control using frequency band filtering p 580 N89-22910

MAGNETIC CIRCUITS

Field experience with quantitative debris monitoring
[SAE 871736] p 34 A89-10620

Guide to oil system monitoring in aircraft gas turbine engines
[SAE AIR 1828] p 35 A89-10622

Experimental verification of an eddy-current bearing p 561 N89-22913

MAGNETIC COMPASSES

Determination of the deviation coefficients of a magnetic compass during a turn p 610 A89-40719

MAGNETIC EFFECTS

A magnetic damper for first mode vibration reduction in multimass flexible rotors p 561 N89-22911

MAGNETIC FIELD CONFIGURATIONS

Merging of aircraft vortex trails - Similarities to magnetic field merging p 356 A89-26630

MAGNETIC FIELDS

Simplified description of the field distribution in finlines and ridge waveguides and its application to the analysis of E-plane discontinuities p 258 A89-24142

MAGNETIC MATERIALS

Plastic media blasting recycling equipment study
[AD-A202463] p 556 N89-21987

MAGNETIC SUSPENSION

Drag measurements on a modified prolate spheroid using a magnetic suspension and balance system
[AIAA PAPER 89-0648] p 335 A89-25512

Magnets promise productivity p 407 A89-29655
Use of magnetic suspension for sensor vibration isolation p 622 A89-40262

The 13-inch magnetic suspension and balance system wind tunnel
[NASA-TM-4090] p 184 N89-14241

An experimental investigation of the aerodynamic characteristics of slanted base ogive cylinders using magnetic suspension technology
[NASA-CR-184624] p 300 N89-16758

Drag measurements on a laminar-flow body of revolution in the 13-inch magnetic suspension and balance system
[NASA-TP-2895] p 374 N89-19232

Test techniques: A survey paper on cryogenic tunnels, adaptive wall test sections, and magnetic suspension and balance systems p 486 N89-20955

An evaluation of three experimental processes for two-dimensional transonic tests
[NASA-CR-181871] p 794 N89-27674

MAGNUS EFFECT

Transonic magnus force on a finned configuration p 112 A89-13658

Moving wall effects in unsteady flow p 150 A89-20311

Airfoil wing theory for rotating cylinders of finite width encountering lateral flows p 734 A89-49595

MAINTAINABILITY

Introduction of the Hornet - A success story
[SAE PAPER 872436] p 27 A89-10653

MILLIMETER WAVES

- Automated Ada code generation for military avionics
p 432 N89-18459
- MILLIMETER WAVES**
Simplified description of the field distribution in finlines and ridge waveguides and its application to the analysis of E-plane discontinuities p 258 A89-24142
Infrared and millimeter wave acquisition system
[ONERA, TP NO. 1989-36] p 699 A89-45191
- MILLING (MACHINING)**
Effect of milling machine roughness and wing dihedral on the supersonic aerodynamic characteristics of a highly swept wing
[NASA-TP-2918] p 652 N89-25117
- MINES (ORDNANCE)**
Artificial and natural icing tests of the UH-60A helicopter configured with the XM-139 multiple mine dispensing system (VOLCANO)
[AD-A205031] p 531 N89-21794
- MINICOMPUTERS**
Military engine condition monitoring systems: The UK experience p 320 N89-16797
- MINIMAX TECHNIQUE**
Minimax and maximax optimal control problems with applications in aerospace engineering p 406 N89-19311
- MINIMUM DRAG**
The shape of thin bodies with minimal drag p 588 A89-42496
The minimum drag of thin wings at supersonic speed according to Kogan's theory p 736 A89-49899
- MISSILE CONFIGURATIONS**
Lateral oscillations of sting-mounted models at high alpha
[AIAA PAPER 89-0047] p 310 A89-25041
Efficient application techniques of the EAGLE grid code to complex missile configurations
[AIAA PAPER 89-0361] p 353 A89-25305
Average-passage simulation of counter-rotating propfan propulsion systems as applied to cruise missiles
[AIAA PAPER 89-2943] p 651 A89-47187
Wind tunnel pressure study and Euler code validation of a missile configuration with 77 deg swept delta wings at supersonic speeds
[NASA-TM-101531] p 372 N89-18415
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations with canard controls
[FFA-TN-1988-11] p 531 N89-22601
- MISSILE CONTROL**
Global positioning system (GPS) receiver initialization methods for MIL-STD-1760A
[SAE PAPER 872501] p 42 A89-10691
Transonic magnus force on a finned configuration p 112 A89-13658
Aerospace simulation III; Proceedings of the SCS Multiconference, San Diego, CA, Feb. 3-5, 1988 p 142 A89-19551
Short-range nonlinear feedback strategies for aircraft pursuit-evasion p 242 A89-22504
The scaling and control of vortex geometry behind pitching cylinders
[AIAA PAPER 89-1003] p 367 A89-30514
Infrared and millimeter wave acquisition system
[ONERA, TP NO. 1989-36] p 699 A89-45191
Improved guidance law design based on the mixed-strategy concept p 828 A89-51716
Wideband linear quadratic Gaussian control of strapdown dry tuned gyro/accelerometers
[AIAA PAPER 89-3441] p 837 A89-52540
Computing Systems Configuration for Highly Integrated Guidance and Control Systems
[AGARD-LS-158] p 3 N89-10831
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations with canard controls
[FFA-TN-1988-11] p 531 N89-22601
- MISSILE TRACKING**
A standard evaluation maneuver set for agility and the extended flight envelope - An extension to HQDT --- Handling Qualities During Tracking
[AIAA PAPER 89-3357] p 779 A89-49061
Improved guidance law design based on the mixed-strategy concept p 828 A89-51716
- MISSION ADAPTIVE WINGS**
Mission-Adaptive Wing
[SAE PAPER 872419] p 27 A89-10641
GENMAP - Computer code for mission adaptive profile generation p 12 A89-12566
Measured and predicted pressure distributions on the AFTI/F-111 mission adaptive wing
[NASA-TM-100443] p 235 N89-15908
AFTI (Advanced Fighter Technology Integration)/F-111 mission adaptive wing briefing to industry
[AD-A202467] p 530 N89-21787

MISSION PLANNING

- Using mission decomposition tools in advanced cockpit applications p 431 A89-31627
Map, Operator, Maintenance Stations --- in mission planning
[AIAA PAPER 89-3523] p 854 A89-52613
Combat aircraft mission tradeoff models for conceptual design evaluation p 102 N89-11736
Comparison of the general dynamics ground clobber algorithm with the GCAS and laws algorithms
[AD-A198479] p 157 N89-14226
The Horizon: A blended wing aircraft configuration design project, volume 3
[NASA-CR-184701] p 360 N89-18409
Aerospace vehicle design, Spacecraft Section
[NASA-CR-184743] p 472 N89-20123
A study of the effect of design parameter variation on predicted tilt-rotor aircraft performance
[AD-A204856] p 531 N89-21793
Avionic system requirements p 789 N89-27652
Special Course on Aerothermodynamics of Hypersonic Vehicles
[AGARD-R-761] p 823 N89-29306
- MIXERS**
Turbofan forced mixer/nozzle temperature and flow field modelling p 773 A89-48521
- MIXING**
Turbofan forced mixer lobe flow modeling. Part 3: Application to augment engines p 14 N89-10025
[NASA-CR-4147-Pt-3]
A two-dimensional numerical simulation of a supersonic, chemically reacting mixing layer
[NASA-TM-4055] p 86 N89-12542
- MIXING LAYERS (FLUIDS)**
On the pairing process in an excited, plane, turbulent mixing layer p 47 A89-10173
The compressible mixing layer - Linear theory and direct simulation
[AIAA PAPER 89-0371] p 283 A89-25314
Combined tangential-normal injection into a supersonic flow
[AIAA PAPER 89-0622] p 288 A89-25492
Effects of a downstream disturbance on the structure of a turbulent plane mixing layer p 348 A89-27692
Mean and turbulent velocity measurements of supersonic mixing layers p 440 A89-33426
Linear instability waves in supersonic turbulent mixing layers p 508 A89-36903
Linear instabilities in two-dimensional compressible mixing layers p 578 A89-41903
Numerical analysis of supersonic turbulent mixing layer
[AIAA PAPER 89-1811] p 580 A89-42041
An analytical study of the characteristics of bypass engine mixing chambers in the case of incomplete mixing of gas flows p 613 A89-42468
The instability and acoustic wave modes of supersonic mixing layers inside a rectangular channel p 699 A89-45453
Diffuser performance of two-stream supersonic wind tunnels p 652 A89-47373
An experimental study of supersonic mixing process by using shock tunnel using quick-action valves and quick-mass-sampling probe technique p 735 A89-49827
New instability modes for bounded, free shear flows p 736 A89-49854
A two-dimensional numerical simulation of a supersonic, chemically reacting mixing layer
[NASA-TM-4055] p 86 N89-12542
Design and calibration of the mixing layer and wind tunnel
[NASA-CR-185472] p 792 N89-26866
- MIXING LENGTH FLOW THEORY**
Improved methods of characterizing ejector pumping performance
[AIAA PAPER 89-0008] p 322 A89-25004
Computational studies of a localized supersonic shear layer
[AIAA PAPER 89-0125] p 275 A89-25110
Viscous drag reduction of a nose body p 362 A89-29186
Control of separation in diffusers using forced unsteadiness
[AIAA PAPER 89-1015] p 416 A89-30525
New mixing-length model for turbulent high-speed flows
[AIAA PAPER 89-1821] p 581 A89-42051
- MOBILE COMMUNICATION SYSTEMS**
International Conference on Satellite Systems for Mobile Communications and Navigation, 4th, London, England, Oct. 17-19, 1988, Proceedings p 552 A89-36576
NTT's program of experimental mobile satellite system (EMSS) using ETS-V and preliminary results p 552 A89-36585

SUBJECT INDEX

- The links in the chain - The Inmarsat system --- to permit mobile communications to and from any point on Earth p 697 A89-43876
Results of 1987 MSS helicopter propagation experiment at UHF and L band in Central Maryland p 53 N89-11077
ETS-V propagation experiments in Japan p 53 N89-11080
Proceedings of the Mobile Satellite System Architectures and Multiple Access Techniques Workshop
[NASA-CR-184564] p 806 N89-27907
Aeronautical mobile TDMA/MCTDMA system p 806 N89-27918
- MODAL RESPONSE**
Modal observability and controllability measures for first and second order linear systems and model reduction p 57 A89-11680
Efficient vibration mode analysis of aircraft with multiple external store configurations p 28 A89-12562
Piaggio P180 p 98 A89-15563
Aircraft interior noise prediction using a structural-acoustic analogy in NASTRAN modal synthesis p 99 A89-15606
Modal analysis of continuous rotor-bearing systems p 188 A89-18766
Turbine design using complex modes and substructuring p 190 A89-19718
The measurement and control of helicopter blade modal response using blade-mounted accelerometers p 229 A89-23306
Study of propagating acoustic sources in a fan intake by modal analysis of tone noise
[ONERA, TP NO. 1988-101] p 434 A89-29253
Measures of modal controllability and observability for first- and second-order linear systems p 563 A89-36943
Multi-input/multi-output frequency domain modal identification method and its application in ground vibration testing p 529 A89-39454
On the generation of a set of accurate numerical modal functions for use in the aeroelastic analysis of flexible rotor blades p 803 A89-50584
Finite element based modal analysis of helicopter rotor blades p 832 A89-52044
Time periodic control of a multi-blade helicopter
[AIAA PAPER 89-3449] p 843 A89-52548
Modal control of an oblique wing aircraft
[NASA-TP-2898] p 333 N89-16845
- MODEL REFERENCE ADAPTIVE CONTROL**
Design of higher bandwidth model following for flight vehicle stabilization and control p 112 A89-13632
A turbfan control system using a nonlinear precompensator and a model-following Riccati-feedback p 105 A89-13653
Design and flight testing of a model following control system for helicopters p 244 A89-24488
A new model reference adaptive aircraft controller p 245 A89-24491
Variable structure model-following control of flight dynamics p 482 A89-35300
Flight control system design for an in-flight simulator p 539 A89-36934
Nonlinear model following control application to a flight simulator control loader
[AIAA PAPER 89-3308] p 788 A89-48416
Application of perfect model following to a control configured vehicle
[AIAA PAPER 89-3453] p 844 A89-52552
Design of adaptive digital model-following flight-mode control systems for high-performance aircraft
[AIAA PAPER 89-3495] p 846 A89-52587
A perfect explicit model following control solution to imperfect model following control problems
[AIAA PAPER 89-3612] p 850 A89-52690
Flight control reconfiguration using model reference adaptive control p 852 A89-53959
Lateral axis autopilot design for large transport aircraft - An explicit model-matching approach p 852 A89-53976
Integral LQG model following controller p 852 A89-53979
- MODELS**
Vibration, performance, flutter and forced response characteristics of a large-scale propfan and its aeroelastic model p 176 A89-17943
The use of vestibular models for design and evaluation of flight simulator motion
[AIAA PAPER 89-3274] p 785 A89-48387
Computerized life and reliability modeling for turboprop transmissions p 863 A89-53364
Phase 4 static tests of the J-97 powered, external augmentor V/STOL model at the NASA, Ames Research Center, November 1983 p 14 N89-10028
[NASA-CR-177395]

- Vibration, performance, flutter and forced response characteristics of a large-scale propfan and its aeroelastic model
[NASA-TM-101322] p 38 N89-10043
- Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 4: Plots of time histories of pressures and overall loads
